

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## *The Development of Kansas.*

By JAMES L. KING.

The word Kansas, as applied to the state, was derived from a tribe of Indians bearing that name. In its original form the word appeared as Akansea, subsequently changing to Konza, Canzas, Okanis, Kansa, Kans, Kanza, Cansez and Kansas. The name has been used by aborigines, explorers and writers in twenty-four different styles, running from Escansaques to Kaw. One authority contends that the name comes from the Spanish word "cansar," which means to stir, to trouble, to disturb. This is not out of harmony with the Indian significance of the word Kansas, which is "swift wind," or "smoky wind," the latter being associated with an early period when prairie fires raged over the southern deserts.

The United States Bureau of Ethnology says that Kansas is a Sioux word which has been used as a tribal name, as the name of a clan or family, or of several families of a common stock, sometimes referred to as South Wind people. The word also appears in personal names, meaning Eagle or War Eagle.

Kansas is popularly known as "the Sunflower state," on account of its abundant production of the genus *Helianthus*. Its nickname is "the Jayhawker state," the appellation being derived from the jayhawk, a marauding bird of Ireland. The notorious and rapacious bird is perpetuated in the college yell of the University of Kansas, "Rock-chalk-jay-hawk-K-U." The abbreviation for Kansas is Kan. In the pronunciation of Kansas the accent is on the first syllable, the second syllable to be given a soft rather than a hissing sound.

Exclusive of Alaska and the island possessions acquired in 1898, Kansas is the geographical center of the United States, being situated in latitude 37 degrees to 40 degrees north, longitude 94 degrees 40 minutes to 102 degrees west; bounded on the north by Nebraska, on the northeast and east by Missouri, on the south by Oklahoma, and on the west by Colorado.

As early as 1541 Francisco de Coronado, commanding a Spanish expedition, marched across the plains which are now a part of this state. The report of his travels contains the first mention made by a European of the American buffalo. French fur traders from Louisiana and Canada were in Kansas early in 1700. In 1719 Du Tisnet, a French explorer, visited the valley of the Missouri, and he was followed by Spaniards from Santa Fé, who came to the present site of Leavenworth, where they were destroyed in a battle with Indians, and that was the last attempt of the Spanish to oc-

cupy any part of the present state. The Lewis and Clark expedition, planned by President Jefferson, reached Kansas in June, 1804, and, two years later, in 1806, the expedition commanded by Zebulon Montgomery Pike, who gave his name to "Pike's Peak," crossed the territory from the Missouri river to the Rocky Mountains. The expedition of Major Stephen H. Long was made in 1819, and in 1824 was established the "Santa Fé Trail," extending 400 miles directly across the territory, and from Independence, Mo., to Santa Fé, N. Mex., a total distance of 780 miles. Col. John C. Fremont made his first expedition across the plains in 1842, blazing the way for a heavy overland travel to Oregon, California and Mexico.

The overland trade on the Santa Fé Trail began in 1827. A fort erected on the Missouri river to protect this trade in that year was named for Colonel Leavenworth, of the Second United States infantry. This became an important point during the Mexican War and the California and Mormon migrations.

The territory forming the present state of Kansas was a part of the Louisiana purchase of 1803, except a fraction in the southwest corner acquired from Texas in 1850. Following the several expeditions referred to, and the opening of the Santa Fé trail, Kansas became Indian territory, and remained such from 1830 to 1854. The Indians of Missouri and other Mississippi valley states were concentrated with the tribes already occupying the country west of the Missouri river. These included the Osage, Shawnee, Pawnee, Delaware, Kickapoo and Kansas tribes, to which were added the Cherokee and other tribes from the states of the South, and the Ottawas, Pottawatomies, Wyandottes and others from Ohio, Michigan and Indiana.

The admission of Kansas as an organized territory dates from May 30, 1854, when President Pierce signed the "Kansas-Nebraska Act." This brought on what may be termed the political troubles of Kansas, and later, as a result of the slavery agitation, precipitated the great armed conflict between the North and the South in 1861-'65. Kansas was admitted as a state January 29, 1861, under the administration of James Buchanan. Although President Buchanan signed the act of admission, Kansas was in reality Abraham Lincoln's state. The principle events preliminary to admission were as follows: Convention met at Topeka September 19, 1855, to consider the formation of a state government; convention adjourned and met at the same place October 23, 1855; constitution formed by Topeka convention November 12, 1855; Topeka constitution adopted by the people December 15, 1855; convention met at Lecompton September 5, 1857; constitution formed by the Lecompton convention November 7, 1857; bill passed Congress to admit conditionally, under the Lecompton

constitution, May 14, 1858; act for admission rejected by the people January 4, 1859; convention met at Wyandotte July 5, 1859; constitution formed by Wyandotte convention July 29, 1859; by act of Congress admitted under the Wyandotte constitution January 29, 1861.

It was on Kansas soil that the first battle was fought for the freedom of the negro, and it was Kansas that developed the heroic figure of John Brown. From the time Congress took the first step for the admission of Kansas, with or without slavery, the territory became the scene of contention, pillage and bloodshed. The proslavery men of Missouri endeavored to gain control of the territory in 1854, and established the first city, Leavenworth. Soon afterward an antislavery colony from Massachusetts settled at Lawrence. No more hostile factions ever contended for supremacy on this continent.

Andrew H. Reeder, of Pennsylvania, was appointed to be the first governor of the territory. At the first contest for territorial delegate to Congress the slavery men of Missouri crossed the river and participated in the election, the candidate of the proslavery party being successful by reason of these illegal votes. The Free-soilers protested, and held indignation meetings at Lawrence and other points. The Missourians repeated the same tactics at the election in the spring of 1855 for representatives to the legislature. When the legislature met at Pawnee the proslavery members were in the majority, and controlled the proceedings, even to the extent of driving out the Free-soil members and changing the seat of government.

The Free-soil party repudiated the acts of the legislature and refused to abide by them. Governor Reeder was removed from office, his successor being Wilson Shannon, of Ohio. John W. Whitfield was elected to Congress by the proslavery party, and Ex-Governor Reeder chosen to the same position by the opposition, but Congress refused to give either delegate a seat. Under the Free-soil constitution adopted in December, 1855, Charles Robinson was elected governor, but the election was repudiated by President Pierce, who had recognized the "bogus" legislature. The Free-soilers ignored the action of President Pierce, and, to meet this and other menacing circumstances, the military forces of the United States government were placed in command of Governor Shannon. Governor Robinson and Congressman-elect Reeder were indicted for high treason. The proslavery party received large accessions from Alabama, Georgia and South Carolina. In the troubles resulting from this conflict of authority the Emigrant Aid Society hotel and the *Herald of Freedom* and *Kansas Free State* printing offices at Lawrence were destroyed, and the town of Osawatimie—the home of John Brown—was sacked and burned.

A meeting of the Free-soil legislature in Topeka was dispersed by United States troops acting under orders from President Pierce. By this time the interest in the Kansas struggle became general throughout the country. The suppression of slavery became a national instead of a state issue. While Congress debated and legislated, the proslavery and free-state factions continued to war against each other for possession of the territory and control of the lawmaking machinery. Public meetings were held in all parts of the North to lend encouragement to the movement for making Kansas a free state. Similar sympathy and help came to the proslavery party from the states of the South. Horace Greeley and Abraham Lincoln visited the territory and made speeches in opposition to the further extension of slavery on American soil. Governor Shannon was removed from office, and the several governors appointed to succeed him found the duties of the position so onerous that they resigned in rapid succession.

The Wyandotte constitutional convention of July 5, 1859, was composed of 35 free-state and 17 proslavery delegates, but they were by this time known as Republicans and Democrats, respectively. Under this constitution slavery was prohibited and Kansas admitted as a state. The seat of government was located at Topeka. At the election held in December, 1859, Charles Robinson was chosen to be the first governor of the state, and Martin F. Conway the first representative in Congress. When the first state legislature assembled at Topeka, in March, 1861, James H. Lane and Samuel C. Pomeroy were elected the first two United States senators from the new state.

In the civil war which followed the inauguration of President Lincoln in 1861, Kansas showed its loyalty to the Union by furnishing 20,000 trained soldiers out of a total population of but little more than 100,000—a number greatly in excess of the quota, none of them drafted, and in proportion exceeding the enlistments from any other state. A large part of this force was employed in defending the borders of the state from invasion by southern troops, Indians and guerillas. During one of these border raids a force of 400 men under command of Quantrell invaded Lawrence, burning and pillaging the town and killing 150 defenseless citizens. The war and the troubles with the Indians, together with a disastrous drouth, greatly retarded the growth of Kansas, but when these obstacles were passed an era of progress and development set in which has never since abated.

The local census of 1855 gave Kansas a population of 8501; this increased in 1860 to 107,206; in 1870 to 364,399; in 1880 to 396,096; in 1890 to 1,427,096; in 1900 to 1,470,495; and in 1910 to 1,690,949. There are 130 cities in Kansas having a population of more than 1000 each. The ten largest cities and

their population, according to the local census of 1912, are: Kansas City, 86,826; Wichita, 56,379; Topeka, 46,385; Leavenworth, 22,353; Hutchinson, 16,735; Atchison, 16,429; Coffeyville, 15,675; Pittsburg, 15,419; Parsons, 13,790; Lawrence, 12,854.

Agriculture and stock raising have been the basis of the state's development. The total farm products in 1912, including horticultural and garden products, amounted to \$324,-988,943 in value. The value of live stock for the same year was \$255,166,533. Combined value of farm and live-stock products, \$580,155,476—the largest in the state's history. The land area of Kansas comprises 82,080 square miles, or 52,531,200 acres. Nearly 50 per cent of this land is in a high state of cultivation. The cultivated farms have an aggregate value of \$650,000,000.

There are 3435 manufacturing establishments in Kansas, representing all the industries, and giving employment to 44,215 wage earners. Value of manufactured products, \$325,-104,000. The mineral products of the state in 1910 were valued at \$28,304,191. Of this amount the coal produced was valued at \$7,914,709; natural gas, \$7,755,367; zinc, \$1,103,760; clay products, \$2,261,527; salt \$947,369; petroleum, \$44,763. Other mineral products of the state include cement, lead, sand, gravel and stone.

Kansas spends more than \$5,000,000 annually in the support of public schools. The total population of school age in 1910 was 516,061, and the total enrollment was 398,746. The average attendance was 291,329. The state has 9300 public school buildings and employs 13,467 teachers.

The total mileage of railway tracks operated in Kansas is 9216. The principal lines and systems are: Atchison, Topeka & Santa Fe; Chicago, Rock Island & Pacific; Union Pacific; Missouri Pacific; Missouri, Kansas & Texas; Saint Louis & San Francisco. The gross earnings of all Kansas railroads for 1911 amounted to \$67,926,984.61. At the beginning of the Civil War there was not a mile of railroad in operation in Kansas. The first piece of railroad constructed on Kansas soil was at Elwood, opposite St. Joseph, Mo., on the Elwood & Marysville line. The first trans-state railway was begun at Wyandotte, in 1863, by the Kansas Pacific line. This was rapidly constructed through to Denver, a distance of 639 miles, and has since been operated by the Union Pacific system as one of the great thoroughfares of the continent.

There are 902 state and private banks in Kansas, with a total paid capital of \$18,052,800, and deposits of \$106,049,142. The 211 national banks have a paid capital of \$12,167,500, and deposits of \$83,925,890; making a total capital of \$30,220,300, and total deposits of \$189,975,033, these figures being for the month of September, 1912.

Kansas has 732 newspapers, of which 67 are dailies, 628 weeklies, 23 monthlies, and 14 of other classes. There are 140 public and institutional libraries in Kansas, having books to the number of 900,119. The school libraries of the state, of which there are 5500, have 479,142 volumes of books.

Two of the largest libraries in the West are the State Library and the Kansas State Historical Library, both located at Topeka. The State Library contains 125,244 volumes in the law, medical, miscellaneous, legislative reference, and traveling library departments. The State Historical Library contains 82,018 volumes of books and bound volumes of newspapers, 136,743 pamphlets, and a vast collection of relics and other material pertaining to Kansas history.

In recognition of the services of the Kansas soldiers in the early period of the state's history, and also of the services of the many soldiers from other states who became citizens of Kansas at the close of the war, the state has recently erected a beautiful memorial hall and library building at Topeka, at a cost of \$300,000, to be occupied jointly by the Grand Army of the Republic, department of Kansas, and the State Historical Society. This stately edifice, with its memorabilia of peace and war and its store of recorded achievement, will not only do lasting honor to the heroes and builders of Kansas but serve to link the old and the new Kansas.

**MEMORIAL AND HISTORICAL BUILDING.**

## *The State Flower.*

By the act of the legislature of 1903 (chapter 479) the helianthus, or native wild sunflower, was adopted as the state flower and floral emblem of the state of Kansas.

The appropriateness of the selection of the sunflower as the floral emblem of our state was very eloquently set forth by Senator George P. Morehouse, author of the law, at a banquet given at the state encampment of the National Guard at Fort Riley, in October following the passage of the act, in the following words:

"This native wild flower is common throughout our borders, and is always hardy and conspicuous. It lifts its head in triumph along our most beautiful and classic valleys and mingles its cheerful light with the verdure of expanding prairies. The seasons have little effect on its coming, for it flourishes in time of flood and the drought of arid summer adds to the multitude of its blossoms. It is of definite, unvarying and striking shape, ever faithful, whether gracing the beautiful gardens of the rich or lingering near the humble habitation of the poor. Wherever reproduced, whether in color or canvas, worked in iron or chiseled in stone or marble, its identity is ever present. I am pleased to see it has been wrought in bronze, and, as a badge, decorates the new uniforms of the Kansas National Guard. It has marked the position of Kansas in many an imposing pageant. This flower has to every Kansan a historic symbolism. It speaks eloquently of frontier days, when buds and blossoms of civilization were not numerous and when we were deprived of many of the refinements

we now enjoy. The sunflower recalls paths and winding trails, and we are reminded of its golden lines of beauty, at times making their graceful turns over hill and vale, and breaking the dull monotony of many a prairie scene. It is not a blossom lingering a few brief hours, but lasts for a season. It gracefully nods to the caresses of the earliest morning zephyrs. Its bright face greets the rising orb of day and faithfully follows him in his onward course through the blazing noontime, till the pink-tinted afterglow of sunset decorates the western sky and marks the quiet hour of eventide. Few can recall all the state favorites, but the entire nation knows that Kansas has the sunflower and is the "Sunflower State."

## *The Great Seal of the State of Kansas.*

The great seal of the state of Kansas, procured by the secretary of state as required by the joint resolution approved May 25, 1861, is described in said joint resolution as follows: The East is represented by a rising sun, in the right-hand corner of the seal; to the left of it Commerce is represented by a river and a steamboat; in the foreground Agriculture is represented as the basis of the future prosperity of the state, by a settler's cabin and a man plowing with a pair of horses; beyond is a train of ox wagons going west; in the background is seen a herd of buffalo, retreating, pursued by two Indians on horseback; around the top is the motto "AD ASTRA PER ASPERA," and beneath, a cluster of thirty-four stars. The circle is surrounded by the words: "GREAT SEAL OF THE STATE OF KANSAS, JANUARY 29, 1861."

Under the new constitution, the first legislature of the state of Kansas met at Topeka on Tuesday, March 26, 1861. On Saturday morning following, the house and senate received the first message from Charles Robinson, the first governor. In his message the governor called attention to the requirements of the constitution about a seal, and recommended the legislature to take necessary steps to procure one. On the 3d of April, the state senate, considering the governor's message, referred that part which mentioned the great seal to the committee on ways and means. Five days afterwards, on Monday, April 8, the following resolution was submitted to the senate:

*"Resolved, That a committee of three be appointed on behalf of the senate to act with a like committee on the part of the house, to draw and recommend a design for the great seal of the state of Kansas."*

This resolution was referred to the committee on ways and means. Similar resolutions were considered by the house, and the two committees got to work. But this did not produce a seal very soon. There were designs, designs, and designs, mottoes and mottoes. Scholars suggested and Western men insisted.

Mr. McDowell, of the state library committee, suggested a landscape, something like that afterwards adopted, and the emphatic motto, "WE WILL." Mr. Denman proposed to change the motto to "WE WON'T." Backward and forward the thing was bandied about. The House Journal for Friday, May 17, records the fact that the senate sent a message on "house joint resolution on state seal," saying they had amended, and desired concurrence. This message was discussed next day by the house, which did not concur. Then a committee was appointed for conference. The senate appointed a conference committee on Monday, and at the meeting of the two committees the same day the matter was substantially settled. Of that date, May 20, a letter in the *Conservative* (Leavenworth) contained the following passage:

*"The vexed question of a state seal has at last received its quietus at the hands of the conference committee. The new design embraces a prairie landscape, with buffalo pursued by Indian hunters, a settler's cabin, a river with a steamboat, a cluster of thirty-four stars surrounding the legend 'AD ASTRA PER ASPERA,' the whole encircled by the words, 'GREAT SEAL OF THE STATE OF KANSAS, 1861.'"*

The senate accepted the report of the conference committee on Wednesday, the 22d of May, 1861, and the house concurred on the same day, and so the design for a seal was decided.

D. W. Wilder, in his "Annals of Kansas," says the writer of the letter in the *Conservative*, was John J. Ingalls, and as Wilder was editor of that paper he ought to know. The same John J. Ingalls was secretary of the state senate, and had, therefore, means of obtaining accurate information. John A.

Martin, of Atchison, was a member of the conference committee referred to above, and a letter of inquiry addressed to him by the writer brought back for answer the statement that John J. Ingalls had submitted to the committee the design that was finally adopted. Why, then, did not the letter in the *Conservative* state that fact? Undoubtedly, mainly because Mr. Ingalls was too modest to claim the honor of having "settled the vexed question," for modesty belongs to youth, and John J. Ingalls was a young man then. Besides being too modest, Mr. Ingalls had another motive for not claiming it. The design, as adopted, is not his alone, and though he may fairly claim credit for some of it, yet of other parts he is by no means proud. The design, as submitted to the committee by Mr. Ingalls, consisted "of a blue shield at the base of a cloud, out of which was emerging one silver star to join the constellation in the firmament, comprising the thirty-four then in the Union, with the motto, 'AD ASTRA PER ASPERA.'" The cloud symbolized the struggles through which we have passed, the star the state, the constellation the Union. The motto was both descriptive and suggestive, and the entire design simple, unique and satisfactory. It was so satisfactory to the committee that they adopted it entire. But after that some of the "wild heralds of the frontier" altered it by mixing a steamboat and plowing, with buffalo hunting, etc., till really nothing but the motto is Mr. Ingalls's, and the landscape is, probably, substantially the one submitted by Mr. McDowell.

All the seal is historic: the motto, the date, the bison hunt, the log cabin. But the motto is not only historic but suggestive of a fact that will be true forever, that the conquest of difficulties is the way to moral as well as political success.

## Kansas Post-office Directory.

Offices in *italic type* are money-order offices, authorized to issue and pay money-orders and postal notes.

**EIGHTEENTH BIENNIAL  
REPORT  
OF THE  
SECRETARY OF STATE  
OF THE  
STATE OF KANSAS.**

---

**1911-'12.**

**STATE PRINTING OFFICE.  
TOPEKA, 1912.**

4 3710

## **Biennial Rep rt of Secretary of State.**

OFFICE OF THE SECRETARY OF STATE,  
TOPEKA, KAN., September 1, 1912.

*Hon. W. R. Stubbs, Governor:*

SIR—I have the honor to submit herewith the eighteenth biennial report of this department, covering the two fiscal years ending June 30, 1912.

During that biennium the department collected and turned into the state treasury fees aggregating \$90,311.31. The total expenses of the department for the same period aggregated only \$24,400.

The most important work performed in the office during the two years was in the corporation department. More than 15,000 dormant and delinquent corporations were wiped out of existence. This was an almost endless task and could only be accomplished by competent and expert clerks and with the coöperation of the Charter Board.

Another important task was to compel all live corporations, for profit, to promptly file annual statements showing their financial condition, something hundreds of them had neglected to do in the past.

For many years several big foreign corporations had been doing business in Kansas without authority. They were prevailed upon to take out licenses, and the fees from that source alone amounted to a considerable sum.

The 1911 Session Laws were compiled and issued earlier than ever before.

As purchasing agent for the legislature, this department kept the bill for legislative supplies far below what it had been at any regular session in many years.

The department has coöperated with the state printer in cutting out useless printing and with the School Fund Commissioners in investing almost two million dollars in bonds, none of which draws less than 5 per cent interest.

The state accountant, Hon. J. C. Gafford, after completing

an examination of the office, in his report recently filed with the governor, said:

"I consider the neatness and accuracy of the records in this office worthy of special mention, and wish to congratulate the secretary of state on the efficient assistants in his office and their courteous treatment to this office while making this examination."

The financial transactions of this department are fully set forth in the following table:

Months.	Notaries public.	Charter and miscellaneous fees.	Annual reports.	Nonresident hunters' licenses.	Total amounts.
1910.					
July .....	\$102.00	\$4,859.41	\$18.00	.....	\$4,979.41

Totals .....	\$3,476.00	\$80,021.31	\$6,169.00	\$645.00	\$90,311.31

In accordance with section 8957 of the General Statutes of Kansas, 1909, I submit for the consideration of the governor and the legislature the following recommendations:

*First.* The enactment of a law providing for an annual license fee on corporations. More than thirty states now have laws of that kind, and the revenue derived from that source

helps materially to defray the expenses of state government and correspondingly lightens the direct burdens of the taxpayers. Two years ago I urged the legislature to enact such a law, but it failed to do so.

*Second.* The enactment of a law placing the work of the Utilities Commission under the secretary of state's office, and providing that the governor, attorney general and secretary of state shall constitute the commission. This should be done, for these good and sufficient reasons: (1) In the interests of economy. (2) Supervision should rest with the department that creates corporations, so there would be no conflict of authority.

*Third.* Amend the primary election law in reference to petitions. In lieu of promiscuous petitions now required, a candidate for state office should only be required to secure a respectable petition in his home county; a candidate for county office in his home ward or township, etc., and each candidate should pay a nominal graduated entrance fee, just large enough to cover the expenses of the primary election. This would not only relieve hundreds of people of the annoyance of peddling petitions for candidates, but would relieve the public at large of the expense of the primary election.

*Fourth.* The enactment of a law to modernize the present antiquated system of gathering election returns, either by the installation of voting machines or providing for a double set of election officers. The cost would be no greater to employ two sets of election officers one day than one set two days, as is done now in many of the counties.

*Fifth.* The enactment of a law making a repetition of the 1912 presidential electoral muddle impossible in the future.

*Sixth.* The enactment of a law providing for state license and registration of automobiles. The money should go back to the various counties, to be used for the improvement of the roads.

*Seventh.* A codification of the laws of Kansas. The books are now lumbered up with numerous obsolete and conflicting laws and the only successful way they can be either weeded out or harmonized will be through a thorough revision.

Respectfully submitted,

CHAS. H. SESSIONS, *Secretary of State.*

## STATE OFFICERS—Elective.

For the two-year term ending January 13, 1913, except State Printer,  
whose term ends June 30, 1913.

# EIGHTEENTH BIENNIAL REPORT.

OFFICE OF THE STATE AUDITOR,

TOPEKA, KAN., December 11, 1912.

*To His Excellency, W. R. Stubbs, Governor:*

SIR—I have the honor to herewith submit the report of the transactions of this department for the biennial period ending June 30, 1912, the same being the eighteenth biennial report of the State Auditor.

In order to come within the allotment of space for the combined volume of departmental reports as prescribed by the State Printing Commission, certain tables and schedules appearing heretofore in this report have necessarily been omitted, notably statement of funds and accounts and of municipal indebtedness of the state. The law requires that the disbursements from contingent funds shall be itemized in this report, to show in whose favor and for what purposes, and I have so shown the same for the last half of the period. The books in use for the fiscal year in which I assumed the duties of the office were not so arranged as to enable the itemization of these expenditures, hence the report is complete in this particular only as to part two, for the fiscal year 1912. The books are now so ruled that this requirement of the law can be fully complied with.

By statutory authority the Auditor is permitted and invited to make suggestions to the legislature touching the matters under his jurisdiction, and I wish to avail myself of this privilege to the extent of offering a few suggestions and recommendations upon the following subjects:

## SUPPORT OF EDUCATIONAL INSTITUTIONS.

There is a widespread feeling in this state that there ought to be a change in our system of providing means for the maintenance of our educational institutions. The present plan of direct appropriations by each legislature has an evil aspect, which becomes more alarming as the influence and power of

these institutions grow. The criticism is mainly along the following lines:

1. The scramble of the different boards and heads of institutions for all they can get from the legislature is unseemly and keeps the legislature and the people in a turmoil.

2. The legislature in the brief period of its existence is unable to determine the actual needs of the institutions and sometimes refuses appropriations that ought to be made and very frequently grants appropriations that ought to be refused.

3. The influence of these institutions through their graduate and student bodies is becoming more and more potent in procuring favorable legislative grants for doubtful purposes.

4. The institutions do not know what funds will be available for any period beyond the existing biennium, and are unable to plan for the future.

These criticisms are in the main well founded and should be given careful consideration by the legislature. In my judgment there are two things that should be done. First, a single board of three should be created for the management of these institutions. This board should be so constituted that it would in reality be a governing board. Under the present plan the boards of regents give only a few days out of the year to their duties. Necessarily they must rely on the heads of institutions, who in reality determine all questions affecting the management of the schools under them. Second, the constitution should be changed to authorize the legislature to levy a direct tax for the support of all state schools. The rate of levy ought not to be subject to change except at intervals of from six to twelve years. Most of the states levy a direct tax for this purpose. The state schools of Illinois receive no appropriations from the legislature, but in every other state, so far as my investigation has extended, the direct levy is supplemented by legislative appropriation.

I am not undertaking to set forth the advantages of the system I suggest over the present plan, for if the legislature decides to go into the matter it will have ample means to inform itself not only as to the advantages of this plan but also as to others that will no doubt be suggested. I am fully convinced, however, that no plan for a direct levy ought to be adopted that will place large sums of money at the unrestricted disposition of state schools unless provision is made for a

single governing board that will actually take over the management of these schools.

RELIEF FOR PURCHASERS OF SCHOOL LAND.

On account of a series of poor crops for the past two or three years in the extreme western portion of the state and of losses in live stock and hardships suffered from the extremely severe winter of 1911-'12, coupled with the losses of the ravages of the horse disease of last summer, many settlers on school land in that section find themselves unable to meet the interest due on their contracts for the purchase of the lands.

The law now is that failure to pay the annual interest on school-land sales within ten months of the time due works a forfeiture of the sale, *ipso facto*. This provision of the present efficient school-land law should not be disturbed in its general application to contracts of sale, but I am heartily in favor of some relief legislation in the nature of an extension of the time in which purchasers who are residing on, improving and cultivating the land may be permitted to reinstate themselves in their right, title and interest to the land by making payments of interest thereon within one year of the passage of the act. This would protect all persons who have suffered their payments to lapse from the danger of losing their land by settlement by others, and would give them opportunity of realizing on next year's crop for the means with which to pay the interest that has accrued or that will accrue within the near future.

It should not be the aim or the desire of the state to deprive any purchaser of school land, who is in good faith endeavoring to meet the conditions of his contract but who is laboring under such stress of circumstances as make it impossible for him to do so, of his property and confiscate such payments and improvements as have been made on the land, and all because the interest was not paid on the very day due. I strongly urge some such relief legislation as suggested above, but earnestly protest against any disturbance of the wise provision, as I deem it, for forfeitures of sales of land at the expiration of a specified time limit without notice, for a repeal of the law and a reinstatement of the notice provision would undoubtedly result in a repetition of all the difficulties that arose in the past over the validity of forfeitures.

**STATE LAND IN THE NAVIGABLE STREAMS.**

By the provisions of chapter 378, Laws of 1907, all islands lying in the navigable streams of the state, wherein the title is vested in the State of Kansas, may be sold according to the procedure for the sale of school lands. The act unfortunately made no provision for a designation and survey of the particular lands thus authorized to be sold, and, as a result, settlements have been made on practically all lands lying between the meander lines of the navigable streams. This is particularly true with regard to lands in the Arkansas river, which the supreme court recently held to be a navigable stream. Hundreds of filings have been reported, and in virtually every settlement there is a dispute as to the title of the land being in the state, riparian owners claiming the lands as accretions to their property.

The sales of lands under this authority have been but few, and where sales have been made this department has required the county officers to describe the location of the land from an actual survey and to furnish plats for filing with the state land department. The question of title to these lands has of late become such a serious one that a determination was reached by the department to refuse to participate in the procedure for the sale of such lands until such time as the department is furnished with official plats showing that they belong to the state. It is unbusinesslike for the state to pay expenses in the settlement upon land the title to which is not yet established in the state. Moreover, it is not fair to those claiming these lands as accretions, and disputing the state's title, for the state to acquiesce in settlements on these lands without first establishing its title.

The state and individuals asserting title to the property as accretions are not the only parties that stand to incur expense from settlements upon these lands before the title to the same is clearly determined. The settler who goes upon such lands and places thereon the improvements required under the statute not only will lose the time and labor employed in improving the land, but also runs the risk of loss by being obliged to remove his improvements, if title is subsequently determined to be in an individual and not in the state. If the state desires to dispose of these lands, it should first clearly establish its title and provide for a proper survey. It would then be possi-

ble to dispose of the lands without risk of unnecessary expense to any person or to the state.

I recommend that the legislature broaden the act for the sale of these lands to provide for the appointment of a commissioner to make a survey of the islands lying in our navigable streams and to determine the question of title in each case, such determination subject, of course, to judicial review. The commissioner should be authorized to employ the county surveyor of the county in which the lands lie to assist in making these surveys and to prepare plats for filing with the register of deeds of the county and with the state land office. Before these surveys are made the commissioner should give all interested parties an opportunity to be heard, and where necessary to a proper determination of title should be empowered to take testimony. Care should be taken, of course, to see that the expense of getting these lands on the market does not exceed the value of the lands.

#### REMOVAL OF SAND AND GRAVEL FROM BEDS OF NAVIGABLE STREAMS.

The beds of the Kansas and Arkansas rivers are rich in deposits of sand and gravel. It is conservatively estimated that every year 2,000,000 cubic yards of sand are taken from the beds of these streams, as well as several hundred thousand cubic yards of gravel. This sand and gravel belongs to the state. Most of it is appropriated by large companies and corporations, who make large profits from its sale, yet the state gets nothing. If the state exacted a royalty from the companies handling this sand and gravel, it would easily produce an income of eighty thousand dollars a year. This could be placed to the credit of the general revenue fund or to the permanent school fund. Upon investigation, I find that the state of Oklahoma is now proposing to utilize the sand and gravel beds of the Arkansas river to augment the revenues of that state. I would suggest that the same act that provides for a survey and sale of lands in navigable rivers should also provide a plan for the collection of a royalty of not less than four cents per cubic yard on the gross output of sand and gravel taken from the navigable streams of Kansas.

**INSURANCE FUND.**

The state has hitherto followed the plan of carrying its own insurance, which, in my opinion, is a wise and economical plan. But it frequently happens that the loss of a building or power plant by fire seriously cripples an institution and hampers it in caring for its inmates in a proper manner. A fund should be provided, to be under the control of the Executive Council, with authority to use it only in case of loss where delay of rebuilding can not await the regular convening of the legislature.

As it is now, if a building is destroyed at one of the institutions, it would require the convening of the legislature in extraordinary session to provide a means for the rebuilding of the structure, and to convene the legislature in extra session would add greatly to the actual cost of the replacement of the building. I recommend that a fund of \$100,000 be provided, under the control of the Executive Council, to be known as an emergency building fund, to be used only in actual loss or damage of state buildings from fire and the elements, and then only in case of imperative need of replacement.

**LEGISLATIVE COMMITTEE ROOMS.**

The Memorial Hall is rapidly being completed, and at its completion all of the property of the Historical Society and the Grand Army of the Republic is to be removed to the new building. That action will vacate all of the top floor of the state-house, and as much of this space as is necessary should be converted into permanent legislative committee rooms.

I would recommend an appropriation of \$25,000 to pay the expense of removing the property of the Historical Society and the Grand Army of the Republic to the Memorial Hall and to remodel and furnish the rooms thus vacated to the extent needed for permanent committee rooms.

**REGISTRATION OF MUNICIPAL BONDS.**

I wish to renew the recommendation of my immediate predecessor, Honorable James M. Nation, touching the registration of municipal bonds in this office, who said in the seventeenth biennial report of this department: "The law on the registration of bonds should be revised to require all bonds issued in the state to be registered in the auditor's office. The regularity and legality of every issue of bonds should be passed

on by the attorney-general before the bonds are registered. When approved by the attorney-general the bonds should be incontestable except on the ground of fraud."

**DEPOSITORY FOR DEEDS TO STATE PROPERTY.**

I would recommend the enactment of a law requiring all deeds and abstracts to state property to be assembled and filed under appropriate indexes with one of the principal departments in the statehouse. At the present time these instruments are filed with this or that department or institution, as the act providing for the purchase of the property may happen to specify or the inclination of the officials supervising the purchase may decide. The requirement should be made for reasons of both protection and convenience of inspection.

**APPROPRIATIONS.**

The appropriations for the biennium of 1914 and 1915, as claimed necessary by the departments and institutions of the state, total \$11,389,388. This is an increase of \$3,013,886 over the appropriations allowed by the legislature of 1911. The educational institutions are asking \$2,324,574 more than was allowed them by the last legislature; the charitable, including the new insane hospital and the tuberculosis sanatorium, \$916,193, or an aggregate for the two classes of institutions of \$3,240,707, which is greater, it will be noted, than the total increase. This shows for the demands of the other institutions and departments collectively a decrease over the amount allowed by the preceding legislature; and, in addition, decreases in specific items have been suggested by me approximating \$100,000. It is clear, therefore, that the only possibilities for greatly increased appropriations lie in the consideration of budgets of the educational schools particularly, and of the charitable institutions, and preceding each of these general budgets I have submitted a few remarks to which I respectfully invite the attention of the legislature.

Respectfully submitted.

W. E. DAVIS,  
State Auditor, and  
*Ex officio* Register State Land Office.

## ESTIMATE OF APPROPRIATIONS

*Required for the Fiscal Years 1914 and 1915, Including Deficiencies for the Fiscal Year 1913.*

In accordance with the requirements of the statutes, I have indicated in this detailed statement of expenditures to be defrayed from the treasury for the next two ensuing fiscal years, by the asterisk or footnote following the particular budget, all salaries not provided by law:

TO THE GOVERNOR:		1914	1915	
Governor .....		\$5,000	\$5,000	
Private secretary .....		2,000	2,000	
Assistant private secretary and executive clerk .....		1,800	1,800	
Assistant executive clerk and confidential stenographer .....		1,500	1,500	
Filing clerk and stenographer .....		1,200	1,200	
Rewards and arrests .....		1,500	1,500	
Postage, express and contingent .....		10,000	10,000	
Maintaining executive residence .....		2,000	2,000	
New porches for executive residence .....		2,500		
Total for the governor .....		\$27,500	\$25,000	
TO THE LIEUTENANT GOVERNOR:		1914	1915	
Services in performance of duties as are imposed by law.		\$700	\$700	
TO THE SECRETARY OF STATE:		1913	1914	1915
Secretary of state .....			\$2,500	\$2,500
Assistant secretary .....			1,800	1,800
Chief clerk .....			1,200	1,200
Charter clerk .....			1,200	1,200
Commission clerk .....			1,200	1,200
Recording clerk .....			1,200	1,200
Stenographer .....			900	900
Filing clerk and copyist .....			900	900
Contingent fund and necessary traveling expenses .....			1,500	1,500
Purchase of stationery and other articles and for expenses not otherwise provided for, for the legislature of 1913; for proof-reading and indexing laws of 1913, and expenses of engrossing bills .....	\$1,500			
Contingent fund for meeting expenses of holding primary election during fiscal year ending June 30, 1914, unexpended balance to be appropriated for fiscal year ending June 30, 1915 .....			1,000	
Total for secretary of state .....	\$1,500		\$13,200	\$12,200
TO THE STATE AUDITOR:		1913	1914	1915
State auditor .....			\$2,500	\$2,500
Assistant state auditor .....			1,800	1,800
Special assistant state auditor .....			1,800	1,800
Chief clerk, deficiency fiscal year 1911 (salary raised but no appropriation made) .....	\$83.06		1,500	1,500
Land office clerk .....			1,200	1,200
Bond clerk .....			1,200	1,200
Bookkeeper .....			1,200	1,200
Stenographer .....			900	900
Contingent .....			1,500	1,500
Total for state auditor .....	\$83.06		\$13,200	\$18,200

# Eighteenth Biennial Report.

xi

## To THE STATE TREASURER:

	1914	1915
Treasurer .....	\$3,800	\$3,800
Assistant treasurer .....	1,800	1,800
Special assistant treasurer .....	1,800	1,800
Chief clerk .....	1,200	1,200
Bookkeeper .....	1,200	1,200
Bond clerk .....	1,200	1,200
Assistant bond clerk .....	900	900
Stenographer .....	900	900
Guard .....	900	900
Contingent fund .....	1,500	1,500
Typewriter .....	100	
Total for state treasurer .....	\$15,100	\$15,000

## To THE ATTORNEY-GENERAL:

	1913	1914	1915
Attorney-general .....		\$2,500	\$2,500
Assistant attorney-general .....		1,800	1,800
Special assistant attorney-general .....		1,600	1,600
*Office assistant .....		1,600	1,600
*Two stenographers, at \$900 each .....		1,800	1,800
*Filing clerk and copyist .....		900	900
Incidental and traveling expenses, contingent fund for the office, law books, and for enforcing antitrust laws of the state .....		10,000	10,000
For furniture and equipment, including typewriter and letter files .....	\$400.00		
Total for attorney-general .....	\$400.00	\$20,200	\$20,200

The appropriations to the attorney-general's department for the fiscal years 1911 and 1912 were \$2,400 each for two assistant attorney-generals and \$1,200 each for two stenographers. The law governing the salaries of these positions was not changed, so that the payments have been made on the basis above shown. All salaries of this department are statutory for the amounts above shown except the office assistant and filing clerk and copyist, which salaries are fixed by the appropriation act. There is a provision of statute for a chief clerk in this office at a salary of \$1,200 per annum, but I have shown no appropriation for this position since the office assistant takes over the work of the chief clerk. The salaries for the attorney-general's force should be raised to the amounts allowed by the preceding legislature.

## To THE SUPERINTENDENT OF PUBLIC INSTRUCTION:

	1914	1915
State superintendent .....	\$2,500	\$2,500
Assistant state superintendent .....	1,600	1,600
Chief clerk .....	1,200	1,200
Statistical clerk .....	1,000	1,000
Index and copyist clerk .....	900	900
Stenographer .....	900	900
Incidental office expenses, necessary for the transaction of the business of the office and traveling fund .....	2,700	2,700
Support of county institutes, as provided by section 6280, chapter 92, article 6, of the General Statutes of 1901 .....	5,250	5,250
Normal training in high schools .....	75,000	75,000
Industrial training in high schools .....	25,000	25,000
Aid to weak school districts .....	25,000	25,000
Normal training examination fees (re-appropriated) .....		
Total for superintendent of public instruction .....	\$141,050	\$141,050

## TO THE EXECUTIVE COUNCIL:

	1914	1915
Engineer	\$1,200	\$1,200
Two assistant engineers at \$900 each	1,800	1,800
Four firemen at \$720 each	2,880	2,880
Electrician	1,000	1,000
Fifteen janitors at \$720 each	10,800	10,800
Two messengers at \$720 each	1,440	1,440
Two watchmen at \$800 each	1,600	1,600
Guide	720	720
Custodian	1,200	1,200
Two elevator men at \$720 each	1,440	1,440
Curator Goss collection	800	800
Sunday watchman	200	200
Stationery	2,000	2,000
Lights	200	200
Ice	500	500
Freight and hauling	3,500	3,500
Water rent	1,200	1,200
Furniture, fixtures and repairs	2,200	2,200
Contingent fund	2,000	2,000
Up-keep, general repairs, restorations and emergency expenses for state capitol building, grounds and heating plant	10,000	10,000
Paving drives on state house grounds and repairing old walks	5,500	
Re-paving Jackson street between Ninth and Tenth; repaving Tenth, north side, from Jackson to alley west of Kansas avenue; paving of alley between Ninth and Tenth, Kansas avenue and Jackson; and the alley between Jackson and Kansas avenues, Tenth and Eleventh, Tunnel from the state heating plant to the capitol building and branch to the memorial building, together with steam equipment, electric cables and water service pipe to memorial building (balance reappropriated for 1915)	4,226	
	10,000	
<b>Total for Executive Council</b>	<b>\$66,406</b>	<b>\$46,680</b>

The up-keep and emergency fund requested should be granted by all means. The state house has been too long neglected in the matter of necessary repairs. Past legislatures have been generous in allowing appropriations to the various institutions for repairs on buildings and this policy is to be commended, but the most valuable piece of property the state has should not be overlooked in this regard.

There are a number of repairs that must be made about the building to prevent a very large outlay of expense at no distant date. The west steps should be torn down and relaid on new foundations. The east and west coping balustrades are positively dangerous from sloughing fragments of stone and should be replaced. The leaks around windows in dome and the lantern of dome should be repaired. The wiring in certain parts of the building is badly in need of restoration. The sewage connection is unsanitary and should be changed. The woodwork throughout practically the entire building should be gone over with oils for preservative considerations alone, and there are many other restorations and repairs not so important at the time except as preventative of a heavy expense if let go without attention beyond the initial need.

The fund requested would not enable the rebuilding of the east steps, now badly needed, nor the resurfacing and waxing the exterior of the east wing, which has been suggested necessary to prevent the stone from further disintegrating, but aside from these needs the fund would enable the doing of the necessary repairs to keep the building in a good state of preservation.

To properly care for the memorial building upon its occupancy, the council should be provided with at least three additional janitors.

## TO THE SUPERINTENDENT OF INSURANCE:

	1914	1915
Superintendent	\$2,500	\$2,500
Assistants superintendent	1,600	1,600
Chief clerk	1,200	1,200
Rate clerk	1,000	1,000
Surety bond clerk	900	900
Stenographer	900	900
Clerk hire	900	900
Expense attending National Convention of State Insurance Commissioners	200	200
Contingent	1,200	1,200
Reappropriation of insurance examination fees for the fiscal years 1914 and 1915		
<b>Total for superintendent of insurance</b>	<b>\$10,400</b>	<b>\$10,400</b>

TO THE ACADEMY OF SCIENCE:		1914	1915
Secretary .....		\$1,000	\$1,000
Contingent .....		800	800
Total for Academy of Science.....		\$1,800	\$1,800

TO THE ADJUTANT GENERAL:		1914	1915
Adjutant general .....		\$2,000	\$2,000
Assistant adjutant general.....		1,400	1,400
Military storekeeper .....		1,200	1,200
Clerk .....		900	900
Clerk .....		900	900
Stenographer .....		900	900
For incidental expenses, necessary for the transaction of the business of the office .....		500	500
Rent of company armories, and contingent expenses of companies, bands, corps, brigades, regimental and separate battalion headquarters, and for pay department and for salary of paymaster general; care of property, freight, drayage, express, bonds, and expenses of state arsenal .....		20,000	20,000
For expense of company drills .....		15,000	15,000
Semiannual inspection of companies and property.....		1,000	1,000
Purchase of badges and special medals and expenses of small arms practice.....		500	500
Per diem and mileage of military board.....		500	500
Muster and camps of instruction for National Guard....		25,000	25,000
For the pay of militia when called into active service for the suppression of mob violence or to repel invasion, or for the expenses created in mobilizing troops under the call of the President of the United States, and for the expenses of general courts martial and courts of inquiry convened by the governor, and for firing salutes and pay of escorts, instruction, target practice, and memorial day exercises .....		20,000	20,000
Regular army sergeants detailed as instructors for companies .....		720	720
Total for adjutant general .....		\$90,520	\$90,520

The above is the budget submitted by the department. In my judgment the following items could be reduced to the basis hereinafter stated without impairing the efficiency of the department: Expense of company drills, \$7500 for each year. Muster and camps of instruction, \$20,000 for each year. Pay of militia, etc., \$20,000 for the year 1914, with balance forward for 1915.

The department is also asking for an additional clerk that I do not think is needed since it is requesting a liberal contingent fund, which can be drawn upon to cover necessary additional clerical hire.

TO THE BANK COMMISSIONER:		1914	1915
Bank commissioner .....		\$2,500	\$2,500
Assistant bank commissioner.....		2,000	2,000
*Special assistant bank commissioner ("Blue Sky" Dept.)..		1,800	1,800
*One special examiner ("Blue Sky") .....		1,800	1,800
*Seven deputy examiners, \$1800 each.....		12,600	12,600
*One deputy examiner.....		1,800	1,800
*One deputy (building and loan) examiner.....		1,500	1,500
*One office deputy (building and loan).....		1,500	1,500
*One clerk .....		1,500	1,500
*Clerk and stenographer.....		1,200	1,200
*Four stenographers, \$900 each.....		3,600	3,600
*One special agent—arrest and conviction of bank robbers, Contingent fund .....		1,500	1,500
Expense of representative, National Association of Bank Supervisors and of National Association of Building and Loan Companies.....		250	250
Contingent fund for rewards, and meeting other expenses in connection with the apprehension and conviction of bank robbers .....		5,000	5,000
Total for bank commissioner.....		\$53,050	\$53,050

The Banking Department is asking for an additional assistant bank commissioner (blue sky), an additional examiner (blue sky), an additional deputy (building and loan) and an additional stenographer. The salary of the first two is placed at \$1800 each, the deputy at \$1500 and the stenographer at \$900. I think the department has a sufficient force at the present time to properly handle the work required of it. The department is also asking for \$1500 each year to cover services of special agent in investigations, arrests and convictions of bank robbers. The

department employs such agent at this time and pays the same from the fund for the arrest and conviction of bank robbers. If the appropriation of \$5000 each year for the arrest and conviction of bank robbers, as requested by the department, is granted, I think the item for special agent should be stricken out. The contingent fund item is placed at \$14,500 for each year. If the additional help is not allowed, this item should be reduced to \$10,500.

TO THE BUREAU OF LABOR AND INDUSTRY:		1914	1915
Commissioner and factory inspector.....		\$2,000	\$2,000
Assistant commissioner and factory inspector.....		1,500	1,500
Two deputy factory inspectors, \$1200 each.....		2,400	2,400
*One deputy factory inspector.....		1,200	1,200
Chief clerk.....		1,200	1,200
Statistical clerk.....		1,000	1,000
Stenographer.....		900	900
Special agents and other assistants.....		1,000	1,000
Incidental and traveling expenses.....		8,600	8,600
Postage and express.....		1,000	1,000
Expense of annual meeting.....		250	250
Total for Labor Bureau.....		\$16,050	\$16,050

The above estimate includes an item of \$1200 each year for an additional inspector for fire escape inspection. The estimate given for traveling expenses is on a basis of three inspectors and this item should be reduced proportionately if the additional inspector is not allowed.

TO THE DISTRICT JUDGES:		1914	1915
First district.....		\$3,000	\$3,000
Second district.....		3,000	3,000
Third district, two judges at \$3000 each.....		6,000	6,000
Fourth district.....		3,000	3,000
Fifth district.....		3,000	3,000
Sixth district.....		3,000	3,000
Seventh district.....		3,000	3,000
Eighth district.....		3,000	3,000
Ninth district.....		3,000	3,000
Tenth district.....		3,000	3,000
Eleventh district.....		3,000	3,000
Twelfth district.....		3,000	3,000
Thirteenth district.....		3,000	3,000
Fourteenth district.....		3,000	3,000
Fifteenth district.....		3,000	3,000
Sixteenth district.....		3,000	3,000
Seventeenth district.....		3,000	3,000
Eighteenth district, two judges at \$3000 each.....		6,000	6,000
Nineteenth district.....		3,000	3,000
Twentieth district.....		3,000	3,000
Twenty-first district.....		3,000	3,000
Twenty-second district.....		3,000	3,000
Twenty-third district.....		3,000	3,000
Twenty-fourth district.....		3,000	3,000
Twenty-ninth district, three judges at \$3500 each.....		10,500	10,500
Thirtieth district.....		3,000	3,000
Thirty-first district.....		3,000	3,000
Thirty-second district.....		3,000	3,000
Thirty-third district.....		3,000	3,000
Thirty-fourth district.....		3,000	3,000
Thirty-fifth district.....		3,000	3,000
Thirty-sixth district.....		3,000	3,000
Thirty-seventh district.....		3,000	3,000
Thirty-eighth district.....		3,000	3,000
Total for district judges.....		\$115,500	\$115,500

TO THE STENOGRAPHERS, DISTRICT COURTS:		1914	1915
Thirty-nine stenographers, at \$1200 each.....		\$46,800	\$46,800

TO THE FREE EMPLOYMENT BUREAU:		1914	1915
Director's salary.....		\$1,200	\$1,200
Contingent fund, postage, express, clerk hire, and to carry out the provisions of the acts of 1901 and 1911, relating to employment offices.....		1,000	1,000
Total for Free Employment Bureau.....		\$2,200	\$2,200

# Eighteenth Biennial Report.

One stenographer .....		720	720
*One clerk and stenographer .....		900	900
Sanitary fund for carrying out the provisions of chapter 382, Laws of 1907, and for investigations into stream pollution and industrial wastes .....		5,000	5,000
Miscellaneous and incidental expenses, including the expenses of the chief food and drug inspector to the annual conference of the Association of State and Territorial National Food and Drug Control Officials, as authorized in sec. 12 of chapter 266, Laws of 1907, and the expenses of a representative of the State Board of Health to the annual meeting of the State and Territorial Boards of Health and the conference of the surgeon-general of the public health service with the state health officers as authorized by an act of congress July 1st, 1902, and for other trips outside the state upon the order of the governor .....		3,000	3,000
For the purpose of the free distribution of anti-toxins, serums and vaccines to the indigent poor of the state, for original research and investigation into and for the suppression of communicable diseases and industrial and occupational diseases .....		2,000	2,000
Emergency fund to be used only upon the approval of the governor, for the purpose of preventing or suppressing epidemic diseases, the unexpended balance of the 1914 appropriation to be reappropriated for 1915 .....		10,000	10,000
<i>Division of Vital Statistics.</i>			
For the purpose of carrying out the provisions of chapter 296, Laws of 1911, known as the vital statistic law .....		5,000	5,000
<i>Division of Foods and Drugs.</i>			
Assistant chief food and drug inspector .....		6,000	6,000
Six food and drug inspectors, but in no wise shall the amount paid to any inspector exceed the scale provided in section 4, chapter 184, Laws of 1909 .....		1,800	1,800
Traveling expenses of inspectors .....		9,000	9,000
Samples of foods and drugs and incidentals .....		7,200	7,200
Salary of bacteriologist .....		500	500
For equipment and maintenance of state laboratory of hygiene .....		1,200	1,200
Expenses of members of the board, postage and incidentals .....		500	500
		1,200	1,200
Total for State Board of Health .....		\$57,420	\$57,420

It would seem to me that if the items of appropriations as requested by the department for the first year of the biennium are allowed with a provision for the balances to carry forward, material decreases should be made in the items for the second year. This applies with special reference to the sanitary fund, the fund for the investigation and suppression of communicable diseases and the emergency fund. I think a small deduction could be made in the item for vital statistics and I know of no need for any increase in the fund for expenses members of the board.

TO THE STATE BOARD OF MEDICAL REGISTRATION AND EXAMINATION:		1914	1915
Secretary .....		\$800	\$800

## MISCELLANEOUS DEFICIENCIES:

The following are deficiencies for the state institutions and departments as per vouchers on file.

## ADJUTANT GENERAL.

C. I. Martin, adjutant general, deficiency in salary, fiscal year 1911 ..... \$54.89

The following claims were paid by Colonel Jerry C. Springstead, paymaster general, from government funds allotted to the state. These payments were suspended for the reason that said claims were not a proper charge against government funds, but should have been paid from state funds:

Subsistence of officers and men at camp of instruction for rifle practice at Ft. Leavenworth, Kan., in July, 1910 .....	\$252.86	
Subsistence at rifle camp of Company C, Second Infantry, August, 1910 .....	9.25	
Transportation of enlisted men of less than three months' service from home station at Ft. Riley and return to attend camp of instruction in August, 1910 .....	301.10	
For pay of members of bands of the First and Second Infantry in excess of the strength of a band as authorized by the federal regulations to attend encampment in 1910 .....	40.00—	\$602.71
In August, 1911, Colonel S. G. Zimmerman, paymaster general, submitted voucher for \$86.50 for reimbursement for expenditures made from government funds, which expenditures were disallowed for the reason that they were not proper charges against government funds, but should have been paid from state funds. These expenditures were as follows:		
For board of Kansas Rifle Team, composed of 12 men, and a picked detail of 5 men, 17 men in all, at \$4.50 per week for one week attending preliminary practice at Burlington, Kan. ....	76.50	
For two telephone sets at \$5 each, purchased for use on rifle range of Company G, Second Infantry, Kansas National Guard .....	10.00—	\$86.50

## BOARD OF HEALTH.

Association of State and National Food and Dairy Departments, for annual dues for 1910. .... \$10.00

## BOARD OF MEDICAL REGISTRATION AND EXAMINATION.

H. A. Dykes, secretary, office expenses during fiscal year 1912 ..... \$37.85

---	--------

## STATE PRINTING.

Inland Manufacturing Company, for repairs furnished printing plant, fiscal year 1911 ..... \$4.08

## WESTERN UNIVERSITY.

Kansas City Water Works Department, for water furnished during fiscal year 1912 ..... \$29.94

TO THE PENITENTIARY:	1913	1914	1915
Salaries .....		\$80,440	\$80,440
Maintenance and repairs .....	\$3,000.00	105,000	105,000
Brick plant .....		1,000	1,000
Prison school and library .....		3,000	3,000
Hospital .....		5,000	
New cell block .....		15,000	
Warden entertainment fund .....		1,200	1,200
Expense parole department .....		1,000	1,000
Electrical pump and equipment, repair of old boilers and pumping station .....		5,500	
Contingent fund .....		5,000	5,000
Total for the Penitentiary .....	\$3,000.00	\$222,140	\$196,640

The salary of the warden is fixed by law at \$2500 per annum; the salary of the parole officer at \$1000 per annum. The salaries of all other officers and employees are fixed by the appropriation act.

TO THE STATE INDUSTRIAL REFORMATORY:*	1914	1915
Salaries and wages .....	\$38,560	\$38,560
Maintenance, improvements and repairs .....	85,000	85,000
Building and equipment, Trades building (destroyed by fire in December, 1912) .....	15,000	
Total for State Industrial Reformatory .....	\$138,560	\$123,560

TO THE STATE SOLDIERS' HOME:	1914	1915
Subsistence and medical supplies .....	\$63,000	\$63,000
Clothing .....	15,000	15,000
Freight, transportation and coal .....	13,500	13,500
Library .....	150	150
Contingent fund .....	2,500	2,500
New buildings, repairs and sidewalks .....	7,000	5,000
Furnishings .....	2,000	2,000
Teachers' salaries .....	2,000	2,000
Manual training .....	300	300
Waterworks .....	1,000	1,000
Sewerage, electric light and heating .....	1,000	1,000
Ice plant .....	1,500	
Laundry .....	800	800
Repairing road to Dodge City .....	750	250
Commandant .....	1,200	1,200
Quartermaster .....	1,000	1,000
Assistant quartermaster .....	600	600
Surgeon .....	1,200	1,200
Assistant surgeon .....	900	900
Adjutant .....	600	600
Chaplain .....	750	750
Nurses .....	4,000	4,000
Engineer .....	1,200	1,200
First assistant engineer .....	900	900
Second assistant engineer .....	500	500
Undertaker and furniture man .....	600	600
Plumber .....	480	480
Matron .....	360	360
Total for Soldiers' Home .....	\$124,790	\$120,790

The item for new buildings, repairs and sidewalks, I think could be reduced without detriment to the needs of the institution in this regard to \$7000 for the biennium.

The salary of the commandant is fixed by permanent law, all others by the appropriation act.

<b>TO THE MOTHER BICKERDYKE HOME:</b>		
	<i>1914</i>	<i>1915</i>
Subsistence and medical supplies .....	\$10,000	\$10,000
Furnishings .....	750	750
Library .....	50	50
Building and repairs .....	1,000	1,000

Clothing .....	1,200	1,200
Freight and transportation .....	1,000	1,000
Superintendent .....	900	900
Matron .....	600	600
Nurses .....	1,700	1,700
Physician and surgeon .....	400	400
<b>Total for the Mother Bickerdyke Home .....</b>	<b>\$17,850</b>	<b>\$17,850</b>

The salaries of the officers are fixed by the appropriation act.

### CHARITABLE INSTITUTIONS.

I am herewith submitting statement of appropriations for the charitable institutions for the ensuing biennium as requested by the Board of Control. I have not made a thorough investigation of the needs of these institutions as I take it that the legislature will desire to go into these matters directly with the board, but wish to say that while every dollar needed to properly provide for the comfort and welfare of the unfortunates of the state should be granted, that there is absolutely no need for any increases in appropriations for maintenance, salaries and wages over that allowed for the current biennium unless additional room be provided to care for an increased number of inmates. If any increases in maintenance funds are allowed, the items classified as specials, except as to additional land and new buildings, should be stricken out as such expenditures to the extent actually necessary can be properly met from maintenance funds.

In this connection I desire to call attention to the statement following this budget containing the appropriations allowed each institution by the preceding legislature for the current two years for maintenance, salaries and wages; also the amount of fees to the credit of each institution on December 1, 1912, which fees are available for the purposes specified above. It will be noted that the balances in the fee funds at this date are in some cases large enough to cover salaries and wages of the institution for one year. If the same policy is pursued in the matter of the reappropriation of fees to the institutions, there is no reason for the institutions not having at the beginning of the next biennium larger balances in the fee fund than at this date as they have a sufficient balance in the regular funds to meet the usual and ordinary expenses for the remainder of the year. It would seem that with the construction of the new hospital at Larned there would be little need for additional room at this period to be provided at the other institutions, and I would suggest that the legislature be sparing in appropriations for such purposes and for additional land. The amount appropriated to the charitable institutions shown in this budget for the ten-year period 1904 to 1913, inclusive, for the purchase of land, new buildings and other permanent improvements, totals \$1,420,577.

**TO THE BOYS' INDUSTRIAL SCHOOL:**

	1914	1915
Salaries and wages .....	\$19,500	\$19,500
Maintenance and repairs .....	36,000	36,000

Fees, balance December 1, 1912.....	\$1,328.41	

### EDUCATIONAL INSTITUTIONS.

I am submitting below the budget of the educational institutions exactly as submitted to me by the heads of these institutions. It will be seen that each institution is asking for large increases for maintenance—in some cases almost twice that allowed for the current biennium—and also for large sums for additional buildings. The legislature should be very cautious in appropriating large sums for buildings and for increased maintenance. The granting of liberal general maintenance funds makes absolutely unnecessary special funds for purposes that are properly chargeable to general maintenance and all requests for additional maintenance for specific departments should be very closely scrutinized. I am sure that a thorough investigation of the needs of these institutions will convince the legislature that many of the items in the budget as set out below are unnecessary and should be stricken out.

I particularly call the attention of the legislature to the requests for large sums for the building of student dormitories. Educational men are quite undecided as to the advantage of student dormitories in state institutions. They are usually constructed, furnished and operated with a degree of luxury and extravagance that is out of harmony with the home life of the student and breeds idleness and foppery. The state would have to maintain supervision of the dormitories and this would add greatly to the increasing army of employees on the state pay roll. There is no satisfactory showing that the localities where these schools are situated are unable to furnish good accommodations for the students. These institutions have the power of the state behind them for the enforcement of regulations compelling proper behavior on the part of students, and in cities the size of Lawrence, Manhattan and Emporia, this ought not to be a difficult matter. I hope the legislature will express itself on this question in such a manner as to leave no doubt as to the policy of the state in this regard.

The University Board failed to include any estimate for the School of Mines and Metallurgy at Weir, therefore no estimate is shown for that institution.

<b>TO THE AGRICULTURAL COLLEGE:</b>	<b>1914</b>	<b>1915</b>
Maintenance .....	\$400,000	\$425,000
College extension .....	50,000	55,000
Experiment station .....	30,000	35,000
Repairs, improvements of buildings and grounds.....	25,000	25,000
New buildings .....	100,000	100,000
<b>Total for the Agricultural College .....</b>	<b>\$605,000</b>	<b>\$640,000</b>

<b>TO THE FORT HAYS BRANCH EXPERIMENT STATION:</b>	<b>1914</b>	<b>1915</b>
Maintenance .....	\$25,000	\$30,000

<b>TO THE FORESTRY STATION AT DODGE CITY:</b>	<b>1914</b>	<b>1915</b>
Maintenance .....	\$2,500	\$2,500

**TO THE GARDEN CITY BRANCH EXPERIMENT  
STATION:**

	1914	1915
Maintenance, including permanent improvements.....	\$2,500	\$2,500

**TO THE NORMAL SCHOOL AT EMPORIA:**

	1914	1915
For maintenance, including salaries, equipment, miscellaneous repairs, supplies, advertising and general expenses .....	\$200,000	\$200,000
For the erection of a building for general recitation purposes, for the use of the grammar and secondary grades of the training school and for the further accommodation of the work in science.....	100,000	
For the general reorganization, restoration and modification of the main building and the erection of an auditorium as an extension to the same.....	50,000	150,000
For additional equipment and furniture.....	10,000	20,000
For the care, upkeep and general improvement of buildings and grounds.....	20,000	20,000
For the extension of the capacity of the heat and power plant and the construction of tunnels.....	15,000	
For the work of Normal School Extension.....	20,000	20,000
For the erection and equipment of a dormitory.....	75,000	
For the president's contingent fund.....	500	500
Total for the Normal School.....	\$490,500	\$410,500

**TO THE NORMAL SCHOOL AT HAYS:**

	1914	1915
For maintenance, including salaries, equipment, supplies, repairs, improvement of grounds and general expenses, .....	\$80,000	\$80,000
For the purchase of fuel, freight and hauling.....	2,000	2,500
For the erection of an auditorium-gymnasium.....	75,000	
For remodeling present gymnasium into a library building, .....		10,000
For the erection of girls' dormitory.....		65,000
For the principal's contingent fund.....	500	500
Total for Normal School at Hays.....	\$137,500	\$138,000

**TO THE PITTSBURG MANUAL TRAINING SCHOOL:**

	1914	1915
For maintenance, including salaries.....	\$95,000	\$105,000
For library .....	2,000	2,000
For fuel, freight and hauling.....	4,000	4,000
For equipment and grounds.....	5,000	5,000
For library building.....		80,000
For gymnasium .....	100,000	
For women's building .....		80,000
For heating and power plant.....	50,000	
For equipment, industrial arts building.....	25,000	
For additional grounds .....	10,000	
For fire protection.....	2,000	
For paving .....	2,000	
For telephone system.....	1,200	
For the principal's contingent fund.....	500	500
Total for Pittsburg Manual Training School.....	\$206,700	\$256,500

To THE UNIVERSITY OF KANSAS:	1914	1915
General maintenance .....	\$537,999	\$567,879
Maintenance of School of Medicine and hospital and dispensary at Rosedale, including necessary repairs and improvements .....	46,659	41,560
Permanent repairs, improvements and upkeep of university plant, buildings, and grounds and for special equipment (balance reappropriated for 1915) .....	119,428	
University extension .....	24,860	29,790
State work (separate), including scientific surveys, salaries and maintenance of water, food and drug laboratories of State Board of Health, sanitary engineering for State Board of Health, industrial research, fish and game, entomology, weights and measures, weather reports and other state service work .....	43,225	42,375
Chancellor's contingent fund .....	500	500
Central section of administration and college building .....	186,000	50,000
Electrical engineering laboratory unit .....	15,000	
Addition to repair shops (service building), for carpenter shop and warehouse purposes .....	5,000	
Biological laboratory building .....		25,000
School of Education building, first section .....		50,000
Excavation and foundation of hospital and such work on walls as may be possible toward finishing \$80,000 section of hospital building .....		50,000
Laboratory building, Rosedale, addition with tunnel connection to hospital .....	30,000	
Extension of campus, Lawrence and Rosedale (balance reappropriated for 1915) .....	49,000	
Total for University of Kansas .....	\$1,057,671	\$857,113

The University authorities suggest the item of maintenance for the biennium is subject to reduction in the amount of \$90,000, provided the interest on endowment fund and the fees collected by the institution are reappropriated for its use and benefit.

To THE WESTERN UNIVERSITY:	1913	1914	1915
Maintenance .....		\$40,000	\$40,000
Equipment .....		7,000	5,000
Superintendent's residence .....		6,000	
Library .....		400	400
Campus and landscape .....		400	400
Gymnasium and athletics .....		500	500
Agriculture, dairying, live stock, sheds .....		2,800	1,500
Engineering laboratory .....		2,750	1,750
Coal and freight .....		1,700	1,700
Summer school and neighborhood extension .....		1,000	1,000
Addition and repairs .....		3,000	3,000
Executive officers' and trustees' traveling expenses and contingencies .....		500	500
Nurse training .....		700	600
Deficiencies for 1910 and 1911:			
Wyandotte Coal and Lime Co., builders' supplies .....	\$583.38		
Foster Lumber Co., builders' supplies .....	411.45		
Missouri Pacific railway, freight and demurrage .....	393.89		
English Tool and Supply Co., tools and supplies .....	458.12		
Emery, Bird, Thayer Dry Goods Co., Mdse. ....	142.48		
Geo. R. Spaulding & Son, extra labor and supplies on girls' dormitory .....	400.00		
Total Western University .....	\$2,384.32	\$66,750	\$66,350

TO THE TOPEKA INDUSTRIAL AND  
EDUCATIONAL INSTITUTE:

	1913	1914	1915
Maintenance .....		\$15,000	\$15,000
Fuel and freight .....		1,500	1,500
Equipment, tools and furnishings.....	\$1,000.00	4,000	4,000
Extension of water pipe line from city limits, piping of buildings and grounds, installation of sewage system and septic tank .....	15,000.00		
Additional land .....		12,000	
Rock crusher, complete with motor, carrier cars and other apparatus.....	3,000.00		
Improvement of grounds .....		500	500
Library .....		500	500
Silo .....		350	
General barn .....		3,000	
Dairy barn .....		1,000	
Remodeling and repairing Girls' Industrial building, and for equipment .....		6,000	
Total for Topeka Industrial and Educational Institute.....	\$19,000.00	\$43,850	\$21,500

## THE TREASURERS OF KANSAS,

FROM THE ADMISSION OF THE STATE, JANUARY 29, 1861, TO JANUARY —, 1913.

**WILLIAM THOLEN**, of Leavenworth county, elected treasurer under the Wyandotte constitution at a general election held December 6, 1859. Mr. Tholen entered the volunteer service, and never qualified or acted as treasurer.

**H. R. DUTTON**, of Brown county, appointed March 26, 1861, and elected to fill vacancy November 5, 1861; served until January 12, 1863. Term of service, 1 year, 9 months, and 16 days.

**WILLIAM SPRIGGS**, of Anderson county, elected November 4, 1862, and on November 8, 1864, reelected. Assumed control of office January 12, 1863, and served 4 years.

**MARTIN ANDERSON**, of Jackson county, elected November 6, 1866. Took the oath of office January 7, 1867, and served 2 years.

**GEORGE GRAHAM**, of Nemaha county, elected November 3, 1868. Term of service, 2 years—from January 11, 1869, to January 9, 1871.

**J. E. HAYES**, of Johnson county, elected November 8, 1870. Took the oath of office January 9, 1871; was reelected November 5, 1872. Served until April 30, 1874, when he resigned. Term of service, 3 years, 3 months, and 22 days.

**JOHN FRANCIS**, of Allen county, having been appointed May 1, 1874, took charge of the office, and served until January 11, 1875—8 months and 10 days.

**SAMUEL LAPPIN**, of Nemaha county, elected November 3, 1874. Entered the office January 11, 1875; resigned December 20, 1875. Served 11 months and 11 days.

**JOHN FRANCIS**, of Allen county, again appointed December 22, 1875, and took charge of the office. Was elected November 7, 1876; reelected November 5, 1878, and again November 2, 1880. Served from December 22, 1875, to January 8, 1883. Term of service, 7 years and 16 days.

**SAMUEL T. HOWE**, of Marion county, elected November 7, 1882, and reelected November 4, 1884. Took charge of office January 8, 1883. Term of service, 4 years.

**JAMES W. HAMILTON**, of Sumner county, elected November 2, 1886, and reelected November 6, 1888. Resigned March 1, 1890. Term of service, 3 years, 1 month, and 19 days.

**WILLIAM SIMS**, of Shawnee county, appointed and took charge of the office March 1, 1890, and served until December 30, 1890. Term of service, 10 months.

**SOLOMON G. STOVER**, of Republic county, elected November 5, 1890, to fill out the unexpired term ending January 12, 1891, and the regular term ending January 9, 1893. Took charge of the office December 30, 1890. Term of service, 2 years, 1 month, and 1 day.

**WILLIAM H. BIDDLE**, of Butler county, elected November 8, 1892. Took charge of the office February 1, 1893. Term of service, 1 year, 11 months, and 15 days.

**OTIS L. ATHERTON**, of Russell county, elected November 6, 1894. Took charge of office January 16, 1895. Term of service, 2 years and 2 days.

**D. H. HEFLDOWER**, of Miami county, elected November 3, 1896. Took charge of office January 18, 1897. Term of service, 1 year, 11 months, and 28 days.

**F. E. GIMMER**, of Wichita county, elected November 8, 1898. Took charge of office January 14, 1899. Reelected November 6, 1900. Term of service, 3 years, 11 months, and 23 days.

**T. T. KELLY**, of Miami county, elected November 3, 1902. Took charge of office January 13, 1903. Reelected November 6, 1904. Took charge of office January 9, 1905. Term of service, 4 years, 2 days.

**MARK TULLEY**, of Montgomery county, elected November 6, 1906. Took charge of office January 14, 1907. Reelected November 3, 1908. Took charge of office January 11, 1909. Reelected November 3, 1910. Took charge of office January 9, 1911.

# EIGHTEENTH BIENNIAL REPORT.

STATE OF KANSAS,  
TREASURER'S OFFICE, TOPEKA, July 1, 1912.

*To His Excellency W. R. Stubbs, Governor of the State of Kansas.*

DEAR SIR—Pursuant to the requirements of law, I have the honor herewith to present the following report of this department for the fiscal years ending June 30, 1911, and June 30, 1912.

In my last biennial report I made the following statements:

"Since the last biennial report of this office a bank guaranty law, known as chapter 61, Session Laws of 1909, and an inheritance tax law, known as chapter 248, Session Laws of 1909, have been enacted.

"The bank guaranty law has been in operation only a part of the time, on account of a court decision, so, at the present time, it would be difficult to tell just how practical and beneficial it will prove to be. However, a good many people who have studied the same have great confidence in the benefits of its operation. While the inheritance tax law is yielding some revenue for the state, it is not looked upon favorably by a goodly number of the people, on account of the hardship they claim it works in some instances. I think, however, the law can be remedied by amending the same, and, if it can not be, in my judgment it should be repealed, as the law is objectionable as it now stands. And the state is in such a financial condition that it can very well get along without the revenue derived from a law that is odious to a majority of the citizens.

"The state depository law of 1905 was amended by the last legislature so as to permit the Board of Treasury Examiners to designate a depository to take the place of one that has gone out of business, either by failure or liquidation. Since that amendment, the law is working nicely and the state receives in interest on the deposits in the different depositories from 3 to 3½ per cent, which adds to the general revenue fund about \$25,000 annually.

"In my last biennial report I made the following statement: 'In this report you will find under the heading "Fraudulent Bonds," a list of bonds which were bought by the School-fund Commissioners about the years 1877, 1878 and 1879, which was at a period in the state's history when school districts were organized by a few par-

ties who issued bonds to build a small school building and to pay other expenses incurred, and sold the bonds to the state. The districts in a few years became depopulated, and the state, in trying to collect the interest, found there was no levy made to pay the same, and, in fact, found no organized districts, and that the bonds were not legally issued. And in all these years these bonds have been carried by the permanent school fund as a dead account, but have to be taken into consideration in making up the total balances. And to correct this false impression that the permanent fund has a sum total of \$8,457,456.15, in which sum is included \$21,750 of fraudulent bonds, I would recommend that the legislature make an appropriation to the permanent school fund in the sum of \$21,750 to reimburse this fund, and order these bonds destroyed.' Instead of \$8,457,456.15, as stated above, the amount of the permanent school fund at the close of the fiscal years, June 30, 1910, was \$8,918,735.79. And a decision of the supreme court in the case of *The State of Kansas v. The City of Lawrence*, over \$100,000 of the permanent school fund, together with interest upon the same, was against the state, and in favor of the city of Lawrence. If that decision is final, and there is no other way to collect that \$100,000 that amount should be added to the \$21,750, and the state should reimburse the permanent school fund for the amount, as the constitution of the state positively says the permanent school fund shall not be diminished. If one fund handled by the state treasurer is more sacred than any other fund handled by him, it is surely the school fund, and no statement of his in regard to either the permanent or the annual school fund should be misleading, as the people have a right to know the exact condition of their school funds. And if the state, as custodian of the permanent school fund, has accepted any fraudulent bonds, it should do the same as any other custodian of funds—fulfill its trust by making those bonds absolutely good. And in my judgment the state violates its trust if it fails to comply with the constitution and fulfill its contract.

"I sincerely hope that a law will be placed upon the statute-book that will authorize the state treasurer to correct the records in his office so as to show the school funds in their true condition, and his accounts with those funds show the same as the accounts of any responsible bank or trust company would show with any of their funds. It is impossible for him to make a correct showing without the legislation asked for. The state would not for a minute permit a state bank to carry as an asset 'fraudulent bonds,' and the state surely ought not to be guilty of doing that which it would not tolerate in others."

In regard to the bank guaranty law will say that it seems to be working fairly satisfactorily.

In regard to the inheritance tax law, there is still a great deal of complaint, and a pretty general demand all over the state for its radical amendment or its entire repeal, and I think a majority of the people in Kansas favor its absolute repeal.

The state depository law is working satisfactorily, except I think a limit should be placed on the number of depositories. The state should have a reasonable number of depositories, but not an unlimited number, as an unlimited number is not satisfactory to the depositories themselves and makes the State Treasurer's office a great deal of extra work, and is almost impractical in the transaction of the business.

As to reimbursing the permanent school fund for its losses on account of fraudulent and worthless bonds, I still insist that the only honorable thing for the state is to do as the constitution prescribes: reimburse the permanent school fund for its losses, and I would recommend that a law of that kind be enacted by the next legislature.

In 1905 a law was passed that practically prohibited one official or employee from drawing more than one salary, or pay, from more than one appropriation of the state. There is a little difference of opinion between some of the officials in regard to the application of that law in some specific cases. I think the law a good one, but it should be amended so as to leave no doubt as to its application.

The state bonded indebtedness is only \$370,000, every dollar of which is held by the state permanent school fund, so when the state pays the interest, instead of its going to a corporation or an individual, it goes into the annual school fund, and is distributed all over the state for the benefit of the common schools. In the sinking fund of the state there is \$76,878.75 to be applied upon the payment of this bonded indebtedness when due. Upon investigation, I find that there are only a few other states in the Union that have as small a state bonded indebtedness as Kansas.

Respectfully submitted.

MARK TULLEY, *State Treasurer.*

## ATTORNEYS-GENERAL OF KANSAS.

---

B. F. SIMPSON, from 1861 to June, 1861. (Resigned.)  
CHARLES CHADWICK, from June, 1861, to November, 1861. (Appointed.)  
S. A. STINSON, from 1861 to 1863.  
W. W. GUTHRIE, from 1863 to 1865.  
J. D. BRUMBAUGH, from 1865 to 1867.  
GEO. H. HOYT, from 1867 to 1869.  
A. DANFORD, from 1869 to 1871.  
A. L. WILLIAMS, from 1871 to 1875.  
A. M. F. RANDOLPH, from 1875 to 1877.  
WILLARD DAVIS, from 1877 to 1881.  
W. A. JOHNSTON, from 1881 to 1885.  
S. B. BRADFORD, from 1885 to 1889.  
L. B. KELLOGG, from 1889 to 1891.  
JOHN N. IVES, from 1891 to 1893.  
JOHN T. LITTLE, from 1893 to 1895.  
F. B. DAWES, from 1895 to 1897.  
L. C. BOYLE, from 1897 to 1899.  
A. A. GODARD, from 1899 to 1903.  
C. C. COLEMAN, from 1903 to 1907.  
F. S. JACKSON, from 1907 to 1911.  
JOHN S. DAWSON, from 1911 to ———.

### ASSISTANTS, 1911-1912.

Samuel N. Hawkes, Stockton, Kan. First Assistant.  
(Appointed January 9, 1911.)  
Charles D. Shukers, Sedan, Kan. Special Assistant.  
(Appointed January 9, 1911. Resigned April 15, 1911.)  
Sardius M. Brewster, Troy, Kan. Special Assistant.  
(Appointed May 1, 1911.)  
James P. Coleman, Clay Center, Kan. Chief Clerk.  
(Appointed January 9, 1911. Resigned June 30, 1911.)  
James P. Coleman, Clay Center, Kan. Office Assistant.  
(Appointed July 1, 1911.)  
M. E. Voorhees, Clay Center, Kan. Stenographer.  
(Appointed January 9, 1911.)  
W. H. Souders, Eureka, Kan. Stenographer.  
(Appointed January 9, 1911. Resigned April 15, 1911.)  
R. D. Payne, Topeka, Kan. Stenographer.  
(Appointed May 1, 1911.)  
W. O. Hunter, Topeka, Kan. Stenographer.  
(Appointed July 1, 1911.)

# TEENTH BIENNIAL REPORT.

OFFICE OF THE ATTORNEY-GENERAL,  
TOPEKA, KAN., September 1, 1912.

*governor:*  
stitution provides that the officers of the Executive shall, at least ten days preceding each regular session of the legislature, make reports to the governor. Similar provisions are to the same general effect. In the herewith the eighteenth biennial report of this office is herewith transmitted.

er has been connected with the legal department of the office most continuously for ten years, and during that time the work of the office has multiplied many times over. The gradual growth and extension of official work was to be expected in the gradual growth and development of the state; but the increasing activities of the department seem to have stimulated and multiplied still other and different demands for our services.

The briefest résumé of the attorney-general's duties is as follows:

The attorney-general is the state's attorney in all the state's courts, in the supreme court and in the federal courts, and handles nearly all of its important litigation in the district and county courts.

He is the legal adviser of one hundred and five county attorneys and some twenty or thirty state officers and state boards.

He is a member of the School-fund Commission, charged with the safe investment of a million dollars annually, perhaps the largest sum in the state.

He is president of the State Charter Board, and must keep a constant watch over the perennial spawn of corruption promoted by enterprising men seeking grants of the state franchises.

He is a member of the State Printing Commission, charged with the perplexing duty of abridging and sifting the multi-

farious demands upon that department so as to limit the entire output to fit the appropriations; and the appropriations for public printing are invariably too small when measured by the statutory requirements and authorizations for printing by the various state departments and educational and other institutions. The present Printing Commission is the only one which has successfully curtailed the public printing so as to keep within the appropriations. I urge that the appropriations be substantially increased, or that the statutes authorizing so much public printing be radically amended and repealed.

It is also the duty of the attorney-general to examine the legal proceedings leading up to the issue of county bonds, school-district bonds, board of education bonds, city bonds, drainage bonds, and all other sorts of municipal bonded obligations. This grows out of the fact that all such bonds must be registered in the state auditor's office, and must be offered to the School-fund Commission before they can be sold to private individuals. When we stop to think of the many millions of dollars of municipal securities which are being issued by the various municipalities and subdivisions of the state each year, some idea of the work developing upon this department may be imagined.

The attorney-general is also a member of the Executive Council, and of several other minor boards and commissions, all entitled to more of his time and consideration than he has to give.

The state's litigation and a schedule of the state's cases during my term and their disposition or present status will be found elsewhere in this report. This schedule shows the wide range of the litigation in which the department has been engaged, but such litigation has not altogether been instituted nor conducted in the exercise of the attorney-general's own discretion.

See *State, ex rel. W. R. Stubbs, Governor, v. John S. Dawson, Attorney-general*, 86 Kan. 180.

#### COÖPERATION WITH LOCAL OFFICERS.

The enactment of the ouster law for the removal of derelict officials, which I secured from the legislature of 1911, made it possible to unify the work of the state and local governments in a way which was not possible theretofore. While there had been some coöperation between the attorney-general's office and

county attorneys' offices, yet in times gone by the  
ces were absolutely independent departments and  
nnected from the attorney-general's office. During  
istration it has been possible to say that we have  
in the nature of a comprehensive legal department.

attorneys, with scarcely an exception, have come  
the attorney-general's office as an agency for real  
coöperation in their problems. The most public-  
yors and chiefs of police and sheriffs have largely  
same view concerning this department.

coöperation with all the leading county attorneys  
I have found it possible to have the antitrust laws  
observed, and to give life and vigor to some of the  
of the antitrust law which have lain dormant on  
book since their enactment twenty-three years ago,  
y the civil penalty features of the Burton act of  
the Farrelly act of 1897. Under those hitherto  
visions of the antitrust law the school funds of  
counties have received the sum of \$36,500 as a result  
activities of the county attorneys and the attorney-

#### THE TWO-CENT PASSENGER FARE LITIGATION.

stance of Governor E. W. Hoch, in 1907, the Board  
Commissioners made an order reducing the pas-  
s in Kansas to two cents a mile. The thirteen rail-  
nsas brought thirteen separate suits in the federal  
strain the Board of Railroad Commissioners, the  
r the Board and the attorney-general from enforce-  
der. But no restraining orders were issued and  
tacit understanding that the lawsuits should not be  
erial while litigation over the two-cent passenger  
ghboring states was pending. It was the confident  
unsel for the railroads that they would make short  
two-cent laws in other neighboring states, and one  
ading Kansas railways set about a more or less  
mpilation of statistics concerning the loss of reve-  
by the reduction of the fares in Kansas in the hope  
might speedily dispose of the two-cent fare in this  
n the two-cent passenger laws of Missouri, Okla-  
nesota, Oregon, Kentucky and Arkansas were held  
the lower federal courts and were appealed to the

supreme court of the United States, I deemed it my duty to file a brief as *amicus curiæ* in the supreme court of the United States, because the same legal problems are largely involved in the Kansas rate cases, and the decision of the supreme court on the two-cent laws of these neighboring states will have considerable effect upon the Kansas cases.

I also deemed it my duty to protect the state against the enormous expense of railroad passenger rate litigation, so that when a determined effort was made in the legislature in 1911 to enact a two-cent passenger law, I went before the railroad committee and also the House committee of the whole and explained the situation at length, pointing out that the proposed bill, if enacted, should carry with it a considerable appropriation of funds for the purpose of conducting the litigation which would undoubtedly follow its enactment. And I also urged the legislature to direct me what to do about the thirteen lawsuits which we already had about the two-cent fares which we were then and still are enjoying. The legislature in the end wisely concluded to leave the matter in the hands of the Railroad Commissioners, who have ample power to fix passenger rates as the march of events will justify.

Following the adjournment of the legislature, and at the next term of the United States court in Leavenworth, I entered into formal stipulations with the attorneys for the thirteen Kansas railroads that this two-cent fare litigation should be held in abeyance and continued *until the conclusion* of the litigation between the railroads and the state of Nebraska over its two-cent passenger fare law. Hon. John C. Pollock, of the federal court, being fully apprised of the matters involved, approved the stipulations.

#### MISCELLANEOUS LITIGATION.

Space will not permit a detailed statement of the miscellaneous litigation in which the department has been involved. The act of 1907 (chapter 250 of the Session Laws), regulating the use of gunpowder in the mines of the state, was successfully maintained in the supreme court of the United States.

*Williams v. Walsh*, 32 U. S. Rep. 137.

The law against blacklisting laboring men on account of their connection with labor unions has been upheld by the state supreme court. (*State v. Coppage*, 87 Kan. 752.) This

one to the supreme court of the United States on

been generally successful in maintaining laws in boards of health and horticulture are interested, in drainage and riparian statutes, tax laws, school and the like. In fact there has not been a single infringement of the property rights of the state where the commonwealth have suffered or been in any way injured.

#### GRAIN INSPECTION LITIGATION.

The legislature of 1911 passed a law increasing the fees for inspection of grain, and shortly after the passage of this law the railroads and elevators of the state began to refuse inspection of grain. This department commenced an injunction against various railroads and elevators, and the elevators located at Kansas City, Kan., to compel the railroads to furnish to the State Grain Inspection department daily manifests of all grain arriving in the terminal yards in Wyandotte county; to permit weighing inspectors of the grain department to inspect and weigh grain in cars in such terminal yards, and to collect proper parties and pay to the department the fees for inspection and weighing, and to compel the elevator operators to procure a license to transact business in warehouses, giving a bond as such to make reports to the department of the movement of grain in and out of elevators and of the issuance and cancellation of warehouse receipts; to permit the weighmasters and inspectors to inspect all grain moving into or out of the elevators; to pay the fees for such inspection and weighing. The operators and directors of the Kansas Grain Dealers' Association, having a membership of three hundred persons, and corporations, engaged in buying and selling grain, and united with the defendants in contesting the law. It was claimed by the defendants that the law does not contemplate compulsory inspection of any grain not that stored in public elevators, and it was found that the defendant elevator companies had no interest in public elevators. On a trial in the supreme court it was held that the law did not provide for a compulsory inspection in public elevators, and that only those ele-

vators were public elevators in which the grain of different owners, of the same grade, was mixed and mingled, or where a warehouse receipt was issued reserving the right so to mix and mingle grain of different owners, and that those elevators in which the grain of each owner was kept separate and distinct from that of other owners were not public elevators. Five of the operators of elevators were held by the court to have been public elevators up to December 6, 1911, and the fees paid by them into court were held to belong to the state, and they were charged with a part of the costs of the proceedings. The decision of the court in this case did away with compulsory grain inspection by the Kansas department, except at public warehouses, and severely hampered the department.

I would suggest that the grain-inspection law be amended so as to expressly provide for the compulsory inspection and weighing of grain at all railroad terminals, public warehouses and other points within the state where the business transacted justifies the establishment of an inspector; and that the law be further amended by defining public warehouses to be all elevators or warehouses in the state in which grain is stored for a compensation, whether the grain of different owners is mixed together or not. I believe that these amendments, with a few others of minor importance, would make the inspection law of this state an efficient and working law.

The history of this litigation is covered in *State, ex rel., v. The A. T. & S. F. Ry. Co. et al.*, 87 Kan. 565, and *State, ex rel., v. A. T. & S. F. Ry. Co. et al.*, p. 348.

There have been some expenses about this litigation which the legislature ought to meet.

#### CRIMINAL APPEALS.

The work of attending to the state's interests in criminal appeals has continued to be one of the heavy burdens upon the department. It is not the duty of the county attorney who has successfully prosecuted a criminal in the district court to attend to the case on appeal. That is the duty of the attorney-general. But most of the county attorneys are public-spirited officers, and many of them do help in this work. On the other hand, the county attorneys who retire from office can not usually be expected to give their attention to these

the new county attorneys, who are their successors, unfamiliar with the cases and with the records, cases must all have the personal attention of this

#### THE STANDARD OIL LITIGATION.

Successor, the late C. C. Coleman, Esq., commenced suit against The Prairie Oil & Gas Company, The Oil Company of Indiana, and The Standard Oil of Kansas, all subsidiary corporations of the Standard Oil Company of New Jersey. This litigation dragged a weary and expensive way to the conclusion of his term through the entire four years of the term of his predecessor, the Hon. Fred S. Jackson, and was brought to a close by me in June, 1911. In schedule B of this report is an abridgement of the findings of the commission and the final judgment in the case.

#### SOME TRUST CASES.

**INSURANCE TRUST.** Early in my term the casualty insurance companies, pursuant to a common purpose in violation of the antitrust law, made radical advances in their rates, which were to become effective April 1, 1911. I issued a temporary restraining order and eventually a peremptory injunction against these companies in the district court of Jefferson county, which prevented these advances. I wish to point out, however, that while these companies were prevented from advancing their rates pursuant to a common plan and yet there is nothing in the law to prevent these companies from acting independently of each other, from making rate advances, and I recommend that the superintendent of insurance be granted the same power to put a check on the rate advances of the casualty insurance companies that he now exercises in the case of life insurance companies.

**ICE TRUST.** In 1911 the two ice companies doing business in Topeka made radical advances in their rates on ice sold to the small consumer. I procured some evidence, not much, which tended to show that this was pursuant to an unlawful agreement, and filed an application for a writ of habeas corpus before Judge Dana of the Shawnee district court for subpoenas to investigate this matter. The officers of the companies called at my office and promised to make no further advances for the year 1911 in

their ice rates, and agreed also to cut the price of ice from seventy-five cents per hundred pounds to fifty cents per hundred pounds when sold in ten-pound chunks; and that the three-hundred-pound cake of ice, which is the common size at the time of manufacture, should be cut into twenty-four pieces, and these pieces, which nominally would weigh twelve and one-half pounds, should be sold for a ten-pound chunk. I accepted this proposal, for two reasons: First, because it was a cut of fifty per cent on the price of ice to the small consumer and secured to the small consumer liberal overweights in his daily purchases. The second reason was that I did not at all feel sure that I had sufficient evidence to prosecute an antitrust case, and such a case would undoubtedly go to the highest courts before the companies would submit. In the meantime the small consumer, who needed the protection of the antitrust law, would get no benefit.

I may say that the Topeka ice companies have kept faith with the state on this settlement, not only for the season of 1911, but also for the season of 1912.

I recommend that the city governments of Kansas be given power to regulate the price at which ice may be sold to the general public.

**PLUMBERS' TRUST.** During the summer of 1912 complaint was made at my office by certain master plumbers in Kansas City, Kan., that an association of master plumbers in Kansas City had an unlawful arrangement with the Pittsburg Water Heater Company, whereby the master plumbers of Kansas City who were not affiliated with the Kansas City Plumbers' Association were charged \$85 each for heaters which the affiliated plumbers were able to secure for \$68. The ramifications of this alleged combination were mostly outside the state of Kansas, but after I filed suit against this alleged plumbers' trust in the supreme court an offer of settlement was made whereby the nonaffiliated master plumbers of Kansas City, Kan., were to be furnished with these heaters at the same favorable price enjoyed by the affiliated plumbers, and I settled the case on that basis.

**THE GAS TRUST.** During the winter of 1911-'12 an attempt was made by the Kansas Natural Gas Company and various local subsidiary gas companies to raise the price of gas without the consent of the Public Utilities Commission. At

It was doubtful whether or not the powers conferred on the Public Utilities Commission were broad enough to cover the matter, and it was apparent to me that the companies would not submit to the regulation of their affairs by the Public Utilities Commission or by public authority. The court of last resort had so decided. In looking into the matter I found that these companies had certain provisions in their contracts with each other in violation of the antitrust law, and I therefore invoked the all-powerful provisions of this law to bridge over any possible weakness in the public utilities law, and within a short time I filed suits, injunction suits and civil-penalty suits of value against the gas companies, which speedily brought them to terms with the state and secured judgments against them for failing to pay into the school funds of the counties of Cherokee, Crawford, Shawnee, Johnson, Leavell and Douglas civil penalties under the Burton and Johnson acts for the benefit of the school funds of these counties of \$10,500.

**STANDARD OIL TRUST.** On the assumption that the suits against the subsidiary companies of the Standard Oil Company of New Jersey, which had been pending for many years in the state supreme court, would be a calamity for the state, I called a conference of the county attorneys of the state of Kansas for the purpose of following up the decision with criminal prosecutions. But the state attorney-general, Judge L. W. Keplinger, in elaborate and comprehensive findings, determined that the only ground for the prosecution of these subsidiary companies of the Standard Oil Company of New Jersey lay in the fact that the subsidiaries of the Standard Oil Company of New Jersey, and not of themselves these subsidiary companies, had violated the antitrust law of the state of Kansas. The fact that they were members of a New Jersey oil trust in violation of the Sherman antitrust law did not bring them within the ban of the Kansas antitrust law. About the same time the supreme court of the United States gave its final decision in the United States case against the Standard Oil Company of New Jersey, the parent

of these subsidiary companies doing business in Kansas, and I therefore concluded to change the proposed criminal cases into civil-penalty cases, and pursuant to which these Standard Oil subsidiaries paid into the school funds of fifty different Kansas counties the sum of \$500 for each county, a total of \$25,000.

**THE CEMENT TRUST.** My predecessor had filed a case in the district court of Sumner county against the Western States Portland Cement Company. This I prosecuted to a conclusion. The court found that the offense was not a grave one, and fined the company \$100.

Other trust matters have engaged the attention of the department, and I believe that the fact that it was well known that the state was on the alert and ready and willing to prosecute offenses under the antitrust law has had a wholesome and moral influence in checking and restraining the tendency to such unlawful gain in this state in violation of the antitrust law. In the counties of Smith, Mitchell and Norton this department has aided the county attorneys to check the rapacity of the bridge trust.

#### COLLECTIONS.

Kansas had a bill against the state of Oklahoma for \$5534.95 for supplies furnished to the Oklahoma prisoners at the time of their exodus from the Kansas state penitentiary. The payment of this had been delayed for about two years. Early in my term I went to Oklahoma City and presented the matter to the claims and accounts committee of the Oklahoma state senate. In due time the legislature of Oklahoma made provision for its payment, providing that the account should first be investigated by the attorney-general of that state. I presented the proper evidence in support of our claim to Attorney-general West, who eventually approved the bill, and the collection was made for the entire sum, \$5534.95, and turned over to the treasurer of the state of Kansas on August 7, 1911.

Some years ago, during Attorney-general Coleman's administration, acting as his assistant, I secured a judgment against Day County, Oklahoma, for the coupons and interest of certain repudiated bonds of that county. When I became attorney-general I set about the collection of these and secured a partial payment of \$1085.81, which was immediately turned

state treasurer, February 14, 1911. Later the enforcement was made and paid direct to the state treasurer. Construction contract with the State Agricultural Colonization Construction Company failed to carry out and it became necessary for me to sue this company and its surety, the Massachusetts Bonding Company. For the state was recovered in the sum of \$15,346.68, at 6 per cent, September 3, 1912. The case has ended.

Every term the state has recovered about \$180,000 for the expenses of insane persons for their care and keeping in hospitals. These collections have been made in law-suits and demands in my official name, but the work of collecting has been done almost entirely by Harry C. Bowman, a member of the Board of Control. Mr. Bowman happened to be a competent and industrious lawyer, fully advised of the claims of the state by virtue of his official position, and his connection with the collections has been little more than that of a servant. The state has certainly had a profitable servant in him.

My duties under the inheritance tax law have been so efficiently attended to by the State Tax Commission that very little of my time has been taken up there.

#### RECOMMENDATIONS.

Section 1057 of the General Statutes of 1909 makes it the duty of the attorney-general to point out all the apparent deficiencies, omissions, unequal and oppressive laws which he may have discovered, for the purpose of enabling the legislature to make such amendments as will tend to perfect the laws of the state.

Compliance with that provision would mean the enactment of a new codification of the Kansas statutes. The commission was authorized by the legislature of 1867. It was then appointed a commission of three eminent lawyers to do the work their entire time for a year, and their report and revision of the statutes was adopted and enacted by the legislature of 1868. No general codification has since been undertaken, but the law of negotiations, the school-land law, and the code of civil procedure have been brought up to date and promulgated by

the legislature in recent years. Aside from these, there is much which needs attention, but my time will permit me to do little more than make general suggestions.

**THREE-FOURTHS VERDICT.** I recommend an amendment to the constitution concerning juries, so as to provide for a three-fourths verdict, except in felony cases where the punishment is imprisonment for life.

**CIVIL-PENALTY SUITS.** I recommend a law providing for a suit for civil penalties, to be used at the discretion of the prosecuting attorneys, in lieu of prosecutions for misdemeanors of trifling nature, such as violations of the food and health regulations, violations of speed ordinances, and the like. Such suits should be justiciable without juries, and be for sums equal to the penalties imposed by the penal statutes, but recoverable as civil judgments; providing, of course, that whenever the defendant raised constitutional questions to such suits the prosecutor should have the right to rewrite his pleadings according to the criminal code, and the prosecutions would proceed in the old way. The advantages of the civil-penalty suit are obvious. Many men would pay a civil penalty for an infraction of a statute without a lawsuit and be careful not to violate the law again, but they will fight to the last ditch before they will plead guilty to a crime. This is particularly true of a respectable hotel keeper or grocer or other decent citizen who may unwittingly have overstepped the law. In Germany this distinction in the penal law is recognized. The Germans have a civil offense called "over-stepping," which calls for the payment of a civil penalty, but is not considered a disgrace any more than it is in Kansas for the taxpayer to have to pay a civil penalty for being delinquent in his tax payments.

The committee on the revision of criminal law appointed by the State Bar Association has set forth the advantages of the civil-penalty suit as follows:

"The following advantages of such proceedings occur to your committee:

"*First.* Offenders may often be induced to pay the penalty without other proceedings and yet may be deterred from future infractions of the same law. The police laws of the state are often broken through ignorance of the existence of the particular law in question, but if the offender is arrested he is

resist conviction because of the stigma resulting. An additional argument may be found in the fact proceeding will destroy the stock appeal to the criminal case that the jury should not 'attach the stigma' to a person of good reputation.

It may succeed in securing conviction by a 'preponderance of the evidence' instead of 'beyond a reasonable doubt'. On this point there seems to be a division of the courts, but the following cases hold that a civil suit for damages is not in the nature of a criminal proceeding.

*Ex v. State of Nebraska*, 11. N. W. 848;

*U. S.*, 1 Wyo. 246;

*Sherman*, (Ky.) 4 S. W. 790;

and on Crim. Law, 43.

It would, of course, have to be taken to bring the provisions of the rule laid down in the above cause if it be made the suit for a 'civil penalty' a civil suit as a matter of law, but it is possible to do so, granting, of course, that the above cases state the better rule.

Provisions under the criminal law would not be abolished by the objection that a civil-penalty suit would not protect individuals from the commission of forbidden acts. The stigma of a criminal prosecution has been removed, but it would not prevent the state from prosecuting a criminal. Instead."

*Kansas Bar Association of Kansas*, 1912, at pp. 19, 20.)

**OF INQUISITORIAL POWERS.** I recommend that the powers now vested in county attorneys to issue subpoenas and subpoenas duces tecum in liquor and gambling cases, and conflict officers, be extended to all sorts of crimes. It is indeed, that these broad powers are conferred upon the county attorney to investigate a sale of liquor or an illicit lottery or dice and are withheld from him in his efforts to prosecute a murderer, a bank robber or an embezzler. Such a situation should not continue for another half year.

**OF BRIDGE LAW.** There is pressing need for a re-entire law relating to the building of bridges and the issue of bonds therefor. Such a disjointed and patchwork as the Kansas bridge law can not be found in any other American state. I recommend that it be re-enacted and that a new law be constructed on the subject.

**FOR TERM FOR LAW ENFORCEMENT OFFICERS.** I recommend changes in the law which might be of a political nature. But although there has been and

still is a current political discussion concerning a four-year term for state and county officers, I think I can say with propriety that it will greatly improve the public service to amend the constitution giving county attorneys a term of four years with a disqualification for reelection. Since the enactment of the ouster law of 1911 no objectionable county attorney can remain in the public service. This might be supplemented with a provision for his recall if that were considered necessary. A four-year term would relieve an energetic and zealous prosecuting attorney from the annoyances of a second campaign, and would relieve a timid prosecutor from his natural fears of political consequences growing out of his activity. My convictions on the subject are based upon ten years' experience and relationship with county attorneys. The same reform could be instituted with like profit by a similar provision concerning sheriffs.

**GARNISHMENTS.** The law of garnishment has been frequently used in this state for the purpose of oppressing railroad employees, and I have had much trouble in suppressing this sort of injustice. The law should forbid the issuance of garnishment process against any railroad employee on publication service or any other service except personal service issued out of the court of a magistrate residing in the vicinity where the railroad employee has his residence. It has not been at all uncommon for railroad employees residing at Newton, Arkansas City, Wichita, Hutchinson, Salina, Oakley, and even as far away as Dallas, Ft. Worth, Denver, Beatrice, Omaha, Sioux City and Chicago, to be subjected to suits before Wyandotte county justices of the peace, in Kansas City, Kan., and the wages of these employees garnisheed in the hands of the big railroad corporations which center at Kansas City. Publication service—wholly illegal—has been used on the employee and personal garnishment upon the railroad company, his employer, and usually for such small sums that as a matter of dollars and cents it would be cheaper for the employee to have default judgment taken against him rather than to hire a lawyer and go to Kansas City to defend his case. The most high-handed and scandalous of these practices I have succeeded in breaking up, but there is still much of this sort of oppression which needs legislation to cure completely.

OF THE PEACE. I take this opportunity to point out to the legislature that the office of justice of the peace, which has performed a useful function in England for several centuries and in America for several generations, has at last broken down as an efficient agency in the administration of justice. A judgment by a justice of the peace is almost always in sequence. Neither party is satisfied with the judgment. Infrequently the justices give judgment against the party who can afford to pay the costs, and few people have faith in justices' courts and their authority. The legislature has already recognized this by limiting their jurisdiction to suits of the first class to sums of one dollar or less, and by instituting therefor modern city courts. The legislature might go further and similarly abridge their jurisdiction in the rural counties of the state. County courts should be instituted in the sparsely settled counties of the west where the justice of the peace might fill that position. The probate judge is to be *ex officio* the juvenile court judge, and by adding to his the functions of a county judge, with jurisdiction over all matters heretofore justiciable before a justice of the peace, justices might be induced to serve in that capacity and greatly improve the administration of the law in the juvenile practice as well.

The office of justice of the peace is not to be abolished, but I would urge that all fees in that office be abolished, so that there would be no attraction to any except men of the highest ability and the broadest public spirit. Perhaps in the future this office could be restored to its ancient dignity and its holder become once more the true country gentleman and the father of his people.

DEBTORS' COURTS. There is another phase of this problem where there is no adequate means for the small creditor to recover. Small bills for wages and other small accounts are almost lost to the creditor in this state for the reason that he is forced to hire a lawyer and to pay the other expenses of litigation which no account is worth. There should be created a small court, especially in the congested centers, the mining districts, the factory districts, and in the cities, where a judge or justice of the peace, or the police judge of the city—would be authorized to give judgment concerning these small accounts, and to enforce the same to the litigants. Perhaps he should be paid a salary, although I am inclined to think that abler and

better men could be secured to administer the necessary sort of even-handed justice which the small debtors and creditors require without any salary at all. He should be authorized to subpoena people by mailing them a post card or calling them over the telephone and requiring their appearance, and give summary judgment according to the very right of the cause, just as a parent or school teacher administers justice between quarreling school boys. Perhaps the constitution would require that an appeal be allowed to some court having a jury, but I am firmly convinced that the small debtors' court is one of the requirements of our time.

**ESCHEATS.** The Kansas constitution provides that the estates of persons dying without heir or will escheat to the state for the benefit of the permanent school fund. As this state increases in wealth there is a constant growth in the amount of such property which should go to the state. But no adequate means are provided by the state for securing it, and consequently this property is made away with by trumped-up bogus heirs and fritted away by extravagant expenses of probate administration.

**CRAWFORD AND CHEROKEE COUNTIES.** Crawford and Cherokee counties were settled by fine old American stock and were originally devoted to agriculture. But in time, coal, zinc, lead and other minerals were developed, and as Kansas men do not readily take to underground labor it became necessary to bring in thousands of miners from foreign lands, principally from the countries about the Mediterranean Sea. These people knew little about Kansas laws and Kansas institutions. They became the prey of a small but influential class of people who sold liquors in violation of law. The open violation of the prohibitory law in the mining districts of these two counties continued for over twenty years. Early in my term I undertook to stamp out this traffic. In Crawford county I have been tolerably successful. In Cherokee county I can not say so much, although I have made a hard fight. The open saloon does not exist, but there is an enormous sale of intoxicants under the thin disguise of interstate commerce and otherwise. It has been almost impossible for me to get the local authorities to take vigorous and persistent action against the violators of the law; and I have been compelled to oust a number of them from office. This matter needs legislative attention.

ATTORNEY-GENERAL'S COMPENSATION. The constitution of the attorney-general's compensation shall neither be increased nor diminished during the term for which he is elected. His compensation is a salary of \$2500 per annum and expenses are allowed by law.

During the past year the demand for a wider extension of the attorney-general's activities became noticeable as far back as attorney-general's term, 1903-'07; and became quite pressing during the more recent term of Attorney-general Jackson. As a result of his larger activities, he logically received a larger compensation than theretofore, and I have criticized unjustly, I believe, about that matter. I am glad that this system of compensation was brought before the attorney-general, at the session of the legislature of 1911 I requested the Hon. James W. Orr, representative from Atchison county, and Hon. Fred Robertson, representative from Rawlins county, to examine and consider the salaries and needs of my department, and these gentlemen, after careful examination of all the facts, introduced the matter in the senate and house to that end. The bills were passed by both houses. They provided in substance that the compensation of the attorney-general and his regular assistants and employees be increased, and that he and his assistants should turn over to the state treasury all fees earned in liquor, gambling, trust or other prosecutions. The bill which was the one which passed both houses, was the following:

1. On and after the second Monday in January, the annual salary of the attorney-general shall be \$2500 dollars, and then and thereafter it shall be the duty of the attorney-general to pay into the state treasury for the general revenue fund all fees and allowances and character paid to him under color of any special statute for criminal convictions secured by violation of the prohibitory law and fees awarded to him by any statute for abating liquor nuisances and all allowances for enforcing all civil or criminal laws and ordinances and in restraint of trade and against gambles and practices and every other fee or allowance in any criminal case whatsoever whether specifically mentioned in this act or not. And for the appropriation to use of any such fee or allowance the attorney-general shall forfeit his office and may be removed therefrom.

in the manner provided by law; provided, that nothing in this section shall be construed either to increase or diminish the compensation of the attorney-general during the present term."

This bill was vetoed by the governor in a message to the house, as follows:

"STATE OF KANSAS, EXECUTIVE DEPARTMENT,  
GOVERNOR'S OFFICE, March 11, 1911.

*"To the House of Representatives:* I return herewith, without my approval, House bill No. 882, entitled 'An act relating to the attorney-general's department, prescribing the compensation for the officers and employees thereof and providing that their fees in all cases shall be turned into the state treasury, and repealing all acts and parts of acts in conflict therewith.'

"This bill on its face is intended to increase the salary of the attorney-general from \$2500 to \$4000 per year; also, to increase the salaries of two assistant attorneys-general from \$1600 to \$1800 respectively to \$2400 per annum. It also increases the salary of the chief clerk from \$1200 to \$1600 per annum, and the stenographer from \$900 to \$1200 per annum, and provides for another stenographer at \$1200 per annum, and another copyist at \$900 per annum.

"It removes from the attorney-general one great incentive to prosecute persons by repealing the law which now provides that he shall receive fees for prosecuting persons who violate the prohibitory law, and further provides that all fees collected under this law shall be turned into the state treasury. If the fees are taken away from the attorney-general's office by this session of the legislature, it is not unlikely that the next session of the legislature may proceed to take away the fees from the county attorneys and places the entire burden and expense of law enforcement upon the taxpayers of the various counties of this state instead of the present law which provides that the lawbreakers themselves shall pay into court the necessary expenses of prosecution and conviction.

"Paragraph 4378 of the General Statutes of Kansas authorizes the attorney-general to appoint as many assistants as he shall see fit to assist in the enforcement of the prohibitory law in every county of this state where the county attorney fails to do his duty. One of the best attorneys in Kansas advises me that in all probability this bill, No. 882, repeals the above provision and leaves the attorney-general without authority to appoint assistant attorneys-general in the various counties throughout the state. Section 2 of this bill authorizes the attorney-general to appoint two assistant attorneys-general and section 4 provides that 'all acts and parts of acts in conflict herewith are hereby repealed.'

my opinion that this bill is the first step in the destruction of law enforcement in Kansas.

The present law the attorney-general has received in the past four years a salary which aggregates approximately \$4000 per year, \$1500 of which was fees which went into court by the lawbreakers.

Preservation in Kansas during the past two years confirms that the present law is a good one, and the brewers should not under any circumstances be permitted to tear down and destroy the machinery with which justice is driven from our borders.

"Respectfully submitted.

W. R. STUBBS, *Governor.*"

I would agree with the governor that the prohibitory law should be preserved intact. And unless the legislature is prepared to make a large increase in the salaries of the attorneys, their fees earned should be left to them. However, that House bill No. 882 could still with the law enacted, and the governor's fear that it would take away from the attorney-general the power to appoint assistants, the prohibitory law could be sufficiently enforced by a short proviso to the effect that the prohibitory law should never so operate nor be subjected to such

as to be of some value to the legislature to say what it should be. But first I should say that many fees are allowed which are never collected; some such fees may have been collected for several years. There has actually come into my hands fees allowed me by the courts amounting to \$4454.70, which I have been able, so far, to retain to my credit. These include fees allowed the supreme court of the United States in all cases in which the state is successful; some fees in the state supreme court in the district courts for liquor, gambling and other offenses, and in certain collection cases like forfeited bonds and for collection of franchise taxes. There are outstanding claims which will reduce my net earnings, a considerable but indefinite amount of fees may yet be allowed in pending cases or already allowed by the courts. Conducting such an enormous amount of litigation, as this report shows, it will be apparent that the usual contingent fund was inadequate for the needs of the department, and I cheerfully paid out these fees (which

strictly were my own moneys) to maintain the work of the department. Perhaps the legislature intended that an attorney-general would take some such unselfish view of these allowances and that his zeal for his work would impel him to spend a considerable part of them to forward it.

As I shall have no further personal interest in the matter, for I will not again be a candidate for the office, I can without selfishness recommend, and I do recommend, the enactment of some such law as the Orr bill of 1911.

But I think the legislature might well make the salary of the attorney-general \$5000 per annum. He earns it. Moreover, the work of the department is now so great that it takes all his time; he must wholly abandon his private law practice, and when he retires from office it will take him a year or two to restore his private practice to a fair income-producing basis. The attorney-general's salary in other states runs usually from \$5000 to \$10,000 per annum.

The salaries of the assistants should also be doubled, and the stenographic force be increased. I will be glad to lay this matter at length before any legislative committee which may interest itself in the needs and affairs of the department.

#### ACKNOWLEDGMENTS.

The most cursory glance at this report showing the wide extent of our activities will prove that only by securing assistants of the highest talents would I have been able to cope with the duties of this department. The regular assistants of the office, Samuel N. Hawkes, Esq., of Stockton, and Senator S. M. Brewster, of Troy, have done the lion's share of the work on the important state cases. These men are lawyers of the first rank among Kansas practitioners, and the state of Kansas and myself are under lasting obligations to them. Neither of these gentlemen has lost a single case entrusted to his charge during my administration.

My office assistant James P. Coleman, is an invaluable man, and a very large amount of the detail work of the office, including the examination of the issues of bonds, aggregating millions of dollars annually, has fallen to him. He has also done much of the work preparing abstracts and briefs for the supreme court, and has done no small share of the actual trial practice in various courts of the state.

The other members of the regular office force are likewise

my acknowledgments and deserve well of the state. Unjust demands upon me have also necessitated employment of special counsel, principally for the enforcement of the prohibitory law, and Mr. W. P. Montgomery and F. P. Lindsay have done much courageous, valuable work for the state. I have paid them partly out of the contingent fund and partly out of fees earned by me in the enforcement of the law.

I do not conclude without giving my hearty acknowledgments to the many mayors, chiefs of police, sheriffs and attorneys of Kansas who have done much of the hard, and disagreeable work of holding in check all sorts of lawbreakers and aiding me in my work in the enforcement of the law of this state. I do not mention them specifically because there are so many of them. They have had my moral support in their work and will continue to have it so long as they exercise our little brief authority for the benefit of this commonwealth.

Respectfully submitted.

JOHN S. DAWSON,  
*Attorney-general.*

## Schedule B.

of the Supreme Court of the State of Kansas.

OF KANSAS, on the relation of C. C. Coleman, Attorney-in and for The State of Kansas, *Plaintiff*,  
*vs.*

BOARD OIL COMPANY OF INDIANA, a Corporation, THE STANDARD OIL COMPANY OF KANSAS, a Corporation, and THE PRAIRIE OIL AND GAS COMPANY, a Corporation, *Defendants*.

No. 15,193.

### PETITION.

Now C. C. Coleman, the duly elected, qualified and acting Attorney General of The State of Kansas, and gives the court to understand and is informed:

#### FIRST CAUSE OF ACTION.

*The Standard Oil Company of Indiana* is a corporation organized under the laws of the state of Indiana, and is transacting business in the state of Kansas as a foreign corporation, and that said company was duly authorized to transact business in Kansas on or about March 18, 1903, by the Charter Board of the state of Kansas, and that said Charter Board a certified copy of its charter and of its incorporation, and the full nature and character of its business, which it is engaged, the names and addresses of its officers, directors and stockholders, as is required by law. That the capital stock of said corporation is \$1,000,000. That the purposes for which said Standard Oil Company of Indiana was organized, as shown by its charter, are as follows, to wit: To manufacture the products of crude oil, to transport and sell the same, to manufacture barrels and kegs for containing said products, to erect necessary buildings and structures for the necessary machinery and do all business found to be proper or convenient in carrying on the business specified.

*The Standard Oil Company of Kansas* is a corporation which was organized on the \_\_\_\_ day of \_\_\_\_, under the laws of the state of Kansas, and transacting business throughout the said state. That said company has a capital stock of \$1,000,000, and that it was organized, as shown by its charter, for the following purposes, to wit: To manufacture, buy and sell all kinds of oils, petroleum and petroleum products and such other articles as are usually manufactured, bought or sold in the oil and petroleum products, and to hold by any and all means all real and personal property which shall be necessary, proper or convenient for carrying out the purposes aforesaid.

*The Prairie Oil and Gas Company* is a corporation which was organized on the \_\_\_\_ day of \_\_\_\_, under and by the laws of the state of Kansas, and that said corporation is transacting business throughout said state; that said corporation has a capital stock of \$300,000 and was organized for the following purposes, as shown by its charter, to wit: To explore for, develop, produce, purchase, sell, store, refine, transport and manufacture

petroleum oil and its products and other oils, and to explore for, mine, produce, purchase, sell and transport natural gas.

4. That the plaintiff further informs the court that said defendant and each of them have wholly violated the rights, privileges and franchises of corporations and have abused their powers, and have each abused their powers as such corporations, and have exercised such corporate powers in the state of Kansas wholly in violation and in contravention of the common law, statutes and public policy of the state of Kansas, and so continue to do, as hereinafter set forth.

5. That plaintiff is informed and believes that The Standard Oil Company of New Jersey is, and was at all times herein mentioned, a corporation duly organized under the laws of the state of New Jersey having a capital stock of \$120,000,000.

6. Plaintiff avers that each of the defendants have engaged in the business authorized by their said charters within the state of Kansas, and that they are now continually engaging in said business, consisting of dealing in and handling all kinds of refined and crude petroleum and the by-products thereof in the various counties, cities and villages of the state, and that the business transacted by said companies, being done at present, amounts to more than \$1,000,000.

7. That on each and all of said dates above set forth, the defendant had unlawfully entered into a combination, contract, conspiracy and agreement with certain persons, firms and corporations, and with the directors, stockholders, servants, employees and agents thereof, as is hereinafter more particularly set forth, and had issued, caused to be issued, and assisted in issuing, certain trust certificates of stock, also for the unlawful purpose, effect and intent of placing the management of said combination and the defendant's business in the control of the trustees holding such trust certificates, and with the intent of fixing and limiting the price of certain articles of commerce, use and consumption hereinafter named, and to lessen the production and sale of articles of commerce, use and consumption, and to prevent, restrict and limit the manufacture and sale of such articles of commerce and to establish a monopoly therein as hereinafter more particularly described and set forth.

8. The plaintiff further alleges that the defendant corporations were each organized by the shareholders and directors thereof for the unlawful purpose of entering into a combine, contract and agreement with a view to preventing the sale and free competition in the product, manufacture and sale of the articles of commerce described in the articles of incorporation of said companies and for the purpose of advancing and controlling the price and cost thereof to the consumers and increasing and controlling the price thereof to producers, within this state; and that soon after the organization of each of the said companies, the stockholders therein, and the real and true owners thereof, became the owners in fact of all or nearly all of the stock of each of the said defendant corporations; and that under and in pursuance of a combination, contract and agreement, trust certificates of the stock of said defendant corporations were issued to one and the same person or persons, and the management and control of the business of each of the defendant corporations was placed in the hands of the same persons, or board or boards of trustees.

9. That plaintiff avers the facts to be that all of the stock of the defendant companies, whether now being held by trustees, or in the name of some person or persons pretending to own the same, in truth and in fact belongs to and is the property of the said Standard Oil Company of the state of New Jersey and that said arrangement has been entered into by reason of unlawful agreements, contracts and combinations of the persons composing said corporations, and of the directors, trustees and shareholders of each of the said corporations, and by the agents,

d employees of each of the said corporations; that the names of said persons are unknown to the plaintiff, and that the management of the business of each of defendant companies of the said unlawful agreements and purposes for which each organized, and by reason of the fact that the stock of defendant corporations is in fact owned and controlled by the Standard Oil Company of New Jersey, and by virtue of said unlawful acts and agreements, wholly and absolutely within the control of the Standard Oil Company of New Jersey; and that said facts entitle the Standard Oil Company of New Jersey to have a monopoly of the manufacture and articles of commerce named in said articles of incorporation of defendant companies; and that said Standard Oil Company of New Jersey is at the present time maintaining said monopoly by means of said combinations in restraint of trade as herein set forth.

That said defendants had at and on all the dates mentioned entered into a combination, and into contracts and agreements with persons and corporations, with a view to preventing the sale and competition in the importation, transportation and sale of articles and with the intent to limit and fix the price thereof and lessen the sale of said articles of commerce, use and consumption thereof thereby conspired and combined with said persons within the state of Kansas for the purpose of securing a monopoly of the manufacture, commerce and line of business herein described, and had on said dates mentioned herein created and entered into a combination of skill and acts between defendants and two or more of the persons and corporations mentioned above, for the purpose of carrying out restraints in trade and commerce and aids to commerce, and in the free pursuit of the business authorized and permitted by the laws of the state as herein described, and for the purpose of increasing the sale of said merchandise, and for the purpose of preventing competition in the manufacture and sale of said merchandise and commodities for the purpose of fixing and controlling the price thereof to the detriment of the purchasers of said commodities in the regular trade within the state of Kansas; and had on said dates mentioned entered into combinations and agreements as herein set forth, by which they had bound themselves not to sell and manufacture, transport or dispose of said articles below a common stated figure and price, and for the purpose of maintaining the price of such articles, commodities and merchandise at a fixed and graded figure, and for the further purpose of excluding a free and unrestricted competition among themselves in the transportation, sale and manufacture of all articles and commodities, and that by the terms of said combinations and agreements they had agreed to pool and combine and unite their interests they have in the manufacture, sale and transportation of such articles of commerce, commodities and merchandise as herein described; and that such agreements, averments, obligation and combinations are and are all in violation of the common law, the statutes and public policy of the state of Kansas, and null and void, as more fully appears from the allegations and averments herein stated.

The plaintiff avers that, as appears from said charter, The Prairie State Oil Company of Kansas is a corporation organized for the purpose of exploring for and mining petroleum oil and for the purpose of selling the same and its products. That The Standard Oil Company of Kansas was organized, as appears from its charter, for the purpose of exploring for and mining petroleum oil and for the purpose of selling all kinds of oils and petroleum products. That The Standard Oil Company of Indiana, as appears from its charter, is a corporation organized for the purpose, among others, of transporting and manufacturing of crude petroleum.

12. That soon after the organization of defendant Standard Oil Company of Kansas, and The Prairie Oil and Gas Company, the exact time plaintiff is unable to state, each of the defendants entered into an arrangement, combination and agreement with each other, whereby the defendant, The Prairie Oil and Gas Company, was bound to sell all of its product and output of commodities only to The Standard Oil Company of Kansas or The Standard Oil Company of Indiana, and whereby defendant, Standard Oil Company of Kansas, was bound to sell its products, manufactures and output of commodities only to The Standard Oil Company of Indiana, and defendant, Standard Oil Company of Indiana, became the sole agent for the sale and distribution to the purchasing public of the products and output of the other defendants above named, and the defendant, Standard Oil Company of Kansas, also agreed and became bound by said agreement not to purchase any of the commodities in which it was organized to deal from any other person or firm than the said Prairie Oil and Gas Company, and the said Standard Oil Company of Indiana became bound not to purchase any of the commodities in which it was organized to deal from any other person, firm or company than the other defendants herein named. That such arrangement and agreement then and now constitutes an unlawful combination in restraint of trade, to fix and regulate prices of said commodities within said state and to obtain a monopoly in the trade therein, and a trust within the meaning of the laws of Kansas. That plaintiff is unable to state whether said agreements were in writing or oral, or made in the definite and precise form of ordinary and usual legal contracts or agreements, or whether the said agreements were the result of the stock and assets of said companies being held and controlled by the same person, persons or board of managing directors or trustees and the result of the carrying out of the unlawful purposes, intent and agreements under which defendant corporations were organized, but plaintiff alleges that said understanding, combination and agreement does in fact exist and defendant corporations are in fact acting under the terms and conditions of the same in violation of the common law, the public policy and the statutes of Kansas.

13. Your informant further states that defendants herein and the Standard Oil Company of New Jersey, by reason of said combination, pool, trust and understanding, and the acts done in furtherance and in pursuance thereof, as herein stated, have been able to control and supply, and do control and supply, to the retail dealers and to the general public in the state of Kansas fully seventy-five per cent of all the naphtha, benzine, gasoline, kerosene, lubricating oil and other products of petroleum offered for sale and sold and transported for general consumption in the state of Kansas; and that by virtue of said pool, trust, agreement, combination, confederation and understanding so entered into by said defendants as aforesaid, and by reason of the acts hereinbefore described, so done by said defendants in pursuance of and in the enforcement of said pool, trust, agreement and understanding, they have been able to control, and do control, the prices of the products of petroleum in the state of Kansas, and they do prevent, and have prevented, competition among themselves in the purchase and sale of the products of petroleum in the state of Kansas; and that through the construction of pipe-lines for transporting oil and the development of the oil-producing fields of Kansas by said defendants, each pretending to act as separate and competing companies, and at the same time observing and carrying out the said unlawful combinations and secret understandings of dealing exclusively with each other, the defendants have secured complete control of the oil-producing refining and manufacturing business and the selling and supplying of the same to consumers throughout the state of Kansas, and have stifled the production, trade and competition therein, and are at present, through and by means of said illegal combinations and monopoly, compelling the producers of petroleum to ac-

rally low prices, ruinous to their business, and entailing  
to the producers in said fields, and are at the same time,  
illegal means, compelling the purchasing public through-  
out to pay unnaturally high prices for the manufactured and  
products of the same for consumption and use, and that the  
and purchasing public have and are, through the operation of  
trading, secret understandings, pool and monopoly, deprived  
wholesome competition in the said trades and businesses,  
damage of the people of the state.

## SECOND CAUSE OF ACTION.

Plaintiff refers to each and every averment, statement and alle-  
gation in the first cause of action in this petition contained, and makes  
this to be the first cause of action.

Plaintiff further avers that The Standard Oil Company of New  
Jersey has a capital stock of \$120,000,000, and that the capital stocks  
of The Standard Oil Company of Kansas, The Standard Oil Company of  
Indiana, The Prairie Oil and Gas Company of Kansas are as here-  
in set forth in this petition. And plaintiff states and avers that the  
defendants as the agents of The Standard Oil Company of  
New Jersey as herein averred, is resorted to by the said Standard Oil  
Company of New Jersey as a means of defrauding the state of Kansas  
under and license fees that the said Standard Oil Company of  
New Jersey would be compelled to pay under the laws of the state of  
Kansas, and that the said Standard Oil Company of New Jersey is  
unable to transact business in the state of Kansas, and that  
the agreement between the defendants and the said Standard Oil  
Company of New Jersey is a mere shift and device made, entered into  
for the purpose of enabling the said Standard Oil Company of  
New Jersey to transact business in the state of Kansas  
under the charter and license fees and charges required by  
the state of Kansas and from foreign corporations transacting busi-  
ness in the state of Kansas as such, and that the state of Kansas  
is defrauded of a large sum of money by the said acts and con-  
duct of the said corporations, which your petitioner is informed and  
believes to be about the sum of \$24,000, all of which is in violation of  
the laws of the state of Kansas.

WHEREFORE, plaintiff prays that the charter, franchises, rights and  
the corporate existence of said defendant company within  
the state of Kansas shall forthwith cease and determine, in compliance  
with the said provisions of the General Statutes of 1901, and that  
the said company be ousted and excluded of and from the exercise within this  
state of all corporate acts, franchises and privileges; and that  
this proceeding be adjudged against the defendants, and that  
the defendants be restrained from further carrying out and continuing  
the said illegal and monopolistic contracts; and that a  
writ be granted for the property and effects of the defendants be ap-  
propriated, and an accounting be taken of their property and assets, and  
distribution thereof made among the creditors and persons  
interested, in compliance with the statutes of the state of Kansas,  
and further relief as in the eyes of the court may seem  
fit and equitable.

C. C. COLEMAN,  
Attorney-general.

F. S. JACKSON,  
Asst. Attorney-general.

REPORT OF L. W. KEPLINGER, COMMISSIONER OF  
THE SUPREME COURT. FILED JUNE 11, 1912.

*In the Supreme Court of the State of Kansas.*

THE STATE OF KANSAS, Plaintiff,

vs.

STANDARD OIL COMPANY, et al., Defendants.

FINDING OF FACT.

1. The Standard Oil Company of Ohio was organized in 1870. Its objects and purposes were to carry on various branches of the oil business.

2. Prior to 1870, the said Ohio Company and its stockholders had adopted the policy of organizing other like corporations in various localities, also of acquiring stock in such corporations, sometimes all, sometimes a majority, and sometimes less, in other like corporations and in partnerships engaged in such business, also sometimes physical properties suitable for use in such business. Such acquisitions were paid for by the Ohio Company or out of the profits arising from the operation of like properties, but the title and control thereof was taken to and held by various individual trustees, who held, managed, used and operated the same, not for the Ohio Company but for the individual stockholders thereof, whose interest therein was in proportion to the amount of stock held by them respectively in the Ohio Company.

3. The stock of the Ohio Company, originally \$1,000,000, was increased to \$2,500,000 in 1875, and to \$3,500,000 in 1879, at which figure it has ever since remained.

4. In 1879, for the purpose of securing a more complete unification in the handling of the trust properties mentioned in the preceding findings and to provide for an administrative oversight of them, an agreement was entered into by the stockholders of the Ohio Company and Messrs. Vilas, Keith and Chester, who were to hold in trust for the stockholders of the Ohio Company, whose interests were to be in proportion to the amount of stock held by them respectively in said company, and to divide and distribute the same between said beneficiaries as soon as they could conveniently do so.

5. Only a part of the agreement mentioned in the preceding finding, which agreement is known as the Vilas, Keith and Chester agreement, is in evidence, and the precise duties of the trustees therein named do not appear, but in fact the trust did not terminate until 1882. While holding as such trustees, Vilas, Keith and Chester received the physical properties, the stocks and interests theretofore held by such individual trustees, and managed and operated the same, and out of the profits arising from such operation they organized other corporations, taking all of the stock; also they sometimes took a majority, and sometimes less, in other corporations engaged in different branches of the oil business, until in the early part of 1882, at which time the total value of the trust properties held by them, including the value of the stock of the Ohio Company, amounted to \$70,000,000.

6. In the early part of 1882 an agreement known as the trust agreement was entered into by the Ohio Company and its stockholders, who were the beneficiaries of the Vilas, Keith and Chester agreement, and Vilas, Keith and Chester. This agreement is not in evidence, but the evidence shows that it was the culmination of efforts, of which the Vilas, Keith and Chester agreement was the initial step, to provide for a more

unification of the various Standard Oil interests, so that the union of them might result in having each unit do the business more efficiently than it had theretofore done, in the area which it was qualified to work in. And after the making of this trust there was in fact a more thorough unification of such interests in a more thorough direction as to the operation of the plants in various localities and in the various corporations. And this was continued until the present time, the Standard Oil Company of New Jersey now having and exercising substantially the same Standard Oil interests that was had and exercised by the trust under the trust agreement of 1882 prior to its dissolution. Prior to the making of the trust agreement, and presumably in accordance with its requirements, all of the stock of the Ohio Company, and all other stocks, properties and interests theretofore held by the Ohio Company and Chester, were transferred, delivered to and vested in the trustees, who held the same in trust for the benefit of the prior beneficiaries, and said trustees thereafter held, operated, and used the same as such trustees. The stockholders of the Ohio Company were the sole beneficiaries of this trust, and their interests were in proportion to the amount of the stock held by the Ohio Company.

Hence their interests, each beneficiary of the trust so created received a trust certificate. Inasmuch as the estimated value of the Ohio Company at that time amounted to \$70,000,000, while the value of the Standard Oil Company was \$3,500,000, each beneficiary received a trust certificate for twenty shares for each share of stock in the Ohio Company, the value of each share in the trust being equal to the value of each share of stock. These trust certificates were negotiable, and the trustees kept books in which the issue of such certificates was recorded. In short, this trust arrangement constituted a trust, and was called a quasi-corporation, in which the title was held by the trustees, who exercised substantially the functions ordinarily exercised by the directors in corporations.

At the time of the creation of the trust of 1882 the property of the Ohio Company consisted chiefly of the stock of various corporations in various localities in different branches of the oil business. The Ohio Company owned all, and in others a majority, and in others a minority of the stock.

During the period from 1882 to 1899, as new oil fields were opened up in different parts of the country, a large number of corporations were created and organized by the said trustees, all the stock of such corporations substantially was held by the trustees for the benefit of the beneficiaries of the trust agreement last named. Among the corporations included was the Standard Oil Company of Indiana, the Standard Oil Company of New Jersey, the Standard Oil Company of New York, the Standard Oil Transit Company; and all the stock of the corporations so created was taken and held by the said trustees and its certificates were provided in the trust agreement. In 1899 the aggregate value of the said trust certificates so issued by the Standard Oil Company under the trust agreement of 1882, was about ninety-eight millions of dollars. Such corporations were, during the continuance of the trust, managed, controlled and operated by the trustees.

Among the corporations organized by the trust of 1882, as hereinafter mentioned, was the Standard Oil Company of New Jersey. The Standard Oil Company of New Jersey was organized by the Standard Oil Company in 1882 under the laws of that state, in August of that year, with a paid-up stock of \$3,000,000, divided into thirty thousand shares of \$100 each. The original shareholders and the amount of stock owned by each were as follows:

H. M. Flagler, Paul Babcock, jr., James McGee, Thos. C. Bushnell, each one share.

John D. Rockefeller, William Rockefeller, J. A. Bostwick, John D. Archbold, O. H. Payne, William G. Warden, Benjamin Brewster, Charles Pratt and H. M. Flagler, trustees of the Standard Oil Trust, nine hundred and ninety-six shares.

The objects and purposes of said corporation, as stated in its charter, were, "the refining of petroleum; the manufacture of the various products thereof; the purchasing of the crude material and the sale of manufactured products thereof; the manufacture of barrels, boxes, cans and other packages in which the manufactured products may be kept or transported; the manufacture and restoration of acids and whatever other substances may be used in the manufacture of petroleum."

12. Among the corporations organized by the Standard Oil Trust was the defendant, the Standard Oil Company of Indiana.

The defendant the Standard Oil Company, an Indiana corporation, hereinafter called the "Indiana Company," is a corporation, and was organized as such under the laws of the state of Indiana on the 18th day of June, 1889, with a capital stock of \$500,000, which, on April 14th, 1892, was increased to \$1,000,000. It commenced doing business in the state of Kansas on the first day of March, 1896, and has been so engaged continuously ever since. Prior to said first day of March, 1896, the Indiana Company had never engaged in or transacted any business within the state of Kansas. The Charter Board granted it a license to engage in business in the state of Kansas as a foreign corporation on the 18th day of March, 1903. Its annual reports for each succeeding year have been duly filed and approved. Its corporate powers are as follows:

To manufacture the products of crude petroleum; to transport and sell the same; to manufacture barrels and packages for containing said products; to erect necessary buildings and manufacture the necessary machinery in carrying on the business specified.

13. The Standard Oil Trust, organized in 1882, practically owned all of the stock of the Standard Oil Company of Indiana. In March, 1892, the stock of this company was increased to one million dollars, practically all of it being owned by the Standard Oil Trust. The original stock of this company, first \$500,000, was afterwards increased to \$1,000,000. Practically all of this stock was held by the trust so long as the trust continued to exist.

14. Among the corporations organized by the trust, as before stated, was the Standard Oil Company of Kentucky. This company was organized in 1886 and all of its stock taken and held by the trustees of the trust of 1882.

15. The National Transit Company is a corporation, and was incorporated and organized under the laws of the state of Pennsylvania on the 30th day of April, 1881, and under its charter and the laws of the state of Pennsylvania is authorized to engage in and has and is engaged in many kinds of business, among which are the following, to wit: To purchase, hold, sell, assign, mortgage, pledge or otherwise dispose of the shares of capital or of bonds, securities or evidences of indebtedness created by any other corporation or corporations of the state of Pennsylvania or any other state, and while the owner thereof, to exercise all the rights and privileges of ownership, including the right to vote thereon.

16. Most of the stock of the National Transit Company belonged to Vilas, Keith and Chester, Trustees. The remainder was acquired by the trustees under the trust agreement of 1882.

17. Sometime prior to March, 1892, a decision of some kind by the supreme court of Ohio necessitated a dissolution of the Trust of 1882. Such dissolution began in March, 1892, but was not completed until 1899.

On the 17th day of March, 1892, the name of the Standard Oil New Jersey was changed to "The New Jersey Company." In 1899, and as a means and for the purpose of still continuing the management of the Standard Oil interests after the dissolution of the trust, the stock of the New Jersey Company was increased to \$110,000,000, which sum was the estimated value of the properties and interests theretofore held by the trust, which was distributed among the beneficiaries of the trust in proportion to their respective interests in the trust, and all the stocks, properties and interests theretofore held by the trustees were transferred to the New Jersey Company, or to companies a majority of whose stock was controlled by it, and the dissolution of the trust was complete; and in view of such increase of stock the charter of the New Jersey Company was amended so as to declare its objects and purposes to be

The objects for which this company is formed are: to do all kinds of manufacturing and trading business; transporting goods or commodities by land or water in any manner; to buy, sell, lease and improve, build houses, structures, vessels, cars, wharves, docks and piers, and operate pipe lines; to erect and operate telegraph and telephone lines and lines for conducting electricity; to enter into and execute contracts of every kind pertaining to its business; to acquire, lease and grant licenses under patent rights; to purchase or otherwise hold, sell, assign and transfer shares of capital stock and other evidences of indebtedness of corporations, and to exercise all the privileges of ownership, including voting upon the stocks carried on its business and have offices and agencies throughout the world, and to hold, purchase, mortgage and convey real and personal property outside the state of New Jersey."

In 1900, and at a time when the New Jersey Company was the controlling interest in practically all of the stock of the National Transit Company, the New Jersey Company organized the defendant the Prairie Oil and Gas Company.

The defendant the Standard Oil Company, a Kansas corporation, is called the "Kansas Company," is a corporation, and was organized under the laws of the state of Kansas on the 24th of March, 1892, with a capital stock of \$1000, which on May 16th, 1892, was increased to \$100,000, and again, on June 12th, 1906, to \$1,000,000. Its reports have been filed and approved annually. Its corporate powers are as follows:

"To manufacture, buy and sell all kinds of oils, petroleum, and petroleum products, and such other articles as are usually manufactured, sold or bought by dealers in oils and petroleum products, and to acquire, hold, buy and sell by any and every kind of tenure all real and personal property which shall be necessary, proper and convenient for carrying on the business aforesaid.

The evidence does not show that either the New Jersey Company or the National Transit Company, as such, ever transacted any business in the state of Kansas.

At the time when the New Jersey Company owned all of its stock in the Standard Oil Company of Kentucky organized the defendant, the National Transit Company of Kansas, and became the owner and holder of all of its stock.

The New Jersey Company, by virtue of its charter and laws, so far as such laws and charter can confer such power, to acquire, hold and vote the capital stocks of the Indiana Company, the New Jersey Company and the National Transit Company.

The National Transit Company, by virtue of its charter and the laws of Pennsylvania, so far as such charter and laws can confer such

power, has power to own and hold the capital stock of the Prairie Company.

26. That the New Jersey Company is now and ever since its organization has been extensively engaged in the operation of refineries and the transportation and marketing of the manufactured products of crude petroleum.

27. The Kansas Company owns and operates a refinery at Neodesha, Wilson county, Kansas, built in 1897; it receives crude petroleum there, from which it manufactures refined or illuminating oils, gasoline, road and fuel oils; it consumes about three million barrels of crude oil annually, all of which is produced in Kansas and Oklahoma.

The Kansas Company has never engaged in any business other than that above described.

The entire capital of the Kansas Company is invested and employed in its refinery and the operation thereof.

28. The New Jersey Company practically owns all and owns practically all of the stock of the Kansas Company, the Indiana Company, the Prairie Oil and Gas Company, and the Standard Oil Company of Kentucky and the National Transit Company.

29. The National Transit Company, as representative of the New Jersey Company, owns practically all and practically does own all of the stock in the Prairie Oil and Gas Company.

30. The evidence shows that the organization of each of the defendant companies herein was caused and procured by the New Jersey Company, except that the Indiana Company was organized by the trustees of the 1882 trust.

31. It was the intention of the creators of each of the defendant companies that there should never be any competition between them, and there never has been any competition between them, and there never has been any intention on the part of either of the defendants to engage in any business engaged in or carried on by either of the other defendants.

32. The stock of the several defendants was in fact issued to various individuals, and the names of the Kentucky Company, of the New Jersey Company and of the National Transit Company do not appear upon the records of the defendant companies, but such stocks are in fact held in trust for the New Jersey Company. Aside from such inferences, if any, as may be drawn from these facts, there is no evidence that defendants herein, or either of them, ever issued or caused to be issued or assisted in issuing trust certificates of stock for any purpose.

33. The only business dealings which the defendants have with each other, as shown by the evidence, is as follows:

The Prairie Company sells crude petroleum to each of the other defendants; the Kansas Company purchases crude petroleum from the Prairie Company, as aforesaid, and sells the manufactured products thereof to the Indiana Company; the Indiana Company purchases crude petroleum from the Prairie Company and buys manufactured products from the Kansas Company, and all of said sales and purchases so made by and between said companies, so far as formalities are concerned and to all outward appearances, are made in the ordinary course of business and as similar transactions are ordinarily made, conducted and performed between other merchants.

In case of sales from one to another of the defendants, each of the parties knew the fact to be, and the fact was, that the stockholders of the New Jersey Company were the ultimate beneficiaries of the deal, whatever may have been the price agreed upon.

34. The Kansas Company is the legal owner of and operates a refinery at Neodesha, Wilson county, Kansas, which was built in 1897.

crude petroleum from the Prairie Company, from which it is refined or illuminating oils, gasoline, road and fuel oils. About three million barrels of crude oil annually, all of which are produced in Kansas and Oklahoma. The Kansas Company has been engaged in no other business other than that above described, and its capital is invested in and employed in its refinery and the operation of the same.

The Indiana Company is the legal owner of and operates three refineries. One at Whiting, Indiana, built in 1889, with a capacity of producing about three million barrels of crude oil per year, which employs about 1800 men and represents an investment of about \$8,000,000; one at Sugar Creek, built in 1904, with a capacity of seven million barrels of crude oil per year, which employs about 850 men and represents an investment of about \$5,000,000; and one at Wood River, Illinois, built in 1907, with a capacity of three million barrels of crude oil per year, which employs about 350 men and represents an investment of \$2,250,000.

The Whiting and Sugar Creek refineries are now run exclusively on crude oil purchased in Kansas and Oklahoma; the Wood River refinery is supplied with crude oil from the Illinois field.

At Whiting refinery, there is manufactured all grades of naphthas, lubricating, road and fuel oils, paraffine wax, candles and kerosene. Practically all of the products of petroleum except a few of the lighter grades such as vaseline.

At Sugar Creek, naphthas, illuminating, road and fuel oils are produced.

At Wood River, naphthas and illuminating oils, a few grades of lubricating oil and crude wax are manufactured, but no candles or coke.

Two-thirds of the men employed at the refineries of the Indiana Company are at that of the Kansas Company are skilled workmen.

The lubricating-oil plant at the Whiting refinery is composed of many intricate pieces of machinery, employs delicate processes of refining, represents an investment of \$2,000,000, and produces lubricating oil of more uniform and satisfactory qualities than any others in the State of Kansas.

Lubricating oils are manufactured by the Kansas Company at its refinery or by the Indiana Company at its Sugar Creek refinery. The reason that the demand for some in the tributary territory is sufficient to justify the expense of the construction and maintenance of the necessary equipment.

In the early history of the oil business, refined oil, commonly known as kerosene, was the only marketable product of petroleum; and the products of which are now made into naphtha, gasoline, lubricating oil, fuel oils, paraffine and coke, were thrown away, destroyed or vaporized.

To create a demand for gasoline, the Indiana Company spent thousands of dollars experimenting with gasoline-consuming devices, engines and lighting stations and appliances. The demand for gasoline now exceeds the demand for kerosene, and as only a small amount of each can be produced from the crude, the sale of kerosene-consuming devices became needless and was abandoned five years ago. Experiments of similar character made to increase the consumption of gasoline in various kinds of stoves, both heating and cooking, have been successful. The Indiana Company; also lamps, lanterns, burners and stoves. Kerosene stoves have now practically supplanted gasoline stoves. During the year 1909, the Indiana Company sold 125,000 of these stoves in ten states in which it does a marketing business, and during the same year sold in the State of Kansas 137,915 lamps, 1,967,212 wicks, and 10,000 lamp burners.

Animal and vegetable oils were used almost exclusively for lamp purposes when the Indiana Company commenced business;

and to create a demand for the products of petroleum for lubricating purposes it employed and sent out a large number of mechanical engineers and experts to make practical and scientific demonstrations. Oils produced from petroleum are now recognized as the best lubricants known.

42. Many practical and valuable improvements have been made during the past twenty years in the machinery and processes by which the various grades of crude oils are treated and the manufactured products thereof produced. The Indiana Company maintains, for the especial purpose of promoting such improvements, an experimental department in charge of five expert mechanics and five competent chemists, and has during said twenty years expended over one million dollars in carrying forward said experimental work. The improved machinery, appliances and processes employed in the operation of its refineries were all discovered and devised by Standard Oil employees.

43. The Indiana Company does not employ in the manufacture or sale of any of its products any patented machinery, processes or devices which are not open to the free use of its competitors, neither does the Kansas Company in the operation of its refinery at Neodesha.

44. Generally speaking, there are six oil fields in the United States, which, in the order of their relative quality and values are, one, Pennsylvania, including West Virginia; two, Ohio-Indiana, which includes the so-called Lima oil; three, Illinois; four, Kansas-Oklahoma; five, Texas; and six, California.

45. The crude oil from the Pennsylvania field is most valuable, because it yields the largest percentage of naphtha and illuminating oils, and about the same amount of paraffine as that of Ohio. The crude from the Illinois and Kansas-Oklahoma fields contains naphtha, illuminating and lubricating oils and paraffine of as good quality but less in quantity.

The naphtha, illuminating and lubricating oils are relatively the most valuable parts of crude oil, the remainder being sold at less per gallon than the crude oil costs.

46. The commercial tests of refined oil are, (1) flash, (2) burning, (3) gravity, (4) wick-climbing power, (5) color, (6) lamp, and to some extent (7) photometric.

The value of the flash test is to ascertain whether the oil is safe under ordinary conditions for domestic use, and does not indicate the quality. It is made by heating the oil and applying a flame. To ascertain the temperature at which it flashes, that is, make a little puff and go out, is the object of the flash test. Then the object of the burning test is to ascertain the point or temperature at which the oil will take fire and burn—which is higher. The flash and burning tests are auxiliary, and the application of either one indicates what the other will be.

The gravity test is valueless unless the field in which the crude, from which the refined oil came, is known, and nothing is gained by comparing the specific gravity of oils produced from the crude of different fields. The specific gravity of an oil is merely its weight as compared with water per unit of volume. When this test is applied to two refined oils produced from crude from the same field, the one of lighter gravity will climb the wick more rapidly.

The wick-climbing power test is to ascertain the freedom with which the oil flows through the wick.

The color test is employed to ascertain the extent to which the oil contains foreign substances or impurities. The whiter the color—the more nearly it resembles water—the better.

46½. By the photometric test the candlepower of illuminating oil is measured, but to be of value, in a comparative sense, the amount of oil consumed must also be measured.

test is the last and best method of testing the quality of oil, and refers merely to the manner in which it behaves in the lamp and the results thus produced.

Producers and consumers were prejudiced against refined oil and manufactured from the Kansas-Oklahoma crude during the early years of that field, because of its low gravity as compared with Pennsylvania and Ohio. The Indiana Company, to overcome that prejudice and convince consumers that the specific gravity had nothing to do with the burning qualities or safety of the oil, sent experts out to make laboratory and practical tests, and as the result of such efforts the refined oil and gasoline now sold by the Indiana Company in the ten states in which it does a marketing business is manufactured from crude oil produced in the Kansas-Oklahoma field.

Kansas-Oklahoma crude oil contains about 10 per cent of illuminating oil.

The Indiana Company does a marketing business in the states of Iowa, Missouri, Kansas, Michigan, Wisconsin, Minnesota, Nebraska and South Dakota, and in that branch of its business has 56,508.32, employs about 3,641 men, and operates 1,331

During the year 1909 the Indiana Company marketed, in the ten states in which it does a marketing business, the following products of Kansas-Oklahoma crude oil (in barrels of 50 gal. each):

Refined oil .....	2,476,509
Gasoline .....	2,374,904
Lubricating oil .....	866,492
Road oil .....	41,604
Fuel oil .....	268,462
<b>Total .....</b>	<b>6,027,971</b>

The Indiana Company is employed to make and maintain roads, and is a common feature of the oil business. The Indiana Company has been extensively with it, and although the demand therefor is increasing, sales thereof have not yet aggregated enough to justify the expense incurred.

Kansas-Oklahoma crude oil contains about twice as much illuminating oil as it does

95 per cent of all products of petroleum marketed by the Indiana Company in said ten states are manufactured from crude oil produced in the Kansas-Oklahoma field.

At the time the Indiana Company commenced to create a demand for its products and as an additional inducement for the owners of power plants to use gasoline engines, it agreed to sell them gasoline, and this practice is still followed. It also sells lubricating oils direct to the "smokestack" trade—operators of mills, elevators, manufacturing establishments, etc. With these two exceptions the business of the Indiana Company in Kansas is that of a wholesaler only.

The Indiana Company owns and operates 156 tank stations within the state of Kansas, at which it keeps for sale and sells and distributes gasoline, by tank wagons and otherwise, refined oil, gasoline and other commodities hereinafter mentioned, and in so doing engages employees, and has an investment, in said tank stations and in the state of Kansas other than that above described.

The tank stations of the Indiana Company in Kansas referred to consist of one or more large steel tanks in which is stored one or more barrels of refined oil and gasoline. The tanks are constructed of steel, and are provided with the view of safely holding their contents, and are so constructed that they may be shut off in case of fire. Where there is a

demand for more than one grade of illuminating oil additional tanks are installed. There is also a warehouse, depending in size upon the amount of business, and tank wagons (divided into compartments) sufficient in number to supply the trade, not only in the town where the station is located, but also adjacent points from ten to twenty miles distant. Oil is shipped in tank cars to these stations, emptied into the aforesaid tanks, and from there drawn off into the tank wagons and distributed. The tank-wagon buckets into which the oil is drawn from the tank wagons and measured to the dealer are, when sent to the stations, sealed with the government seal from Washington, D. C., and are full standard measure. Agents are not permitted to purchase or use any other buckets or measuring devices. Each tank wagon is provided with a device for counting the number of buckets drawn off, and carelessness or inattention of the agent operating same would benefit the customer and not the company.

The Indiana Company's salesmen in Kansas each have charge of, and are responsible for, five or six of these tank stations, and in addition call on the trade to see that supplies are furnished promptly and the business diligently taken care of. Over the salesmen are managers, one of whom is located in Wichita, one at Kansas City, Kan., and one in St. Joseph, Mo. It is the duty of the managers to supervise and direct the operations of the other agents and salesmen. The company's general officers, stationed at Chicago, have supervision over the entire selling organization, and have under them various departments and department heads, each of whom looks particularly after the line of business committed to his special charge. These departments are known as "lubricating department," "stove and lamp department," "purchasing department," "traffic department," "fuel oil department" and "road oil department." The general manager, in company with heads of departments, visits the various managers at least twice each year, and there confers with the salesmen and agents with the view of improving the service and method of taking care of the business.

57. The competitors of the Indiana Company also maintain tank stations in the state of Kansas similar in character but fewer in number and less extensive and efficient.

58. By means of its system of tank-wagon deliveries the Indiana Company places oil in the tanks of retail dealers in such a way as to enable the latter to sell and dispose of same without having to handle more than once, i. e., when drawn off for the customer.

59. Seventy-five per cent of the refined oil and gasoline which the Indiana Company sells in the state of Kansas is manufactured by the Kansas Company at Neodesha; the other 25 per cent is manufactured by the Indiana Company at Sugar Creek.

60. Two grades of illuminating oil are sold by the Indiana Company in Kansas, i. e., Perfection and Standard White, sometimes referred to in the refineries as Water White and Prime White, respectively. These brands have both been sold for more than ten years, and represent separate and distinct grades. The Perfection is the better of the two. Its wick-climbing power is greater by about one hundred points, thus producing better combustion, less wick char and less discoloration of the chimney. The Standard White has more paraffine and other foreign substances in it, and in winter these chill and congeal and prevent a free flow through the wick. The specific gravity of Perfection is about 43, that of Standard White is about 40. The color of Perfection is better by four or five shades, and 25 per cent more Standard White can be taken from a given amount of crude.

61. The Indiana Company does not deliver all of the refined oil and gasoline which it sells in Kansas by tank wagons. Where sales are made of grades not carried at the nearest tank station or at points to which a tank wagon does not go, shipments are made in barrels—wooden and iron. Where wooden barrels are employed, they become the property of

out may be sold to the company at current prices or to his  
ers as he desires. The iron barrels remain the property of  
and are to be returned.

shipment of oil in barrels entails an additional expense to  
er, of cartage from the station, of emptying from the barrel  
s, and then of returning the barrel to the shipper, if it is  
shipments of oil in wooden barrels are also subject to leakage  
nation with glue and other impurities incident to its contact

Indiana Company is the only wholesale dealer in oils in  
h employs iron barrels.

General tendency of the prices at which the Indiana Company  
in Kansas during the past ten years has been downward—  
ut 13 cents per gallon for Perfection oil and 16 cents per  
asoline in 1902 to 6.6 cents per gallon for Perfection and 13  
allon for gasoline in 1910, and during the same period the  
l grades has gradually improved.

Indiana Company had in 1900 three competitors in the sale  
tion of petroleum products in the state of Kansas. At the  
it has twenty-two.

proportion of business transacted by the Indiana Company  
petitors since 1905 is, as stated by the oil inspector of the  
sas in his annual reports to the governor, as follows:

ports on file in this office from the several Kansas refineries  
ey have during the year ending December 1, 1906, refined  
upon the market 49,622 barrels of oil and 7,713 barrels of  
f this amount 25,535 barrels of oil and 6,266 barrels of gaso-  
bmitted to this department for inspection and were then  
the market within this state, and as a matter of comparison  
t during the year ending December 1, 1905, there were sub-  
is department for inspection by the Kansas refineries 4,865  
l and 32 barrels of gasoline, showing that during the year  
ansas refineries made a net gain of 29,904 barrels of oil and  
ected and sold within the state."

ports on file in this office show that during the year ending  
o, 1907, there has been inspected by this department 369,847  
il and gasoline. Of this amount the independent refineries  
in this state furnished 53,583 barrels of oil and 13,216 bar-  
ine, making a total of 66,799 barrels, or 18 per cent of the  
of all oil and gasoline consumed in Kansas during the year  
matter of comparison it might be of interest to note that  
ear 1906 the independent refineries furnished and submitted  
rtment for inspection 31,801 barrels of oil and gasoline, or  
of all oil and gasoline consumed in the state. From this it  
that the independent production of oil in Kansas has made  
f 34,998 barrels, or 8½ per cent of all oil and gasoline con-  
ansas during the year 1907."

ports on file in this office, and also in the state auditor's office,  
uring the year ending November 30, 1908, there has been  
this department 220,110 barrels of oil and 161,605 barrels  
making a total of 381,715 barrels of oil and gasoline. Of this  
independent refineries located within this state furnished  
s of oil and 23,574 barrels of gasoline, making a total of  
s, or 21 per cent of the total amount of all oil and gasoline  
uring the year 1908; and, as a matter of comparison, it might  
to note that during the year 1907 the independent refineries  
d submitted to this department for inspection 66,799 barrels  
asoline. From this it will readily be seen that the inde-  
duction in Kansas has made a net gain of 13,816 barrels  
ear 1908, and that the independent production of oil has

made a net gain of 3 per cent of all oil consumed in Kansas during the year."

"The reports on file in this office and in the state auditor's office show that during the year ending November 30, 1909, there has been inspected by this department 248,568 barrels of oil and 210,496 barrels of gasoline, making a total of 459,064 barrels of oil and gasoline. By referring to former reports of this department it will be noted that this is an increase of 77,218 barrels more of oil and gasoline inspected during the year 1909 over that of 1908. The independent refineries located within this state furnished and submitted to this department for inspection, during the year 1909, 77,290 barrels of oil and 43,623 barrels of gasoline, making a total of 121,613 barrels, or 26 per cent of the total amount of all oil and gasoline inspected during the year 1909. The independent refineries in the year 1908 submitted to this department for inspection 80,615 barrels of oil and gasoline. From this it will be noted that the independent production in Kansas has made a net gain of 40,998 barrels of oil and gasoline during the year 1909, and a net gain of 8 per cent of all oil consumed in Kansas during the year 1909."

67. In addition to the refined oil and gasoline marketed in Kansas in 1909, as shown by the inspector's reports hereinbefore referred to, the Indiana Company sold in the state of Kansas 2,402 barrels of road oil, 37,494 barrels of lubricating oils, and 247,838 barrels of fuel oil.

68. The prices at which the Indiana Company sells refined oil and gasoline in Kansas and Missouri are cheaper than those at which it sells same in other states further removed from refineries and crude-oil fields, but are no less than the prices in states situated at equal distances from said refineries and crude-oil fields.

69. The Indiana Company sells oil in Kansas and elsewhere at a uniform net price regardless of quantity, fixing its prices in the manner following, to wit: Uniform prices are made at the refineries by its general manager, and to these are added the actual cost of transportation to the purchaser. This method of price making has been employed for ten years last past.

70. The Indiana Company sells, and ever since it commenced business in Kansas has sold, the commodities in which it deals at uniform prices throughout the state of Kansas, and does not cut the price in any locality or to any individual for the purpose of getting business.

71. It is the custom of the Indiana Company in marketing its products to endeavor to increase the demand and sale for the grades of oil of which relatively the least is being sold. Various means are employed to achieve that end. Prices are lowered, expert salesmen and demonstrators are put into the field, and extensive advertising campaigns inaugurated. In order to receive the same net return from its aggregate sales, the Indiana Company, when it thus reduced the price, increased it on the item for which there is an excessive demand. It has thus frequently happened during recent years, when the demand for gasoline has exceeded that for illuminating oil, that the price of gasoline has been increased and at the same time that of illuminating oil correspondingly decreased.

72. The Indiana Company does not in the sale and distribution of the commodities handled by it require dealers to refrain from handling similar products sold and distributed in the state of Kansas by its competitors; on the contrary, it appears from the evidence that many of the dealers who purchased oils from the Indiana Company were at the same time purchasing and handling oils procured from other concerns.

73. The facilities of the Indiana Company for sale and distribution of oils are superior to those of any of its competitors, and by reason of the quality of its oils and prices as compared with those of its competitors, and superior service rendered in supplying its patrons, retail

throughout the state generally find it more satisfactory to deal with the company.

In the manner in which the Indiana Company has transacted its business in Kansas, so far as shown by the evidence, has been shown to be beneficial to the people of the state in many respects, and has not been shown to be otherwise in any respect.

The Indiana Company purchased some of the crude oil used in its refinery from companies other than the Prairie Company.

The evidence shows that crude petroleum contains many proper-  
ties which marketable products of value other than illuminating  
oil and fuel oil can be made, and the refiner who is able to  
extract the valuable properties, or the major portion thereof, and  
convert them into marketable products, is by reason thereof enabled to pro-  
fitably market gasoline and illuminating oil at lower prices  
than the producer who by reason of his limited facilities and equipment is  
unable to make from crude petroleum any other products.

Refineries located in the state of Kansas have facilities and equip-  
ment for manufacturing from crude petroleum only illuminating oil,  
gasoline, and fuel oil.

The evidence shows that the railroad rates obtaining on crude oil shipments from  
the state of Kansas, and vicinity to Kansas City, Mo., and St. Louis, Mo.,  
are reasonable; but there is no evidence to show or tending to show that  
the rates herein, or either of them, or any person representing  
the railroad, is attempting to induce or influence such change; on the contrary,  
the evidence shows that the Indiana Company's representatives objected  
to any increase.

The evidence shows that whenever the market price of any  
oil which it sold and distributed in Kansas declined, the Indiana  
Company gave its customers the benefit thereof, even those who had  
purchased it for such product at a higher price for a stated period.

The Prairie Company is the owner of a system of pipe lines  
extending from a point near the city of Tulsa, in the state of Oklahoma,  
through the states of Oklahoma, Kansas, Missouri, Iowa, Illinois, and  
Indiana; its pipe lines are used by it exclusively for the  
transportation of its own oil to such markets as are tributary and avail-  
able. It consists of lines of steel pipes screwed together, laid in  
trenches and buried beneath the surface, through which crude oil is  
transported by means of force pumps established along the line at vary-  
ing intervals apart of from forty to fifty miles. The pipe used in con-  
struction of these lines varies from six to twelve inches in diameter, and  
the continuous lines between pumping stations, the variance in  
length selected with regard to the capacity required and the topog-  
raphy of the country traversed by the line. Each pumping station is  
equipped with several large engines and two or more large steel tanks  
for storage of oil. The oil is kept continuously moving through  
the lines, pumps and other equipment must be so arranged  
as to keep the lines full of oil and discharging at each station  
approximately the same amount of oil as is sent out therefrom at  
the time. The Prairie Company procures about 95 per cent of all the  
oil which it handles and sells. It buys oil from those who  
bring it upon the open market at prices posted daily in its main  
office at Independence, Kan. It collects the oil purchased by it, and from  
others, by means of lines of pipe laid to the wells and connected  
to a pipe line or receiving tanks adjacent thereto, so that when  
a tank of oil which he desires to sell to the Prairie Com-  
pany has been made such desire known to it or some of its repre-  
sentatives, the company causes one of its employees to go upon the tank

and measure its contents, whereupon he opens the connection between the tank and the company's line, which enables the oil to be pumped from the tank into the line; and after the tank is emptied or its contents nearly removed, such employee of the company goes back upon the tank and measures the oil, if any, remaining therein. He reports his conduct and measurements to the home office of the company at Independence, Kan., by wire, where the quantity of the oil so taken is determined and the producer from whom same was taken is credited on the books of the company with such quantity, as oil, and he may by application to any purchasing agency receive pay for the same at the regular posted market price on the day of such application. When the amount of oil so received by the company on any day exceeds the capacity of its pipe lines or the requirements of the market, then and in that case such excess is gathered into storage tanks. These storage tanks are constructed of steel, and they have capacities ranging from 26,000 barrels to 50,000 barrels. They usually are grouped together upon lands owned or leased by the company, and such groups of steel storage tanks are designated and known as "tank farms," embracing from eighty acres to several hundred acres each, and in some instances containing several hundred such steel tanks, wherein there is now stored about 43,000,000 barrels of crude petroleum owned by the Prairie Company, which has been produced in the Kansas and Oklahoma fields in excess of the market demands and the capacity of the company's pipe lines. These pipe lines are operated every hour of every day in the year (except when such operation is temporarily prevented by accident), and by means of connections with other pipe lines in the state of Indiana the Prairie Company is able to and does market and deliver its crude petroleum at various points in the states of New York, New Jersey and Pennsylvania.

80. The Prairie Company sells the crude petroleum produced and purchased by it to the Kansas Company at Neodesha, to the Indiana Company at Sugar Creek, Mo., and Whiting, Ind., to the Security Oil Company at Beaumont, Texas, to the Atlantic Refining Company at Philadelphia, Pa., to the Atlas Works at Buffalo, N. Y., to the New Jersey Company at Bayonne, N. J., and to P. S. Trainer. About sixty per cent of the oil sold by the Prairie Company is sold to the Kansas Company and the Indiana Company, its codefendants herein, and about forty per cent of the same is sold to other parties.

81. Of the authorized capital stock of the Prairie Company there has been submitted, paid for and issued fifteen million dollars.

82. The Prairie Company, under and in pursuance of the authority granted by its charter, has expended all of its available capital and resources in the construction of lines of pipe and tanks for the transportation and storage of crude petroleum and for the purchase of such oil from producers, except a comparatively small sum which has been expended for mining and producing oil.

83. The Prairie Company does not have and never has had any facilities for the manufacturing or marketing of refined oil or other petroleum products.

84. The Indiana Company does not own or control any pipe lines or producing oil properties and has no facilities for manufacturing or refining oil or other petroleum products in Kansas.

85. The Kansas Company does not have and never has had any tank-wagon stations for the distribution and sale of manufactured products of petroleum, or any producing oil properties.

86. While the Prairie Company has, by virtue of its charter, authority to engage in other business than the construction of lines of pipe and tanks for the transportation and storage of crude petroleum, and the purchase of oil from producers, and mining and producing oil and gas, it has, in fact, never engaged in any other business than that in which it

ed, and has never had any purpose or intention of engaging in any other business.

The Indiana Company has by virtue of its charter authority no other business in Kansas than the sale of the products of petroleum. Before set forth, it has in fact never engaged in any business in the state of Kansas than that in which it is now engaged, and has never had any purpose or intention of engaging in any such business within the state of Kansas.

The Indiana Company has all its capital employed in the business of producing and marketing the products of crude petroleum.

The Kansas Company has never engaged in the business of producing or transporting crude petroleum, as a dealer therein.

Crude petroleum was discovered in Wilson county, Kansas, in the year 1890 and during that year and the years following several wells were drilled in that and other parts of the state, with the result that a production of a few hundred barrels was developed in the vicinity of Pittsburg by J. F. Guffey and John M. Gailey, residents of Pittsburg, who began business in Kansas as a copartnership under the firm name of Guffey and Gailey.

In the year 1897 the Kansas Company erected a small refinery having a maximum capacity of 500 barrels of crude petroleum per day in its operation.

In 1895 Guffey and Gailey, a copartnership composed of J. F. Guffey and John M. Gailey, of Pittsburg, owned a number of producing wells in the vicinity of Neodesha, Kan., and a large number of leases in the northern part of the state of Kansas, which were sold by Guffey and Gailey to the Forest Oil Company, a corporation organized for the purpose of producing and marketing crude petroleum.

The Forest Oil Company, from and after the purchase by it of the holdings of Guffey and Gailey, continued to develop its oil fields and produce oil in the vicinity of Neodesha, Kan., which was sold to the Kansas Company until about the month of December, 1901, when the Forest Oil Company sold all its holdings in the state of Kansas to the Prairie Company for three hundred thousand dollars.

In the year 1904 the Forest Oil Company was the only large producer of crude petroleum in the state of Kansas, and its production was at that time small as compared with the production of other individuals in the state which have been developed in the state since that time.

In the year 1900 the refinery of the Kansas Company at Neodesha, Kan., was the only profitable market for crude petroleum that existed in the state of Kansas.

The Prairie Company began business about the month of January, 1902, and continued to produce oil and sell oil to the refinery at Neodesha, Kan., and to deliver oil tanks such oil as it produced in excess of the capacity of the tanks of said refinery, until about the year 1902, when oil was produced and produced in considerable quantities in the vicinity of Neosho county, Kansas. (Testimony of Young.)

In January or February, 1902, a Mr. Knapp had developed a large quantity of oil on leases owned by him in the vicinity of Chanute, Kan., and marketed the oil produced from the leases, which he operated, by railroad shipments at points without the state of Kansas. The oil except such as belonged to the owners of land upon which it was produced, as royalty, and there was at that time no market for crude oil in the state of Kansas except the refinery at Chanute, and the producers in the vicinity of Chanute had no such facilities or other facilities for transportation as were necessary for that market profitably available.

In the month of January or February, 1902, the citizens and

producers of oil at Chanute appealed to W. J. Young, then president of the Prairie Company, and requested that said company extend its pipe lines to the Chanute field, or erect storage tanks there and purchase the oil that was being produced in that field.

99. About February 10, 1902, W. J. Young made the following promise on behalf of the Prairie Company to H. F. Lea, representing the citizens of Chanute and producers in that vicinity, to wit:

"I feel confident in saying to you and other companies that are producing around Chanute, that in the near future, as soon as we can move the tank, we will put up one at Chanute and will take the production within one and one-half to two miles of the town, at the price paid at the wells in Neodesha less 20 cents per barrel to cover a possible freighting of the same to Neodesha; as soon as the production in the field shows 500 barrels settled daily production, outside of the production now or hereafter made by Mr. Knapp's company, we will take up the question of building a pipe line from Chanute to Thayer to connect with our pipe and tankage at that point." (Testimony of Young, page 33.)

100. During the year 1902 the Prairie Company erected a large steel tank near Chanute, Kan., and constructed a connecting pipe line to its lines and tankage at Thayer, Kan. Later it erected a number of steel tanks for the storage of oil at Humboldt, Kan., and continued to buy all the oil offered to it as promptly as its pipe line and storage facilities would permit.

101. The Prairie Company was practically the only purchaser of crude oil in the state of Kansas, equipped with transportation and storage facilities to handle crude oil in large quantities, up to about March or April, 1905. Up to that time it purchased approximately all the oil produced in the state of Kansas.

102. Throughout the year 1902 the production of crude oil in the Kansas field increased very rapidly, until it amounted to 37,666 barrels in the month of January, 1903, and continued to increase until in the month of July, 1903, there was produced and run into the pipe lines of the Prairie Company 60,421 barrels. Prior to July, 1903, oil had been discovered in several places in Oklahoma, and in August, 1903, the territory which now comprises the state of Oklahoma produced 10,490 barrels for the month of August, 1903. There was produced in Kansas during the last four months of 1903: 107,018 barrels in September, 109,603 barrels in October, 151,662 barrels in November, and 216,448 barrels in December.

103. The completion of the pipe line from Kansas to Sugar Creek, Mo., by the Prairie Company materially increased the market available for Kansas and Oklahoma oil, and the Prairie Company in the month of November, 1904, the first month after such pipe line was completed, sold and delivered 162,468.75 barrels of crude oil, as compared with 76,235.82 barrels for the month of September, the month preceding that in which such pipe line was completed.

104. In the year 1903 the Prairie Company bought and handled 1,063,069 barrels of crude petroleum, of which 980,361 barrels was produced in Kansas, and 82,708 barrels was produced in Oklahoma. During the same period the Prairie Company sold 480,631 barrels and put in storage 582,437 barrels.

105. In the year 1904 the production in the Kansas and Oklahoma field continued to rapidly increase throughout the year, and the Prairie Company began in that year the construction of a pipe line from Kansas to a refinery owned and operated by the Indiana Company at Sugar Creek, near Kansas City in the state of Missouri, which pipe line was completed about the month of October, 1904. During the month of October, 1904, the Prairie Company handled 600,736 barrels of crude oil, 408,736 barrels of which was produced in Kansas and 192,000 barrels in Oklahoma. Dur-

month it sold and delivered 97,576 barrels and put in storage 1,234,386 barrels of crude oil.

During the year 1904 the Prairie Company handled 4,236,301 barrels of crude oil produced in Kansas as compared with 980,361 barrels in 1903, making the total number of barrels handled by the company in Kansas and Oklahoma during the year 1904, 4,236,301 barrels, of which 1,069,328 barrels was marketed and 4,534,708 barrels in storage.

During the year 1905, the Prairie Company handled 11,854,822 barrels; 3,244,063 barrels produced in Kansas and 8,610,759 barrels in Oklahoma. Of this amount the Prairie Company sold and delivered 9,959,770 barrels and put in storage 8,135,923 barrels.

During the year 1905 the Prairie Company handled less Kansas oil than it did during the year 1904, but this does not correspond to a reduction in the Kansas field for the reason that during the year 1905 there were several oil fields in different parts of the state which became competitors of the Prairie Company in the purchase of crude oil.

During the year 1905 the Prairie Company began the construction of its pipe line from the Kansas and Oklahoma field states of Missouri, Iowa, Illinois and Indiana, to a point at the refinery of the Indiana Company at Whiting, Ind., for the purpose of enabling the Prairie Company to sell and deliver its Kansas oil to the refinery at Whiting. This line was completed and in operation in October, 1906, and by reason of its completion the Prairie Company was enabled to sell and deliver in October, 1906, 2,163,562 barrels of crude oil, as against 846,128 barrels for the month of September immediately preceding the completion of said line. And through the construction of its pipe line to Griffith, Ind., the Prairie Company was enabled to connect with other pipe lines at that point and thereby sell and deliver Kansas and Oklahoma oil to the market at Buffalo, Philadelphia, and Bayonne, N. J., so that during the year 1907, the first year after such a market was made, 24,515,323 barrels of Kansas and Oklahoma oil, of which 11,234,386 barrels during the year 1906.

During the month of December, 1906, the Prairie Company handled 2,163,562 barrels of Kansas and Oklahoma oil, as against 846,128 barrels for the month of December, 1905; while it handled 2,163,562 barrels of oil produced in Kansas in December, 1905, it handled 2,163,562 barrels of oil produced in Kansas during December, 1906.

The total number of barrels of oil handled by the Prairie Company during the year 1906 was 21,194,156, of which 3,128,287 barrels was produced in Kansas and 18,065,869 barrels was produced in Oklahoma. The oil handled during the year 1906, 11,234,386 barrels was sold and delivered to refineries and 9,959,770 barrels in storage.

During the year 1907 the Prairie Company handled 35,610,339.82 barrels of crude oil, 1,696,428.85 barrels of which was produced in Kansas and 13,910.97 barrels was produced in Oklahoma, of which the company sold and delivered to refineries 24,512,323.38 barrels and put in storage 11,098,106.44 barrels.

During the years 1903, 1904, 1905, 1906 and 1907 the Prairie Company handled 75,325,423.73 barrels of oil; 13,285,442.45 barrels of which was produced in Kansas and 62,039,981.28 barrels in Oklahoma. Of this amount during these five years the Prairie Company sold and delivered 62,039,981.28 barrels and put in storage 34,310,854.85 barrels. The organization of the Prairie Company down to and

including the month of February, 1905, it was practically the only purchaser of crude oil in the state of Kansas. It had no real, substantial competition in that business, and the oil taken and handled by it represents approximately the output of the Kansas field up to that time. (NOTE.—Testimony of Connelly.)

117. Since February, 1905, the Prairie Company has bought and paid for practically all the oil that has been offered to it by producers in Kansas, and in addition to it there have been a number of refineries established throughout the state of Kansas which became purchasers of crude oil and competitors of the Prairie Company.

118. The exact date of the establishment of the several refineries competing with the Prairie Company in the purchase of crude oil in the state of Kansas is not shown by the evidence, but it is clear from the evidence that prior to February, 1905, the only refinery in the state of Kansas, outside of the one belonging to the Kansas Company at Neodesha, was a small concern at Humboldt, owned by a man named Webster, and that on the 10th day of December, 1907, there had been established and were then in operation sixteen other refineries with a total or combined capacity of 6650 barrels of crude oil per day, as follows:

Kansas City Oil Company, Kansas City, Kan.....	250	barrels.
Great Western Co., Erie, Kan.....	1,000	"
Western Refinery, Humboldt, Kan.....	500	"
Paola Refining Co., Paola, Kan.....	200	"
Rollin Refining Co., Rollin, Kan.....	200	"
Kansas Coöperative Ref. Co., Chanute, Kan.....	150	"
Chanute Refining Co., Chanute, Kan.....	150	"
Kansas Refining Co., Chanute, Kan.....	200	"
Home Refining Company, Bronson, Kan.....	75	"
Superior Refining Co., Longton, Kan.....	150	"
Sunflower State Refining Co., Niotaze, Kan.....	500	"
National Refining Co., Coffeyville, Kan.....	1,000	"
Caney Oil Refining Co., Caney, Kan.....	175	"
Uncle Sam Oil Co., Cherryvale, Kan.....	350	"
Uncle Sam Oil Co., Atchison, Kan.....	200	"
Standard Asphalt & Rubber Co., Independence, Kan.....	1,000	"

119. There never were any contracts of any kind between the Prairie Company and either the Indiana Company or the Kansas Company, except for the sale of crude oil, in stated quantities at stated prices.

120. There never were any contracts of any kind between the Indiana Company and the Kansas Company, except for the sale of the manufactured products of petroleum at wholesale by the Kansas Company to the Indiana Company, in stated quantities at stated prices.

121. The Prairie Company never agreed with the Indiana Company that it would sell its crude oil only to it.

122. The Kansas Company never agreed with the Indiana Company that it would sell the products of its refinery only to it.

123. The Prairie Company never sold any crude petroleum or other oil to the Indiana Company for delivery within the state of Kansas.

124. The Prairie Company never agreed with the Kansas Company that it would not sell crude petroleum to any other than it.

125. The Kansas Company never agreed with the Prairie Company that it would not purchase crude petroleum from any other person than the Prairie Company.

126. The Indiana Company never agreed with the Prairie Company that it would not purchase crude petroleum from any other person.

127. The oil produced generally throughout the Oklahoma field is more valuable and acceptable for refining purposes than the oil produced

the Kansas field, because a larger percentage of gasoline is produced from Oklahoma crude.

The largest production reached in the Kansas field for any month during the month of November, 1904, when 429,915 barrels were produced, and it is certain that the production at the time is much less than that amount, although exact figures are not available for the reason that the amount of Kansas oil purchased by independent refineries in competition with the Prairie Company is not known. Between November, 1904, when the production of Oklahoma was 1,161 barrels for the month and the first day of January, 1905, the production of oil in Oklahoma had increased to in excess of 1,000 barrels for the month of December, 1907, this last named being handled by the Prairie Company during said month, while competing pipe lines in the state of Oklahoma were handling only 40,000 barrels per day.

The increase in the production of oil in the state of Oklahoma is due to the fact that under substantially the same markets and marketing conditions the production of crude oil has declined in Kansas.

The prices paid for oil by the Prairie Company have been uniform throughout the mid-continent field, including both Kansas and Oklahoma, and its dealings with those from whom it purchases oil have always been fair.

The price paid by the Prairie Company for oil purchased by independent producers was determined and established prior to June, 1905, by J. E. Young, its president, and since June, 1905, by J. E. Young, vice president and general manager.

The decline in price of crude oil in the mid-continent field, including Kansas and Oklahoma, is largely if not wholly due to the production in excess of market requirements, and the present price of oil in the state of Kansas is as high as the domestic refineries pay while selling their manufactured product at prevailing prices.

The business conducted and carried on by the Prairie Company in Kansas and in the manner the same has been conducted has in all respects been beneficial to the people of the state of Kansas, and is known to have been otherwise in any respect.

The evidence shows that the prices of crude oil and gasoline and refined oil have fluctuated in the state of Kansas since 1903, but there has been the same upward or downward tendency in the prices of crude oil and the refined products.

The evidence shows that several hundred corporations were organized with capital stocks ranging from \$100,000 to \$1,500,000, for the purpose of engaging in the oil business in Kansas. Many of them were organized and managed by speculators, who sought profit more from the sale of corporate stocks than from the production and sale of oil. The majority of such corporations either failed, went voluntarily into liquidation, or never succeeded in getting into business, and very few ever owned wells from which enough oil could be produced to return upon the amount actually invested in their drilling. Not one of them, as far as the evidence disclosed, ever produced enough to pay fair dividends upon the value of their authorized capital stock. The evidence fails to show that any such company was due directly or indirectly to the policy, operation or management of the Prairie Company or to any other defendants herein.

The Kansas Company does not sell all the manufactured product produced by the Indiana Company, as alleged in plaintiff's petition, and the evidence shows that it does sell to others.

137. The Indiana Company handles and sells in the state of Kansas, among others, the following items of merchandise, to wit:

Burning oil, known as kerosene or refined oil.	Railroad car oil.
Varnish makers' and painters' naphtha.	Electric car oil.
Special naphtha for mechanical use.	Transformer oil.
Red crown gasoline.	Turbine oil.
Gas machine oil.	Ice-making oil.
Fuel oil.	Cordage oil.
Gas oil.	Twine oil.
Road oil.	Tanners' oil.
Cylinder oil.	Curriers' oil.
Engine oils.	Tanners' wax.
Machinery oils.	Curriers' wax.
Dynamo oil.	Cup grease.
Ammonia oil.	Sponge grease.
Signal oils.	Crank-pin lubricant.
Crank case oil.	Friction or curve grease.
Windmill oil.	Pit-car grease.
Hand separator oil.	Chain grease.
Power separator oil.	Skid or slide grease.
Automobile oils.	Graphite grease.
Air-compressor oils.	Antirust grease.
Tempering oil.	Dairy wax.
Crusher oils.	Paro wax.
Brickmaking oil.	Paraffine wax.
Calendar oil.	Miners' sunshine oil.
Gas-engine oil.	Floor dressing.
Wood oil.	Harness oil.
Spindle oil.	Coach oil.
Loom oil.	Carriage grease.
Motor journal oil.	Axle grease.
Felt oil.	Hoof oil.
Soap stock.	Candles.
Worm gear grease.	Coke.
Putty oil.	Parolite.
Press oil.	Petroleum ether.
Paint oil.	Pentane.
Animal dipping oil.	Mexane.
Meter oil.	Core oil.
Torch oil.	Roofing oil.
Slushing oil.	Rubbing oil.
Hatch coating oil.	Neutral oils.
Automatic screw-cutting oil.	Pneumatic tool oil.
Thread-cutting oils.	Sea oil.
Paraffine oils.	Household lubricant.
Black oils.	Glycerine petrea.
Belt oil.	Cable coating.
Residuum.	Continental ointment.
Petrolatum.	Cheese coating.
Railroad signal oil.	Marking crayons.
	Typewriter oil.

138. In 1899 the capital stock of the Standard Oil Company of New Jersey was increased to one hundred and ten millions. Its name was changed to the "Standard Oil Company." The capital stock of all the corporations held under the old trust agreement of 1882 by the trustees was all taken over by the Standard Oil Company, in exchange, dollar for dollar, for the capital stock of the said last-named company, and stock of the newly organized company was issued to the holders of trust certificates under the agreement of 1882, share for share.

139. The Standard Oil Company, a New Jersey corporation, from

At the present time, has continued practically the same methods of installation and absorption of new oil fields which had been followed by the trust of 1882, and its predecessor the Vilas, Keith and Company trust of 1879. It organized, either directly or through some of its constituent companies, a large number of corporations for handling the oil business which it acquired in different parts of the country, including Kansas. The Standard Oil Company of Kentucky, through its subsidiary organized in 1882, the Standard Oil Company of Indiana, all its stock being taken by the Standard Oil Company (N. J.), and the Standard Oil Company, either directly or indirectly, it is still held. The National Transit Company organized the Prairie Oil and Gas Company, the stock of which being originally taken by the National Transit Company, is still held in fact, although nominally held by individuals. All the stock of the National Transit Company is owned by the Standard Oil Company (N. J.).

The Standard Oil Company (N. J.) controls a large number of refining and marketing companies. Through these subsidiary companies it covers every producing field in the United States. It owns twenty refineries in the United States, and covers the market for oil in every state in the Union. And in the business of producing, purchasing crude and marketing refined oil it transacts from eighty-four per cent of the entire oil business of the United States, including the state of Kansas.

There is no competition in prices paid for crude oil in Kansas between the Prairie Oil and Gas Company and any other purchasing agent controlled by the Standard Oil Company (N. J.). There is no competition in price charged for refined oil and other petroleum products in the state of Kansas between the Standard Oil Company of Indiana and any other marketing company controlled by the Standard Oil Company (N. J.). There is no competition in price paid to the Standard Oil Company of Kansas for refined oil between any of the purchasing companies controlled by the Standard Oil Company (N. J.) to which the Standard Oil Company of Kansas delivers refined oil; but refined oil is delivered by the last-named company to Standard Oil marketing companies fixed by the officers of the Standard Oil Company (N. J.). Substantially all the profits and dividends made by all the defendants to the Standard Oil Company (N. J.), and are paid out in dividends to the stockholders of the last-named company.

The Standard Oil Company of New Jersey, by means of its controlling, producing, refining, transporting and marketing companies, through the value of the oil business it has acquired thereby, has seized and is now exercising the power to prevent competition between the companies it controls to fix for them the prices paid for the oil, the rate for its transportation, and the selling prices of its products. It has prevented and is now preventing in Kansas any competition in commerce in petroleum and its products between its subsidiary companies, including the defendants, and each of the defendants, and its officers and managers, are acquiescing in and consenting to such control.

At the present time the entire oil business of the United States in 1898, the "Standard Oil interests" referred to in these findings controlled and owned more than 83 per cent.

The proportion of business transacted by the Indiana Company and its subsidiaries since 1905 is, as stated by the oil inspector of the state in his annual reports to the governor, as follows:

Reports on file in this office from the several Kansas refineries show that they have, during the year ending December 1, 1906, refined and sold upon the market 49,622 barrels of oil and 7713 barrels of kerosene of this amount 25,535 barrels of oil and 6266 barrels of kerosene were submitted to this department for inspection and were then

placed upon the market within this state, and as a matter of comparison will say, that during the year ending December 1, 1905, there were submitted to this department for inspection by the Kansas refineries 4865 barrels of oil and 32 barrels of gasoline, showing that during the year 1906 the Kansas refineries made a net gain of 29,904 barrels of oil and gasoline inspected and sold within the state."

"The reports on file in this office show that during the year ending November 30, 1907, there has been inspected by this department 369,847 barrels of oil and gasoline. Of this amount the independent refineries located within this state furnished 53,583 barrels of oil and 13,216 barrels of gasoline, making a total of 66,799 barrels, or eighteen per cent of the total amount of all oil and gasoline consumed in Kansas during the year 1907. As a matter of comparison it might be of interest to note that during the year 1906 the independent refineries furnished and submitted to this department for inspection 31,801 barrels of oil and gasoline consumed in the state. From this it will be seen that the independent production of oil in Kansas has made a net gain of 34,998 barrels, or eight and one-half per cent of all oil and gasoline consumed in Kansas during the year 1907."

"The reports on file in this office, and also in the state auditor's office, show that during the year ending November 30, 1908, there has been inspected by this department 220,110 barrels of oil and 171,605 barrels of gasoline, making a total of 381,715 barrels of oil and gasoline. Of this amount the independent refineries located within this state furnished 57,041 barrels of oil and 23,574 barrels of gasoline, making a total of 80,615 barrels, or twenty-one per cent of the total amount of all oil and gasoline consumed during the year 1908; and as a matter of comparison it might be of interest to note that during the year 1907 the independent refineries furnished and submitted to this department for inspection 66,799 barrels of oil and gasoline. From this it will readily be seen that the independent production in Kansas has made a net gain of 13,816 barrels during the year 1908, and that the independent production of oil has made a net gain of three per cent of all oil consumed in Kansas during the year."

"The reports on file in this office and in the state auditor's office show that during the year ending November 30, 1909, there has been inspected by this department 248,568 barrels of oil and 210,496 barrels of gasoline, making a total of 459,064 barrels of oil and gasoline. By referring to former reports of this department it will be noted that this is an increase of 77,218 barrels more of oil and gasoline inspected during the year 1909 over that of 1908. The independent refineries located within this state furnished and submitted to this department for inspection, during the year 1909, 77,290 barrels of oil and 43,623 barrels of gasoline, making a total of 121,613 barrels, or twenty-six per cent of the total amount of all oil and gasoline inspected during the year 1909. The independent refineries in the year 1908 submitted to this department for inspection 80,615 barrels of oil and gasoline. From this it will be noted that the independent production in Kansas has made a net gain of 40,998 barrels of oil and gasoline during the year 1909, and a net gain of eight per cent of all oil consumed in Kansas during the year 1909."

145. Petroleum oil was first discovered in Kansas in paying quantities in 1899 or 1891. The refinery of the Standard Oil Company of Kansas at Neodesha was built by the Standard Oil Company of Kentucky, one of the subsidiary companies of the Standard Oil Trust, in 1897; and at that time commenced the refining of oil; but the Indiana Company, the defendant, continued to market in Kansas both its oil and that manufactured by the Kansas refinery, and still continues to do so.

146. About the year 1896 the Standard Oil Company of Kentucky went out of the Missouri and Kansas territory as a marketing company, and the Indiana Company, the defendant, "got Kansas, Nebraska, South

Iowa." The whole system, including stock and all storage cars, tank wagons, horses, was transferred to the Indiana mere book entries, both companies being part of the system controlled by the Standard Oil Company, and the managers remained as prior to such transfer.

in the two years immediately preceding the filing of its the interrogatories propounded in this cause, the defendant, Oil Company of Kansas, with a capital of one million to its stockholders for the benefit of the Standard Oil (N. J.) the following amounts in dividends: 1906, \$1,350,000; 1907, \$1,350,000.

in the five years immediately preceding its answers to the the interrogatories propounded in this cause, the defendant, the Standard Oil Company of Indiana, with a capital of \$1,000,000, paid to its stockholders for the use and benefit of the Standard Oil Company (N. J.) the following amounts:

1903 .....	\$8,499,150
1904 .....	7,499,250
1905 .....	5,249,475
1906 .....	4,449,550
1907 .....	10,999,900

defendant, the Prairie Oil and Gas Company, uses its pipe lines to transport oil from the Kansas oil fields to Sugar Creek, Mo., and Whiting, Ind., for the purpose of transporting crude oil, and receives and transports the same to its own oil.

defendant, the Prairie Oil and Gas Company, has on hand and in its tank farms in Kansas and Oklahoma about forty thousand barrels of crude oil, and maintains this reserve storage for the purpose of keeping its pipe lines employed and busy in case of a failure or partial failure in the current production.

defendant, the Prairie Oil and Gas Company, sells to its stockholders the Standard Oil refineries, about thirty-five or thirty-six thousand barrels of crude oil per day.

the testimony was taken, the defendant, the Prairie Oil and Gas Company, was anticipating additional markets to refineries in course of construction in Louisiana and owned by the Standard Oil Company of Louisiana.

pipe lines of the Prairie Oil and Gas Company commence about twelve miles south of Tulsa, Okla., extend northward, through Kansas line near Peru; then up through Kansas north of Lawrence, through Neodesha; thence to Humboldt, Kan., through Lawrence, and there cross into the northern part of Missouri, near St. Louis, passing into Iowa, across the Mississippi river, across the Iowa and terminate at Griffith, Indiana, which is just over the line between Indiana and Illinois.

oil transported by the Prairie Oil and Gas Company is to be transported farther east than Griffith, it is transported through Standard Oil Company and pays charges under the interstate commerce act eastward.

defendant, the Prairie Oil and Gas Company, is selling the same at a price fixed and offered by W. O. Cowan, vice president of the Standard Oil Company, and never refused to sell that company oil at a lower price.

the process of refining crude oil, nine gallons of refined oil are produced from one barrel of Kansas crude oil. This besides the by-products.

Sugar Creek refinery was built in 1905 and has a capacity of producing ten thousand barrels of crude oil per day.

157. In 1890 the Standard Oil Company (N. J.) acquired control of the Forest Oil Company, a producing company which owned and operated wells and leases in Kansas, which were conveyed to the Prairie Company, and the stock, valued at 102, was paid for in stock of the Standard Oil Company (N. J.) valued at 170, the difference being paid in cash.

158. The Standard Oil Company of Indiana gets 75 per cent of the oil it sells at retail in Kansas from the Standard Oil Company of Kansas, and of all of the oil sold by the Standard Oil Company of Indiana, in its entire field, 95 per cent comes from the Kansas and Oklahoma field, known as the mid-continent field.

159. In making its sales of refined oils and gasoline to the trade in the ten states in which it operates, the defendant, the Standard Oil Company of Indiana, fixes the price at which it delivers and sells its product at the different stations in the several states by making a basing price at the refinery from which the oil is furnished and adding thereto the cost of transportation and delivery at the point of delivery. The basing points for Kansas are Sugar Creek, Mo., and Neodesha, Kan.; for North Dakota, South Dakota, Minnesota, Wisconsin and Michigan, Whiting, Ind.; and for Illinois and Indiana, Whiting, Ind., and Wood River, Ill.; for Iowa, Sugar Creek, Mo., and Whiting, Ind.; for Missouri, Sugar Creek, Mo.; for Kansas, Sugar Creek, Mo., and Neodesha, Kan.

160. In fixing its basing price for the state of Kansas at Sugar Creek, Mo., and Neodesha, Kan., the defendant, the Standard Oil Company of Indiana, makes its basing price on Standard White oil from one-half cent to one cent lower than in any other state; on Perfection oil from one cent to three and one-half cents lower than in any other state, and upon Crown Gasoline about an average of the other states, some being one and one-half cents to one-half cent higher than Kansas, and some being from one-half cent to one and one-fourth cents lower than in Kansas.

161. A comparison of the basing prices for Kansas and for the other nine states, as nearly as the same can be made from the answers of the defendant to the question propounded, is shown in the following table, the figures representing cents and fractions of cents per gallon:

162. John D. Archbold was one of the trustees of the Trust at the time of its formation in 1882. The names of the others do not appear in the evidence. In 1892 the trustees were John D. Rockefeller, William Rockefeller, J. A. Rockefeller, John D. Archbold, O. H. Payne, William G. Warden, Benj. Brewster, Chas. M. Pratt and H. M. Flagler. Of these J. D. Rockefeller, William Rockefeller, John D. Archbold, Charles M. Pratt, and H. M. Flagler were among the directors of the New Jersey Company in 1909. The remaining directors of the New Jersey Company

1909, were H. H. Rogers, W. H. Tilford, F. Q. Barstow, d, Walter Jennings, Jas. A. Moffett, C. W. Harkness, J. D. r., A. C. Bedford, H. C. Folger, and O. H. Payne. who were trustees of the Trust in 1892, John D. Archbold and tt were directors of the Indiana Company in 1907. Of those ectors of the New Jersey Company in January, 1909, John H. H. Rogers, W. H. Tilford, F. Q. Barstow, James A. Bedford and Walter Jennings were directors of the Indiana October, 1907. The only remaining director of the Indiana . P. Cowan, vice president of the Indiana Company, is also in the New Jersey Company and president of the Kansas

Moffett, the president of the Indiana Company, was formerly the same time vice president and general manager of the npany and president of the Kansas Company, and was one izers of the New Jersey Company, and is now a stockholder of that company.

Pratt, director in the Indiana Company, one of the trustees, der and director in the New Jersey Company and treasurer any.

stow, director in the Indiana Company, is also a stockholder in the New Jersey Company.

ford, director in the Indiana Company, is also a stockholder in the New Jersey Company.

nnings, a director in the Indiana Company, is also a director etary of the New Jersey Company.

Archbold, director and president of the Indiana Company, is stockholder and vice president of the New Jersey Company.

lford, director of the Indiana Company, is a director and t of the New Jersey Company.

ahl, secretary and assistant treasurer of the Indiana Com- assistant secretary and assistant treasurer of the Kansas

, director of the Indiana Company, is a stockholder and vice the New Jersey Company.

White, assistant secretary of the Indiana Company, is also retary of the New Jersey Company.

wan, president, W. M. Burton, vice president, H. M. Flagler, offett, nominal stockholders in the Kansas Company, are in the New Jersey Company.

Archbold, director and president of the Prairie Company, is John D. Archbold, who is a director of the Indiana Company and vice president of the New Jersey Company.

il 1907 the Prairie Oil and Gas Company, the defendant, er at 26 Broadway, N. Y., or employee designated as com- pe duties are to pass on the monthly and annual statements

dant, and in connection with that to arrange for the credit dant and the sale of bonds and securities, and the borrowing

r the purpose of carrying on the defendant's business; that rreanged by the said comptroller was always with the National

pany, and through its auditor the defendant carries a loan h the National Transit Company, and the proceeds of the

ed in purchasing and storing large quantities of oil. Since functions are performed by the president, John D. Archbold.

s the practice of the Prairie Company to send to the repre- f the Prairie Company, whose officers are at 26 Broadway,

annual and monthly statements of the business transacted by y.

the important transactions undertaken by the defendant the and Gas Company are first arranged for by conference of the

nager with John D. Archbold, the president, at 26 Broadway,

N. Y. O'Neill is frequently in New York, and conferences between them are in most cases personal and not by letter.

166. The Standard Oil Company of New Jersey has its general office at Number 26 Broadway, New York city; so also has James A. Moffett, the former vice president and general manager and now president of the Indiana Company, and also John D. Archbold, president of the Prairie Company. The Prairie Company has representatives at Number 26 Broadway, to whom monthly and annual reports are sent; so also the Indiana Company. Other Standard Oil Companies also have offices at 26 Broadway, New York.

167. The Prairie Oil and Gas Company owns a telegraph line extending from the Glen Pool, near Tulsa, Okla., to the termination of their pipe at Griffith, Ind., also a leased wire between Kansas City, Mo., and Griffith, Ind. These lines are used by the defendant the Prairie Oil and Gas Company in their telegraph communications with the Standard Oil Company (N. J.), and replies from the Standard Oil Company (N. J.) come to said defendant over the same lines.

168. The defendant the Standard Oil Co. of Indiana makes full and detailed reports of its business to its sales agent who has his office at No. 26 Broadway, New York.

168½. W. P. Cowan, vice president of the defendant the Standard Oil Company of Indiana, fixes the price at which the refined products are by it sold to the other companies subordinate to the Standard Oil Company of New Jersey, whether the same be delivered from Sugar Creek or Neodesha.

169. By reason of the relation existing between the subordinate companies and the New Jersey Company, the stock of the subordinate companies serves no purpose except a means of placing the subordinate companies in the control of the New Jersey Company, and such stock has no market value, and is never and was never intended to be put upon the market. Also, in many instances, the stock of the subordinate company was increased, in which cases the increase stock was not put upon the market, but was taken and held for the trustees of their successor, the New Jersey Company.

170. The prices to be paid by the Standard Oil interests are not left exclusively to the various subordinate companies acting independently, but that matter is considered by Mr. J. D. Archbold and his associates, acting for said interests as a whole. The prices to be paid are determined by them, at least in a general way, and their determination is made known to the subordinate companies.

Mr. Trainer was the general purchasing agent of the New Jersey Company, with office at 26 Broadway, New York. During the time Mr. Young was president of the Prairie Company, and until December, 1905, the Prairie Company received communications from Trainer in regard to the prices of crude oil. This was done under an arrangement made with Trainer by Mr. Hunnewell, the comptroller of the Prairie Company, whose office was also at 26 Broadway, New York.

The prices paid for crude oil by the Prairie Company are usually determined in personal conference between Mr. O'Neill and Mr. J. D. Archbold at his office in New York, upon Mr. O'Neill's recommendations, which have never been disapproved by Archbold. Sometimes this is done by wire or by letter.

Although there is no evidence of the specific fact, from the facts found herein I find that J. D. Archbold and O'Neill were familiar with the wishes and determinations of the general managers of the Standard Oil interests, and that the prices to be paid by the Prairie Company for crude oil were adjusted with reference to and in conformity with such determination.

171. The Standard Oil interests, meaning thereby all interests whereof the stockholders of the Standard Oil Company of New Jersey are the-

officiaries, constitute and are managed and operated as one unified system. The various companies which constitute are not coördinate, but with the exception of the New Jersey subordinate and without voice in the management of the whole. The subordinate companies are not less than one hundred, including companies that were discontinued, and with as there is nothing in their names to suggest any possible with the New Jersey Company.

board of directors of the Standard Oil Company of New accustomed to consider all matters of interest to that company, marketing and refining of oil by all interests owned by that exercises a general control of the business wherever a doing business in which it owned a controlling interest in

territorial limits within which the various companies in New Jersey Company has a controlling interest are not infrequently. Also, the objects and purposes of each of the defendant set forth in their respective charters, is largely the same of each of the other companies. The selection of the territorial limits within which the companies in which the New Jersey Company controlling interest shall operate, and the changes made from such limits, and the apportionment between the defendant the portion of the power conferred by their respective not the result of accident, but is due to the exercise of the control which the New Jersey Company has by reason of its the stock. And although there is no direct evidence of the as a conclusion of fact from the facts found herein, I find matters are determined by the New Jersey Company with the of the subordinate companies.

Indiana Company does no business in Iowa, Nebraska, Oklahoma, Arkansas, or in the south half of Missouri. All of is occupied by corporations whose stock is owned and controlled by the Standard Oil Company of New Jersey.

formerly the Standard Oil Company of Kentucky, all of whose owned by the New Jersey Company, occupied what was called territory." It afterwards ceased to do so. When it did so the which the Indiana Company did business was extended to Texas, Nebraska, South Dakota and Iowa. Thereafter, and in Standard Oil Company of Nebraska was organized and its stock New Jersey Company, and the marketing stations theretofore Indiana Company were purchased by the Nebraska Company. Indiana Company ceased to do business within the state. Company now does business only in ten states, viz.: North Dakota, Minnesota, Wisconsin, Michigan, Indiana, Illinois, Iowa and Kansas. The southern part of Missouri is occupied by the Pierce Oil Company, about 67 per cent of whose stock is owned by the New Jersey Company.

to the commencement of this action, the New Jersey Company practically the owner of all or a majority of the stock of one hundred corporations engaged in different branches of business in various parts of the country. From time to time some companies were consolidated with others in which the New Jersey Company had a controlling interest. In many cases the property of one company was transferred to another and the territory occupied by one was abandoned by another. Others went out of business entirely, in which the property owned by the retiring company was transferred to another company in which the New Jersey Company had a controlling

at the time of the organization of the Prairie Company, the Standard Oil Company, one of the companies in which the New Jersey Company

pany owned a controlling interest, which had theretofore been doing business in Kansas and elsewhere, transferred its properties in Kansas to the Prairie Company and thereafter discontinued doing business in Kansas.

178. Prior to the organization of the Indiana Company, the Standard Oil interests represented by the trustees under the trust agreement of 1882 formed the purpose of erecting a refinery at Whiting, Indiana, and as a means of effectuating such and other purposes caused and procured the organization of the Indiana Company and furnished the necessary capital. The Indiana Company, after its organization, did erect the refinery at Whiting, Ind.

179. Prior to the organization of the Kansas Company, the Standard Oil Company of Kentucky, in which the New Jersey Company held a controlling interest, formed the purpose of erecting a refinery at Neodesha, Kan., and in order to effectuate such and other purposes it caused and procured the organization of the Kansas Company and furnished the necessary capital. The Kansas Company, after its organization, did erect a refinery at Neodesha, Kan.

180. Prior to the organization of the Prairie Company, the New Jersey Company formed the purpose of procuring the construction of pipe lines leading from the mid-continent field, for the conveyance of crude oil from that field to refineries further east operated by the New Jersey Company and companies in which it held a controlling interest, and in order to effectuate such and other purposes it caused and procured the organization of the Prairie Company, which company, after its organization, did construct pipe lines leading from the mid-continent field to such eastern refineries.

With respect to the allegations of the plaintiff's petition:

181. As to paragraph 7. Substantially all of the stock of the defendant companies was issued to parties who in fact hold the same in trust for the Standard Oil Company of New Jersey, for the purpose of giving said New Jersey Company the practical control of the defendant companies. Unless the law infers otherwise, from this and other facts herein found, the evidence does not sustain paragraph 7 of plaintiff's petition.

182. Paragraph 8. Unless the law infers otherwise, from the facts herein found, the evidence does not sustain the allegations contained in the 8th paragraph of plaintiff's petition.

183. Paragraph 9. Practically all of the stock of the defendant companies is held by parties who hold for the Standard Oil Company of New Jersey, and the stock for all practical purposes is the property of said company; and although there was no actual formal agreement between the defendants or to which they became parties, each of them and their managing officers have become parties to the Standard Oil system, managed, controlled and operated as stated in these findings. Unless the law infers otherwise, from this and other findings herein, the evidence does not sustain the 9th paragraph of the petition.

184. Paragraph 10. Unless the law infers otherwise, from the facts herein stated, the evidence does not sustain the 10th paragraph of the plaintiff's petition.

185. Paragraph 11. The allegations contained in the 11th paragraph of plaintiff's petition are true.

186. Paragraph 12. To sell crude oil to independent refineries within the state of Kansas is not a part of the business of the defendant the Prairie Oil and Gas Company. It has not been requested to do so. Whether it would do so if requested is uncertain. That would be a matter for future determination when the occasion arises. The evidence does not show that any formal agreement was ever entered into by the defendants, of the character stated in the 12th paragraph. Unless the

therwise, from this and other findings herein, the evidence in the 12th paragraph of plaintiff's petition.

graph 13. Not less than 75 per cent of the purchase price of crude oil and of the manufactured products thereof within and within the state of Kansas are made by companies connected with Standard Oil companies.

of the vast amount of such business done by others, the prices paid by said companies and said companies as compared with that of the defendants acting as they do ostensibly and professedly and in their public appearances, as wholly independent and disconnected companies, practically establish the price for the trade generally.

reason of its superior facilities for serving and the extent to which it now serve the public, the price it charges and the quality of its products, I find that the exclusion of the Indiana Company would, at an indefinite period, be a great detriment to the general public.

The evidence does not show that the prices paid for crude oil or for manufactured products within the state of Kansas are any less than the general public than they would have been if the defendants had been wholly independent and in no way connected with the Standard Oil Company.

As shown by the findings herein and as conclusions therefrom, the Standard Oil Company of New Jersey has in fact full control over all the companies belonging to the Standard Oil Company, including the defendants herein, and for all practical purposes the owner of all properties whereof said companies are the legal owners. Such control includes the power to create, terminate, to demand, to increase of capital stock and whether and what increases of stock are made, the territorial limits within which the several companies operate, and what changes shall be made from time to time within and in cases where companies having the same powers operate in the same territory to determine what portion of their authorized powers shall be exercised, together with the power to fix prices which shall be paid by subordinate companies in dealing between them or between them and outside parties; all of which powers are in fact exercised by the Standard Oil Company of New Jersey.

The various subordinate companies, including the defendants, are substantially independent with power to act regardless of the will of the Standard Oil Company so long as they are permitted to exist or so long as they are permitted to hold their positions as managers and officers, and the agencies and instrumentalities in the hands of the New Jersey Company, and all transfers of property from one to another of the defendants, in form, are merely transfers of what for all practical purposes is the property of the New Jersey Company from one of its officers to another.

L. W. KEPLINGER,  
*Commissioner.*

*In the Supreme Court of the State of Kansas.*

THE STATE OF KANSAS, on the relation of C. C. Coleman, Attorney-general in and for the State of Kansas, *Plaintiff*,  
*vs.*

STANDARD OIL COMPANY OF INDIANA, a corporation, THE STANDARD OIL COMPANY OF KANSAS, a corporation, and THE PRAIRIE OIL AND GAS COMPANY, a corporation, *Defendants*.

No. 15,193

## FINAL JUDGMENT.

*Journal Entry.*

Now, on this 15th day of June, A. D. 1911, this cause comes on for final disposition and judgment, the plaintiff appearing by John S. Dawson, attorney-general, its attorney, and the defendants, Standard Oil Company, an Indiana corporation, and The Standard Oil Company, a Kansas corporation, appearing by Alfred D. Eddy, Robert W. Stewart, R. R. Vermilion and Earle W. Evans, its attorneys, and the defendant, The Prairie Oil and Gas Company, a Kansas corporation, appearing by J. B. F. Cates, J. D. McFarland and W. S. Fitzpatrick, its attorneys. And the court, after hearing the statements and arguments of the parties and being fully advised in the premises, finds that the parties hereto have entered into and filed herein a stipulation for judgment, the terms of which are hereby approved; and pursuant thereto

It is by the court considered, ordered, adjudged and decreed as follows:

I. That the defendant, Standard Oil Company, an Indiana corporation, its officers, agents and employees, be and they and each of them are hereby ousted, prohibited, restrained, enjoined forever from doing and performing, within the state of Kansas, each, every and all of the matters and things following, to wit:

1 The engaging within the state of Kansas in the business of producing and selling crude petroleum except for fuel and power purposes.

2. Selling, for the purpose of destroying competition, any petroleum or refined or manufactured product of petroleum at a lower rate or price in one section, community or city within the state of Kansas than it charges for the same in another section, community or city therein, after equalizing the distances from the point of production, manufacture or distribution and freight rates therefrom.

3. Making and executing any contract or contracts, arrangements or understandings, whereby any person, firm or corporation shall be required, or is bound to, refrain from the purchase, handling or sale of petroleum or petroleum products manufactured or sold within the state of Kansas by any other person, firm or corporation.

4. Selling under different brands or trade names any oil or oils of the same value and quality at different prices for the purpose of destroying competition.

That the license or permission heretofore issued to the said defendant by the Charter Board of the state of Kansas as a foreign corporation be and the same is hereby forfeited, canceled and annulled in so far as same granted it the authority to do and perform any of the matters and things which by this decree it is ousted and enjoined from doing.

II. That the defendant, The Standard Oil Company, a Kansas corporation, its officers, agents and employees, be and they and each of them are hereby ousted, prohibited, restrained and enjoined from doing and performing each, every and all of the matters and things following, to wit:

1. Engaging in the business of producing and selling crude petroleum.

publishing and maintaining tank stations or supply depots except  
ery at Neodesha, Kansas, for the purpose of supplying refined  
omers.

ng, merchandising, or marketing the refined products of petro-  
ny of them, except to wholesale dealers in the same.

l and singular the parts and portions of the charter of the  
The Standard Oil Company, a Kansas corporation, by which  
was vested in it to do any of the matters and things which by  
e it and its officers, agents and employees are ousted and en-  
doing, be and the same are hereby forever forfeited, canceled  
led.

rther adjudged, ordered and decreed that it shall not be con-  
violation of the terms of this decree for the defendant, The  
Oil Company, a Kansas corporation, to sell, dispose and trans-  
its property of whatever kind and character to the defendant,  
Oil Company, an Indiana corporation, or for the defendant,  
Oil Company, an Indiana corporation, to purchase and other-  
re the ownership of the same, or for the said defendant, The  
Oil Company, a Kansas corporation, to surrender its charter  
from business.

at the defendant, The Prairie Oil and Gas Company, a Kansas  
n, its officers, agents and employees, be and they and each of  
hereby ousted, prohibited, restrained and enjoined forever from  
performing each, every and all of the matters and things fol-  
wit:

aging in the business of manufacturing and refining crude  
into any of the products thereof.

ublishing and maintaining tank stations or supply depots for  
e of supplying refined oil to customers.

ng, merchandising or marketing the refined products of petro-  
ny of them, to the retail or jobbing trade or to consumers.

d, however, that it shall not be deemed a violation of this  
said defendant, The Prairie Oil and Gas Company, to manu-  
soline or naphtha from natural gas and sell or otherwise dis-  
e same, subject, however, to the limitations and restrictions  
in this decree as to petroleum and its products.

l and singular the parts and portions of the charter of the  
The Prairie Oil and Gas Company, a Kansas corporation, by  
hority was vested in it to do any of the matters and things  
this decree it and its officers, agents and employees are ousted  
ed from doing, be and the same are hereby forfeited, canceled  
led.

at the defendants herein, and each of them, and each and all  
pective officers, agents and employees, be, and they and each  
re hereby, ousted and permanently enjoined from doing and  
g, within the state of Kansas, each, every and all of the things  
to wit:

aking or carrying out any arrangements, contracts, agree-  
nderstandings, trusts or combinations between themselves or any  
re of them, or with any other persons, firms or corporations,  
w, or which tend, to advance, reduce or control the price or the  
producer or to the consumer or to prevent the full and free  
n in the importation, transportation, manufacture or sale of  
oleum, or any of its products.

aspiring or combining with themselves or with any other per-  
or corporations within or without the state of Kansas for the  
monopolizing the production, transportation, manufacture or  
ide petroleum, or any of its products.

uing or owning trust certificates of stock or entering into any

combination, contract, agreement, arrangement or understanding with any person or persons, corporation or corporations, or with any stockholder or director thereof, or issuing or owning stock for the purpose of effecting or attempting to effect any combination, contract, agreement, arrangement or understanding to place the management or control of the aforesaid several businesses or the manufactured product thereof in the hands of any trustee or trustees, holding company or agency, with the intent to limit or fix or to the effect of limiting or fixing, the price, or lessen the production, transportation, manufacture or sale of crude oil or any of its products.

4th. To fix any standard or figure whereby the price to the public of crude petroleum, or any of its products, shall be in any manner controlled or established.

5th. To make, or enter into, execute, or carry out any contract, obligation, agreement, arrangement or understanding of any kind or description by which they or any of them, shall bind or have to bind themselves not to produce, transport, sell, manufacture or dispose of crude petroleum, or any of its products, or by which they or any of them shall agree in any manner to keep the price thereof at a fixed or graded figure, or by which they or any of them shall in any manner establish or settle the price thereof between themselves or between themselves and others to preclude the free and unrestricted competition therein, or by which they shall agree to pool, combine, or unite any cause that they may have in connection therewith that its price may in any manner be affected.

V. The court hereby retains jurisdiction of this case for the purpose of supervising the carrying out of the provisions of this decree and the enforcement thereof and the making of such orders in relation to the execution and enforcement of this decree as may seem proper.

VI. That the plaintiff do have and recover against said defendants the costs of this action, taxed at \$16,420.03.

O. K. JOHN S. DAWSON, *Attorney-general*,  
For the State of Kansas.

## FOURTY-SECOND ANNUAL REPORT.

DEPARTMENT OF INSURANCE—STATE OF KANSAS.

TOPEKA, KAN., May 1, 1912.

*Secellency, W. R. Stubbs, Governor:*

DEAR SIR—I have the honor to transmit herewith the second annual report of the Department of Insurance of the State of Kansas for the year ending December 31, 1911, containing a detailed record of the collections, disbursements, and statistical information of general character pertaining to the same.

Referring to the detailed statements of the collections of fees and taxes from the various companies transacting business in

Kansas, you will observe that the revenues of the Department are increasing annually. Total amount of fees collected by this Department for 1911, \$343,540.64; total for 1910, \$325,983.28; total for 1909, \$298,423.29; total for 1908, \$270,206.68. This indicates a steady increase of revenue to the State derived from fees and taxes collected from the various insurance companies transacting business in the State, which could be produced only through an increase in the volume of business of the companies.

The total of \$338,755.58 collected from all the insurance companies transacting business in Kansas from January 1 to December 31, 1912, the sum of \$173,010.09 was collected from fire insurance companies of other States and countries. It is not to be understood that this amount operates as an additional charge upon the purchaser of fire insurance. Such being the case, is it wise to continue a system which adds additional revenue to the State by direct contributions of purchasers of fire insurance?

The citizens of Kansas were paid the sum of \$3,111,272.00 in 1911 on account of losses sustained by fire. These losses represent about 50 per cent of the total loss sustained. The State cannot and can not take into account losses by those who have no insurance; it does not include losses paid by companies or societies which provide for insurance for their

membership or other companies or concerns over which this Department exercises no supervision. This enormous loss represents property destroyed for all time in an amount approximately equal to \$3 for every man, woman and child in the state.

All are agreed as to the desirability of securing as low a rate of insurance as can be obtained commensurate with safe business. We buy insurance for protection, but it is manifest that protection is unsound unless there can be a margin above the losses and expenses of placing the business. In order to obtain a lower rate of insurance, therefore, it follows that the fire waste must be reduced. To use the language of my predecessor, Superintendent Barnes, in his annual report for 1910:

"The causes of fires result in a majority of cases from defective chimneys, flues, fire-places, heating and lighting apparatus, deficient construction and equipment, matches, sparks, explosions, incendiaries, electricity, deficient electric wiring and lightning. The average person does not recognize the duty he owes to society in the exercise of care in the construction and maintenance of buildings for protection against fire. I do not believe that legislation regulating this proposition will be long deferred, but it is an assured fact that the action of legislative and municipal authorities in enacting laws to reduce the fire waste would assure direct financial benefits to their constituents in reducing the cost of insurance."

I believe that fully one-half of the fire waste may be placed at the door of the *careless*. Carelessness in handling the match, faulty construction and equipment, the careless smoker, carelessness in permitting rubbish to accumulate upon the premises. In France and Germany carelessness upon the part of the people of the character stated above is made a crime against the state.

It is lamentable that too many people feel that their responsibility ends as soon as their property is covered by insurance. The education of the whole people to the importance of safeguarding their property against fire by the elimination of carelessness is the end sought. The State Fire Prevention Association is doing splendid work along this line and should be commended and encouraged. The proclamation, issued by your Excellency, designating a general clean-up day is an advanced step toward the attainment of the object sought and,

in my opinion, one day in each year should be set aside and designated "Clean-up Day" by statute. If means can be devised whereby the public may understand that one-half of the enormous fire waste is directly attributable to carelessness and through this knowledge be influenced to the extent of eliminating it, a reduction of the rate of insurance proportionately must and will follow.

The loss by fire originating through incendiary origin is much greater than the average citizen is aware of and appears to be on the increase. Contrary to the general understanding, the insuring public pays for the losses of this character by increase in the rate of insurance. Resting under the delusion that the insurance companies are the only sufferers, the public remains indifferent and the criminals are allowed to escape punishment.

The enactment of a law creating a fire marshal and clothing him with authority to rigidly investigate all questionable fires, to administer oaths and compel citizens to testify before him, would result, as it has in other states where this law has been enacted, in the conviction of many criminals, preserving thousands upon thousands of dollars in property (a direct saving to the people), the saving of many human lives and a lower rate to insurers.

The incentive of the incendiary is that of obtaining more for his property by burning it than can be obtained otherwise. His unlawful and inhuman ambition is made possible by the insurance companies through over-insurance. While we must hold the insurance companies responsible, they can not altogether be charged as blamable inasmuch as they promptly reject insurance on property greater than its value when they have knowledge of it, but the blame attaches to them through and on account of the ignorance or cupidity of the agent. No person will burn his property for the insurance if he can sell it for more.

From my viewpoint, the remedy for a cure of over-insurance, and consequently the elimination of incendiarism, is to fix by statute an insurance valuation on all real property, a maximum value for insurance in no case higher than its real value. A solution which would make the problem simple indeed would be to provide that the value fixed by the last assessor's returns on real estate shall be the insurance value.

I recommend the enactment of a law along the lines of the suggestion above.

The wisdom of the enactment of the law regulating fire insurance rates and to prevent discrimination in the transactions of the insurance business is evidenced by the fact that four other states have already followed Kansas in the enactment of similar laws. Kansas in passing this law took an advanced step in the right direction in the solution of that vexed question of fire insurance rates which sooner or later, in my opinion, will be acknowledged by all the states in the enactment of similar laws. But the states enacting this law since its enactment in Kansas have had an advantage by observing the practical workings of the law here and have thereby been able to materially strengthen certain features of the law found to be weak. Our law requires companies to file with the Superintendent of Insurance general basis schedules showing the rates upon all classes of risks and all charges, credits, terms, privileges and conditions which in any wise affect the rates or the value of the insurance to the insured. In order to obtain a proper rate the various companies, through a system of inspection, classify the various cities and towns of the state as first, second, third, fourth, fifth and sixth class, and a basis rate is established for each class, dependent upon the adequacy of the fire department, fire fighting apparatus, water system, etc. To the basis rate is added many charges for additional hazards, such as occupancy, thickness of walls, openings in walls or floors, character of roof, area, height, sky-lights, heating and defective electric wiring, which are all taken into consideration in determining the rate.

Section 199, chapter 55, Laws of Kansas, 1909, provides that when the Superintendent of Insurance shall determine that any rate made by the insurance companies is excessive or unreasonably high he shall direct the companies to file a lower rate. The weakness in the law consists in its failure to provide proper means of ascertaining whether a rate is too high or not. Take this example: A city complains that the inspectors of the insurance companies have classified it into a lower class than proper and, in consequence, a higher rate of insurance is established than is justified, and asks relief through this Department. The Department undertakes an investigation by the only means at hand—correspondence through the mails. The insurance companies contend that the

water system is totally inadequate—insufficient pressure, mains too small, etc.—and that this condition prohibits a higher classification, all of which is desired by the city authorities.

Hundreds of individual complaints reach this Department that the companies, through their inspectors, in making up a rate have added charges for hazards that have no existence. This Department must have help to be able to intelligently determine the facts. It should be provided with funds sufficient to employ a competent person or persons to make a thorough investigation by personal inspection. In my opinion this is imperative, and unless provision is thus made this law must fail. At the present time no provision is made for inspection by the superintendent, or by any other means of investigation except through correspondence, and this method has proven unsatisfactory and practically of no value. Other states having passed this law have provided means for its proper enforcement. Complaints of inspections made by the insurance companies should be met by sending a competent person to check up the reports filed by the companies and ascertain their correctness.

I recommend the enactment of additional laws as follows:

A law requiring that all companies transacting liability business in this state be made a party to the action commenced by an injured employee against the employer.

A law defining an agent for an insurance company.

A law requiring the approval of the Department of Insurance of all reinsurance contracts where transfers of membership, finances or interests of policyholders are made to other similar corporations.

An anti-rebate law applicable to life and accident companies. The practice of rebating by agents is, in my opinion, immoral, indecent and degenerating to agent, company and recipient. This Department refuses to license a rebater.

A law to establish uniform standard provisions for policies of health and accident insurance as recommended by the National Convention of Insurance Commissioners.

A law amending the present laws or parts of laws relating to reserve valuation of legal reserve life insurance companies, providing for a uniform standard of reserves for all such companies.

A law providing that copies of all reports made by a receiver or receivers appointed to take charge of the affairs of any insurance or guaranty company incorporated under the laws of this state shall be filed with the Superintendent of Insurance, and that the expense of preparing such copies shall be made a part of the costs of such receivership. Heretofore, the records of the Department of Insurance are lacking in information pertaining to the dissolution of Kansas insurance or guaranty companies.

A law to provide for automatic nonforfeiture provisions in policies issued by legal reserve life insurance companies. This Department, having been apprised of losses to citizens of this state by reason of their failure to observe the requirements of policy provisions by giving notice of intent to discontinue, and, being without authority under law, used its discretionary powers by refusing to authorize any company to transact business in this state which did not provide for automatic nonforfeitures.

#### BUSINESS OF 1911.

From January 1, 1911, to January 1, 1912, the fees collected were:

Agency licenses .....	\$44,639 50
Charter fees .....	1,900 00
Annual statement fees .....	13,475 00
School fund .....	11,750 00
Taxes .....	226,159 77
Certificate and seal .....	149 00
Miscellaneous .....	1,444 50
Examination fees .....	3,899 11
	<hr/>
	\$303,416 88
Firemen's relief fund .....	40,123 76
	<hr/>
Total .....	\$343,540 64
	<hr/>
By payments to state treasurer .....	\$303,416 88
By firemen's relief fund to cities .....	39,543 86
Kansas State Firemen's Association .....	555 40
Firemen's relief fund received after distribution in 1911 .....	24 50
	<hr/>
Total .....	\$343,540 64

During the year 1911, January 1 to December 31, examinations and fees therefor were:

St. Paul Mutual Hail and Cyclone Ins. Co.,	\$240 75
State Farmers' Mutual Hail Ins. Co. ....	227 25
Anchor Life Insurance Company.....	93 00
Osage Fire Insurance Company .....	57 50
Knights and Ladies of Protection .....	25 00
Fraternal Aid Association .....	137 08
Modern Order of Prætorians.....	106 45
Bankers' Deposit Guaranty and Surety Co.,	36 00
Colorado National Life Assurance Co. ....	167 20
Pacific Coast Casualty Company .....	191 00
Pacific Mutual Life Ins. Co. (Accident) ..	183 00
German American Life Insurance Co. ....	104 25
National Fidelity and Casualty Company..	88 15
Equitable Surety Company .....	100 00
Scandia Life Insurance Company .....	200 00
National Life Ins. Co. of the U. S. of A. .	220 00
Central National Fire Insurance Company,	500 00
American Life Insurance Company .....	132 80
Knights of the Maccabees of the World.	181 50
Pennsylvania Casualty Company .....	126 00
National Americans .....	141 30
Federal Insurance Company .....	264 00
Knights of the Modern Maccabees .....	53 10
Massachusetts Bonding and Insurance Co.,	198 00
Farmers' Mutual Ins. Co. of El Dorado ...	125 78
Total .....	<u>\$3,899 11</u>

BUSINESS OF 1912.

From January 1, 1912, to May 1, 1912, collections were as follows:

Agency licenses .....	\$36,044 50
Charter fees .....	455 00
Annual statement .....	12,830 00
School fund .....	11,050 00
Taxes .....	232,787 87
Certificate and seal .....	43 00
Miscellaneous .....	1,524 70
Examination fees .....	1,269 60
Total .....	<u>\$296,004 67</u>
Firemen's relief fund, 1911 .....	42,726 41
Firemen's relief fund not distributed in 1911 .....	24 50
Total .....	<u>\$338,755 58</u>
By payments to state treasurer .....	\$296,004 67
By firemen's relief fund to cities .....	42,109 20
Kansas State Firemen's Association .....	641 71
Total .....	<u>\$338,755 58</u>

## Examinations from January 1, 1912, to May, 1912:

Fraternal Mystic Circle .....	\$200 00
Western Casualty and Guaranty Ins. Co...	271 05
National Protective Legion .....	170 00
State Farmers' Mutual Hail Ins. Co. ....	275 40
St. Paul Mutual Hail and Cyclone Ins Co.,	353 15
<b>Total .....</b>	<b>\$1,269 60</b>

I herewith submit a statement, itemized as to companies, of fees collected from January 1, 1912, to May 1, 1912. All fees, except firemen's relief fund, are turned into the state treasury. The collection of firemen's relief fund, and the distribution thereof to the cities entitled thereto and to the State Firemen's Association, appear on subsequent pages.

## KANSAS MUTUAL FIRE.

Alliance Coöperative .....	\$62 50
Bremen Farmers' Mutual.....	19 00
Brown County Farmers' Mutual.	28 00

## EIGHTEENTH BIENNIAL REPORT.

*To His Excellency, Hon. W. R. Stubbs, Governor of Kansas:*

SIR—I have the honor to submit herewith a report of the business of this office and the activities of the organized militia of this state, known as the Kansas National Guard, for the biennium, June 30, 1910, to June 30, 1912.

The past biennium has been a very busy one for the National Guard of this state. It has made great progress during this period, and this Department has been advised by officers of the War Department that it is not excelled by the National Guard of any other state. Never in the history of the Guard has every element and part of the organization coördinated in its upbuilding and progress as in the past two years. Every officer and enlisted man seems to have acquired the spirit of progress of the time and is determined to make the organization one that is not only an honor but a privilege to belong to. It is now as much a recognized part of the military resources of the national government as is the regular or standing army. It can be called directly into the service of the United States by organizations without new enlistments. The organizations as such can be called for indefinite service, each officer and man serving for the balance of his term of commission or enlistment. It is expected to be in such a state of readiness as to be prepared for immediate active war service, and, as a matter of fact, it would form a part of the first line. This new function of the National Guard has brought about the necessity for a very different kind of training. In fact, it must be trained to perform all the duties for the state in time of peace, in maintaining law and order and protecting life and property, and in addition thereto be trained in all those duties which would have to be performed in active war service. It is therefore a dual organization—a state organization in time of peace and a national organization in time of war.

Few realize how much training is now required of the National Guard, but this may be classified under the following general heads:

- The use and care of arms.
- Sanitation and care of the wounded in the field.
- Discipline.
- The science of war.

In former times the simplicity of firearms did not require the same amount of training as at present. With modern rifles the effective range in open country is one mile. At one thousand yards firing should be quite accurate. The rifle itself is complicated, involving a great deal of care in keeping it in proper condition. The artillery arm is even more complicated and has an effective range of over three miles. The firing of this arm is, as a rule, indirect—that is, by a system of mathematical calculations the fieldpiece can be fired from a concealed position without the object fired at being in view. This, perhaps, is one of the most difficult tasks presented, requiring patience on the part of both officers and men.

Until recent years little attention was paid to sanitary laws in active field service, neither was the individual man trained in the methods of caring for himself in the field. Without going into unnecessary details, it may be stated in a general way that much time and effort is now spent in training men not only to understand but to observe proper sanitary regulations.

In the care of the wounded in the field much attention is given. All men are taught the application of first aid to the wounded. They are provided with simple bandages and taught the use of same. All wounds not serious are dressed on the field of battle, thereby saving much loss of life. Thousands of well-trained men slightly wounded are returned in a few days or weeks to their proper commands.

The word "discipline" is used here in its broadest sense. It means prompt and cheerful obedience to orders, accurate and faithful performance of duty, and, above all, the proper co-ordination of each unit to all others; orderly administration of all departments; in general, all those things which make an army move like a well-adjusted piece of machinery, each part fitting into the other, and each part adjusted to do the particular thing for which it is designed.

It takes more time, probably, to secure good discipline than any other part of the soldier's training. It requires the constant supervision of officers, the frequent bringing together of each branch of the service; it requires a thorough knowledge of customs, forms and regulations.

Officers must be schooled in the effective training and handling of men in the field, not only in preparation for battle, but in battle itself. This is done by active service in the field. Under present plans, frequent mobilization of the National Guard with the regular army is particularly important, especially in coördinating these two branches of the service. This training is obtained by performing the same kind of duties in the open country as might be required in actual war, scouting, reconnoissance, patrolling, advance and rear guard, extended order, battle exercises, making and reading maps, judging

and elevations, plans of battle, issuing orders in form, etc.

In the absence of the opportunity for field service, military duties are worked out on maps devised for this purpose. There is no limit to the amount of work that can be done along these lines. The National Guard is now being trained in all duties, and it is becoming, in fact as well as in name, a military organization. This all requires an immense amount of instruction and labor. The National Guard is in fact a school in which the young men who belong to it are developed mentally, morally, and physically.

The National Guard is particularly commended to the consideration of all employers. It is believed that if employers thoroughly understand its importance and value they will heartily encourage the young men in their employ to join and will willingly grant them the amount of time from their regular work to properly perform the military duties required.

Our country should certainly feel proud of its National Guard and should stand ready to support it in every possible way. Its success will depend, as almost everything depends, on the good will of the people at large. It is doing all it can to secure this good will.

It is believed that in the development of this special form of military organization—that is, the volunteer organization or National Guard—in conjunction with the regular army, the future problems of our military policy of this country is solved. It meets all the needs required. In developing this force, no matter to what extent, men are not withdrawn from their regular vocations and therefore from the productive capacity of the country. While filling their regular positions in life, they heartily devote a part of their time in preparing themselves for military service. This form of military training does not create a prejudice in the minds of the people, but, on the contrary, makes military service popular.

The value of the National Guard does not rest alone upon the fact that it is an effective military force for war service. It is also a great educational institution. No one who undergoes the training can fail to come to the conclusion that the discipline required, the development of intelligence, the precise and efficient performance of duties, the development of physical strength and endurance, makes a better class of citizens.

No other institution is doing more to develop the patriotism of our country. The influence of the National Guardsmen extends out into every walk of life and into every community. It is a military school which is preparing thousands of men for the defense of their country. These men will

rally to the colors whenever the safety of our country and its institutions requires it.

#### ORGANIZATION.

The organized militia of Kansas consists of the various staff corps, departments, retired list, and a brigade (the First), commanded by Brig. Gen. Charles S. Huffman, headquarters, Columbus.

The brigade is composed of :

- Two regiments of infantry.
- Two provisional companies of infantry.
- Battery A, field artillery.
- Company A, signal corps.
- Sanitary troops.

**FIRST INFANTRY.**—Twelve companies and band. Col.\* Wilder S. Metcalf, commanding; headquarters, Lawrence.

- Company A—station, Clay Center.
- Company B—station, Burlingame.
- Company C—station, Burlington.
- Company D—station, Paola.
- Company E—station, Fredonia.
- Company F—station, Hiawatha.
- Company G—station, Fort Scott.
- Company H—station, Lawrence.
- Company I—station, Manhattan.
- \* Company K—station, Coffeyville.
- Company L—station, Yates Center.
- Company M—station Iola.

**SECOND INFANTRY.**—Twelve companies and band. Col. Perry M. Hoisington, commanding; headquarters, Newton.

- Company A—station, Wichita.
- Company B—station, Holton.
- Company C—station, Garden City.
- Company D—station, Newton.
- Company E—station, Hutchinson.
- Company F—station, Larned.
- Company G—station, Osborne.
- Company H—station, Winfield.
- Company I—station, Wichita.
- Company K—station, Independence.
- Company L—station, Emporia.
- Company M—station, Salina.

**BATTERY A, FIELD ARTILLERY.**—Topeka. Capt. W. A. Pattison, commanding.

**COMPANY A, SIGNAL CORPS.**—Wellington. Capt. Thomas A. Mayhew, commanding.

---

\* This company was mustered out May 5, 1912. New company will be organized.

**FIRST PROVISIONAL COMPANY.**—Lawrence. Capt. Horace E. Steele, commanding.

**SECOND PROVISIONAL COMPANY.**—Ellsworth. Capt. William B. Hutchison, commanding.

**HOSPITAL CORPS.**—Lawrence. Maj. Carl Phillips, commanding.

**CHANGES DURING THE PERIOD.**

**First Infantry.**—Band; station, Hiawatha; mustered out June 6, 1911. Band; station, Lawrence; mustered in July 7, 1911. Company K; station, Coffeyville; mustered out May 5, 1912.

**Second Infantry.**—Band; station, Downs; mustered out November 28, 1911. Band; station, Topeka; mustered in January 26, 1912. Company B; station, Wellington; mustered out December 31, 1910. Company K; station, Caney; mustered out November 14, 1910.

**Second Provisional Company.**—Station, Hays; mustered out September 16, 1910.

**Second Provisional Company.**—Station, Holton; mustered in September 24, 1910. Assigned to Second infantry and designated company B, December 31, 1910.

**Second Provisional Company.**—Station, Independence; mustered in March 9, 1911. Assigned to Second infantry and designated company K, June 1, 1911.

**Second Provisional Company.**—Station, Ellsworth; mustered in January 29, 1912.

Totals.....	7	2	16	2	2	2	83	26	140	395	1,728

The strength reaches its lowest mark at this time of the year. The strength usually averages about 1800. Mustered out May 5, 1912.

**EQUIPMENT.**

The National Guard is thoroughly equipped for field service, with the exception of escort wagons and some additional technical equipment for the signal corps. The state has no place to store escort wagons, and it is thought best not to procure them for the present, as they can be readily supplied in case the troops are called into active service. The technical equipment needed by the signal corps will be procured this coming fiscal year. The equipment is supplied to the state by the federal government on requisition, the cost of same being charged to the state's allotment from the federal government.

Returns are made annually to the federal government, accounting for this property. The property is in excellent condition and well cared for. Frequent verifications of the property are made, and shortage, if any, immediately accounted for. The Quartermaster General's report, found in another part of this report, will give a detailed report of the property on hand.

Since my last report the battery has been equipped with the new 3-inch field artillery equipment without cost to the state. This is the latest equipment issued by the ordnance department, and costs about \$85,000. The old equipment was returned to the United States arsenal at Rock Island, Ill.

**ARMORIES.**

The greatest need of the Guard to-day is adequate and suitable armories for the proper storage and care of property and for drill and school purposes. Only one company in the state, B, Second infantry, Holton, owns its armory. This armory was built by the company at a cost of about \$10,000, and the members of the company are paying for it. All the other companies occupy rented halls, many of them absolutely unfit for the purpose, and all of them unsuitable. Rentals have increased, and practically all of the companies are paying all of their annual allowance from the state for rent, leaving nothing for other expenses. Many are paying more than their allowance and some more than twice their allowance.

The federal government furnishes the equipment to the state with the understanding that the state will provide suitable armories for the proper care of this equipment. Federal inspectors have always reported that the armories in Kansas were not suitable. In 1909 the legislature passed a law authorizing the building of armories, but failed to make an appropriation making the law effective. This law provides that if towns in which companies are located will raise not less than \$2500 for the purpose of erecting an armory, that the state will add to this amount twice as much. This is a good law and should be put into effect. It would not only bring about

big saving in the companies' equipment, but would save the state the expense of renting armories. I trust that you will urge the legislature to make an appropriation to make this law effective.

#### INSPECTIONS.

The National Guard is inspected twice annually at the home stations of the various organizations by officers detailed for this purpose. These inspections are required by section 29 of the militia code. Two inspections are made each year by officers of the regular service detailed by the Secretary of War, as provided in section 14 of the national militia law. The federal allotments to the states are based upon these inspections. These officers report upon the strength, organization, equipment, instruction, efficiency for field service, care of property, armories, etc. These officers have made excellent reports on the work of the Guard. Detailed reports of inspection made by state officers will be found in circulars No. 1, 1911; No. 2, 1911; No. 1, 1912; No. 2, 1912.

#### SCHOOLS.

The correspondence school for officers, established in 1909, is still progressing and has been very beneficial to the officers. The class which started with the establishment of the school in 1909 graduated in April of this year. There were ninety-three officers in the graduating class, and they were each given a handsome diploma. A class of sixteen officers finished the first year's work in April of this year and will begin the second year's work in September. A detailed report of this school work will be found in G. O. 22, 1910, G. O. 22, 1911, and G. O. 15, 1912, in another part of this report.

#### SCHOOL CAMPS.

A school camp for officers of infantry was held at Fort Leavenworth, July 10 to 17, 1910. There were about one hundred officers in attendance at this school. Officers of the regular service were detailed as instructors. The school camps enable the officers to work out in the field the problems they have been studying during the year. The cost of this camp was met largely from federal funds. A detailed report of this camp will be found on page 73 Seventeenth Biennial Report of this office.

No school camps were held in 1911 on account of the mobilization of the federal forces on the Mexican border and the consequent lack of officers of the regular establishment for detail as instructors. The Secretary of War authorized the detail of a limited number of officers from this state to attend the maneuver camp at San Antonio, Texas, in April and May. The following officers were given this detail:

April 5. Capt. Dennis J. Sheedy, First infantry, Fredonia; Capt. Fred

L. Lemmon, Second infantry, Hutchinson; Capt. Harry G. Menkemey, Second infantry, Wichita.

April 25. Capt. Samuel G. Clark, First infantry, Lawrence; Capt. Guy R. Martin, First infantry, Clay Center; Capt. John H. O'Connor, Second infantry, Osborne.

May 11. Maj. Aaron L. Hitchens, First infantry, Burlington; Maj. Henry T. Salisbury, medical corps, Burlington, First Lieut. Clarence Grimes, field artillery, Topeka.

May 27. Col. P. M. Hoisington, Second infantry, Newton; Capt. Albert H. Krause, First infantry, Lawrence; First Lieut. Seth A. Hamel, medical corps, Topeka.

These officers all submitted reports on this tour of duty, which reports are on file in this office, being too lengthy to publish. The officers were all well pleased with the tour and report that it was very profitable and beneficial. The cost of these details was met from federal funds.

A school for field artillery was held at Fort Riley June 10 to 10, 1912. The following officers were in attendance this camp: First Lieut. Clarence G. Grimes, First Lieut. Charles E. Edwards, Second Lieut. M. C. Pennekamp.

A school camp of instruction for infantry officers was held at Fort Leavenworth June 17 to 22, 1912. There were in attendance at this camp eighty-five officers and a detail of fifty enlisted men. The camp was commanded by Col. P. M. Hoisington, Second infantry, and the instruction was under the supervision of Maj. Waldo E. Ayer, U. S. A., instructor-inspector for the organized militia of this state. Major Ayer was assisted by the best talent the army could produce. This was the best school ever held in the state. The cost of this camp was largely met from federal funds. A detailed report of this camp will be found in Circular No. 5, 1912.

A school of fire for field artillery officers was held at Fort Sill, Okla., May 15 to June 15, 1912. First Lieut. Charles Edwards was detailed to attend this school. The cost of this detail was paid from federal funds.

A school for field artillery officers was held at Fort Riley July 6 to 20, 1912. The following officers were detailed to attend this school: First Lieut. Clarence G. Grimes, First Lieut. Charles E. Edwards, Second Lieut. M. C. Pennekamp, Second Lieut. Dana T. Jennings. The cost of this camp was met from federal funds.

#### CAMPS OF INSTRUCTION.

Camps of instruction in which the entire National Guard participated were held at Fort Riley, August 15 to 26, 1911 and August 7 to 16, 1912. Detailed report of the 1910 camp will be found at page 370, Seventeenth Biennial Report of this office, and report of the 1911 camp will be found in Circular No. 4, 1911, in another part of this report.

# VISIT OF PRESIDENT TAFT TO THE STATE.

In September, 1911, the President of the United States spoke at several points in this state, and at points visited by him where companies were located the company turned out as an escort. His visits to Hutchinson and Topeka were made on state occasions. Companies A, D, E, F and I of the second infantry, commanded by Col. P. M. Hoisington, were ordered to Hutchinson as an escort; and battery A, companies B, H, and band of the First infantry, company B, Second infantry, and the first provisional company, commanded by Col. Wilder Metcalf, were ordered to Topeka as an escort.

## CAMPS OF INSTRUCTION FOR RIFLE PRACTICE.

In 1910 each company of infantry held a six-day camp of instruction for rifle practice on its local rifle range. The inspectors of small-arms practice were detailed to attend these camps as instructors. These camps were very instructive and very beneficial, and as a result of holding these camps a greater per cent of the Guard qualified with the rifle this year than had qualified in any previous year. The cost of these camps was paid from federal funds.

A state camp of instruction for rifle practice was held at Fort Leavenworth July 18 to 23, 1910. This was a competitive shoot, and a number of prizes were awarded and a team selected to represent the state at the national match. All members of the Guard who qualified as experts with an aggregate score of 345 out of a possible 450 were authorized to attend this camp. There were in attendance at this camp 117 contestants.

The following were selected as a team to represent the state at the national match at Camp Perry:

### OFFICERS.

Brig. Gen. Charles I. Martin, the Adjutant General, chief of staff, Topeka, to be captain.  
Lieut. Col. Willie McD. Rowan, Second infantry, Garden City, to be coach.  
Capt. George J. Frank, First infantry, Manhattan, to be spotter.  
Lieut. Col. Charles S. Flanders, First infantry, Paola, to be range officer.

### TEAM.

Maj. Bruce Griffith, ordnance department, Wichita.  
Capt. Rodney J. Kessler, ordnance department, Hutchinson.  
Capt. Earl A. Cole, ordnance department, Manhattan.  
Capt. Guy P. Sawyer, Second infantry, Newton.  
First Lieut. Raymond Stotts, Second infantry, Garden City.  
First Lieut. William D. Fleeman, Second infantry, Hutchinson.  
First Lieut. Frank Parmely, First infantry, Burlington.  
First Lieut. Guy N. Walling, First infantry, Lawrence.

First Lieut. Clement O. Smith, First infantry, Burlington.

Second Lieut. Charles C. Clark, First infantry, Burlington.

Second Lieut. Thomas R. Campbell, Second infantry, Hutchinson.

First Sergt. Adolph D. Altenreid, company E, Second infantry, Hutchinson.

Quartermaster Sergt. James B. Brown, company K, Second infantry, Caney.

Sergt. George R. Wooten, company E, First infantry, Fredonia.

Sergt. Forest C. Walden, company D, Second infantry, Newton.

This team entered the match in thirty-fourth place and finished in sixteenth place, winning first prize in class C, "The Bronze Soldier of Marathon" and \$300 in cash. This was the first time a Kansas team had won a prize in these matches.

In 1911 no company rifle camps were held, owing to the lack of funds for this purpose. A state camp of instruction for rifle practice was held at Fort Leavenworth July 17 to 29, 1911. This was a competitive shoot, and a number of prizes were awarded and a team was selected to represent the state in the national match. All members of the Guard were authorized to attend this camp who qualified as expert riflemen with an aggregate score of 368 out of a possible 450. There were in attendance at this camp 100 contestants. The following were selected as a team to represent the state at the national match at Camp Perry:

#### OFFICERS.

Brig. Gen. Charles I. Martin, the Adjutant General, chief of staff, Topeka, to be captain.

Maj. Bruce Griffith, brigade inspector small-arms practice, Wichita, to be coach.

Col. Wilder S. Metcalf, First infantry, Lawrence, to be spotter.

First Lieut. William R. Fleeman, Second infantry, Hutchinson, to be range officer.

#### TEAM.

Col. Jerry C. Springstead, pay department, Topeka.

Capt. Rodney J. Kessler, second infantry, Hutchinson.

Capt. Earl A. Cole, First infantry, Manhattan.

Capt. Guy P. Sawyer, Second infantry, Newton.

First Lieut. Frank Parmely, First infantry, Burlington.

First Lieut. Guy N. Walling, First infantry, Lawrence.

First Lieut. Ira E. Brighton, First infantry, Coffeyville.

First Lieut. Clement O. Smith, First infantry, Burlington.

Second Lieut. Charles C. Clark, First infantry, Burlington.

Second Lieut. Thomas T. Campbell, Second infantry, Hutchinson.

Second Lieut. Wilbur T. Phares, First infantry, Burlington.

Sergt. James B. Brown, company K, First infantry, Caney.

Sergt. George R. Wooten, company E, First infantry, Fredonia.

Sergt. Joseph S. Wenger, first provisional company, First infantry, Lawrence.

Private William L. Stryker, company E, First infantry, Fredonia.

entered the match in sixteenth place and finished in seventh place, receiving the first prize in class B, "The Hilton Trophy" and \$350. A detailed report of the 1910 camp will be found at page 290, in the Biennial Report of this office, and report of the 1911 camp will be found in Circular No. 3, 1911, in another part of this report.

#### EXAMINATION OF OFFICERS FOR COMMISSION.

Under the provisions of G. O. 48, 1910, officers are required, in receiving a full commission, to pass an examination before the Military Board, sitting as an examining board, in the following subjects:

English grammar, including orthography, reading, and writing composition.  
His knowledge of arithmetic and his ability to apply his rules to word problems and practical questions.  
Geography, more particularly in reference to the United States and America.  
Lines of the history of the United States.  
Army regulations, briefly and only the most important subjects.  
Duties of the branch of the service for which application is made.  
Constitution of the United States and the form of government.  
The probable efficiency and aptitude of the candidate as judged by his record and as shown by his knowledge of army and drill regulations, and his experience in a military school, or in the National Guard.

Under the provisions of G. O. 43, 1910, officers are required to pass an examination on promotion, as follows:

#### FOR OFFICERS OF THE CORPS OF ENGINEERS.

Written examinations in any of the subjects given in the school during the preceding two years; not to exceed twenty questions on any one subject. (The officers' course only.)  
Military Engineering. (Engineers' Field Manual, No 29.)  
Bridges: Trussed ladder bridges; spar bridges; single and double trestle bridges.  
Fortifications. (Part V, paragraphs 1 to 35.)  
Arithmetic; description of, and their uses.  
Solution of plane right-angled and oblique-angled triangles.

#### FOR OFFICERS OF THE QUARTERMASTER'S DEPARTMENT.

As above.  
Quartermaster's Manual, 1904: Paragraphs 3 to 11, 17 to 20, 33, 51, 78, 79, 180, 190, 191, 192, 193, 217, 218, 231 to 235, 257, 301, 318 to 326, 361 to 393, 428 to 433, 452, 469 to 479, 483, 498, 500 to 518, 547, 548, 552, 553, 554, 555, 570 to 578, 599, 657, 691, 700, 702, 704, 706, 707, 708, 714, 716, 717, 718, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.  
Examinations will be under the above paragraphs only; the board has great latitude in considering the answers made thereto. It will be expected that the officer will be able to give full answers to these questions, but the board will endeavor to ascertain his general knowledge of various subjects.

## FOR OFFICERS OF THE SUBSISTENCE DEPARTMENT.

- (a) As above.
- (b) Subsistence Manual, 1903: Paragraphs 4, 5, 6, 11, 12, 13, 15, 18 to 25, 29, 33, 41, 51 to 67, 73, 77, 93 to 96, 101, 109, 115, 116, 118, 134, 135, 141, 142, 195 to 199, 204 to 211, 221 to 226, 428 to 444, 445, 464, 551, 552 to 554, 624 to 632, 713, 714, 719, 720, 731, 737, 741, 746, 749, 752, 753, 755 to 760, 788, 836, 862, 889, 925 to 940, 944, 945, 948, 949, 954 to 961, 965, 999, 1000, 1003, 1005.

The same remarks as under (b) in Quartermaster's Department apply.

## FOR OFFICERS OF THE SIGNAL CORPS.

- (a) As above.
- (b) Signal Manual No. 3, 1905: Electrical definitions and terms. Primary batteries—gravity cell (chapter 2). Electro-chemical action of a battery (page 23). Grouping cells (page 23). Telegraph installation (page 45). Adjustment of instruments (chapter 6). The buzzer (page 87). Testing lines (page 141). Theory of the telephone (chapter 14).
- (c) Logarithms and their use.

## FOR OFFICERS OF THE ORDNANCE DEPARTMENT.

- (c) Logarithms and their use.

## FOR OFFICERS OF THE ADJUTANT GENERAL'S, JUDGE ADVOCATE GENERAL'S AND INSPECTOR GENERAL'S DEPARTMENTS.

Special examinations will be formulated and timely notice given.

## . FOR OFFICERS OF INFANTRY AND ARTILLERY.

*Lieutenant to Captain.*

- (a) As above.
- (b) U. S. Army Regulations, 1908. Articles XXX, XXXII, XXXIII, XXXIV, XXXV, XXXVI, XXXVII, XXXVIII, XXXIX, XL, XLII; paragraphs 328, 329, 330.
- (c) Rules and Regulations for the Kansas National Guard, 1909. Paragraphs 60, 62, 64, 65, 68, 70, 71, 73, 74, 75, 79, 81, 84, 85, 86, 136, 164, 173, 220, 223, 225, 527, 530. Articles I, II, VI, VII, VIII, XXVI, XXVII.
- (d) General Orders, No. 22, A. G. O., series 1909. (Mobilization order.)
- (e) Company drill of imaginary troops.

*Captain to Major.*

- (a) As above.
- (b) U. S. Army Regulations, 1908. Articles XXIX, XXXIII, XXXIV, XXXV, XXXVI, XXXVII, XXXVIII, XXXIX, XL, XLII; paragraphs 322, 487, 488 (4), 488 (5286), 755 to 761.
- (c) Rules and Regulations for the Kansas National Guard, 1909. Paragraphs 1 to 41, 43, 44, 52 to 57, 60, 62, 70, 71, 74, 75, 79, 81, 85, 154, 172, 174, 175 to 184, 468 to 514.
- (d) As above.
- (e) Battalion drill of imaginary troops.

*Major to Lieutenant Colonel.*

(a) As above.

(b) Infantry Drill Regulations, 1904. Evolutions of the regiment. The brigade. Ceremonies; general rules. Reviews; general rules. Camping (paragraphs 562 to 569). Honors (paragraphs 587 to 602).

(c) The solution of a problem in minor tactics, selected by the board. In problems in minor tactics given for examination it is not expected that the officer will always give the accepted solution. All that will be demanded of the officer is that the solution is "feasible and good and that it meets the conditions of the problem."

Any officer appearing for examination who has received a *diploma* of graduation from the officers' school dated not earlier than three years previous to the date of the order for the examination will not be required to take the course (a).

Under provisions of G. O. 43, when an officers' commission terminates under the constitutional limitation (4 years), no election to fill the grade is held, but the officer whose commission so terminates is ordered for examination for recommission. The examination of an officer for recommission is as follows:

(1) As to physical condition.

(2) That he has a diploma from the officers' school, or has satisfactorily completed the school work which may have been required of him.

(3) As to general efficiency. In order to carry out the provisions of this section it will not be necessary for the officer to personally appear before the board, except as hereinafter provided. The officers' examination shall be completed *before* the expiration of his commission; therefore, the first session of the board anterior to the termination of the officers' commission shall be furnished and have before it:

(a) A certificate of the physical condition of the officer, made within six months of the convening of the board in the particular examination, by a reputable physician, and furnished to the board through the Adjutant General's Office by the officer concerned.

(b) A full statement of the officer's work in the officers' school, if any such work has devolved upon the officer, to be furnished the board by the director of the officers' school.

(c) Any recommendations the officer may choose to lay before the board for its consideration.

(d) Any recommendations which the colonel or other immediate commanding officer may send to the board.

(e) Any reports detrimental to the efficiency of the officer by the colonel of his regiment or other immediate commander.

(f) A full statement from The Adjutant General as to the efficiency, promptness in attending to official correspondence, and care of public property and preparation of money accounts.

Whenever any report is made detrimental to the officer's efficiency under (e) and (f), the officer so reported against shall have the right to appear in person before the board to offer testimony in refutation of the charges; and it shall be the duty of the officer making such reports to furnish the officer reported against with a copy of the report ~~two~~ days before the board shall meet.

If there be no detrimental reports under (e) and (f), it shall then be presumed that nothing affecting the general efficiency of the officer under (3) exists.

When an officer examined shall have passed a satisfactory examination, the board shall recommend him for recommission in the grade and arm in which he was at the termination of his previous commission, and, when so recommended, he shall be so recommissioned.

All officers recommended for recommission shall be commissioned for a period of four years and shall take rank from date of first commission in that grade.

#### BULLETIN.

This department issues monthly a Bulletin of Militia News Notes, giving news items of interest and decisions and information not published in orders and circulars. This Bulletin has proven to be very beneficial as a means of conveying information of a general nature to the Guard.

#### CIVIL WAR RECORDS.

This office is the custodian of all the state records of all wars. Thousands of soldiers of these wars must depend upon these records in order to prove their legal claims against the government. Communications are received daily from soldiers asking for certificates of service. The number of these requests has increased greatly due to recent pension legislation.

#### ACTIVE SERVICE.

The Guard has not performed any active service during the beinnium, although on several occasions conditions arose which indicated a call would be made. Fortunately these matters were adjusted without the use of troops.

#### FEDERAL PAY FOR THE GUARD.

To secure the efficient training of the National Guard involves a greater expense than can well be afforded by the states. The national government has adopted a liberal policy in providing arms, clothing and equipment. The great difficulty now faced is in the fact that the National Guardsman must earn his own livelihood, and the training, particularly for national service, involves an amount of time and effort which he really can not afford to give without some reward. It is manifest that we have arrived at a point where some compensation should be made, and this should come from the national government.

To accomplish this a bill is now before Congress which provides for compensation on the basis of a percentage of the pay for the regular army. The benefits of such a bill in securing a higher degree of efficiency can hardly be estimated, and it should therefore receive the hearty support of all citizens.

## RECOMMENDATIONS.

would respectfully recommend that the legislature be authorized to make an appropriation, making the law authorizing the building of armories effective.

That the annual allowance to companies for armory and contingent expenses be increased so as to meet the expenses of these organizations. The amount of work done by the captains of companies can hardly be appreciated by any one not familiar with the National Guard and the commanding officer's duties. In addition to this he is responsible for the financial condition of his company. One of the principal items of expense is the armory rent and its maintenance. In order to make this possible it is necessary in many cases, under present conditions, to reread the armory for other purposes, and in some cases to collect dues from the members of the company in addition to the time they give to meet these expenses. Under these conditions it is very hard to maintain the proper discipline and keep companies up to the required standard of efficiency.

That the appropriation for pay for drills be made sufficient so that pay can be allowed for four drills each month. That the militia code be re-drafted, so that it will conform to the federal militia laws and meet the existing conditions of the National Guard service.

That an additional clerk be authorized for this department to be used as a filing clerk and to assist in the stenographic work.

That an allowance be made each company, battery, signal, hospital corps and band sufficient to pay the quartermaster sergeant to properly care for all public property, under such regulations as may be prescribed by the Military Department.

That an act be passed by the legislature prohibiting any person or persons or organizations other than the United States army or the National Guard from wearing uniforms or uniforms similar to those authorized to be worn by members of the United States army and the National Guard.

That the law governing disbursements by the Paymaster General be changed so that the expenses in connection with the same can be more promptly settled. At the present time the Paymaster is not permitted to draw any funds in advance of the camp for pay and subsistence. This should be changed so that the Paymaster General to draw sufficient funds from the state treasurer to enable the troops to be paid and while at camps of instruction. This officer is under the law and this method would repeal the law which requires the auditing of the accounts by the state auditor before actual payment can be made. By the above method it would be

possible for the Paymaster General to pay off the organizations and account to the state auditor by vouchers covering expenditures, and return to the state treasurer any money unexpended.

9. That the law authorizing pay for shots be amended so as to authorize an allowance for qualifications instead of pay for shots.

10. That the old capitol building on Pawnee Flats, Fort Riley Reservation, which has been ceded by the federal government to the state of Kansas, be repaired and put in condition so that it can be used as a storehouse for camp equipment, thus saving the state the cost of shipping this equipment to and from Fort Riley each year.

#### CONCLUSION.

It is of the utmost importance that the National Guard of Kansas should be maintained to a high standard of efficiency, and I trust that it may continue to have your loyal support and encouragement, as well as that of every good citizen of the state. All patriotic citizens of this state should encourage a proper military spirit among the young men of this state. Every male citizen of sound physical condition should serve at least one enlistment in the Guard, and every soldier should be made to feel that it is an honor and an expression of loyalty to their country to be privileged to wear the military uniform.

I am indebted to Maj. Alvarado M. Fuller, United States army, retired, on duty with the organized militia of Kansas, and Maj. Waldo E. Ayer, Second U. S. infantry, inspector-instructor of the organized militia of Kansas, for their able counsel and advice.

I am grateful to the officers and enlisted men of the Kansas National Guard for their loyal support of this department and for their prompt performance of every duty.

To my office assistants I am indebted for their constant attention to duty and earnest loyalty and support.

In conclusion, sir, I wish to express to you my appreciation for the earnest support and the encouragement you have given to every movement which was intended for the improvement of the National Guard, and sincerely thank you for your many personal favors.

Very respectfully,

C. I. MARTIN,  
*The Adjutant General.*

# **Expenditures of the Adjutant General's Department.** **BIENNIUM JUNE 30, 1910, TO JUNE 30, 1912.**

For the fiscal year June 30, 1910, to June 30, 1911, there was appropriated to this department \$51,100. In addition to this, the unexpended balance on June 30, 1910, in the fund known as the "active service fund," amounting to \$8,273.04, made a total appropriation to this department for the fiscal year of \$59,373.04, which by the terms of the appropriation was divided into thirteen different funds, as follows:

	Appropriation.	Disbursements.	Balance.
Pay of The Adjutant General,	\$1,800.00	\$1,800.00	.....
Pay of the Assistant Adjutant General	1,400.00	1,400.00	.....
Pay of military storekeeper...	1,200.00	1,200.00	.....
Pay of clerk.....	900.00	900.00	.....
Pay of stenographer.....	900.00	900.00	.....
Contingent fund .....	500.00	500.00	.....
Quarters rent, etc.....	15,000.00	14,857.19	\$142.81
Pay for company drills.....	7,500.00	6,874.75	625.25
Diem and expenses officers making semiannual inspection.	1,000.00	1,000.00	.....
Purchase of badges and expenses small-arms practice.....	500.00	484.50	15.50
Diem and mileage Military Board .....	400.00	398.50	1.50
Travel and camp of instruction..	20,000.00	19,746.70	253.30
Active service, etc.....	8,273.04	8,273.04	.....
<b>Totals .....</b>	<b>\$59,373.04</b>	<b>\$58,334.68</b>	<b>\$1,038.36</b>

For the fiscal year June 30, 1911, to June 30, 1912, \$75,000 was appropriated to this department for the fiscal year June 30, 1912, \$75,000, which was distributed by the appropriation act into fourteen different funds, as follows:

	Appropriation.	Disbursements.	Balance.
Pay of The Adjutant General,	\$2,000.00	\$1,967.55	\$32.45
Pay of the Assistant Adjutant General	1,400.00	1,298.20	101.80
Pay of military storekeeper..	1,200.00	1,200.00	.....
Pay of clerk.....	900.00	900.00	.....
Pay of stenographer.....	900.00	900.00	.....
Contingent .....	500.00	470.05	29.95
Quarters rent, etc.....	18,000.00	17,145.88	854.12
Pay for company drills.....	7,500.00	7,127.00	373.00
Diem and expenses of officers making semiannual inspections.	1,000.00	756.10	243.90
Purchase of badges and expenses small-arms practice.....	500.00	500.00	.....
Diem of Military Board.....	500.00	500.00	.....
Travel and camp of instruction,	20,000.00	20,000.00	.....
Active service, etc.* .....	20,000.00	12,061.89	7,938.11
Transportation, lodging and medical attendance, regular-army sergeants .....	600.00	510.34	89.66
<b>Totals .....</b>	<b>\$75,000.00</b>	<b>\$65,337.01</b>	<b>\$9,662.99</b>

The appropriation is for two years. The unexpended balance at the end of the year is available for the next fiscal year. If this fund was divided equally over the two years, the total appropriation would be \$65,000.

## A REVIEW OF THESE FUNDS AND RECOMMENDATIONS.

FUND 1. The salary of The Adjutant General is \$2000, which is \$500 less than the heads of other departments receive. The work of this office is that of a specialist, who must have had years of training in the military service to be competent to fill the office. The National Guard has become a semifederal organization, and is under the supervision of the War Department. The head of this department is responsible for the proper disbursement of the federal and state funds and the proper discipline, instruction and activities of the troops. He is also responsible for the proper care and accounting of over half a million of equipment issued to the state by the federal government.

The work of this department has more than quadrupled in the last two years and is constantly increasing and becoming more intricate, and the responsibilities are not excelled in any department of the state, and equaled in only a few.

FUND 2. The salary of the Assistant Adjutant General is \$1400. The assistants in other departments receive a salary of from \$1800 to \$2000. This officer is assistant to The Adjutant General, and Quartermaster General of the state. He is responsible for the proper care of and accounting for over one-half million dollars' worth of property for which the state is accountable to the federal government.

FUND 3. The military storekeeper is in charge of the state storehouse. There is in this storehouse at all times over one hundred thousand dollars' worth of government property for which the state is accountable. This officer supplies military stores to the various organizations of the National Guard of this state when needed.

FUND 4. The clerk is the bookkeeper of the department and has charge of the war records of the Kansas soldiers and the furnishing of certificates to soldiers of their war service.

This department should have an additional clerk for a filing clerk. Both of these clerks should be stenographers and assist in the stenographic work of the office when necessary.

FUND 5. By reason of the increased work of this department, it has become a physical impossibility for the stenographer to do the work.

FUND 6. Contingent fund.—This fund is practically all used for postage. The postage of this department averages about \$40 per month.

FUND 7. This fund is for rent of company armories, contingent expenses of companies and other organizations, freight, drayage, express, care of property, and other expenses of this department and of the state arsenal. The annual allowance to organizations for rent of armories and contingent expenses comes out of this fund.

This allowance is \$300 per annum to the companies. Nearly all of the companies pay the full allowance for rent, leaving nothing for contingent expenses. Many of the companies have to pay more than their allowance for rent alone. Some of the companies are compelled to pay twice the amount of their allowance for armory rent. This is not fair to the company commanders. This is a state institution and should be maintained by the state. The company commander is issued about

and dollars' worth of military supplies and is required to give the safe-keeping of this property. This is government property and if any of it is lost or stolen or damaged by the elements the commander is required to pay for it unless he can show by evidence that it was unavoidably damaged or lost. The commander devotes a large portion of his time in drilling and looking after his company and looking after the property, for which he receives no pay. Is it fair in addition to all this to expect him to put his own pocket to maintain this, the state's institution? The annual allowance to each organization should be at least enough to cover the necessary expenses.

This fund is used to pay the enlisted men for attendance at drill companies drill each week for about two hours. This would be about five drills per month. The pay authorized by the statutes is \$1.00 per man actually in attendance and participating in the

This appropriation we have been able to pay for only two drill companies per month. These men are subject to the call of the President, to go to any part of the United States or of the world or of the Union; and subject to the call of the governor or of the mayor any hour in the day or night, without any warning or time to prepare for their business affairs, to go to any part of the state in case of the peace, tumult, riot or resistance to process, or emergency thereof, etc. Are they not entitled to the little amount of pay authorized for the labor they perform in preparing themselves for duty?

A man should serve his country in time of war is noble, brave and patriotic, but that a man shall properly prepare himself in time of peace to serve in war is all of these things and more. It is noble and patriotic which is real, not ideal. It is brave with a bravery which is real, not ideal. In times of unemotional peace many burdens, among them the lack of appreciation of those who do not consider military service or training necessary."

This appropriation is to cover the per diem pay and expenses of inspecting officers, making the semiannual inspections of the organizations and their equipment at their home stations. It is required by federal statutes and by section 29 of the military laws.

This appropriation is for the expenses of the various camps during the year, such as the annual maneuver camp, camp instruction, and officers' school camps.

This appropriation is for the per diem pay and expenses of men when called into active service, either mobilization for federal duty in case of riot or strike duty, etc.; for the pay of troops on semiannual inspection, for pay of troops on duty on Memorial

Day, shots on rifle ranges, firing salutes, details for inauguration other ceremonies, for schools of instruction, for target practice details of officers and enlisted men on any necessary duty, and expenses of courts-martial, etc.

If the entire National Guard was called into active service for one week this appropriation would be entirely wiped out. In addition to any active service which might be necessary to pay for from this fund the following are a few of the expenses which must be paid from the fund under the provisions of the General Statutes:

The attendance of the personnel of the National Guard at two inspections each year, \$5000 each; two years..... \$10,000  
For attendance of the personnel of the various organizations of the National Guard at Memorial Day exercises each year, \$1800; two years..... \$3,600  
Pay for shots each year, \$4,000; for two years..... \$8,000

These three items alone, without taking into consideration the expenditures authorized and required, make a total of \$21,600, or more than the appropriation, leaving nothing for active service.

FUND 14. This fund is to meet the expenses of transportation, clothing and medical attendance of regular-army sergeants on duty with the National Guard as instructors. There are three of these sergeants on duty with the militia of this state; one with each regiment of infantry and one with the battery of artillery.

## THE STATE OF KANSAS,

IN ACCOUNT WITH THE UNITED STATES, FOR ARMING AND EQUIPPING  
THE MILITIA.

## LIST OF UNDELIVERED TWENTIETH KANSAS MEDALS.

These medals were the ones that were raised by the Grand Army of the Republic immediately on return of the Twentieth Kansas from the Philippines, in 1899. At that time the people of the state contributed something like \$1500 for these medals.

### FIELD AND STAFF.

Coryll Faulkner.  
James A. Young.

### CAMPANY A.

Fred Shaufele.  
Jno. D. Young.  
Edw. H. Brennan.

### CAMPANY B.

Morris J. Cohen.  
Edw. Barrett.  
Fred C. Sharland.  
Fred L. Heyler.  
F. A. C. Shellhardt.  
Jas. D. Sampson.  
Monte Yeakey.  
Jno. T. Grurevich.  
Francis McCrea.  
Jas. W. McFarlane.  
Geo. C. Robinson.  
Iver J. Howard.

### CAMPANY C.

Francis C. Head.

### CAMPANY D.

Edw. Bowen.  
Hugh Kelley.

### CAMPANY E.

Jos. F. Harrington.  
Peter Epp.  
Ralph L. Roberts.  
Andrew W. Evans.

### CAMPANY F.

James Luks.  
Frank M. Jones.

### CAMPANY G.

John Shearer.  
Jesse E. Baker.  
Wm. Dexter.

### CAMPANY H.

Otis H. Chase.

### CAMPANY I.

Saml. C. Bell.

### CAMPANY L.

Joseph Schole.  
Adolph Abrams.  
James W. Wilson.  
Benj. Squires.

Total .....	\$308,794.30

**SMALL ARMS, ETC.** In addition to the small arms of present issue pattern, there are in the state arsenal and in the hands of citizens certain small arms and appendages of obsolete pattern. This property has been listed in previous reports and no change has taken place therein during the current year.

**SMALL PARTS.** A sufficient supply of small parts for replacing worn and broken parts of small arms is kept on hand at the state arsenal at all times.

**SUBSISTENCE PROPERTY.** The commissary chests required by the militia regulations are kept completely filled at all times, and in addition thereto there is a small amount of subsistence property, tableware and kitchen utensils which have been procured for camp purposes.

**SIGNAL-CORPS PROPERTY.** In addition to the articles listed, there is on hand a small amount of obsolete property at one time issued to the signal corps.

**TEXTBOOKS.** The several organizations of the National Guard are supplied with the required textbooks, manuals, regulations, etc., a sufficient reserve being kept at the state arsenal at all times. Frequent changes, rendering whole editions obsolete, render any list of publications confusing; hence the enumeration of all books by title is omitted.

R. NEILL RAHN, *Quartermaster General*, K. N. G.

REPORT OF THE JUDGE ADVOCATE GENERAL.

---

PITTSBURG, KAN., July 29, 1912.

*the Adjutant General, Kansas National Guard, Topeka, Kan.:*

SIR—I have the honor to submit herewith the annual report of this department for the two years ending June 30, 1912.

There have been no officers, men or citizens tried by a general court-martial, and no proceedings of company courts of discipline have been submitted for review.

Opinions upon legal questions have been rendered in response to various inquiries, copies of all of which are on file in this office.

Because of the similarity of conditions existing at the time of my last biennial report and now, I beg to renew the recommendations made in that report. Respectfully,

WILLIAM J. WATSON, *Judge Advocate General.*

## REPORT OF SURGEON GENERAL.

MAPLEHILL, KAN., July 25, 1912.

*General C. I. Martin, Adjutant General, Topeka, Kan.:*

SIR—I have the honor to submit the following biennial report for the medical department of the National Guard of Kansas:

I attended the camp of instruction at Fort Riley from August 16 to August 26, inclusive, as per A. G. O.

All organizations arrived in camp in good physical condition. From a sanitary standpoint, the camp was ideal as to location. Drainage was good, and the screening of kitchens added greatly to the sanitary condition of the camp, as did also the careful attention to garbage cans, which were kept well covered and limed. Latrines were kept clean and well limed.

I agree with Colonel Huffman, who was chief surgeon at that time, that too much lime was used in latrines, and his suggestion of crude oil would be an improvement over the lime, as the lime used too freely has a tendency to clog the urinals and cause an overflow instead of a free drainage.

The men of the entire command gave more attention to cleanliness, both personally and generally, which added greatly to the success of the camp from a sanitary standpoint. Their clothing was unusually clean and neat, and with the exception of some few cases of sore feet caused by ill-fitting shoes, the men enjoyed personal comfort throughout the encampment.

Very little sickness was reported in the command during the two weeks—about one-tenth of one per cent, mostly from heat prostrations, which occurred one afternoon while out on maneuver; about sixty in all, I believe. All made good recoveries, and at breaking of camp none were found to be suffering from any ill effects. One acute case of appendicitis was reported, and was operated on and made an uneventful recovery. No cases of infectious or contagious diseases were reported up to time of breaking camp.

I desire to thank the officers of the several commands for their assistance and close scrutiny from a sanitary standpoint and their untiring efforts in training their men along sanitary lines, which added greatly to the success of this department. The equipment of this department seemed adequate to meet all demands, and calls for service and attention to the men were promptly responded to, which proved the efficiency and alertness of all the medical officers.

In compliance with Order No. 38, A. G. O., I had the pleasure of attending the dedication of the John Brown monument at Osawatimie, Kan., August 31, 1910, as a representative head of this department. I also have the honor to report my attendance at the camp of instruction at

Camp Chas. P. Drew at Fort Riley, Kan., August, 1911, with the following strength of this department:

Commissioned officers .....	5
Enlisted men .....	21
Enlisted men absent .....	3
Aggregate present and absent.....	29

The following detail was made: Maj. H. Z. Hissem, assigned to Second regiment; Maj. Carl Phillips, assigned to brigade hospital; Lieut. H. H. Heylmun, chief sanitary officer; Lieut. I. E. Durant, assigned to First regiment; Lieut. Seth Hammel, assigned to battery; Lieut. J. T. Reed, absent; Maj. Henry T. Salisbury, chief surgeon.

I consider this one of the most successful encampments held since I have been Surgeon General. Owing to the terrific heat and strenuous work which a class of men such as compose the National Guard had to undergo, I consider it remarkable that the percentage of sickness was no more than it was—less than 1 per cent of the entire command, including all minor cases.

The sanitary condition of the camp was excellent, and showed the untiring effort of the chief surgeon, Major Salisbury. I heartily approve of Major Salisbury's recommendation of the incinerator range for each organization, as this will greatly relieve the accumulation of garbage, which can be disposed of while the meals are being prepared, and thus remove the presence of the same three times daily, instead of one as heretofore done by contract method.

The equipment of the troops with the Gold Medal cot is surely a great addition to the comfort of the members of the Guard, as well as a protection of the soldiers from colds and other minor troubles from lying on damp hay or straw, and also renders it much easier to keep the camp clean.

I made my annual inspection last year at the same time General Huffman made his general inspection, and I will repeat that I have never in the eight years of my service with the Guard seen the camp or the personal equipment of the soldiers in a better condition. Kitchens were neatly policed, and each well supplied with utensils and containers, and, most of all, the ice boxes, with a liberal supply of ice and vegetables and meat presented a neat appearance.

I also have the honor to acknowledge the receipt of Order No. 33, A. G. O., detailing me to attend Governor's Day, September 25, at the Hutchinson State Fair; also the state-wide soldiers' and sailors' reunion and the reception of the President of the United States at Topeka on September 27, 1911. I was unable to attend the former on account of matters over which I had no control, and my excuse was kindly granted by the Adjutant General. I had the honor to be present at the reunion and reception to the President at Topeka on September 27.

Very respectfully, CHARLES R. SILVERTHORNE, M. D.  
*Surgeon General, Commanding Medical Department.*

## THE MILITARY BOARD.

The State Military Board meets quarterly and at such other times as The Adjutant General may deem their services to be necessary. This board is an advisory board to the commander-in-chief on military matters, and is composed of the following officers:

The brigade commander, Gen. Charles S. Huffman, president.  
 The Adjutant General, Charles I. Martin, recorder.  
 The Judge Advocate General, Col. William J. Watson.  
 The commanding officers of infantry regiments—Col. Wilder S. Metcalf, First infantry; Col. Perry M. Hoisington, Second infantry.

This board has been in session at least once each quarter for from two to three days, and has been in absolute accord with this department in all its efforts. This department is greatly indebted to this board for its advice, counsel and coöperation in its efforts to make the National Guard of Kansas second to none.

### REPORTS AND RECOMMENDATIONS OF MEMBERS OF THE BOARD.

PITTSBURG, KAN., July 29, 1912.

*The Adjutant General, Kansas National Guard, Topeka, Kan.:*

SIR—Replying to yours of July 18, asking for an expression as to the progress, needs, etc., of the Kansas National Guard, I have the honor to state:

The splendid achievements of the Guard, both in maneuver camp and on the target range, are very gratifying and are convincing evidence of a high state of efficiency—one that could have been reached only by industrious, intelligent officers and men, competently and carefully commanded.

Especially does this speak well for the Guard, in view of the very stinted allowances made and the fact that not a specially constructed building in Kansas is in use as an armory.

The needs of the Kansas National Guard are twofold—more money and better quarters.

By more money it is not hoped to compensate the members for their services, but to reimburse them for outlays and encourage a greater rather than a lesser expenditure of time.

A very small per cent of state and government property is rendered unserviceable by service. It is lost or damaged or destroyed in keeping it always in readiness for service, and because of improper handling and inadequate means for keeping account of it.

Immense savings would be immediately effected by the erection of proper armory buildings. The convenience and comfort of the members will have a great deal to do with the class of men who will enlist in the National Guard. Therefore, the personnel of the troops will be much affected by such armory buildings.

Respectfully,  
 WILLIAM J. WATSON,  
*Colonel and Judge Advocate General, K. N. G.*

HEADQUARTERS SECOND INFANTRY, K. N. G.,  
NEWTON, July 30, 1912.

*The Adjutant General of Kansas, Topeka, Kan.:*

SIR—It is beyond question that the last two years have seen improvement in the National Guard, or organized militia as it is termed by Congress, of all the states. In Kansas the following have been some of the special contributing causes:

*First.* An increased measure of federal supervision and instruction through the annual inspection of each unit at its home station, and of the organization as a whole, in the field, by officers of the U. S. army.

*Second.* The instruction and encouragement given by two officers and three noncommissioned officers of the regular service, who are constantly on duty with the Kansas National Guard as "instructor-inspectors."

*Third.* The prospect of the federal pay bill.

*Fourth.* The particularly efficient administration of our Adjutant General's department, resulting in improved organization, equipment and instruction.

Whatever may be said of the importance of "the man behind the gun" on the battlefield, the great and constant need of the Guard is officers—officers with zeal, intelligence and knowledge to equip them as military leaders, organizers, and instructors. Their work is that of students and teachers. The correspondence school has been of the greatest assistance and benefit to our officers. This comprises a course of three years, and our first class has just graduated eighty-seven officers, who have received their diplomas, which testify to their personal application to the study of military art, topography, engineering, and law. These officers are to be congratulated, as also the state, and the thanks of the people of Kansas are due to Maj. Alvarado M. Fuller, U. S. A., retired, for his able and tireless service as director of the school.

Nothing stands still. There must be either improvement or decay, and it is doubtful if our Guard can be maintained even at the present efficiency without material assistance from the state. Thus far the added support has come principally from the general government. Kansas is not niggardly with her National Guard, but in all her history she has had so little need of troops for domestic purposes that it has been easy to lose sight of her obligations to support the military arm of the nation. She is rich, prosperous, enterprising and loyal, and should do her part. Neither is it fair to expect the boys who do the drilling and marching to also pay the bills.

The greatest present need is a larger appropriation to companies for armory rent and care of property. This must be paid by the state. The present allowance of \$300 per annum was fixed about fifteen years ago, since which time rents have more than doubled and all prices greatly increased. One recently organized company in a small town in order to secure adequate quarters was obliged to pay \$600 a year for rent alone, and to make a lease for five years. Many other companies pay more for rent than the entire allowance, and the balance, with cost of incidentals, must be eked out by contributions from the men or by passing the hat among their patriotic friends. This makes it difficult to enlist and retain the class of men necessary to uphold the organization, and as a consequence some of our oldest and formerly most efficient companies are languishing. There is no trade or profession in which experience counts for more than in the military service, and conditions should be so adjusted that veterans can be retained. While it is generally easy to organize a company in a new community, it does not make for efficiency, as years of training are necessary to make a company even fairly proficient in all the present requirements, and the deficiencies become quickly apparent under the rigid inspection above referred to. The annual allowance to companies should not be less than \$1000.

It is also apparent, from a comparison with other states, that Kansas is not maintaining her full proportion of the organized militia. Our forces are organized as a brigade, and we have but two regiments,

when three are required. It would also seem reasonable that an agricultural state like ours would support a squadron (four troops) of cavalry, and we have not even one troop. Sanitary troops for the care of the sick and wounded are one of the first and greatest necessities of war. Their training and equipment requires much time and labor, and our small medical department should be expanded into a full hospital company; so also our fragment of a signal corps into a full signal company, with ample equipment, including facilities for field aerial telegraph, which the army has now made simple and effectual. Our battery should be allowed the hire of horses for at least one monthly drill with their fieldpieces, which they must now haul around their armory by hand in the painful effort to learn the drill. Each of our infantry regiments should have a machine-gun company, and we should have in training the rudiments of an engineer corps, so necessary for bridge building and pioneering in time of hostilities, and then so difficult to get.

We are assured by the inspectors for the War Department that all the organizations we now have rank high in efficiency among the organized militia of the United States, but it is doubtful if we can retain our place, and certain that no further improvement can be expected, without increased appropriations by the state.

Very respectfully, P. M. HOISINGTON,  
Colonel Second Infantry, K. N. G., Member Military Board.

LAWRENCE, July 22, 1912.

*The Adjutant General, Topeka, Kan.:*

SIR—I respectfully submit the following in reply to your letter of July 18:

I have been a member of the National Guard of the state of Kansas for twenty-four years, serving as private and in each commissioned grade from second lieutenant to colonel of the regiment. I was a company commander for a number of years. I know something about the National Guard of Kansas. During my early service the officers and men knew a very little about drill regulations, and almost nothing else; nothing about marching, camping, or the real work of soldiers—fighting. Since 1900 considerable real progress has been made.

The National Guard of Kansas to-day knows a little more about drill regulations, knows considerable about camping and sanitation, knows very little about marching, and has made a very small beginning in the knowledge of the principles of fighting.

The men of the National Guard of Kansas are excellent physically. They are earnest and willing workers. What they need to-day more than any other one thing is capable and efficient officers. If the men of the Kansas National Guard have officers who know how to instruct and how to lead, the companies will rapidly become efficient organizations.

The officers of our Guard do not generally appreciate the amount of study and attention necessary to make them efficient instructors and leaders. The National Guard of Kansas needs officers with a little higher degree of ability and considerable more determination to take the time and do the hard work necessary to equip them for their duties as officers.

The most encouraging thing in the whole matter is the fact that quite a number of our officers are beginning to understand how little they know about the military profession, and are showing ambition to know more.

The National Guard service must be made attractive to the enlisted men in order to promote enlistment. We have tried pay and other things. In my judgment, the best way to make the service attractive is to make the organizations efficient, so that the men can be proud of them. Consider the companies of the National Guard to-day, and you will find that without exception the largest companies are the best companies.

WILDER S. METCALF,  
Colonel First Infantry, National Guard of Kansas.

NOTE.—A number of men in each organization were discharged before they had had twenty-four drills; also a number of men in each organization enlisted during the year and had not been in long enough to have attended twenty-four drills. Under the heading "Rendezvous for Drill" is shown the number of men in each organization who were present twenty-four drills or more.

## REPORT OF THE KANSAS RIFLE TEAM OF 1911.

Under the provisions of General Orders 12 and General Orders 23, Adjutant General's Office, 1911, the state rifle competition was held at Fort Leavenworth for one week, commencing July 17, one of the purposes of this camp being the selection of the rifle team to represent the state at the national rifle match at Camp Perry, Ohio, in August.

At the conclusion of this camp about twenty-five men were selected from the contestants of the camp to try out for the team. These contestants practiced on the Fort Leavenworth rifle range up until the 29th of July, under the supervision of Maj. Bruce Griffith, inspector of small-arms practice, First Lieut. Joseph L. Topham, Thirteenth U. S. infantry, and myself. At the conclusion of this practice the following team was selected to represent the state at the national match:

## OFFICERS.

Brig. Gen. Charles I. Martin, The Adjutant General, chief of staff, Topeka, captain.

Maj. Bruce Griffith, brigade inspector small-arms practice, Wichita, coach.

Col. Wilder S. Metcalf, First infantry, Lawrence, spotter.

First Lieut. William R. Fleeman, Second infantry, Hutchinson, range officer.

First Lieut. Joseph L. Topham, Thirteenth U. S. infantry, professional coach.

## TEAM.

Col. Jerry C. Springstead, pay department, Topeka.

Capt. Rodney J. Kessler, Second infantry, Hutchinson.

Capt. Earle A. Cole, First infantry, Manhattan.

Capt. Guy P. Sawyer, Second infantry, Newton.

First Lieut. Frank Parmely, First infantry, Burlington.

First Lieut. Guy N. Walling, First infantry, Lawrence.

First Lieut. Ira E. Brighton, First infantry, Coffeyville.

First Lieut. Clement O. Smith, First infantry, Burlington.

Second Lieut. Charles C. Clark, First infantry, Burlington.

Second Lieut. Thomas T. Campbell, Second infantry, Hutchinson.

Second Lieut. Wilbur T. Phares, First infantry, Burlington.

Sergt. James B. Brown, Company K, First infantry, Caney.

Sergt. George R. Wooten, Company E, First infantry, Fredonia.

Sergt. Joseph S. Wenger, First provisional company, First infantry, Lawrence.

Private William L. Stryker, Company E, First infantry, Fredonia.

The members of the team reported at Kansas City, Mo., Friday, August 4, and proceeded to Camp Perry, Ohio, via the Atchison, Topeka & Santa Fe and Lake Shore railroads, and established a camp for the purpose of preliminary practice and to participate in the National Rifle Association match.

The state was very fortunate in securing the service of Lieutenant Topham as professional coach of the team again this year. Lieutenant Topham is recognized as one of the best rifle shots and team coaches in

the army. Being a Kansan himself, he was very much interested in the success of the Kansas team and worked very energetically to bring the team up to its highest state of efficiency prior to the national match. The excellent showing made by the Kansas team in the matches of 1910 and 1911 was due largely to the intelligent and systematic coaching of this officer.

The team was very successful in its practice work, and was confident when it entered the national match that it would be a strong contender for a good place in the final result of the match. In 1910 the team entered the match in thirty-fourth place and finished in thirteenth place, winning first prize in class C, the "Bronze Soldier of Marathon" and \$300 in cash. The result of the 1910 match placed the team well up in class B and made it necessary for the team to land well up in class A in order to win a prize in class B.

The national match commenced on Monday, August 28. The morning was very cold and cloudy, and the wind was blowing strongly off of the lakes. The first range shot was the 200-yard slow fire. The second pair up shot only a part of its score when it commenced to rain and the range officer ordered that the firing cease. The contestants were kept on the range for some time in the rain, waiting for it to clear up sufficiently to continue the firing; but it became apparent that it would rain all of the forenoon, and recall was sounded and contestants ordered to their quarters. The rain ceased about 1 o'clock, and about 1:30 the firing commenced again. The Kansas team finished this range with a score of 485.

At the conclusion of the firing at the 200-yard point, the team fired their rapid-fire score at the 200-yard range. The team finished at this range with a score of 535. This finished the firing for this day.

Firing was commenced on the following morning at the 600-yard point. The team finished this range with a score of 538.

As soon as the firing at the 600-yard range was completed, the firing was commenced at the 1000-yard range. The team made a score of 469 at this range. Up until this range the team had been gradually gaining. The score at this range was lower than they had made at any time in their practice. The conditions were very bad, and all of the teams made poor scores at this range. After figuring up the scores and the standing of the team at the conclusion of the firing at the 1000-yard range, it was found that if the team was able to make its usual score on the skirmish run it stood an excellent show to land a good place in the match and to win a prize in class B.

The skirmish run was made in the afternoon, the Kansas team being in one of the first runs. The conditions were good and the team made an excellent run, making a total score of 1023. Only two teams in the match made a better score than the Kansas team on the skirmish run—the U. S. marine corps, with 1085, and the U. S. cavalry, with 1032.

The total score made by the team during the match was 3050. The team finished the match in seventh place, winning first prize in class B, "the Hilton Trophy" and \$350 in cash. The high team in the match, the U. S. marine corps, made a score of 3180. Only two National Guard teams made a better score than the Kansas team.

The scores made by the team in the match are as follows:

	200 yds. S. F.	200 yds. R. F.	600 yds. S. F.	1,000 yds. S. F.	Skir- mish.	Aggre- gate.
Thomas R. Campbell, 2d Lieut., 2d Inf.	44	46	44	37	77	248
Guy P. Sawyer, Capt., 2d Inf.	42	42	45	26	81	236
Guy N. Walling, 1st Lieut., 1st Inf.	43	46	45	48	91	273
Clement O. Smith, 1st Lieut., 1st Inf.	35	48	47	36	68	234
Earle A. Cole, Capt., 1st Inf.	43	48	45	36	90	257
Ira E. Brighton, 1st Lieut., 1st Inf.	41	44	44	41	70	240
Charles C. Clark, 2d Lieut., 1st Inf.	38	46	49	39	97	269
J.S. Wenger, Sergt., 1st Prov. Co., 1st Inf.	40	42	44	40	87	253
Rodney J. Kessler, Capt., 2d Inf.	38	47	45	44	98	272
James B. Brown, Sergt., K, 1st Inf.	39	42	45	39	82	247
Frank Parmely, 1st Lieut., 1st Inf.	42	44	42	44	99	271
William L. Stryker, Sergt. Maj., 1st Inf.	40	45	43	39	83	250
Totals	485	535	538	469	1,023	3,050

It is needless to say that the Kansas team was a happy bunch when they learned their position in the match.

A number of cash prizes were won by members of the team in the National Rifle Association individual matches. Lieut. Charles C. Clark, First infantry, won first prize in the governors' match, with a score of 280 out of a possible 300.

At the conclusion of the National Rifle Association match, the United Service match was fired. There were three teams in this match, one composed of the members of the National Guard, one of the infantry and cavalry of the United States army, and one of the marine corps and navy. Lieutenant Walling and Sergeant Stryker were selected to represent Kansas on the National Guard team. Lieutenant Walling finished this match with the second highest score of any competitor participating in the match.

At the conclusion of the match members of the team returned to their home stations.

#### STANDING OF THE KANSAS RIFLE TEAM IN THE NATIONAL MATCHES.

Year.	Location and date.	Scores.	Relative rank.	No. com- petitors.

## LETTER OF TRANSMITTAL.

---

*To His Excellency, W. R. Stubbs, Governor:*

SIR—The board of regents of the Kansas State Agricultural College, in compliance with the law of the state, submit herewith their eighteenth biennial report for the period ended June 30, 1912.

(S)

## *Report of Board of Regents.*

---

The chief care of a college must always be its resident student body, no matter how diverse or extensive may be its other lines of activity. The continued esteem in which the College is held is shown by marked and steady growth in its student attendance, and in the number of its graduates. The total enrollment has increased from 2305 in 1909-'10 to 2407 in 1910-'11 and 2523 in 1911-'12. The number graduated was 139, 197 and 203 for the same periods, respectively. It is gratifying to note from these data that the graduates are increasing in numbers at a greater rate than are the students as a whole, thus showing a markedly increased persistence in attendance. While the total attendance has increased ten per cent, the number of graduates has increased forty-six per cent.

The work of subfreshman students has, under the new course and closer supervision, been rendered more effective, and the interest of students in it and the benefit that they derive from it has increased notably.

The preparation of students entering the College is constantly improving. The number of high-school graduates coming to us has increased many fold. Most of these are attracted by our courses in agriculture, engineering and home economics. These also bring us a considerable number of graduates of normal schools and other colleges.

The solicitude of parents whose children for the first time have been placed upon their own responsibility is fully appreciated by the faculty. While it is impossible for students at college to be given the care or submitted to the restraint of home life, everything that can be commanded is used to safeguard them. In line with this constant effort it has been required that both young men and young women shall not room in the same house. The housekeepers of Manhattan are co-operating with the faculty in carrying out the spirit of this rule. Considerable success has also attended efforts designed to secure better accommodations for young women than had hitherto been provided.

The general deportment of our student body is exceptionally good. The disorder, lawlessness and foolishness so prominent in some colleges, and so difficult to eradicate when once established, is almost unknown here. The relation of students to faculty is most cordial, and serious cases of discipline are of extremely rare occurrence. The moral atmosphere is of a

high order, and temptations to dissipation and vice are at a minimum.

Efficient utilization of our classrooms, laboratories, and equipment requires that they be used all day and six days in the week. The convenience and health of the students and teachers alike would be highly promoted by a commodious cafeteria on the campus. The board of regents has voted to establish one, but has not been able to go further because of the lack of funds.

#### STUDENT HEALTH.

There has been no serious outbreak of disease among the students during the past two years. With our increasing number of students, there is increased danger of the introduction of contagious diseases which may be epidemic in the localities from which the students come. The College has done everything that seems possible in the way of safeguarding the students.

Following a unanimous vote by the student body, the state legislature was asked to pass a law authorizing the board of regents of the College to collect a fee from each student for the establishment of a sick benefit fund. This law was passed and the board of regents took immediate advantage of it and directed that a fee of fifty cents per term be collected from each student. A part of this fund has been used to pay the salary of a trained nurse, who gives her time to attending to the needs of students. Teachers are required to notify her when students are absent for two consecutive days, and she has been of much assistance.

The remainder of this fund is used to pay the charges of physicians who attend students or prescribe for them. The total amount of the bills of physicians for the school year 1911-'12 was \$3057.25. The funds available were sufficient to pay only 58.9 per cent, a payment which the physicians accepted and gave credit in full, in accordance with a previous agreement. It is believed that the services rendered by the physicians was uniformly of a high order.

There were four cases of scarlet fever during the year, in which case quarantine prevented the spreading of the disease. Not a single case was discovered of measles, mumps, diphtheria or smallpox among the students. The general success of this effort to conserve the health of the student body must be regarded as entirely satisfactory, although some changes of details will doubtless be made in the future.

#### THE SUMMER SCHOOL.

A summer school for teachers of domestic science has been held for a number of years. In the summer of 1911 the scope of the school was greatly enlarged, but the instruction offered

was principally of an industrial character. Classroom work was given in several branches of agriculture, and elementary work was offered in the fundamental sciences and in educational subjects. The total number enrolled was one hundred.

For the summer of 1912 the courses of study offered have been greatly extended, and include a considerable number of academic studies such as teachers are likely to wish to take advantage of, and which our regular students may pursue for the purpose of making up deficiencies. Several subjects are offered especially for teachers of rural schools. The number enrolled is 281. The interest in the summer school is thus seen to be increasing notably, in spite of the climatic disadvantages of this location.

The more generous support that the College has received in recent years at the hands of the legislature has enabled larger salaries to be paid, and as vacancies occur, or new positions are established, it has been possible to secure better men than heretofore to fill them. While we are thus constantly on the up-grade, the fact remains that we are not yet able to hold, or to obtain, men in competition with many other colleges and the United States Department of Agriculture. The people of Kansas deserve the best. The College can not hold its teachers and investigators without more liberal support than has thus far been given it.

The business organization of the College has been completely transformed within the last year. A financial secretary has been appointed, and a complete and modern system of accounting inaugurated. The financial secretary is also the purchasing agent, and it is believed that a considerable saving will be effected by wholesale purchases.

While students in attendance are the first care of the College, we have also looked constantly toward the great rural constituency outside the College, and have extended and strengthened our means of serving their needs. The report of the director of college extension presents in some detail the efforts that are being made in this direction, and the results. Rural education in a broad sense has received special attention. By invitation the county superintendents of public instruction in the state have been for the last two years holding their annual meeting at the College. An annual conference has also been held, the especial object of which was consideration of the problems of the rural church.

## PUBLIC WORK OF THE KANSAS STATE AGRICULTURAL COLLEGE.

At the time of the establishment of the land-grant colleges of the United States, the education of industrial classes contemplated was limited to students in attendance at the institutions. In the course of a few years various lines of research were established at these institutions, and these have grown to be of great importance, especially to the agricultural interests, but including engineering as well. A third field of service which has been developed consists in bringing the resources of the institution to the public at large by a considerable variety of agencies.

In the Agricultural College this work began at a very early date, with the establishment of the policy of holding farmers' institutes annually in as many places in the state as funds would permit. However, until recently the number of institutes held was very small. In 1912 the Agricultural College took scientific and practical industrial information to 350,000 people of the state, or about one-fifth of the total population. This information was conveyed through numerous channels, the most important being farmers' institutes, railroad trains carrying agricultural speakers with means of demonstration and illustration, movable schools in home economics, home economics clubs, addresses before granges and meetings for the promotion of good roads and better rural schools. Over sixteen thousand heads of families are enrolled in the 384 farmers' institute organizations maintained in the state in connection with the College.

The influence of the College has been strongly felt in the introduction and promotion of the use of drainage tile, concrete bridges and silos. Through the systematic efforts of the College there are now thirty-five hundred silos in the state, whereas there were but sixty-two three years ago. The county commissioners in three-fourths of the counties have adopted the policy of building concrete bridges only, and in the last three years the College has furnished plans and specifications for more than three hundred bridges and has inspected the sites of hundreds of bridges and bridge structures. More miles of drain tile have been laid in the last three years than in the entire previous history of the state.

The College is coöperating with farmers in the improvement of staple crops and in ascertaining what varieties are best adapted to the several conditions of climate and soil. This work is going on in every county but four in the state. It is estimated that more than two million acres of wheat in

Kansas last year were grown from seed wheat directly descended from that introduced and improved by the College.

A systematic survey of the soils of the state is being conducted in coöperation with the United States Department of Agriculture. The results of a preliminary survey of the entire state west of Salina have been published and a detailed survey of several counties in the eastern part of the state has been completed. The typical soil formations of about fifteen of the counties of the state have been sampled for analysis, and the analyses completed to a large extent. This fundamental work will afford a sound basis for advising farmers concerning methods of soil treatment, considering not only immediate returns but permanent fertility.

Coöperative experiments with orchardists in spraying, conducted in several parts of the state last year, showed a net increased return per acre of \$81.60. A similar increased profit upon all of the orchards of the state would amount to approximately ten million dollars per annum.

The professor of entomology is a member of the State Entomological Commission and in charge of the work of the commission in the north half of Kansas. He enforces the law under which the commission proceeds, which deals primarily with the examination and certification of home-grown nursery stock, and secondarily with stock coming from other states and countries. In the course of this work, every nursery and the region for miles in all directions around has been examined, and diseased stock excluded from the markets. The suppression of San José scale has received special attention.

The College has devised a simple and comparatively inexpensive method of ridding mills of insects by heating. This has been adopted almost without exception by millers exporting flour, and a difficulty which had threatened to break up the Kansas flour export business has been entirely eliminated.

A continuous campaign of investigation and publication of information has been of considerable service to farmers in their efforts to minimize damage from chinch bugs, the Hessian fly, the corn earworm and other noxious insects.

Last year the College produced serum to vaccinate more than 150,000 hogs against hog cholera. It carries a large store of serum in reserve, and while the yearly loss from hog cholera has amounted to from two to ten million dollars, there is now no reason why a farmer may not at small expense protect himself from loss.

Under the provisions of a recent law, the College is in charge of the registration of every stallion in use in the state, and examines the animal for soundness and inspects his pedigree. The owners of mares in the state are thus protected against animals which are unsound or inferior in breeding.

Through the dairy commissioner, the College is authorized

to inspect all creameries, dairies, ice-cream factories and cream-buying stations of the state and to check the tests made by cream buyers. In this way sellers of cream are protected against fraud and the public health safeguarded.

A large part of the food samples collected by inspectors for the State Board of Health are examined at the College, including especially those connected directly with the agricultural interests, such as cereal, dairy and meat products.

Under the provisions of the feeding-stuffs law, the College registers and inspects feeding stuffs offered for sale in the state, thus protecting the consumer and the right-intentioned dealer from deleterious and deceptive goods.

In a similar way, users of commercial fertilizers are insured that the goods offered for sale in this state shall be as represented. The importance of this service is increasing from year to year.

The College maintains branch experiment stations at Hays, Ogallah, Dodge City, Garden City and Tribune. These stations investigate problems of immediate importance to the several localities, and are of great value in determining the types of farming best suited to them. The College also conducts demonstrational experiments in various parts of the state, in order to carry to the people the results of experimentation at the several stations.

Experiments to test the feasibility of pumping water for use in irrigation have been made at Garden City and at other points in the state.

The power and heating plant for the statehouse was redesigned by the College last year and reconstructed, and, following instructions given as to firing, its efficiency was greatly increased and the smoke nuisance eliminated to a large extent.

For the State Board of Control, heating tunnels were designed for the Topeka State Hospital and tests were made of radiator traps. The new engines and machinery purchased for the Penitentiary were inspected by the College before acceptance, and a detailed survey was made of the coal mines, shale pits and farm lands. The power and lighting plant at the Soldiers' Home at Dodge City and the one at the Branch Normal School at Hays were tested by the College before being accepted by the Board. On request of the Board of Control and the Executive Council of the state, the College inspects at regular intervals the boiler and power plants of all institutions under the control of the Board, in order to prevent accidents and to increase their efficiency through the adoption of the best methods of operation.

Many mining and manufacturing propositions which were submitted by the promoters for state incorporation were investigated for the state bank commissioner in the enforcement of the "blue-sky law." The municipalities of the state

call upon the College for tests of paving brick and other material previous to acceptance, tests of water and lighting plants, for advice as to the reasonableness of charges for light and service, and in the selection of machinery for power plants, inspection of public buildings, etc.

The College advises commercial clubs and school boards of the state, and makes tests of materials for manufacturing cement, brick and tile, inspects and furnishes heating plans for schools and other buildings, advises concerning irrigation systems, driveways, park improvements, school grounds, etc.

With the exception of that done by the department of college extension and in connection with definite state laws, the public work of the College, aside from teaching and investigation, is an added service tending to double the duty of the officers giving it. Their work as teachers and investigators is very heavy, and in many cases much more than is required of men in similar positions in other institutions, and the salaries allowed are, as a rule, lower than those paid in other institutions of like grade in the United States. However, the work is performed cheerfully, and not only that outlined in the preceding paragraphs but an immense amount for private individuals in the way of special advice and investigation. In every way the utmost effort is made in rendering the institution useful to the taxpayers of Kansas.

As the extension department carries the College to the people through its lectures and demonstrations, so does the department of industrial journalism keep the readers of the papers in Kansas informed of what the College is doing in agriculture, domestic science, and engineering that would be of service to these readers in their daily occupations and in their homes. This service extends far beyond the state into the leading magazines and newspapers. In 1912 this department supplied the newspapers and farm journals of Kansas and the country outside its boundaries nearly 1000 columns monthly, divided about evenly among the departments of animal husbandry, domestic science, horticulture, dairying, engineering and extension. More than 750 publications used the material supplied daily and weekly by the department of industrial journalism in 1912.

It is conceded on every hand that the Agricultural College of Kansas is closer to the people and serves the state more completely than perhaps any other agricultural college in the United States. It is referred to as a model or type in other states as an institution that serves its people. While this is true, it should be remembered that it is costing actually less, in proportion to the service rendered, than any other like institution in the country. For example: taking the total income from all sources and deducting the amount used for permanent improvements, such as buildings, as shown by the

last annual report of the United States commissioner of education, the cost to the state and the federal government, per student, in the Kansas State Agricultural College is \$107 per year. At the Iowa Agricultural College it is \$214, just double the amount. In the Indiana Agricultural College (Purdue University) it is \$273, Michigan \$262, Massachusetts Agricultural College \$456, Maryland Agricultural College \$539, per student per year. There is only one such institution in the United States where the cost is less than in Kansas, and that is in Arkansas.

## SUMMARY OF ENROLLMENT.

[illegible]

# CONDENSED STATEMENT OF INCOME AND EXPENSES.

FOR THE FISCAL YEARS ENDED

June 30, 1911, and June 30, 1912.

INCOME.	June 30, 1911.	June 30, 1912.
From students, incidental and matriculation fees .....	\$17,027.00	.....*
From students, sick benefit fund .....		\$2,966.50
From investments, original endowment .....	29,418.33	24,481.91
Congressional industrial fund .....	45,000.00	50,000.00

Balances July 1, 1910, and July 1, 1911.....	14,641.22	5,248.84
Totals .....	\$592,612.33	\$724,096.67

\* Incidental and matriculation fees for the year ended June 30, 1912, were not re-appropriated for the use of the College.

EXPENSES.	June 30, 1911.	June 30, 1912.
Department expenses .....	\$274,322.67	\$385,444.72
Library .....	6,235.34	10,617.92
College extension and farmers' institutes ..	28,056.70	35,495.16
Experiment station .....	55,335.82	55,331.17
Branch stations .....	45,268.61	41,265.41
Administration and general expenses .....	27,719.68	38,443.85
General repairs .....	7,569.76	10,930.32
Heat and power plant .....	31,743.70	36,143.74
New construction .....	93,349.26	60,534.40
Miscellaneous .....	15,480.48	26,193.90
Public service activities .....	2,246.07	11,233.84
Fellowships .....		125.01
Total expenses .....	\$587,328.09	\$711,759.44
Balances June 30, 1911 and June 30, 1912..	5,284.24 *	12,337.23
Totals .....	\$592,612.33	\$724,096.67

\* Includes \$40.40 Fort Hays receipts which were not reappropriated.

SCHEDULE I, 1910-1911.

INCOME.

Income from students:		
Matriculation fees and incidental fees .....		\$17,027.00
Income from investments:		
Land grant of July 2, 1862 .....		29,418.33
Congressional industrial fund:		
Morrill act, August 30, 1890 .....	\$25,000.00	
Nelson act, March 4, 1907 .....	20,000.00	— 45,000.00
Experiment Station (federal aid):		
Hatch act, March 2, 1887 .....	15,000.00	
Adams act, March 16, 1906 .....	15,000.00	— 30,000.00
State appropriations:		
Maintenance .....	200,000.00	
Armory and gymnasium and equipment....	72,000.00	
Athletic field .....	5,000.00	
Cement walks .....	3,000.00	
Experiment station .....	15,000.00	
Farmers' and state institute .....	27,500.00	
Heat and power equipment .....	5,000.00	
President's contingent fund .....	400.00	
Regents .....	1,564.60	
Dairy commissioner .....	6,000.00	
Forestry .....	2,000.00	
Hog-cholera serum .....	3,000.00	
Fort Hays, maintenance .....	12,000.00	
Fort Hays, teams .....	2,000.00	
Fort Hays, horticulture and forestry .....	2,000.00	
Fort Hays, cottages .....	2,000.00	
Ogallah, maintenance .....	500.00	
Ogallah, trees, etc. ....	300.00	
Ogallah, labor .....	1,200.00	
Ogallah, postage and incidentals .....	200.00	
Dodge City, maintenance .....	500.00	
Dodge City, trees, etc. ....	300.00	
Dodge City, labor .....	1,200.00	
Dodge City, Postage, etc. ....	200.00	
Investigation, methods of growing wheat and corn .....	2,057.67	— 364,922.27
Public service activities:		
Feeding-stuffs control .....	7,732.69	
Fertilizer control .....	725.00	— 8,457.69
Income from sales and services:		
Agronomy .....	2,897.36	
Animal husbandry .....	9,926.07	
Applied mechanics and experimental engi- neering .....	53.75	
Architecture .....	59.35	
Bacteriology .....	162.00	
Botany .....	157.69	
Chemistry .....	505.45	
Civil engineering .....	50.40	
Correspondence courses .....	556.70	
Dairy husbandry .....	4,835.57	
Domestic art .....	201.60	
Domestic science .....	1,093.24	
Electrical engineering .....	185.37	
English .....	72.00	
Entomology .....	1,004.34	
Executive .....	1,876.69	

SCHEDULE I, 1910-1911—*continued.*

## INCOME.

## Income from sales and services:

Forestry .....	\$1,005.38	
Heat and power .....	116.95	
Horticulture .....	1,657.23	
Industrial journalism .....	2.50	
Library .....	19.24	
Machine design .....	1.50	
Mechanical .....	848.57	
Milling industry .....	7.00	
Military science .....	.90	
Physics .....	116.22	
Printing .....	3,665.95	
Shops .....	855.69	
Steam and gas engineering .....	3.75	
Veterinary science .....	2,393.32	
Hog-cholera serum .....	13,276.64	
Experiment station, general .....	97.34	
Prairie dog poison .....	2,047.28	
Fort Hays branch station .....	22,043.07	
Garden City branch station .....	27.75	
Live-stock revolving fund .....	1,670.57	— 73,494.43

## Department transfers:

Agronomy .....	1,317.18	
Animal husbandry .....	9.73	
Applied mechanics and experimental engineering .....	40.00	
Architecture .....	1.70	
Chemistry .....	67.35

## REPORT OF THE DIVISION OF AGRICULTURE.

*To President H. J. Waters:*

The Division of Agriculture occupies two distinct fields, that of teaching agriculture in the College, and that of carrying on investigations relating to agricultural matters. The work of teaching belongs to the College of Agriculture, and for administration purposes the administrative officer is designated as Dean. The investigational work belongs to the Experiment Station and the administrative officer is known as Director. In the Division of Agriculture the Dean of Agriculture and Director of the Experiment Station are, according to the regulations of the Board of Regents, the same person.

The departments of the College reporting to the Dean of Agriculture are as follows: Agronomy, animal husbandry, dairy husbandry, forestry, horticulture, milling industry, poultry husbandry, and veterinary science. The departments reporting to the Director of the Experiment Station are as follows: Agronomy, animal husbandry, bacteriology, botany, chemistry, dairy husbandry, entomology and zoology, forestry, horticulture, milling industry, poultry husbandry, and veterinary science.

### AGRICULTURAL TEACHING.

The beginning of this biennium, fall of 1910, marks a distinct advancement in the agricultural instruction of the College. Not only were the entrance requirements raised, but the courses of study were revised. The purpose of the change was to give more fundamental instruction in the sciences underlying agriculture, and to introduce earlier in the course some of the more practical subjects required of every agricultural student. The change in the courses made it possible for the student to elect agriculture during his freshman year, and to follow a consistent course leading to the degree of bachelor of science in agriculture in either of the four courses—agronomy, animal husbandry, dairy husbandry, or horticulture; the first two years of these courses being the same and so arranged as to lay the groundwork for the student's future specialization during his junior and senior years. The course in veterinary medicine was also revised, making it a four-year technical course leading to the degree of Doctor of Veterinary Medicine. In the extending of the subfreshman course from one to two years, such practical subjects as stock judging, grain production, fruit judging and dairy judging were introduced into the course, in order that the students who come to the College without sufficient preparation to enter the freshman year may get some of the more practical phases of agriculture which could be studied before they had had their fundamental instruction in the sciences.

*Enrollment.* During the past three years the enrollment has been as follows:

	1909. 1910.	1910. 1911.	1911. 1912.
Freshmen .....	...	127	100
Sophomores .....	98	94	149
Juniors .....	72	84	81
Seniors .....	43	60	88
Specials .....	18	12	37
Graduates .....	4	4	13
First year, S. C. ....	183	224	182
Second year, S. C. ....	52	69	92

It is a noticeable fact that each year more of our students are prepared to enter the freshman class, and that more of the graduates of high schools are applying for work in agriculture. The men who have had the advantage of a four-year high-school course are better prepared to undertake the work of the four-year course in agriculture than those who have barely enough entrance requirements to give them a freshman assignment. The extra two years in the high school are of great value to the student in preparing him for his college work, even though it may not be directly in line with his future studies.

*The Faculty.* Several changes in the personnel of the faculty have occurred at the beginning, and during the last two years. Professor Jardine succeeded Professor TenEyck as head of the agronomy department. Professor TenEyck became superintendent of the Ft. Hays station. Professor Reed succeeded Professor Kendall as head of the dairy department, September 1, 1910, Professor Kendall resigning. On January 1, 1911, Professor Kinzer resigned. His place was filled by the appointment of Professor Cochel, July 1, 1912. On January 1, 1912, the poultry department was organized with Professor Lippincott at its head. The department of milling industry was organized in 1909, and Professor Fitz appointed as Professor of Milling Industry. The department of forestry was organized in July, 1910, and Professor Scott appointed as state forester and head of the forestry department of the College. A large number of assistants have been appointed to fill the vacancies of men who have resigned to accept better positions, and to fill vacancies created by the Board of Regents in organizing new work in the departments. There has been less change of men in the instruction force during the past year than for several years previous. The men are better satisfied with the line of work, and with their prospects for the future in the development of their particular work. This condition means a great deal, so far as the continuity and permanency of the work of the institution is concerned. The chief difficulty to overcome at the present time in holding men is the inability of the school to pay salaries comparable with those paid in some other institutions of the country, and until the College is placed on a basis where it can reasonably compete with other institutions, particularly in the line of agricultural teaching and research, it will become more and more difficult to hold the best men to the institution. They can not be blamed for accepting positions with better salaries when such are offered.

#### WORK OF THE DEPARTMENTS.

*Agronomy.* The Agronomy Department covers the subjects of farm crops, soils, and farm machinery. The teaching of such subjects as farm crops includes the preparation of the seed bed, the cultivation of the crops, and the handling and harvesting of the crop to the point where it is marketed in the form of grain or forage, either through the stock on the farm or by direct sale from the farm. The student is taught all of the principles relating to this subject, and their applications under conditions as they exist in Kansas. The use of farm machinery in the ordinary farming operations, the principles for which such machinery is constructed, and its care and management, are included in the course which the student must follow in agronomy. A four-year course in agronomy, leading to the degree of bachelor of science in agriculture, is offered. In this course the student takes as his major subject the courses offered in the department of agronomy.

*Animal Husbandry.* The Animal Husbandry Department teaches the principles of breeding, feeding and management of all classes of live stock except dairy cattle and poultry. The department maintains large herds of cattle, hogs, sheep and horses, for demonstration purposes and for laboratory work in stock judging, which students in animal husbandry are required to take. All of the principal breeds in these classes of live stock are well represented. A four-year course in animal

husbandry is offered, in which the student takes his major work in the subjects taught in the department of animal husbandry. The course leads to the degree of bachelor of science in agriculture, and is intended to fit students for the management of live-stock farms, the handling of live stock in general, or the teaching of live-stock subjects. The students in animal husbandry get a certain amount of work in the department of agronomy, and have sufficient fundamental work in the sciences on which to develop an intelligent understanding of the general subjects of live-stock farming.

#### WORK OF THE AGRICULTURAL EXPERIMENT STATION.

The Agricultural Experiment Station concerns itself with the problems of the farm and with those industries closely related to the farm. The work follows along several general and well-defined lines, such as research, demonstration, the enforcement of state laws relating to agriculture, the manufacture and distribution of serums, vaccines, rodent poisons, etc., and acting in the capacity of expert advisers on general agricultural matters and related subjects, and making a general soil survey of the state. These general lines of work shade into each other at various points of contact in such a way that it is impossible to divide them and give each a distinctive and separate part in the Station plans and organization, many of the chief projects of the Station combining, in a way, more or less of all of these various features.

The following lines of work have been in progress during the past year:

*Coöperative Experimental Work among the Farmers.* This work consists largely of coöperative experiments which have been established on individual farms in 101 counties of the state. Three men have been employed in this work for a part of their time, and another man for a few days, and the expenses of others who have taken trips in the interests of this work have been paid from the funds of this project. Work has been conducted, or started, in all but ten counties of the state. The result of the work, for the most part, was lost in thirty counties, due to dry and hot weather. The general plan of the year's work has been along six lines: First, seed-wheat inspection; second, distribution of seeds for variety testing; third, distribution of seeds for the introduction of crops into sections where such crops were not already being grown; fourth, experiments in crop sequence, particularly on alfalfa sod; sixth, preliminary work to secure ideas for use in next season's work and to develop permanent plans.

In the wheat-inspection work 180 farms were inspected and a report published giving the quality of the seed, its purity, and any other important facts. The price asked by the farmer was also given. These reports were sent broadcast over the state, and resulted in the farmers having good seed finding a ready market for it. It has placed good seed in every county of the state. The work of this wheat inspection has proven to be very profitable to the farmers, and if it can be carried on for the next four or five years will result in a very material increase in the wheat yield of the state, due to better seed.

There were fifty corn tests and twenty-five alfalfa sod tests carried on during the year. This coöperative experimental work promises to be one of the most popular and one of the most profitable lines of endeavor that the Agricultural College is carrying on direct with the farmers of Kansas.

*Coöperative Experiments in Orchard Spraying.* For several years Kansas has had approximately five million apple trees in bearing, which in extra good years produce about one bushel each, but average less than one-half bushel each. For the purpose of utilizing this vast orchard resource, this department, in coöperation with that of horticulture and the U. S. Bureau of Entomology, went into the field in the spring of 1910 and treated in a demonstrational way seven orchards. These or-

chards were located in as many different counties, and either had had no spraying or had been inefficiently treated previously. At the close of the season the spraying was found to have brought about an average gain of four bushels of merchantable fruit per tree at a cost of thirty-eight cents. The net return from selling this fruit at fifty cents per bushel (counting forty trees per acre) was \$64.80 per acre. The people who lived within reach of the demonstration orchards watched the results closely, and at the close of the season gathered at a set date in these orchards where methods and results were explained and discussed. The communities in which the demonstration treatments were made last year were kept in touch with and the interest aroused by the results was found to have taken permanent root.

Demonstration treatments during 1911 in the apple region of northeast Kansas have shown an average gain from spraying of 4.85 bushels of merchantable apples per tree, at about the cost of last year, making an average net return of \$81.60 per acre. By proper grading and handling the gross returns from sales are easily more than doubled.

It is a pleasure to note the increase of interest in proper orchard spraying as shown in the improved spirit of cooperation. In 1910 in many cases we had to furnish both materials and machinery, while in 1911 every coöperator furnished a power sprayer, all the materials, and all the labor except that of one demonstrator.

It is hoped that this campaign for the utilization of our apple orchard resources may not stop until every owner or lessor of an apple orchard shall understand how to get the best apples it can produce.

*Coöperative Experiments with the Kansas Mills.* In the early spring of 1910 a committee representing the Southwestern Millers' League and the Kansas millers came to the Agricultural College and requested that the College clean up insect infestation in the export mills, that marine insurance of flour exported by way of the Gulf of Mexico might be renewed, it having been withdrawn on the ground of too great losses due to injurious insects. The department of entomology detailed one of its members with sufficient assistants to do this work. Not only was the work done in so satisfactory a manner that the insurance was readily extended, but a method for ridding mills of injurious insects (now known as the heating method) was devised, which, because of its simplicity and inexpensiveness, promises to revolutionize the methods of mill-insect control. The millers at a late meeting have adopted the method as official and recommended that all mills be equipped with the necessary heating apparatus.

During 1911 the benefits of inspection for injurious insects have been extended to practically all the milling plants in Kansas. Six of the important local milling plants have installed the heating system and more plan to do so as soon as possible. Two plants, one at Monticello, Ind., and one at Pittsfield, Ill., have installed the same system under our direction.

For the purpose of determining whether insect losses in flour shipped to Europe through the Gulf of Mexico was due to infestation in domestic ports, on shipboard, or on foreign docks, and to discover some method of preventing the loss if it should prove traceable to any of these sources, a member of this department was detailed to visit domestic ports, cross with a flour-laden vessel from New Orleans, and to inspect the European ports where this Kansas flour is commonly discharged. In the course of this phase of the work the following ports were inspected: New Orleans, Newport News, Baltimore, Philadelphia, Liverpool, London, Glasgow, Manchester, Leith, Belfast, Amsterdam, Rotterdam, Antwerp, Bremen, and Hamburg. This study shows conclusively that flour leaving the mills clean and transported without undue delay will reach the foreign consignee clean.

*Coöperative Experiments with Farmers in the Eradication of Chinch Bugs.* In spite of the fact that the chinch bug has done more harm to

Kansas crops than any other one insect, no measures of control generally acceptable to our people have been devised. Realizing this fact, the department of entomology in the spring of 1909 began a study of the question. The fact that those bugs which pass the winter in sufficient numbers to do serious damage the following season hibernate in bunch grass, big bluestem, and some other similar clump-forming grasses, was soon firmly established, and a limited test of the efficiency of the consumption of chinch-bug cover by means of fire was carried out with promising results.

For the purpose of subjecting winter burning to a thoroughly practical test, and of developing both its strength and its weakness, during November and December of 1910 the chinch-bug cover was stripped from an area of twenty-five square miles of farming land in north Sumner county. The results were so truly remarkable that we have been led to wonder that it has not been tried before. Throughout the summer the bugs ranged from one-twentieth to one-sixth as numerous on the burned as on the unburned area, and entered winter quarters this fall at the rate of one hundred per clump of bunch-grass, as compared with more than five hundred in the unburned area. The wheat of the burned area made 2.1 bushels more to the acre than that in the unburned, and no rows of corn were sucked dry at harvest time in the burned areas whereas from one to forty or more rows were destroyed in the fields of the unburned area.

The farmers about Conway Springs are well pleased and are burning again this year. Another area will be burned at Independence this winter as a further test of the method.

In course of studies to devise practical methods by which the bugs may be destroyed at harvest time, the department of entomology, in cooperation with the department of agronomy, has been able to demonstrate that at comparatively small expense, by use of the dust furrow, gasoline torch and small spray pump, blocks of corn having small grain on three sides can be so well protected that none of the corn will be seriously damaged. Apparently for the first time the practicability of common laundry soap for the destruction of chinch bugs thickly congregated on stalks of corn has been demonstrated. This treatment destroys the bugs but does not injure the plants. A mixture of tobacco decoction and laundry soap has also proven a satisfactory substance for destruction of chinch bugs under these conditions.

*Experiments in the Eradication of the Hessian Fly.*—Preceding, during and following the 1908 outbreak of Hessian fly, which cost the people of Kansas not less than ten million bushels of wheat, the department of entomology studied this insect with a view to perfecting measures for its control under Kansas conditions. A practicable method has been devised consisting simply of a special arrangement of best wheat-growing practice, which will at once give opportunity to obtain the maximum yield of wheat, leaving the fly entirely out of consideration, and at the same time avoid most of the fly damage. We hope with the reappearance of the fly to subject this method to the severest possible test and to introduce it into general farm practice.

*Eradication of Corn Ear-worm.*—Each year one of every two ears of corn produced in Kansas is attacked by one or more corn ear-worms, reducing the total yield of the state to the extent of two and one-half to three million dollars, not to mention the damage to domestic animals traceable to the consumption of wormy corn, or the difficulty which the farmer's wife experiences every time she tries to get a "mess" of sweet corn for the table.

By a series of careful studies this department has been able to show how by late fall or early winter plowing of the infested cornfield one hundred per cent of the over-wintering pupæ may be destroyed, how the individual farmer can by early planting on clean land eliminate at

least one-half of the normal damage, and how by judicious use of powdered arsenate of lead sweet corn may be adequately protected.

*Manufacture and Distribution of Anti-hog-cholera Serum.*—About three million cubic centimeters of serum have been manufactured and distributed during the fiscal year 1912, reaching a very large number of farmers in all counties of the state. The Station maintains the largest serum plant in the country for the manufacture of this serum, and has about two million cubic centimeters of serum in storage at the present time for future use. This work has resulted in the saving of hundreds of herds of hogs from devastation of cholera, and has been one of the most profitable things that the Experiment Station has entered into during the year, so far as the saving of actual value to the farmer is concerned. The work was started without extra appropriation, and the serum is sold to the farmers at a price much less than that asked by commercial concerns.

*Stallion Registry Board.*—The stallion registry board has registered, up to date, eight thousand stallions, and has issued certificates which will give direct information to mare owners as to the breeding and degree of soundness of the stallions they are using. The work is receiving very favorable comments from stallion and mare owners throughout the state, and is proving a very good agency for ridding the state of undesirable stallions. Most of these are going into states not having stallion registry laws.

*Dairy Commissioner's Office.*—The Dairy Commissioner's office handles all matter pertaining to the dairy laws of Kansas. The work of the office has been crowded to the limit during the past year; 11,278 letters have been written, 1146 samples of milk tested, and inspections made of creameries, ice-cream factories, dairies, and cream-receiving stations amounting to over 250. The dairy commissioner's office, in cooperation with the director's office and the department of dairy husbandry, is carrying on an extensive investigation as to the quality of Kansas cream, with a view of issuing regulations based on proper laws which will enable the creameries of the state to vastly improve the quality of their product. The consummation of this project means a very large increase in the value of dairy products for the state. The work is being carried on at ten different points, distributed over the state on various railroad lines tributary to the large creamery centers at Topeka, Kansas City, Wichita, Omaha and Lincoln.

*Egg Investigations.*—The Station has had in progress during the past year an extended investigation of the quality of eggs marketed in Kansas. This work has resulted in a determination to place the Kansas egg raisers, or producers, on a plane where they can produce the very best eggs that can be found on the general market of the country. With this in view, the Station has established a campaign of education among the grocery-men who buy eggs throughout the state, encouraging them to buy on a candling basis, and instructing them in the care and handling of the eggs. This will mean the saving of hundreds of thousands of dollars to the grocery-men, and incidentally the saving of as much to the farmers of Kansas.

*Milling Investigations.*—The department of milling industry has engaged in investigations relating to the manufacture of flour from Kansas wheats, and has established a line of research to determine the milling qualities of wheats grown on different types of soils, in different parts of the state, under different climatic conditions, and to determine the baking qualities of this flour as shown by scientific baking tests. This work is attracting a large amount of attention from the millers of the state, and of adjoining states, and bids fair to be of vast commercial importance to the state of Kansas, and to bring a great deal of return to the farmers of the state because of a better understanding of Kansas hard wheat and its value in flour making.

**State Soil Survey.**—The College, in coöperation with the federal Department of Agriculture, is carrying on a detailed soil survey of all the counties in eastern Kansas. During the past year the counties of Shawnee and Reno have been surveyed, and maps showing the types of soil and their distribution have been published. This work is of utmost importance to the farmers of the state, and will aid the College authorities in giving definite instruction as to treatment of various soils, the rotations of crops, etc. A soil survey is the basis of our agronomic work.

**Irrigation Investigations.**—There has been conducted during the past year in western Kansas a series of investigations to determine the use of water and the possibility of carrying on irrigation, in a small way, by the farmers of western Kansas. The first work has been to establish an irrigation plant on the Experiment Station farm at Garden City. This work is done in coöperation with the federal Department of Agriculture in Washington. There is great interest in irrigation in western Kansas, and great possibilities in raising water for irrigation by means of pumps from the underground flow. The Station at Garden City is established to determine the cost of pumping, the use of water, and the number of acres and the kinds of crops that can be most profitably grown under that system of irrigation.

**The Feeding-stuff Inspection.**—The experiment station is charged with the enforcement of the feeding-stuffs laws of the state. There have been something over four hundred different kinds of feed registered for sale in Kansas. The law provides certain requirements of the manufacturer for the protection of the consumer. The feed buyers of Kansas are beginning to understand that this is a protection to them, as they can buy their feeds subject to the guaranty placed on the label and feel assured that they are getting what is guaranteed.

**Fertilizer Laws.**—The experiment station is charged with the enforcement of the fertilizer laws of the state. Fertilizer manufacturers must register their fertilizers and give their guaranteed analysis. They must be sold to the consumer under this analysis and under the brand which is registered at the experiment station. This protects the farmer from fraudulent fertilizers and helps him in deciding what is best for his own particular needs.

**Branch Experiment Stations.**—There are branch experiment stations established at Hays, Ogallah, Dodge City, Garden City, and Tribune. These are supported from general funds or by direct appropriation, and are interested primarily in crop production in the western part of Kansas, where the light rainfall makes ordinary methods of farming very difficult. At Garden City the chief feature of the work, in addition to dry farming, is the irrigation plant. At Dodge City it is the dairy herd. At Ogallah and Tribune the work is largely that of determining methods and means of preparing the soil for the retention of moisture and the growing of crops under dry conditions. At Hays a large number of investigations are in progress, but the primary object of all of them is to determine the best means of conserving moisture and cultivating the soil so as to insure a uniform cropping condition under the light rainfall of that region. At Hays and Garden City the federal government also carries on work in coöperation with the Kansas station, determining the best crops and the best methods of growing dry-farming crops under conditions that exist at these two points.

**New Agricultural Building.**—There was appropriated by the legislature in 1911 the sum of \$125,000 for the first wing of the general agricultural building. This wing is nearly completed, and will house the departments of agronomy (with its subdivision of soils), animal husbandry, milling industry, and temporary offices for the Dean of Agriculture and Director of the Experiment Station, and for the Professor of Poultry Husbandry. The building will furnish materially increased

facilities for the handling of the work of class and laboratory in the departments mentioned. When completed it will be one of the handsomest buildings on the grounds of the Agricultural College.

*Station Finances.*—The Station receives from the federal government \$15,000 known as the Adams fund, and \$15,000 known as the Hatch fund. During the past two years the station has had, through appropriations from the state legislature, \$22,500 each year for general work of the experiment station, \$7500 for coöperative experimental work with grains, and \$2000 for irrigation investigations in western Kansas. The stations at Hays, Dodge City, and Garden City have received appropriations for their own needs, while the stations at Ogallah and Tribune have been supported from the general funds of the experiment station.

Considering the needs of the state for more information concerning the problems which the farmer meets every day in his work, the state should appropriate for the general work of the experiment station not less than \$70,000 a year for the next two years. The funds from the federal government will remain the same. For the special work of coöperative experiments with farmers the sum of not less than \$20,000 per annum should be granted by the state, and the purposes for which it will be used should be extended to cover all branches of agriculture. There is a decided trend toward irrigation in many of the valleys in western Kansas, and assistance of some sort is sorely needed by the men, who have farms but have no knowledge of applying water to them, and the state should make an appropriation direct for this purpose of not less than \$5000 per annum.

Respectfully submitted.

ED. H. WEBSTER,  
*Dean and Director.*

## REPORT OF THE DIVISION OF MECHANIC ARTS.

*To President H. J. Waters:*

The following is a brief summary of the work done in the mechanic arts division for the biennium ending July 1st, 1912. The departments composing this division are as follows:

- Applied mechanics and hydraulics,
- Architectural,
- Civil engineering,
- Electrical engineering,
- Heat and power,
- Mechanical drawing and machine design,
- Power and experimental engineering,
- Printing,
- Shop methods and practice,
- Steam and gas engineering,
- Water, steam and gas distribution, and the
- Engineering experiment station.

This summary is made up from the reports handed in by the heads of the departments.

Owing to the fact that Professor Seaton, of the department of applied mechanics and hydraulics, was absent on a two-years leave, the work of that department was divided among the others, being done principally by Professors Potter and Conrad.

The total enrollment in the department of shop methods and practice was, for 1910-1911, 1996; and for 1911-1912, 2121. Owing to the fact that the shop work was scheduled regularly for subfreshmen students, the teaching work in the carpenter shop was increased over 50 per cent, with no increase in the teaching force. In order to handle the work it has been necessary to employ additional assistants and pay them from the current expenses of the department. The work each year was done by seven instructors, all of whom were called upon for outside work in connection with repairs and construction in the engineering and other departments.

In the department of Agriculture and Free-hand Drawing, with five instructors, a total enrollment of 2256 was handled in 1910-1911, and of 2412 in 1911-1912.

These two departments have the largest number of student hours, owing to the fact that they handle more students from other divisions of the College, and students from the subfreshman course. An inspection of the report shows, however, that other departments handling fewer students have, because of a much smaller number of instructors and because of small classes, as many or more teaching hours per week per instructor.

The statistics contained in these reports show that the instructors in Mechanic Arts division of this College are teaching more hours per week than in the average colleges of the country, and in addition to the teaching work are called on for much other work in connection with college activities and with research and consultation work handled by the Engineering Experiment Station.

During the school year of 1910-1911 I collected some data regarding the state schools of the four states of Nebraska, Iowa, Missouri, and Kansas. The following figures give the enrollment in the regular four-

year engineering courses at each institution, together with the number of instructors teaching purely engineering subjects:

*Engineering at State Schools, 1910-1911.*

School.	Students.	Instructors.	Ratio of instructors and students.
Iowa College .....	588	42	1 to 14
K. S. A. C. ....	441	21	1 to 21
University of Kansas .....	435	25	1 to 17 2-5
University of Nebraska .....	435	22	1 to 19½
University of Missouri .....	411	31	1 to 13¼
University of Iowa .....	180	22	1 to 8 1-5

These figures show that of the six schools this College has the second largest enrollment, the smallest number of instructors, and the largest number of students per instructor. They also show that the two states having separate universities and colleges have practically double the enrollment in the engineering work over those having the universities and colleges combined.

I am pleased to say that in spite of the fact that we are calling on our instructors for more work than does the average college, the men in the department have carried on the work cheerfully and with constantly increasing efficiency. A few of the instructors in the division have requested and secured leaves of absence without pay, for the purpose of continuing their studies and increasing their efficiency to the College. However, owing to the relatively low salaries paid here, it is not possible for this system to be extended to any great extent, and I therefore recommend that the Board consider adopting a system in vogue in many places, of granting a full year leave of absence on pay to each instructor after a service of six consecutive years; that is, that each instructor shall have every seventh year off on full pay, upon the condition that he take up a line of work that is approved by the Board and that will better fit him to carry on the work of the school.

The needs of the departments are many, and will be taken up in detail in the budget presented to the Board for the coming legislature. I believe the most important need is to provide sufficient funds to permit of paying salaries that will attract the best men in the profession and that will retain them when once secured, and also permit a material increase in the number of instructors employed.

### ENGINEERING EXPERIMENT STATION.

This being the first report of the engineering experiment station, a brief history of its creation and purpose will be given.

The engineering experiment station was established by the Board of Regents for the purpose of carrying on a continued series of tests of engineering and manufacturing value to the state of Kansas, on a scale sufficiently large for the results to be of direct commercial value.

With the above objects in view, very extensive tests are being carried on with producer gas, internal-combustion engines, coal, petroleum and alcohol fuels, compressed air, brick, cement and concrete.

A test lasting ten months was just completed on the gas producer, and the results when published should prove of considerable value. Besides the 100-horsepower Smith gas producer on which the experiments were being conducted for the past three years, a new type of producer for burning cheap bituminous coal is being developed in the experiment station.

Tests on the actual commercial economy of small gasoline engines with gasoline and cheaper fuels are well under way, and the results up to date should prove of great value to prospective buyers and owners of gasoline engines.

Research work with cement, concrete, and various mineral fuels is

being carried on, as are the traction tests in coöperation with the office of Public Roads of the U. S. Department of Agriculture.

Other research problems in the experiment station included a study of the "Cost of various power-plant machinery and apparatus" and the "Effect of location on the cost of manufacturing various products." The results of these investigations were incorporated in bulletins, which are held up on account of lack of funds for publication.

Besides the experimental and investigation problems carried on by the station, commercial tests on power plants, gas plants, gas wells and paving materials were carried on by the various officers of the engineering experiment station. A partial list, showing the variety of work done, is given in the following table:

*Partial List of Public Engineering Work Carried on by the Engineering Experiment Station.*

Acceptance test of steam power plant at Hays, Kan., by Orr, Johnson and Lane.

Acceptance test of municipal plant at Marion, Kan., by McCormick, Potter, Carlson, Orr and Wilson.

Resurvey of Ft. Hays Reversation at Hays, Kan., by Conrad and Frazier.

Remodeling statehouse heating plant at Topeka, Kan., by McCormick and Orr.

Remodeling heating system of State Hospital at Topeka, Kan., by McCormick and Orr.

Survey of state mine and shale pit at Lansing, Kan., by Conrad.

Irrigation survey at Garden City, Kan., by Conrad.

Acceptance test of irrigation plant at Garden City, Kan., by Potter and Carlson.

Resurvey of state prison farm at Lansing, Kan., by Conrad.

Feed-water examination for Industrial School at Topeka, Kan., by Willard and McCormick.

Acceptance tests boiler and heating plant at Dodge City, Kan., by Orr and Johnson.

Schoolhouse heating system at Chapman, Kan., by McCormick.

Gas-well tests at Ellsworth, Kan., by Potter.

Flour-mill tests at Wichita, Kan., by McCormick.

Gas-plant tests at Cheney, Kan., by Potter.

Paving-brick tests at Manhattan, Kan., by Potter, Johnson, King.

Location and plans for heating tunnel, State Hospital at Topeka, Kan., by McCormick and Conrad.

The engineering experiment station has been of value to the state in connection with advice regarding various matters of engineering character. The inquiries which were answered during the past two years included such subjects as asbestos shingles, belt cement, concrete bridge construction, cement blocks, cement cover for reservoir, cement floor paint, cement floors for stables, cement testing, cement tile, cement walks, cesspools, clay deposits, coal, steaming value of different grades, coating for cement blocks; coloring, curing and strengthening of cement blocks; concrete culverts, concrete stock tank, cost of gasoline power, creeping meters, crude oil for domestic purposes; dams, repairs for same; drainage; driveways, crushed rock or gravel; cost of installing electric-light plants; electric-light plant, difference in cost of steam and oil engines, cost of operating the two; engines, best kind for use in irrigating small farms; engines, kind best adapted for general farm purposes, generating lights, running washing machines, etc.; engines, oil, merits and values of oil engines; fillers for woodwork; flooring for granary, cement; flooring for stables, cement; forge work, foundation for oak posts, fuel oil for heating and cooking, guage record for Blue river, gasoline engine for lighting purposes, gasoline tractors and engines for farm work; gas, artificial; gas wells, tests on same; grades for water mains, grounded

current, heat necessary to weaken crucible-steel cable, heating system, horsepower of gasoline engines, hydraulic plant, ice storage, regarding purity of ice taken from pond near livery stable, incubators and brooders, irrigating systems, macadam paving, Medusa cement, paper mills; patents, reliability of patent attorneys; pumping systems, road improvements, roofing materials, scale in automobile boilers, mechanical stokers, storm-sewer ditch, strawboard factory, strength of timbers, sub-irrigation for lawn, tests on clay deposits; switchboards, how to read same; tank for storing city water, testing weights, tractors, ventilation for cellars, water-power for farm purposes; water, rain water for drinking purposes; water pressure, method for increasing; waterworks system for town, windmills.

In connection with the work of the last two years may also be mentioned the development and construction of a machine for rope testing.

There being no funds appropriated for the work of the engineering experiment station, the above lines of investigation and public engineering work are carried on by the various members of the engineering teaching force in addition to their regular teaching work. Our greatest needs are for more men in the division of engineering who can devote their time to research work of the engineering experiment station, and to the various public engineering problems, and for funds with which to carry on the research work, and publish results.

Respectfully submitted.

E. B. MCCORMICK,  
*Dean and Director.*

## REPORT OF THE DIVISION OF HOME ECONOMICS.

*To President H. J. Waters:*

I have the honor to submit herewith the report of the Division of Home Economics for the biennium ended June 30, 1912.

Home economics, as a distinctive subject of instruction, includes the economic, sanitary and æsthetic aspect of food, clothing and shelter as connected with their selection, preparation and use by the family in the home or by other groups of people. Instruction in the subject is based on laws of the physical, biological and sociological sciences; but the fact that home economics derives its materials from a variety of arts and sciences is no argument against its independent existence. The teaching must be a selection of facts and principles drawn from the physical, biological, economic and sociological sciences, and a presentation so related to the business and life of the home as to give home economics an assured place and standing in the educational institutions and to bring legislators and the general public to its support.

Under present conditions the task of the college teacher of home economics is a difficult and complicated one. By study and research she must assemble and enlarge a new body of knowledge and give it pedagogical form. She must prepare manuals, textbooks and illustrative material in this new subject. She must meet the requirements of collegiate standards in the intellectual and scientific strength of the home economic courses, and at the same time overcome the false views of those who oppose the introduction of the practical into college courses. Besides giving instruction to her college students she must do a large amount of work to secure general recognition of home economics in the elementary and secondary schools, and much of that broader extension work by which the multitudes of untrained women in the homes are to be encouraged and inspired.

It has been the purpose of the teachers of the division of home economics of the Kansas State Agricultural College during the biennium just ended to develop the work along the lines indicated. To this end an effort has been made to strengthen each course offered by the division. All teaching outlines have been carefully revised, and the following printed material has been prepared: Domestic science department—Outlines in Elementary Cooking; Principles of Cookery; Table Etiquette and Table Service; Study of Foods, Parts I and II; and Practical Cookery; Domestic art department—Hand Sewing Notes; Subfreshman Sewing II Notes; Subfreshman Sewing III Notes; and Making Shirt-waists Suit Notes.

Recognizing that to gain its rightful place in a modern educational system home economics must be made a definite subject, the scope and purpose of which can be fairly defined, an effort has been made, by careful selection of teachers and by an earnest and sympathetic study of the problems involved, to enhance the importance of home economics as a part of a general and adequate scheme of college education for women. The very marked increase in the enrollment of the division during the biennium is gratifying evidence of the fact that the courses offered are meeting the general and increased demand for instruction along these lines.

The division of home economics at Kansas State Agricultural College includes the departments of domestic science and domestic art. The teachers of each department have by painstaking and conscientious effort done all that is possible to strengthen the work of their department, and as a result of the harmonious and united efforts of the faculty of the division a marked progress is evidenced.

The following changes have been made in the personnel of the teaching force of the division since June 30, 1910. Misses Clara Willis, Clara Smith and Grace Woodward resigned September 1, 1910, from the domestic science department, and Misses Stella Stephens, Laura Storms and Ada Noyes were elected assistants to fill vacancies thus created. The Board of Regents approved the recommendation for an additional assistant in the department, and Miss Jane Humphrey was appointed and began her duties September 1, 1910. Misses Stella Stephens and Ada Noyes resigned September 1, 1911, and Misses Carlotta Ford and Jennie Caton were elected to fill the vacancies thus created. As a recognition of faithful service, Misses Annie Lindsey and Helen Huse were given the title of Instructor at this time. Mrs. Van Zile, Misses Dow, Lindsey and Miles gave continuous service throughout the biennium.

Miss Schraepel was elected as an assistant in the domestic art department January, 1911. In 1911 Misses Stump, Byerly, Fortney, Donaldson and Schraepel resigned, and Misses Humfield, Mutchler, Bayha, Smiley and Hobbs were elected to fill the vacancies. On account of the increased number of students in 1911 and 1912 three student graduates were employed at different times to take charge of some class work. June 1, 1912, Miss Becker, who for previous six and one-half years had administered the work of the domestic art department, resigned, and Mrs. Bessie Webb Birdsall was elected professor of domestic art to fill the vacancy created by Miss Becker's resignation; arrangements were also made for a new assistant in the department. Miss Cowles rendered continuous service to the department during the biennium.

Miss Gilkison as division stenographer for the biennium has rendered faithful service.

During the biennium the work of the summer school was reorganized and much more extensive courses offered, the result being a much larger enrollment. Besides the regular college work, the division continues to offer the housekeepers' course, thus reaching a larger number of young women who otherwise would not receive the benefit of this instruction. The work is intensely practical, and the hundreds of young women who take this course go back to their homes with a broader view of life, and a knowledge and training that will enable them to meet their responsibilities.

Because of the large attendance of young women at the Kansas State Agricultural College the problems of administration have become difficult and complicated. An effort has been made to improve the home life of the young women while in attendance at college by certain regulations controlling the boarding and rooming-house conditions. The result has been a marked improvement, but in my judgment there is still much needed along this line. I would, therefore, respectfully request the Board to give careful consideration to the various problems connected with the home life of the young women. I believe there is need for the appointment of a woman whose entire duty and responsibility shall be the supervision of the social and home life of the young women of our college. The work can, in my judgment, no longer be successfully combined with the administration work of the division of home economics.

Respectfully submitted,

MARY PIERCE VAN ZILE,  
*Dean of Division of Home Economics.*

## REPORT OF THE DIVISION OF GENERAL SCIENCE.

*To President H. J. Waters:*

The Division of General Science includes the following departments: Bacteriology, botany, chemistry, economics, English language, English literature, entomology and zoölogy, German, history and civics, industrial journalism, library economy, mathematics, military training, music, philosophy, physical education, physics, public speaking, and rural education and sociology. It is evident that in the space allotted for this report only matters of general importance can be included, and that for details, many of which are of great interest, the original full reports of departments must be consulted.

Most of the courses of study as offered in the College are characterized by one or another group of distinctly technical subjects, which are indicated by the names of the courses, respectively, and which constitute the feature which determines the student's choice. Each course, however, includes not only its distinctive group of studies, but others which are fundamental to them or which contribute essentially to the course in other respects. These subjects are taught by the departments of this division, and impart information, impose discipline, confer culture, and fit for citizenship. Over one-half of the teaching in the College is in this division. The technical departments add the essential vocational features which give completeness to the several courses.

In addition to functions just indicated, the science departments of this division are important factors in the work of the experiment stations, and much of their most advanced work is in connection with these investigations.

Possession of laboratories and valuable equipment for instruction and research constitutes a basis for offering a course in general science which includes less of definitely specified work than do the technical courses, and allows great freedom of choice in respect to the remainder of the work. This enables one to give character to his course by the election of groups of subjects that will fit him for research in one of the applied sciences, or for teaching these and other subjects, or will serve as a broad basis for concurrent or subsequent vocational training. The importance of effective printed presentation of matters intended for the public is such that a course in industrial journalism has also been formulated, the technical journalism subjects of which are available for election in all other courses.

The personnel of this division is so extensive that space will not be taken to record all changes that have taken place therein within the biennial period covered by this report. In respect to heads of departments, we have had the advantage of continuity of service excepting in a few cases. The College lost an able man in the resignation of Prof. W. E. King, professor of bacteriology, who left August 31, 1910, and was succeeded by Dr. F. H. Slack. Doctor Slack resigned before the close of the year to accept a more lucrative position elsewhere, and Asst. Prof. L. D. Bushnell has been in charge of the department since. Capt. Chas. H. Boice completed in 1911 his four-year detail as professor of military science, and was succeeded by First Lieut. R. P. Harbold. The work in the department of economics and public speaking having become too heavy for one man to carry, in 1910 Mr. Everett P. Johnston was elected instructor in public speaking, and the next year he was given the rank of assistant professor and placed in charge of the department of public speaking. In 1910 Prof. James W. Searson was elected associate professor of English, and the next year, on the recommendation of Doctor Brink, head of the department, the department of English

language and literature was divided and Professor Searson made professor of the English language, the professorship of English literature remaining with Doctor Brink. A further feature in this increased attention to English was the creation of the department of industrial journalism in 1910, and the election of Mr. Charles J. Dillon to the professorship of industrial journalism. With the larger opportunity for physical training for young men that the completion of the Nichols Gymnasium afforded, Mr. Guy S. Lowman was, in 1911, elected professor of physical education and director of physical training. The excellent work of Miss Blanche Enyart was recognized by continuing her in charge of the physical training for young women. In 1910 Prof. Edwin L. Holton was elected to fill the newly established professorship of rural education. The need of the library for a man of wide experience in the purchase of books, and in library administration, was met by the election of Mr. Arthur B. Smith as librarian. He entered upon his duties in 1911.

The mother tongue is one's most valuable endowment. It is the channel through which a very large proportion of our knowledge comes; it is the chief means by which we influence others; and as literature, the drama or oratory it affords much of the purest pleasure of life. The importance of the study of English, in its manifold forms of record and of expression, has always been recognized by the College, and a generous fraction of the college courses allowed for it. Insistence upon clear, unequivocal spoken or written expression is the best means of insuring accuracy of information, clarity of thought, and correctness of reasoning.

In the separation of the old department of English language and literature into two departments a distinct advance has been made. In the department of English literature, the cultivation of taste and appreciation of literary quality receives most attention, thus fitting the student for enjoyment of the literary treasures of all ages. In the department of the English language, constant and vigorous attention is given to the production of correct, accurate, forceful English composition, and great gains in these directions are already apparent. The department of industrial journalism was established in order that students with the necessary preliminary training in English may be taught to put observations and discussions upon the practical work of the world into forms that will attract readers, and thus fulfil a useful mission. An article that is not read might as well never have been written. The importance of the spoken expression of thought has received further recognition by the College in the erection of a separate department of public speaking. In this it is not the intention that special attention should be given to the dramatic and ornate, but that instruction and drill be directed chiefly toward the development of a delivery that shall be convincing; that shall enable one to present most effectively any matter that may be in hand.

There are thus four departments that are especially charged with developing the student's power in control and use of his mother tongue, and the continued and adequate support of their work is confidently looked for.

The department of industrial journalism, in addition to its educational work, has been the agency for giving publicity to the College and experimental stations through the newspapers and agricultural and trade journals. Remarkable success has been attained in this work, due chiefly to the fact that the matter offered the papers is recognized as of actual value to their readers.

The opportunity for better preparation for citizenship has been considerably extended within the biennial period. Additional courses in American history, industrial history, economics, sociology and rural sociology have been added. These have been liberally chosen by students as elected work and their appreciation thus demonstrated.

Some of the departments of this division give instruction in subjects

that bear directly on vocational preparation. The teaching of higher mathematics is of this character for the engineering students. Much of the instruction in bacteriology, chemistry, entomology, botany and other sciences is essential in the vocational training in home economics and agriculture, whether the students apply their knowledge in their own homes, on the farm, or as teachers or investigators. For teachers there are also offered special courses in subjects belonging especially to pedagogy. Considerable attention is given to preparing for teaching in rural schools and in schools of towns possessing a large rural constituency. The time allotted to the several subjects of this section is at present not sufficient, and in order that our work in these lines shall compare favorably with that of other schools it should be somewhat extended.

With the completion of the Nichols Gymnasium we are for the first time in position to give systematic physical training to the young men. Thus far physical training, aside from that incident to military drill, has not been required; but it is expected that in the future at least a minimum of work in the department of physical education will be required of all students in the institution. To carry out this plan, however, will require considerable additions to the instructional force, not only to meet the needs of the young men, but for those of the young women as well. The students not in the regular four-year courses are frequently more in need of physical training than are others. The necessary developmental exercises also require additional equipment, and the benefits attending participation in outdoor sports should be extended to many more by an increase in the fields and other facilities. The importance of developing a sound physique, or preserving that which one has, while one is obtaining intellectual development at college can not be overestimated. The military training for young men contributes much toward this end, in addition to providing to a certain extent for defense in warfare, should this become necessary. A high degree of efficiency has been attained in the military department and a greater interest in this work is being manifested by the cadets.

Among the most indispensable features of provision for instruction in the sciences, are laboratories and their equipment. In some of the departments this equipment is of a very expensive character, and with the great increase in students has become entirely inadequate to supply them properly. The departments of entomology and zoölogy, botany, and bacteriology are all much in need of additional compound microscopes, the cost of which will run into thousands of dollars. These departments also need additional tables for laboratory work, and lockers for the use of students in caring for their apparatus and material under investigation. Additions in respect to other apparatus are constantly required. There is also imperative need of additions to the force of instruction of these departments.

When the Nichols Gymnasium became available the building formerly used as a woman's gymnasium was assigned to the department of chemistry. The expansion thus made possible has placed this department in comparatively satisfactory condition in respect to floor space for the laboratory work of instruction and investigation. Funds for the equipping of the laboratory for freshman chemistry have, however, been very meager, and additional appropriations to provide for ventilating hoods, additional laboratory tables and other equipment are an imperative need. Additional apparatus is also required for the new courses in household chemistry and various branches of chemistry for engineering students. Additional teachers are a pressing necessity also.

The department of physics is in need of additional apparatus, some of which is of a very expensive character, but its most pressing requirement is that of a building, which might be shared with the department of electrical engineering. The need for this building is imperative, and a strong effort should be made to secure an appropriation of \$100,000

for a building and its equipment. The space in Physical Science Hall that would thus be set free could be occupied at once by the department of chemistry, which would thus have ample room for its student laboratories, and for more efficiently conducting and enlarging the chemical work of the agricultural and engineering experiment stations, and the chemical control of foods, feeds and fertilizers which is in charge of this department.

The needs of the library can hardly be overestimated. While changes made within the last year have added greatly to the efficiency in use of the material which we possess, it is safe to say that the library is exceedingly meager in respect to the valuable sets and works which are really indispensable in research. Investigators in the sciences in their relation to agricultural and other arts are hampered excessively by this lack of reference material. I can not urge too strongly the need of very liberal appropriations for books. Ten thousand dollars per annum for some years could be spent to very great advantage. Not only do we need large additions of books purchased as such, but there is exceedingly pressing necessity for some provision by which our constantly accumulating serials may be bound promptly and placed upon the shelves. Hundreds of volumes are of but little value because of their comparative inaccessibility in the unbound state. Additional assistants are needed in the library to give aid to students and investigators in the constantly increasing use of the library in the study of technical and scientific subjects. Adequate provision should be made for the establishment of divisional libraries, in order that technical works may be near at hand for those in especial need of them.

The instruction in languages other than English is at present limited to German. The importance of this language to students, teachers and investigators was recognized some years ago in the establishment of the department of German. There is scarcely less need for French to the workers in sciences, and a knowledge of Spanish has come to be of special value to those whose duties take them to the Spanish-speaking peoples with whom the United States is now so intimately involved. The time has come for merging the department of German into one of modern languages, in which provision would be made for giving instruction in French, Spanish and Italian.

In addition to the college work of the Division of General Science thus briefly outlined, some of the departments are charged with other definite duties to the state. Thus the professor of entomology is state entomologist and a member of the State Entomological Commission. The duties of this commission are attended to by him throughout the north half of the state, and include inspection of growing nursery stock and of that introduced into the state from other states or countries. The professor of chemistry is a food analyst for the State Board of Health, and a special assistant is employed to do the analytical work in this connection. Analyses of dairy products are also made for the dairy commissioner. The chemical work required by the fertilizer law and the feeding-stuffs law is in charge of the chemistry department of the agricultural experiment station. While there is yet no law providing for seed testing, work of this kind is regularly done in the department of botany, and state provision for this might advantageously be made by legal enactment.

Many of the departments of this division have a heavy correspondence with the citizens of this and other states touching matters coming within their scope, and the influence and usefulness of the College is thereby largely extended.

In conclusion, I wish to call attention to the fact that the teaching force of the departments of this division has not increased proportionately to the enrollment in classes. This means that classes are growing constantly larger and larger and that the quality of the instruction is

deteriorating thereby. While special mention has been made of the need of additional teachers in certain departments, it may be stated in general that there is scarcely one of them in which an increase of the force, with the resulting possibility of giving greater individual attention to the students, is not highly desirable.

Respectfully submitted.

J. T. WILLARD,

*Dean of the Division of General Science.*

## REPORT OF THE EXTENSION DEPARTMENT.

*President H. J. Waters:*

This department has been able to conduct many lines of public service within the past two years, but these have but served to point out many new fields of work yet untouched. The whole population of Kansas must depend for its prosperity upon agriculture and the common industries. Degrees of prosperity depend upon efficiency, and the welfare of the people of this state will be modified by efficiency in agriculture, home making, and in the other common vocations of rural people. This College was established to give instruction in agriculture and the mechanic arts, and when it offers such instruction to those who come to it only a small part of its duty, its privilege, has been met. The same economic and social reason for teaching those who come to it must stand as applied to the million who can not be expected to sit in the college classes. It may therefore be a source of gratification to you to know that this department has been able to present the cause of improved agriculture, improved rural life, a more scientific home life and vocational education to a total of three hundred and forty-nine thousand nine hundred sixty-eight (349,968) Kansas people, practically one-fifth the population of the state; and this is a very conservative estimate. A dozen other avenues are waiting to be opened and a dozen more trained men and women could be used to the manifest advantage of the rural life of the state.

**THE FARMERS' INSTITUTE.**

Since the first public service of the Kansas State Agricultural College was the holding of a farmers' institute, it is but proper that the farmers' institute should be the center and the real basis of all our extension work. At this time there are three hundred eighty organized institutes in the state, with a total membership of about sixteen thousand heads of families. There is no county without at least one institute, and many counties have from two to eight institute organizations. There are one hundred county institutes. Five counties—Reno, Cloud, Saline, Shawnee and Wyandotte—do not have county institute organizations affiliated with this department, although each of these counties has several local institutes.

During the year ending June 30, 1911, there were held 197 one-day institutes, 102 two-day institutes, and one three-day institute, or 300 institutes, with a total attendance of 58,504, the small attendance due to unusual weather during one month when five institute circuits were being conducted. During the year ending June 30, 1912, 233 one-day institutes were held, and 109 two-day meetings—altogether 342 institutes—with a total attendance of 95,789. Twenty-eight institute dates were canceled in February and March, 1912, on account of the snows. It has been the policy of this department to arrange the programs for all annual institute meetings, indicating the subjects to be discussed by the College speakers and by local speakers, and also requiring one or two subjects, such as "Roads," "Silos" or "Alfalfa," for example, to be on every program in the state. Two college speakers, as a rule, attend each annual meeting, but never supplying quite half the program. In addition to the regular speakers from this department, seventeen persons of the college and experiment station staffs rendered valuable help, altogether 168 days of service. The state institute held 27 sessions, and the attendance exceeded 1100 different persons. The total cost of our institute service for the year ended June 30, 1911, was about \$15,000, while for the year ended June 30, 1912, the total cost was about \$18,000. It is not possible definitely to fix the amount used for farmers' institutes.

*Women's Auxiliaries.* A fine beginning has been made in the organization of farmers' wives. Twenty-four definite organizations were formed during the year, with a membership of 674 women. Monthly meetings are held and a definite program is sent out for each meeting by Miss Frances L. Brown of this department. We hope now to have a women's auxiliary soon in connection with every farmers' institute.

#### AGRICULTURAL TRAINS.

During the year ended June 30, 1911, only two of these "trains" were conducted, a "Dairy Train" over the Santa Fe (southwestern) and a "Pork Production Train" over the Rock Island lines, with a total attendance of 8670. During the year ended June 30, 1912, five such "trains" were conducted, "Wheat," (R. I.), "Diversified Farming" (Santa Fe—southwestern), "Drainage" (M. K. & T.), "Good Roads" (A. T. & S. F.—east), and "Live Stock" (U. P.), with a total attendance of 58,337, covering a total of 4553 miles with 293 stops.

#### SPECIAL MEETINGS.

Under this head are included lectures before teachers' associations, granges, women's clubs, commercial clubs, farmers' picnics, fraternal picnics, fairs, etc. During the year ended June 30, 1911, the attendance at these special meetings was 52,000, and for the year just ended it was 51,000.

#### LECTURES TO TEACHERS AND SCHOOLS.

As a part of the work in promoting the cause of vocational education, speakers from this department attend many teachers' meetings, and during the year ended June 30, 1911, four of the staff gave a total of 70 lectures to an attendance of 6000 teachers, and during the year just ended their lectures were given to a total of 45,000 teachers. It is considered of great importance when on farmers' institute work to visit the high schools and grammar schools. During the year ended June 30, 1911, our speakers spoke on some agricultural or home economics topic to a total of 25,000 children, in 245 addresses. During the year just ended, 720 such lectures were given to a total of 144,500 school children, mostly in the high schools and grammar schools.

#### HIGHWAY, BRIDGE AND DRAINAGE WORK.

This work has had a remarkable growth. It was begun in September, 1909, with one highway engineer. In June, 1910, an assistant was employed, largely for bridge work; in September an expert in drainage and irrigation was secured; and in June, 1912, a fourth man was employed to help in both the highway and drainage work. It will be impossible to meet all the calls during the coming year without doing an injustice to other forms of extension work. It should be understood that all money expended for this work is taken from the general appropriation for the extension department. For the year beginning June 1, 1912, the sum of \$7500 has been set aside for highway and drainage work, out of the total of \$40,000.

For the year ended June 30, 1911, Mr. Gearhart has submitted the following summary of public services: The supervision of the construction of  $1\frac{1}{2}$  miles of oiled road; preparation plans, specifications and estimates for 250 miles of earth roads, 23 miles of oiled roads, 20 miles of sand-clay roads, 40 miles of macadam roads, 50 reinforced concrete bridges, 10 steel bridges, and also prepared 20 standard bridge plans. In that year Mr. Gearhart attended 125 public meetings, with a total attendance at said meetings of about 12,000 people. As the result of the campaign many boards of county commissioners adopted during that year resolutions to use concrete for all bridge work and to have the plans and specifications prepared by Mr. Gearhart.

During the year ended June 30, 1911, Mr. Gearhart prepared for

publication a most valuable bulletin on Highway Improvement, which was published by the state printer and copies were sent to all members of farmers' institutes, to all county commissioners, county clerks, county surveyors, and to hundreds of others on application. The bulletin is a most valuable textbook on the subject of road improvement and bridge building.

For the year ended June 30, 1912, Mr. Gearhart reports that he and his assistants have attended 304 public meetings in the interest of good roads, made 169 bridge inspections, and furnished plans, specifications and estimates for 225 bridges. Also that plans, specification and estimates were prepared for the construction of seven miles of macadam road, and inspections and estimates were made for 37 miles of macadam and five miles of oiled-earth roads and approximately 150 miles of earth roads. Supervision was given in the building of five demonstration earth roads and one oiled-earth road. During this year Mr. Gearhart has made an especially strong campaign for the building of better bridges, and has shown conclusively that many counties were being imposed upon and that many very inferior bridges were being built at an unreasonable expense. He has prepared an illustrated lecture on "Good and Bad Bridges," and has given it in more than 40 counties, causing a great awakening in the minds of the people as to the cost of bad bridges. In one county where a flood on August 9, 1911, took out a great many bridges this department wrote the county clerk suggesting the building of a few concrete bridges and offering the assistance of the highway engineer's office. No reply was made to this letter, but ten days later office contracts were made with one bridge company for the replacement of all bridges taken out by that storm, at a cost of \$95,000. As this was in plain violation of the law, the county attorney asked Mr. Gearhart's cooperation, the matter was carried into court, and the court appointed a committee of arbitration, consisting of State Engineer Gearhart, the county engineer of that county, and an engineer appointed by the contracting bridge company. Careful investigation was made and a unanimous report filed giving the reasonable value of all bridges as about \$52,000. The bridges completed at the time of the injunction from the court amounted, according to the original contract, to something more than \$49,000, and the unanimous verdict of the committee placed the value of these bridges at a little more than \$28,000. Therefore the offer of assistance by this department and the wise co-operation of Mr. Gearhart secured the saving of more than \$40,000 to that county. Similar investigations are being made in other counties, and it is safe to say that the agitation started by this department four years ago, and carried on constantly by Mr. Gearhart, in favor of the right kind of bridges has resulted in the saving to the state of Kansas of at least \$250,000 this year; and it is safe to say that the highway engineer's office in the three years since it was established has saved to the taxpayers of Kansas more than a half million dollars, and has educated the people of Kansas on the value of good roads and good bridges beyond the possibility of financial estimate. The entire cost of the highway department for the three years has not exceeded \$12,000.

In July, 1910, an assistant for Mr. Gearhart was authorized by the board and Mr. A. R. Losh was employed, and he has rendered very conscientious and valuable service. In June, 1912, another assistant was added, Mr. Fred R. Hesser.

#### DRAINAGE AND IRRIGATION.

In the institute work in southeastern Kansas the authorities of the College were constantly confronted, in the early years of this service with the need for the drainage of thousands of acres of farm lands. In July, 1910, authority was granted for the employment of a drainage engineer, and Mr. H. B. Walker, of Iowa, was selected, and began his

work in September of that year. Mr. Walker has rendered unusually faithful and conscientious service, and the reports of his work for the two years are exceedingly gratifying. During the year ended June 30, 1911, Mr. Walker attended 45 farmers' institutes in 21 different counties in eastern Kansas, gave 59 addresses to over 5000 people, speaking always on the improvement by farm drainage and the methods of securing the best results. During that year he made 108 drainage-inspection trips to 93 different farms in 30 different counties, and advised with farmers relative to the irrigation of five drainage districts. Mr. Walker's railroad travel during that year aggregated over 7500 miles. He was able to report at the end of the year that about 40 per cent of the farmers visited had by the end of the year undertaken some farm drainage work, according to his plans and recommendations, but the best results of the year was the creation of a public sentiment in eastern Kansas towards the conservation of the lands through drainage and the preparation of farmers for the organization of drainage districts, especially in the direction of the necessity for compromise and concession without law. Since September, 1910, Mr. Walker has visited 60 different counties in Kansas, advising with farmers on matters pertaining to drainage and irrigation.

For the year ended June 30, 1912, Mr. Walker attended 42 farmers' institutes, giving 54 lectures to an aggregate attendance of 8927, attended ten special conventions, delivering nine addresses. He also gave nine lectures to different classes in the College. Besides delivering the 127 lectures described above, he made 42 visits to assist farmers with tile drainage, and has organized a number of "Mutual Consent" drainage districts, where a number of farmers come together and in conference agree upon plans for establishing a system of drainage without action under the law. He has prepared complete plans and specifications for the Delaware river drainage district in Jefferson county, Kansas, and supervised the letting of the contract for excavations, straightening, cleaning, etc., the total expense for the 39 miles being approximately \$90,000, and benefiting over 10,000 acres of very useful land. Mr. Walker has just prepared and submitted for publication a very valuable bulletin on land drainage, and the same has been approved by the president and is now in the hands of the state printer.

During the first year of Mr. Walker's service he made a number of trips through western Kansas, urging the importance of small farm irrigation plants. In the winter of 1912 he made the institute circuit out over the Union Pacific lines, urging the same matter; and later made an inspection trip over the Missouri Pacific and the Santa Fe lines on the same errand, and succeeded in interesting about 30 farmers to the point of installing small irrigating plants. In June, 1912, he made a final inspection trip, visiting about 30 farms where small irrigation pumping plants had been installed, advising as to method of handling the machinery, water, etc.

During the three years in which this public service has been rendered there are only fifteen counties that have not had personal visits from some one connected with the department, on matters pertaining to roads, bridges, drainage or irrigation. The counties not visited are Cheyenne, Sherman, Rawlins, Greeley, Morton, Stanton, Grant, Hamilton, Stevens, Seward, Haskell, Gray, Comanche, Graham and Decatur.

The experience of the past three years has shown the need of more trained supervisory engineering work, and this department should have, beginning September, 1913, not less than four district engineers, each having supervision over work in a distinct portion of the state, and there should be at least two other engineers in the office.

## CORRESPONDENCE COURSES.

Two years ago authority was granted for the establishment of correspondence courses. During the year ended June 30, 1911, there were enrolled 210 persons in this work, taking instruction altogether in 15 subjects. The fee for the work at that time was \$2, much less than one-half the actual cost to the state. Since no appropriation was made for this work it was necessary to raise the fee to \$5, and this was authorized June, 1911, as well as the employment of Mr. H. L. Kent, whose duty for the first year was to develop a system of instruction, and with that thought in mind no effort was made this past year to secure a very large number of students but attention was given to developing methods of instruction. During the past year only 95 different persons were enrolled in the correspondence courses, representing work in 25 subjects. However, Mr. Kent has the work so well systematized now that we will be able to handle successfully and economically a much larger enrollment of students. Acting on your authority the courses have been increased and classified into Reading courses, 1, Extension courses, \$3, and College Credit courses, \$4.

## OTHER FORMS OF EXTENSION WORK.

*Home Economics Clubs.* This work has begun in the winter of 1910-11. Out of many conferences a systematic course of instruction was developed by Miss Brown, of this department, and Mrs. Van Zile, Miss Becker, Miss Dow, Miss Huse, Miss Cowles and others, of the division of home economics, and three courses in cooking (20 lessons each), and similar courses in sewing, have been offered for use. Since January, 1911, more than 175 clubs of girls have been organized, with a total of more than 5000 members, each club doing definite work and reporting the work done. It was necessary in September to employ a teacher, a graduate of the College, to devote her whole time to handling the work of these clubs. The three courses, sixty lessons in cooking, are now printed; two courses in sewing, forty lessons, are printed, and the other sewing course will be printed by November, 1912.

*Exhibits at Fairs.* For convenience of management the president directed that the public arrangement of fair exhibits should be handled by this office. Each department of the College prepared last year one or more boxes to illustrate the educational aspects of the work of that department, and two sets were prepared, making two complete exhibits. These exhibits were shown at fifteen county and state fairs. Two speakers were sent to each fair to explain the exhibits and to give lectures.

*Orchard Visits, Spraying, etc.* During this biennium Mr. Holsinger has visited more than fifty orchards, advising as to treatment and assisting in the spraying of twelve orchards. This work is capable of great expansion as we have funds for special men during the brief season from March to June.

*Neighborhood Improvement Clubs.* During the past year Mr. Holton, of this department, prepared a valuable pamphlet outlining plans and rules for organizing neighborhood improvement clubs. These are principally for rural teachers, but they may be organized in villages and towns or in wards or districts of the cities. Next year it is our desire to perfect hundreds of these organizations, most of them in school districts or in "neighborhoods," thus leading to the discussion in many communities of many important problems relating to rural betterment.

*Pure-bred Sire Club.* During the past two years Mr. Wheeler has been pushing this work through pledge cards until he has about 1000 men who have pledged themselves to use only pure-bred sires of their live stock. This will lead at once to a league for exchanging sires, and next to coöperative breeding associations.

*Silo Building.* During the past two summers Mr. Hine and Mr. Wheeler have supervised the building of cement silos in several counties of the state, building both the cement-metal-lath and the solid-wall types, and both have proved entirely satisfactory.

*Farm Visiting.* During the past two years Mr. Crabtree, of this department, visited, on request of the owners, more than two hundred farms in twelve counties of the state.

*Movable Schools.* This department has never held a general "movable school" or "short course in agriculture," and it will not be able to hold such schools without neglecting the farmers' institutes until we can have at least six specialists who may devote their entire time during the winter to this work. These schools must be held, to be most successful, just when the institutes must be held. However, we have held each year one or two "poultry schools" and "stock judging schools." The principal efforts of the department in this direction have been expended in the holding of "movable schools in home economics," as they can be held in the fall and spring months, before and after the institute season. During the year ended June 30, 1911, Miss Brown, with assistants, held sixteen schools with an attendance of 463 women. During the past year fifteen of these schools were held, with an attendance of 345.

*Vocational Education.* For seven years I have, "in season and out of season," advocated the teaching of elementary agriculture and manual training in all public schools, and the teaching of elementary home economics in all high schools and grammar schools at least. For three years of this campaign there was very little coöperation from any source except from county superintendents of schools. Then the farmers began to be interested, and through the talks of our institute speakers at the schools the children became interested, and gradually more teachers and school officers became interested, until now we have in Kansas a remarkable unanimity of public opinion on this subject. Last year elementary agriculture was taught in over 400 of the village, town and high schools, and over 7000 of the 8000 rural schools and all the normal schools of the state, whereas seven years ago it was taught in only one school aside from the Agricultural College. Seven years ago home economics had a place in only three or four high schools in Kansas, and last year it was taught in over 250 Kansas high schools. Seven years ago manual training was taught in only four high schools in Kansas, and it was taught last year in over 160 high schools. In April, 1910, Prof. E. L. Holton was added to the staff of this department, with the special purpose of systematizing this campaign and presenting proper plans not only for the introduction of these subjects but the right system of instruction. His work has been eminently satisfactory, and he has not only interested teachers and school officers, but he has interested the clergy of the state in the whole problem of rural life.

#### STAFF FOR 1910-'11.

For the year ended June 30, 1911, the following people were in this department: J. H. Miller, superintendent of institutes; P. E. Crabtree, farm management; Geo. C. Wheeler, animal husbandry; Geo. S. Hine, farm dairying; C. V. Holsinger, horticulture; Frances L. Brown and Josephine Edwards, home economics; W. S. Gearhart and A. R. Losh, highway engineering; H. B. Walker, drainage and engineering; E. L. Holton, rural education. Appropriation, \$27,500.

#### STAFF FOR 1911-'12.

In June, 1911, the employment of a superintendent of farmers' institutes was authorized, and Mr. G. W. Conn was employed. He served from October to March, when he resigned, and his place was not filled. Miss Edwards resigned in May, 1911, and later Miss Ella M. Nash, Mrs.

Mary E. Simmons and Miss Nellie Thompson were employed to assist Miss Frances L. Brown. Mr. H. L. Kent was chosen as director of instruction of four correspondence study courses, to take entire charge of the work beginning with July, 1912. Mr. H. J. Umberger was employed for four months for institute work in western Kansas. Mr. Conn's place has not yet been filled, but will be in the near future. Miss Nash resigned at the end of the year, and her place has not yet been filled.

For the year ending June 30, 1912, the following people were in this department: J. H. Miller, director extension service; G. W. Conn, superintendent of institutes; P. E. Crabtree, farm management; G. C. Wheeler, animal husbandry; C. V. Holsinger, horticulture; H. J. C. Umberger (3 mos.), dry-land farming; Geo. S. Hine, dairying; Frances L. Brown, home economics; Ella M. Nash, home economics; Mary E. Simmons, home economics; Nellie Thompson, home economics; W. S. Gearhart, state highway engineer; H. B. Walker, drainage and irrigation; A. R. Losh, assistant engineer; Edwin L. Holton, rural education; Harry L. Kent, correspondence courses. Appropriation, \$35,000.

#### RECOMMENDATIONS.

As I stated in the beginning of this report, the work we have done has plainly pointed out to us the necessity for more work, and especially for more personal work. The visits to farms have but proved that comparatively little definite progress will be made in farming methods until the College can have a force of "county agents," to be paid, of course, by the counties. There is urgent need for more farm demonstrations, and these can best be done by men located in the different counties, and the best results from the work of these men will only come through close supervision by the College.

The fact that we can have a thousand persons come each winter to the state institute proves to me that the College ought to carry the same kind of instruction out to not less than twenty communities every year. This can not be done without additional force of specialists, men whose sole business it will be during four or five months of the year to conduct these movable schools, and who can be used for the rest of the year in farm advisory and farm demonstration work. I would recommend, therefore, such an increase in our force, four men and two women, as will permit us to hold at least twenty of these "movable schools" each winter. I would then divide the state into four districts, each of these men to have supervision over the demonstrations to be conducted in these districts during the remainder of the year.

Respectfully submitted.

J. H. MILLER,

Office Deputy Building and Loan, . . . . .	P. S. TOMSON.

## LETTER OF TRANSMITTAL.

TOPEKA, September 1, 1912.

*Hon. W. R. Stubbs, Governor:*

DEAR SIR—In compliance with section 515 of the General Statutes of Kansas of 1909, I herewith transmit this report, which is the eleventh biennial report of the state banking department.

At the date of this letter of transmittal there are in operation under the supervision of this department 892 state banks, 4 private banks and 5 trust companies.

I point with pride to the fact that not a single dollar has been lost during the past two years by depositors in the state banks of Kansas. Instead of the method prevailing in the past, this department has adopted the policy of rejuvenation in all cases. In several instances, banks, which it would be unwise to name, have been found in straitened financial circumstances, but by prompt work on the part of this department these banks in every case have been reestablished upon a firm and solvent financial basis. Numerous incompetent and dishonest officers have been summarily removed from office, and the vacancies thus created filled with practical and experienced bank managers, with the result, as above stated, of absolutely no losses to depositors from insolvency of banks during the past two years.

The suits which were brought against the bank depositors' guaranty law were carried to the United States supreme court, and that court held that the guaranty law was constitutional in every respect. This ended the legal fight against this law, and has firmly established the principle of guaranteeing bank deposits in the banking and business world to stay.

At the present time there are 456 banks operating under the guaranty law. We have in that fund in bonds and cash in lieu thereof, to guarantee the payment of assessments \$341,349.10, and in the assessment account \$83,231.03. To date not a single cent has been withdrawn from this fund, although in the case of the Abilene State Bank guaranty certificates to the amount of \$46,809.75 have been issued against it, this being the amount that that bank owed its depositors at the time its doors were closed. It is confidently believed, however, that this bank when finally closed out will pay its depositors in full out of its own assets, so that these certificates can be surrendered and canceled.

The guaranty Law in Kansas has done more to put the

proper amount of confidence in the state banks, than any other one thing since its enactment. It has also done much toward assisting us to regulate and supervise the banks in the manner that they should be and raising them to their present high standard. I am pleased to inform you that the guaranty law has been a success in every sense of the word.

Two of the worst gangs of bank robbers which have ever infested the Middle West were operating in the state of Kansas at the time I took active charge of the banking department, one on the north line of the state, with headquarters at Wymore, Neb., and one on the south line with headquarters in Oklahoma. In the years of 1908, 1909, 1910 and the first three months of 1911, there were one hundred twenty-five banks robbed in the states of Oklahoma, Nebraska, Arkansas, Missouri, Texas and Kansas, thirty-eight of which were in this state. Kansas was apparently helpless to prevent these outrages against its citizens and their properties. In March, 1911, this department secured a special appropriation from the legislature and employed one of the best detectives in the United States, Mr. J. S. Searls. (We secured the active support and coöperation of the National Surety Company of New York, through their state agent, Mr. R. A. Algire, of Kansas City, Kan., and a great deal of the credit for the results accomplished is due to the efforts of Mr. Algire.) We began to make a campaign against the bank robber in Kansas. We worked in conjunction with the Anti-Horse Thief Association, the United States government, and various other officers and organizations. No less than fifty-five of the most desperate bank burglars in America, who were all more or less connected with the organizations of robbers operating in Kansas, have been captured and placed in the penitentiary for terms ranging from ten to fifty years. Both of the gangs mentioned above have been completely wiped out. As a result of this work, not a single bank has been robbed in Kansas since that time, and only one attempt, while the other states mentioned have had as many or more than ever before.

Mr. Searls has also been of inestimable value to this department in running down embezzling bank officers. A notable example of our work along this line is the capture of John A. Flack, the embezzling bank cashier who caused the failure of the Abilene State Bank. Mr. Flack escaped at the time of his embezzlement and the officers were unable to locate him. However, Mr. Searls, finally tracked him to New York city and effected his capture after he had been at large about two years, and he is now under arrest and awaiting trial at Abilene with eleven charges filed against him.

This detective has not only been of inestimable value to us in capturing bank robbers and embezzling cashiers, but he has also secured convicting information and evidence for us in a

very large number of cases when we otherwise would have been helpless.

The banking department has been put on as nearly a civil service basis as it is possible to put it under the present law. Not a single employee now holds a position under this department for political reasons. Each man is required to take an examination and show himself competent to hold the position sought before he is appointed. Each employee is very closely checked up, and if at any time he shows a weakness or does not do his duty his place is immediately filled by a more competent person. I strongly recommend that the banking department, both as to Bank Commissioner and all his employees, be entirely removed from politics.

The system of bank examination has been steadily improved until it has reached a very high state of efficiency, and I believe compares favorably with that of any other state in the Union or with that of the government.

This department has just recently issued an order providing that any person desiring to become a cashier or managing officer of a Kansas state bank must have had at least two years' actual, continuous experience in banking, and the record of this two years' experience must show that they were persistently faithful to their work; and further than this, unless they have had at least five years' actual experience and their record first-class for that period, they must report to the banking department and take a written examination on the Kansas banking laws in general, the corporation law as it applies to banks, the negotiable instruments law, and the practical and technical points of everyday business and banking. If they pass this examination with a grade of at least seventy per cent they are issued a certificate entitling them to become the cashier or managing officer of a Kansas state bank.

This department has found, upon investigation and research, that much of the trouble in Kansas banks is caused by incompetency and lack of education in banking, without any preparation by the would-be-banker to fill the responsible position of managing officer of a bank. Many men are allowed to go into the banking business who have no talents, experience or education for this great, important work, and disastrous results too often follow. The department is very anxious to elevate Kansas banking to the highest state of perfection and efficiency, and has decided that no steps can be taken to accomplish these ends with more certainty than our present position as to the preparation and education of men for the Kansas banking service.

The department succeeded in getting the last legislature to pass House bill 906, commonly known as the Kansas "Blue Sky" law, providing for the regulation and supervision of the sale of stocks, bonds and other securities. This law, as you

know, was something entirely new in the business world, but I am pleased to inform you that we have worked the same out in very nice shape and accomplished some wonderful results. I estimate that it has saved the people of this state at least six million dollars since its enactment. Between fourteen and fifteen hundred companies have been investigated by this department since the enactment of this law, and of this number less than one hundred have been granted permits to sell the securities in Kansas. The law is rapidly gaining fame all over the civilized world, and I believe that a large number of the states will adopt a similar law at the coming sessions of the legislatures. I believe that a movement has been started that will eventually result in the regulation and supervision of all kinds of companies in the same manner as banks are now regulated and supervised. There are a few minor amendments that should be made to this law, which I will be pleased to recommend to the legislature at the proper time.

Through the enactment of the charter limitation law, being section 2, chapter 125, of the Laws of 1911, there has been granted to the Charter Board the absolute right to prohibit the organization of banks in any territory except where a strict investigation shows the need of a new bank to be a matter of public necessity.

Prior to the enactment of this law a number of charters were refused, which convinced me of the necessity of the enactment of this feature of limitation, and since the enactment of this law charters have been refused in a great number of cases. Kansas, in my opinion, is now recovering from the effects of a wave of bank organization for speculative purposes, and later developments have proven that in a majority of the smaller towns of the state having two banks, the second bank instead of being a credit and help to the community, has resulted in the weakening of the older institution, and has demonstrated conclusively that a new bank is, in most cases, the result of inability to properly judge the need of banking facilities. This law has done and is doing a great deal toward helping to properly regulate and supervise the banks in the best interests of the people.

#### LEGISLATION.

The banking law at the time of its first enactment, in 1891, has proven itself to be in need of substantial amendments and practically every legislature since that time has added to or taken from this law some important feature. The last session of the legislature was very liberal in the enactment of legislation recommended by myself, as bank commissioner, and at this time, aside from a few minor and unimportant changes, I consider the Kansas banking laws to be in very good shape.

**BONDS OF OFFICERS.**

An investigation conducted by this department during the past two years has shown that in at least 70 per cent of the banks the bonds of the officers are insufficient in amount, and in numerous instances these bonds are merely personal bonds, signed by sureties who are unable financially to meet the obligation created by the signing of the bond, should they be called upon to do so. The experience of this department has been that personal bonds are not satisfactory in a majority of cases when we are forced to realize upon them if possible.

A ruling was promulgated by this department in January, 1912, requiring a minimum bond of \$10,000, which has been rigidly enforced. In this connection I would recommend that section 9 of the banking law be so amended as to require a graduated bond according to the total assets of the bank, with a minimum of \$10,000, and further require surety bonds in all cases. I would further recommend that the law provide that all bonds shall be deposited with the bank commissioner as custodian, and thus permit better supervision and scrutiny of same.

**CLOSED BANKS.**

The Citizens and Farmers State Bank, Arkansas City, Kansas.

As stated in the report of this department, under date of September 1, 1910, the winding up of the affairs of this bank has extended into the period covered by this report. The same receiver, Merritt Jeffries, is still in charge of the affairs of this bank. Although its assets, with the exception of 180 shares of the capital stock of the Arkansas City Ice and Cold Storage Company, have been disposed of, there yet remains at this time a liability to the depositors of approximately \$18,300, being equal to an eight per cent dividend on the receiver's certificates. The receiver has at this time a bid of \$80 per share on this stock, which on account of its being insufficient to pay the depositors in full and settle the attorneys' fees and court costs, has been refused.

There is pending in the United States circuit court at Kansas City, Mo., an action on the directors' liability of Wm. A. Wilson, former president and controlling officer of this bank, and I am informed by the receiver and his attorneys that this suit promises success.

Considerable agitation has developed owing to the dilatory court proceedings, and in August of the present year Attorney-general Dawson was requested to make special investigation of the management of the affairs of this bank. To date the report of his investigation has not reached this department. It is confidently believed that in the near future the final settlement with the depositors of this bank will be made, paying them in full.

The affairs of the Bank of Arcadia, Arcadia, Kan., the Garland State Bank, Garland, Kan., and the Bank of Ellinwood, Ellinwood, Kan., have all been finally wound up and closed out. These banks were closed previous to my term as bank commissioner.

**THE ABILENE STATE BANK, ABILENE, KAN.**

This bank was forced, through the defalcations of John A. Flack, its cashier, to suspend business in September, 1910, and Ed Makins, of Abilene, Kan., was appointed its receiver.

According to the report rendered by the receiver on July 2, 1912, there was due and unpaid to depositors a balance of \$40,408.48, with total assets in the possession of Receiver Makins amounting to \$97,526.96, which with the liability of certain of the directors of that bank, if judiciously handled, should pay all claims in full and dispense with the necessity of making payment through the guaranty fund. Payment from the guaranty fund can be made only at the exhaustion of all other resources; hence, these certificates are at the time remaining in the hands of the depositors of that bank.

**IN CONCLUSION.**

I take pleasure in saying to you that, as a whole, the banks of this state are in a sound and solvent condition, and are moreover, prosperous and flourishing. From the fact that crop conditions have been eminently satisfactory, I feel that at this time Kansas state banks are enjoying the most sound and prosperous years of their existence. I know of no state banks in operation in this state in which I would hesitate to deposit personal funds.

In my former report I assured you that as bank commissioner I would put forth every possible effort toward the maintenance of a higher standard and the improvement of banking conditions in every material way. I am indeed proud to submit the work of this department to you and to the people of this state, and allow you and them to judge as to what results we have accomplished.

Respectfully submitted.

*J. N. DOLLEY, Bank Commissioner.*

## NEW BANKS ORGANIZED.

During the period covered by this report (September 1, 1910, to September 1, 1912), 56 new state banks, with a capital of \$1,061,000, have been incorporated and authorized by the banking department, as follows:

Billene	The Commercial State Bank	\$25,000
Agricola	The Agricola State Bank	10,000
Arma	The Arma State Bank	12,000
Arma	The Farmers State Bank	12,000
Asherville	The German-American State Bank	50,000
Atchison	The Barnes State Bank	10,000
Barnes	The Beaumont State Bank	10,000
Beaumont	The Berryton State Bank	10,000
Berryton	The Farmers State Bank	10,000
Bloom	The Farmers State Bank	10,000
Broughton	The Broughton State Bank	10,000
Leburne	The Union State Bank	10,000
Concordia	The Concordia State Bank	25,000
Corbin	The Corbin State Bank	10,000
Courtland	The Peoples State Bank	15,000
Cunningham	The Farmers State Bank	10,000
Dennis	The Dennis State Bank	10,000
Furley	The Furley State Bank	10,000
Goessel	The Goessel State Bank	10,000
Hidley	The Citizens State Bank	10,000
Helzer	The Helzer State Bank	12,000
Holington	The Farmers and Merchants State Bank	25,000
Hope	The Farmers State Bank	15,000
Kansas City	The Riverview State Bank	50,000
Keats	The State Bank of Keats	10,000
Kimball	The Kimball State Bank	10,000
Lamont	The Farmers State Bank	10,000
Lawrence	The Citizens State Bank	25,000
Lawrence	The Perkins Loan and Trust Company	100,000
Leavenworth	The Leavenworth Savings and Trust Company	100,000
Lehigh	The Menno State Bank	15,000
Lovewell	The Lovewell State Bank	10,000
Layetta	The Exchange State Bank	10,000
Miltonvale	The Home State Bank	20,000
Mont Ida	The Mont Ida State Bank	10,000

# THIRTEENTH ANNUAL REPORT

OF THE

## Kansas Building and Loan Associations,

AT CLOSE OF BUSINESS

DECEMBER 31, 1911.

---

PUBLISHED BY THE

KANSAS BANK COMMISSIONER.

---

STATE PRINTING OFFICE,  
TOPEKA, 1912.

4 3945

## *Letter of Transmittal.*

---

TOPEKA, KAN., September 1, 1912.

*Hon. W. R. Stubbs, Governor:*

DEAR SIR—In compliance with the provisions of the building and loan law I have the honor to present to you the Thirteenth Annual Report of this department relating to the building and loan associations in the state of Kansas.

There are fifty-three local and three general associations doing business in Kansas on this date.

This report gives the principal items contained in the semi-annual statements for the year 1911 of all associations reporting to this department.

There has been a steady increase in assets and in membership of the various associations, demonstrating the fact that the people of the state have confidence in them and realize that there is no better investment for the small savings of the wage earner.

Thousands of our people are owners of homes acquired through the building and loan associations of the state and the associations themselves have been of untold benefit to an army of small savers besides aiding materially in the growth and development of the communities in which the associations are located.

I found on taking charge of the banking department that, for some reason or other, the building and loan associations of this state had never been thoroughly examined, although the law provided for it. A special appropriation was secured from the legislature of 1911, and each and every association doing business in the state has now been thoroughly audited and examined, and a large number of them examined the second time. The examinations made have been the means of correcting many errors of commission and omission, of bringing the plans and operations of the associations into conformity with the law, and establishing uniform methods of accounting in so far as circumstances would permit. I am

pleased to state that the examinations were welcomed by the associations as a whole and a general desire manifested to operate in accordance with the law and the wishes of this department. The examinations were of great assistance to the associations; in some few cases we were able to materially strengthen an association by removing certain incompetent officers and installing new and more efficient men in their stead.

I am pleased to state to you that at this writing I consider each and every building and loan association in the state of Kansas sound and solvent. Respectfully submitted.

J. N. DOLLEY, *Bank Commissioner.*

**ABSTRACT OF RESOURCES AND LIABILITIES of all local and national (or general) associations reporting June 30, 1911, and December 31, 1911.**

FOURTH BIENNIAL REPORT  
OF THE  
BOARD OF CONTROL  
OF THE  
STATE  
HARITABLE INSTITUTIONS  
OF KANSAS,

FOR THE

*Two Years Ending June 30, 1912.*

STATE PRINTING OFFICE,  
TOPEKA, 1912.

4 3718

## LETTER OF TRANSMITTAL.

---

TOPEKA, KAN., August 1, 1912.

*To the Honorable Governor and Legislature:*

In accordance with the provisions of law, the Board of Control of State Charitable Institutions herewith respectfully submits its biennial report covering the fiscal years of 1911 and 1912.

The report has been compiled with a view of giving you, in as concise and convenient form as possible, the actual transactions of the Board for the years covered. The State Printing Commission notified us that our space was limited, and that the reports of this and other departments will be consolidated into one volume for the legislature; each department to be allowed separate copies of its own report for distribution. Heretofore we have used from 720 to 780 pages and have divided our biennial report into four parts. It will be necessary for us to eliminate all of Part I and most of part II, and to follow a different arrangement of topics.

Respectfully submitted,

HARRY C. BOWMAN,  
SHERMAN G. ELLIOTT,  
CHAS. D. SHUKERS,

*Board of Control of State Charitable Institutions.*

# GENERAL OBSERVATIONS, SUGGESTIONS, AND RECOMMENDATIONS.

## WORK OF THE BOARD.

Charitable institutions and asylums are not objects of interest to the majority of people. We do not like suffering and misfortune. It would be well if we could realize that we are all possible patrons of such places. The inmates come from every grade of society. It is only within the last century that such institutions, generally, have been established by the public and maintained for the public benefit.

Little does the world know of the grief and sorrow in the thousands of homes scattered over the state. It is not talked about at home; it is not discussed with the neighbors; it is the skeleton in the closet. All the more deep is their anguish and sorrow because it is silent. Mother feels proud of her children as they grow up about her and win success in the world, but her heart, her burning tears and silent prayers go up in supplication for her most unfortunate child in such institutions. For her to know that her child is being tenderly and kindly cared for is a great source of solace to her and saves many an anxious hour and many a tear.

The work of the State Board of Control covers a broad and rapidly growing field. Under the law of the state the work is divided into two classes—the supervision of certain private agencies and the management and control of nine state charitable institutions, which will soon be increased to eleven. But in carrying on this work the Board becomes the center of the charitable activities of the entire state, and keeps in touch, to a certain extent, with the charity work carried on by religious and fraternal organizations, associated charities, provident associations, settlement work and the charitable work of the counties. The almshouse is the fundamental institution in American poor relief. The benevolent or charitable work of the state is done first by the counties, either in outdoor relief or providing for indigent persons at the county asylums; and second, by private agencies and by the state at large.

### PRIVATE AGENCIES UNDER SUPERVISION OF THE BOARD.

1. Foreign children's corporations are required to furnish the State Board with such guaranty as may be required that no child will be brought into the state having any contagious or infectious disease, or having any deformity, or being of feeble-minded or vicious character, and agrees to remove from the state any child which shall become a public charge within a period of five years. The State Board requires foreign children's associations to execute a bond to the state of Kansas in the sum of \$10,000. A proper supervision of this line of work would require a statement from each such foreign corporation when a child is placed in Kansas, and an annual statement listing all of the children placed and when and where, and what

has become of them, and the checking of this by the State Board and the keeping track of all such children.

2. Domestic children's associations and institutions are subject to the visitation, inspection and supervision of the State Board. Every such association or institution is required to file an annual written report with the State Board, and the secretary of the Board is required to furnish the probate judge of each county a list of the same, and no child can be committed to the care of any institution which shall not have filed a report for the fiscal year last preceding.

3. Private insane hospitals and asylums are required to obtain a license from the State Board and are under the supervision of said Board. There are five private insane institutions.

4. Private orphanages, rescue homes, homes for adults and hospitals receiving state aid are subject to the same visitation, inspection and supervision by the State Board as are the public institutions, and the Board is required to pass upon the condition, management and competency of the same; but this is simply a work of supervision, and does not go to the management and control of these private institutions. There are sixty-two private institutions receiving state aid from \$100 to \$500 a year.

5. All charitable or benevolent institutions proposing to solicit in more than one county within the state funds for the maintenance thereof must be incorporated, and its charter and general standing and purposes have to be carefully examined and certified to by the State Board of Control before the officers or agents of such institutions can solicit. The Board may refuse, in its discretion, to grant such certificate.

#### THE NINE STATE INSTITUTIONS.

The main work of the Board, however, is the management and control of nine state institutions. The School for the Blind, at Kansas City, Kan., and the School for the Deaf, at Olathe, are educational institutions, and are not in session during the summer months. These schools are not asylums or homes for the unfortunate or hospitals for the treatment of disease. They furnish free care and maintenance to all the blind and deaf children of Kansas between the ages of seven and twenty-one years, but any parent who so desires can pay for the care and maintenance of his child or children.

The Boys' Industrial School, at Topeka, and the Girls' Industrial School at Beloit, are for delinquent children. Admissions are made up to the age of sixteen years, as a general rule, and the schools have jurisdiction over all children admitted until the age of twenty-one years. By the word "delinquent" is meant a child who has violated the laws of the city or state, or who is incorrigible. The industrial schools are educational and correctional in their nature, but the state furnishes care and maintenance and clothing to all the inmates.

The State Orphans' Home, at Atchison, is for all dependent, neglected or ill-treated children of the state over the age of two and under the age of fourteen years. The object of the home is to temporarily take care of children until good family homes can be found. The state has a state agent who looks after the placing of children. The state furnishes free care and maintenance to all of the children, except that the state can recover from the parent or parents, or other persons responsible for the child's depend-

ncy, the expense of the care and maintenance of the child. The State Orphans' Home is a combination of a school and a home.

The State Home for Feeble-minded, at Winfield, is a school and home for feeble-minded children, not over fifteen years of age, who are incapable of instruction in the common schools. Parents and the estates of the inmates are liable for their care and maintenance, but the school furnishes free care and maintenance to all who can not pay.

The Topeka State Hospital and the Osawatomie State Hospital are for persons whose minds, by reason of brain sickness, have become unsound. These two institutions are hospitals, and not asylums.

The Parsons State Hospital is for epileptics, both sane and insane. The estates and parents of all patients are liable for their care and maintenance, but the state furnishes everything free to patients who are unable to be maintained by others or out of their own estates.

These nine institutions are under the full management and control of the State Board of Control, the Board having full executive and administrative functions.

Each institution has a professional side and a business side. The business side is divided into the inventorying of all property and charging it against the head of the institution, and the keeping track of this property and the purchasing of provisions; fixing the number of employees and salaries and the paying of the same; fixing of the commissary and dietary; the checking up of the farm and stock accounts and seeing whether these lines are paying; monthly reports of all financial matters; and second, the letting of contracts for buildings and improvements and the taking care of the physical condition of the institution and the supervision of the new buildings. The institutions are towns in themselves, and some are larger than many of the cities of the third class, and have water plants, electric-light plants, power plants, laundries, greenhouses, large grounds with fountains, roads and walks. Farming and other lines are carried on in connection with the institutions, the larger institutions having stock, consisting of a herd of seventy-five cows, heifers and calves, and horses, mules, hogs and chickens of an equally extensive number. The institutions have libraries, chapel services, amusements and recreations. Two of the institutions have complete printing outfits and print periodicals. Some of the institutions have gymnasiums, physical and moral training, shoe shops, harness shops, tailor shops, domestic economy, music, stenography, decorative art and sewing.

The professional side covers the care and treatment of the insane, and the education of the blind and deaf, the incorrigible and dependent and feeble-minded. The Board fixes the course of study and investigates the causes of delinquency, dependency and insanity, and holds conferences with the superintendents and others at the Board's office. The proceedings of these conferences are issued in bulletin form. The average population of the institutions is now 4600, and is constantly increasing. The Board is required to visit each institution at least once a month and investigate everything and see each inmate. Every application for admission is made direct to the Board, and the Board either accepts the application or refuses it for want of room or eligibility. A daily report of population is made by each institution to the Board, and everything pertaining to the records of inmates is kept at the institution and also at the office of the Board. The

reports between the institutions and the Board are voluminous. The power of parole and discharge of inmates is vested in the Board, but the Board can delegate this authority to the superintendents under such rules as the Board may specify.

#### ORGANIZATION OF INSTITUTIONS.

The Board consists of three electors of the state, no two from the same congressional district and none from a county in which one of these state institutions is located, appointed by the governor, by and with the advice and consent of the senate, for four years, at a salary of \$2500 a year and traveling expenses. The governor can remove a member for cause. The office force is composed of a secretary, at \$2000; a bookkeeper, at \$1500; and two stenographers, at \$900 each, appointed by the Board. The Board selects the superintendents, by and with the consent of the governor. The superintendents select all officers and employees, under civil-service rules. The superintendent is the executive officer of the institution, and the Board holds each superintendent accountable for the management of his institution and acts in a judicial capacity between the institutions and the people of the state. If you have not the right man at the head of the institution, and if you have not the right kind of subordinates under that man, it does not make any difference what kind of a system you have or how perfect the equipment of an institution may be, you will not have the results you seek. The Board may discharge a superintendent for cause, and a superintendent may discharge any employee for cause. There has been in this state a gradual but continual process of elimination of the "spoils" system for several years, but it remained for the Board of Control and civil-service laws to eradicate it and make its reestablishment impossible. Our law provides a means of preventing the appointment of disqualified and incompetent officers and employees, and prevents appointment or removal for political reasons. Blacklisting is prohibited, and upon the request of a discharged employee the superintendent is required to furnish him, in writing, the true cause or reason for such discharge.

Very little is known about the institutions of a state by the ordinary citizen. Even those attending one institution know practically nothing about another. How many can correctly name and locate the state institutions of Kansas? Chancellors, presidents, superintendents and wardens know very little about the management and facilities of the other institutions, and there is no concerted action to accomplish a common purpose. It matters nothing to the taxpayers whether the institutions which they maintain are educational, charitable, correctional or penal. They are all created and maintained for the cure and prevention of social evils of some description—of ignorance, of disease, of poverty or of crime—but all social evils grow out of general social conditions and can not be successfully studied except in their mutual relation.

The people of the state should be proud of the appearance, condition and management of our public institutions. They are a credit to the state. They stand as monuments to the progressive spirit of the citizens of the state.

Our Board has endeavored to follow a broad-minded and generous policy, and to apply the same to the public and to the various institutions, public and private, in a patient and considerate manner. We believe it is possible

to place the Kansas institutions on a higher plane than those in any other state, so that the inmates and pupils, who are our fellow citizens and our wards, may receive the most humane, curative, scientific and economical care and treatment known to the scientific world.

#### APPOINTMENT AND CONFIRMATION OF MEMBERS.

The Board of Control law was not published in the official state paper until after the adjournment of the legislature of 1905. Pursuant to the law, the governor appointed as members of said Board E. B. Schermerhorn and Sherman G. Elliott for the four-year terms, and H. C. Bowman for the two-year term, as vacation appointments. February 26, 1907, Hon. E. W. Hoch, governor, submitted the following appointments, among others, to the senate of 1907 for confirmation, and said appointments were duly and legally confirmed:

"Members of the State Board of Control, for term of four years, commencing July 1, 1905: E. B. Schermerhorn, Galena; Sherman G. Elliott, Lawrence. For term of two years, commencing July 1, 1905, H. C. Bowman, Newton. For term of four years commencing July 1, 1907, H. C. Bowman, Newton."—*Senate Journal*, pp. 491, 492.

On March 4, 1909, Hon. W. R. Stubbs, governor, submitted the following appointments, among others, to the senate of 1909 for confirmation, and said appointments were duly and legally confirmed:

"For members State Board of Control for full terms: Sherman Elliott, E. B. Schermerhorn."—*Senate Journal*, pp. 524, 568.

On March 2, 1911, Hon. W. R. Stubbs, governor, submitted the following appointment, among others, to the senate of 1911 for confirmation, and said appointment, was duly and legally confirmed:

"Board of Control: H. C. Bowman, Newton, for full term beginning July 1, 1911, and ending July 1, 1915."—*Senate Journal*, pp. 647, 648.

After almost six years of faithful and valuable service, E. B. Schermerhorn resigned to give his time to his vast private business interests, and on April 11, 1911, Hon. W. R. Stubbs, governor, appointed:

"Chas. D. Shukers, of Sedan, as a member of the State Board of Control, for the term expiring July 1, 1913, in place of E. B. Schermerhorn, resigned."

#### OFFICE FORCE.

The following are the names, salaries and positions held by the members and employees of the State Board of Control:

##### MEMBERS OF BOARD:

		Monthly salary.
Harry C. Bowman	Chairman	\$208.30
Sherman G. Elliott	Treasurer	208 30
Charles D. Shukers		208.30

##### EMPLOYEES:

Charles W. Gibbs	Secretary	166 66
Floyd A. Baker	Accountant and Bookkeeper	125.00
Edith Wood	Stenographer	75.00
Bertha House	Stenographer	75 00

## SALARIES OF OFFICERS AND EMPLOYEES.

The name and salary of each officer and employee in each of the several institutions at the close of the biennium is given in the reports of superintendents. The regular officers and employees listed by the superintendents are paid out of the salary funds. Persons employed by the day to assist the regular employees in making repairs and improvements are usually paid out of the maintenance and repairs fund, but in some instances are paid out of the salary fund or out of special appropriations. Persons employed by contractors for buildings or improvements let by contract are paid by the contractor, who receives his pay out of special appropriations, unless there is no special appropriation for the building or improvement made, in which event the same is paid out of the maintenance and repairs fund.

The superintendents in their reports give the changes in the official staff, but not of the coming and going of the vast number of employees. The help question is the greatest that confronts and tries the management of our state institutions.

## CONFERENCES OF THE BOARD AND SUPERINTENDENTS.

The members of the State Board of Control and some of the superintendents and other officers are members and have been attending and participating in the meetings of the State and National Conferences of Charities and Correction and other national conferences. The Board of Control law also provides that the Board shall meet in conference, as often as may be necessary, the superintendents or other executive officers of each institution. We are having quarterly conferences, two being business conferences and two being devoted to the discussion of scientific matters. The meetings devoted to scientific matters are open to the public and the papers and discussions are not confined to persons connected with this Board. Bulletins of these conferences are published and will be mailed to any one free of charge, upon request.

## VISITATIONS TO INSTITUTIONS.

Visits made from July 1, 1910, to and including June 30, 1912, showing when and by whom made:

Chairman Bowman has supervised the visitations and the obtaining of reports from the private institutions under the supervision of the Board, the apportionment of the funds to the private institutions receiving state aid, and the investigation and granting of certificates to private institutions soliciting funds in more than one county in the state. He has also supervised the collections for the care and maintenance of patients at the state insane hospitals, written the briefs in the cases, and visited different counties in attending to these cases. He also spent about two weeks in June, 1911, attending the National Conference of Charities and Correction at Boston, Mass., and in visiting institutions in that vicinity and along the route. The three members of the Board attended the National Conference of Charities and Correction at Cleveland, Ohio, in June, 1912. Some of the office force have also visited the state and private institutions in carrying on the work of the Board. The members of the Board spent a great deal of time visiting numerous sites for the new insane hospital and the tubercular sanatorium.

## FINANCIAL.

The provision made by a state for the education, care and treatment of its unfortunates furnishes a faithful exponent of the degree of civilization, enlightenment and intelligence of its citizens. The nine state institutions now under the management and control of this Board are called the state charitable institutions, but some of them are educational, some are correctional, some are medical, and some a combination of these and what would be termed charitable. The total appropriations to these nine institutions of Kansas for each year do not amount to as much as the annual increase in the cost of the charity service of some of the other states.

The total appropriations to these nine institutions made by the legislature of 1907 for the fiscal years 1908 and 1909 were \$1,969,517. The total appropriations made by the legislature of 1909 for the fiscal years 1910 and 1911 were \$1,720,250, and on account of the Oklahoma convicts being returned the State Penitentiary was unable to furnish coal to all the institutions, and the legislature of 1909 appropriated \$186,000 to this Board for coal and fuel, which is still being used, and probably is sufficient for this purpose for the fiscal year 1913. The total appropriations made by the legislature of 1911 for the fiscal years 1912 and 1913 were \$1,746,227, and the legislature also appropriated \$100,000 for a new Insane Hospital and \$50,000 for a State Tubercular Sanatorium. Each legislature also appro-

prises back to the institutions the amounts collected for the care of inmates and from the sale of products.

The average population of these institutions for the fiscal year 1907 was 3939, and for the fiscal year 1911 the average population was 4518, an increase of 579, and yet the total appropriations made by the legislature to these institutions for all purposes have decreased. This decrease is due to three things: (1) less was appropriated for new buildings; (2) the increase in the amount collected for the care of insane persons at the state hospitals, and (3) the business system upon which these institutions are run.

Appropriations are one thing and expenditures are another. Appropriations have to be made before any money can be expended. The money stays in the office of the state treasurer, and can only be drawn out upon sworn vouchers from the individual or firm doing the work or furnishing supplies. For the fiscal year 1911, \$282,196.67 was expended from the salary funds, \$456,543.88 from the maintenance funds, and \$48,912.07 from the fee-account funds, a total of \$787,652.62. For the fiscal year 1912, \$289,469.02 was expended from the salary funds, \$444,922.27 from the maintenance funds, and \$66,114.02 from the fee-account funds, a total of \$800,505.31. These funds are designated by the legislature as "current expenses." The unexpended balances in the salary funds and the maintenance funds, \$30,559.45 in 1911 and \$9,614.71 in 1912, went back into the general-revenue funds of the state. There was on June 30, 1912, an unexpended balance of \$142,658.89 in the fee-account funds of the institutions, which was reappropriated by the legislature for the fiscal year 1913. This is chiefly from collections for the care of the insane. We went into this matter fully on pages 392 to 398 of our biennial report of 1906, pages 168 to 186 of our biennial report of 1908, and pages 189 to 198 of our biennial report of 1910.

For the fiscal year of 1911, \$87,272.05 of the special appropriations to the institutions and \$47,876.99 of the fuel fund was expended. For the fiscal year 1912, \$133,358.33 of the special appropriations to the institutions and \$45,879.37 of the fuel fund was expended. There was on June 30, 1911, a balance of \$1511.86 in the special appropriations, which went back into the general-revenue fund of the state. On June 30, 1912, there was a balance of \$79,659.67 in the special appropriations, most of which was reappropriated for the fiscal year 1913. There was also a balance of \$36,767.82 in the fuel fund, which was also reappropriated for the fiscal year 1913.

The appropriations to the Board of Control for salaries of members, office force, traveling and contingent funds for the fiscal year 1911 was \$16,000, out of which \$14,988 was expended, and for the fiscal year 1912, 16,500 was appropriated, out of which \$16,182.22 was expended.

The following financial tables, 1, 2, 3, 4 and 5, give the figures in detail.

## DESTITUTE INSANE.

TOPEKA, KAN., January 25, 1911.

*Ways and Means Committee:*

GENTLEMEN:—We herewith hand you the data collected by this office from counties for the care of destitute insane refused admission to a State Hospital for want of room, or who have been discharged to make room for some other patient, for the period beginning January 1, 1909, and ending December 31, 1910.

Following is a list of the counties who report no claims against the state for the care of destitute insane during the above-named period: Allen, Anderson, Barber, Bourbon, Butler, Chautauqua, Cherokee, Cheyenne, Cloud, Coffey, Cowley, Crawford, Ellis, Ellsworth, Finney, Ford, Geary, Gove, Graham, Grant, Greeley, Hamilton, Harper, Harvey, Haskell, Johnson, Kearny, Kingman, Lane, Lincoln, Logan, Marion, Marshall, Meade, Morton, Ness, Osage, Ottawa, Pawnee, Pottawatomie, Pratt, Rawlins, Reno, Rice, Riley, Scott, Sedgwick, Shawnee, Sheridan, Sherman, Smith, Stafford, Stanton, Stevens, Sumner, Wallace, Washington, Woodson.

Following is the list of counties who made no report to us in answer to letters and blanks sent out: Barton, Brown, Chase, Clark, Comanche, Decatur, Dickinson, Doniphan, Edwards, Franklin, Gray, Greenwood, Hodgeman, Jackson, Jewell, Kiowa, Lyon, McPherson, Mitchell, Morris, Norton, Osborne, Phillips, Republic, Rooks, Seward, Thomas, Trego, Wichita, Wilson.

Following is the list of counties who report claims to us, together with the history and amount of each claim: Atchison, Clay, Douglas, Elk, Jefferson, Labette, Leavenworth, Linn, Miami, Montgomery, Nemaha, Neosho, Rush, Russell, Saline, Wabaunsee, Wyandotte.

## ATCHISON COUNTY.

Atchison county presents two claims, one for the care of Anna Wirth, amounting to \$93.50, and the other for Wm. Sampson, amounting to \$225.50.

Anna Wirth was refused admission for want of room on February 22, 1909, but an order for her admission was given on August 28, 1909. Atchison county presents a claim for 26½ weeks, amounting to \$93.50. The correct amount due is for 26½ weeks, at \$2 per week, amounting to \$53.43.

William Sampson was refused admission for want of room on January 1, 1909, and died on August 29, 1909, having been cared for by Atchison county during that time. The claim presented is for 34½ weeks, amounting to \$225.50. The correct amount due is for 34½ weeks, at \$2 per week, amounting to \$68.85.

## DOUGLAS COUNTY.

Douglas county presents the following claims: Mattie Warren, amounting to \$358; Elizabeth Chowell, amounting to \$4; and Mary G. Gibbens, amounting to \$624.

Mattie Warren was discharged to make room for Johanna Jespersen, on July 22, 1907, and has been kept at the Douglas county farm since that time, no claim having heretofore been presented for her care. There is due on this patient's care \$353, or 179 weeks, at \$2 per week, which is the amount presented by the county.

Elizabeth Chrowell was refused admission for want of room December 14, 1910, and Douglas county presents a claim for two weeks at \$2 per week, which is correct.

Mary G. Gibbens was discharged from the State Hospital on November 7, 1902, to make room for Lucy Christy. On February 16, 1903, T. C. Biddle, superintendent of the Topeka State Hospital, ordered the probate judge of Douglas county to send this patient to the hospital, the application to be made on copies of the original papers in the case. No notice was taken of this order, and Mary G. Gibbens has been an inmate of the Douglas county farm since November 7, 1902. On the statement sent in by Douglas county is a notation to the effect that the county collected for this patient's keeping up to December 31, 1904, and they present a claim from December 31, 1904, to December 31, 1910, 312 weeks, amounting to \$624. In view of the fact that no attention was paid to the order of Superintendent Biddle, this claim is not considered a just one by this Board, and it is recommended that it be not allowed.

#### CLAY COUNTY.

Clay county presents a bill of \$48 for the care of John B. Parker, who was refused admission for want of room on January 9, 1909, and who was admitted to the Topeka State Hospital on June 23, 1909. This claim should be for 23½ weeks at \$2 per week, or \$46.85.

#### ELK COUNTY.

Elk county presents a claim of \$178 for the care of Caroline Milton. This patient was refused admission for want of room on March 10, 1909, but was admitted to a state hospital on August 27, 1909. The claim should be for 24½ weeks at \$2 per week, or \$48.57.

#### JEFFERSON COUNTY.

Jefferson county presents a bill of \$6 for the care of Abbie King, which is correct. This patient was granted an order of admission to the Topeka Hospital as an exchange patient on October 19, 1910. No patient having been sent back to make room for her, she was kept at the county farm until November 11, 1910, when a straight order of admission was given.

#### LABETTE COUNTY.

Labette county presents two claims, one for \$208 for the care of Margaret Shields, and the other for \$100 for the care of Lucy Vanover.

Margaret Shields was discharged from the Osawatomie Hospital on October 22, 1906, to make room for Elizabeth Hull. Labette county has presented bills regularly since that time, which have been allowed. However, we are recently in possession of information that this patient has \$961.17 in money, and such being the case, the county is not entitled under the law to \$2 per week for her care, as she is not a destitute patient. She has paid for her clothing regularly since being kept at the county farm, and the last report of the guardian, Harvey Terwilliger, showed the above-named amount on hand. We do not consider this claim a just one.

Lucy Vanover was refused admission for want of room on January 9, 1909, but an order for her admission to the State Hospital for Epileptics was given December 18, 1909. Labette county presents a bill for fifty weeks, amounting to \$100, which is correct.

## LEAVENWORTH COUNTY.

Leavenworth county presents the following claims against the state for the care of destitute insane: Thomas Lee, \$83.71½; Maggie Moore, \$120.28½; Ureal Hanson, \$57.71½; Eva Crouser, \$77.14½; John H. Magers, \$46.85½; Alice Dugan, \$9.71½; Samuel W. Hilt, \$41.42½; Bert Benson, \$27.71½; Branch Whittner, \$109.14½; James Grey, \$58; Adrian Smith, \$58.28; Frank Kinney, \$57.71½; Geo. Smith, \$57.71½; Walter Brown, \$57.71½; John Thornton, \$6; Jane H. Hughes, \$32.28½; Hettie Gaske, \$31.42½; Irene Brown, \$26.28½; Mahala DeBow, \$28.28½; Harriet Greenwood, \$26.57½; Mary Sanders, \$20.85½.

Thomas Lee was refused admission for want of room on June 12, 1908. On July 9, 1909, an order for his admission to a state hospital was given. He escaped on May 21, 1909, and was not returned until September 6, 1909. The order for this patient's admission of July 9, 1909, was not used, and the order was renewed on January 25, 1910. Leavenworth figures this bill from January 1, 1909, to February 4, 1910, the date the patient was taken to the hospital, less the 15½ weeks he was out on escape, amounting to 41½ weeks at \$2 per week, or \$83.71½. We figure the bill from January 1, 1909, to July 9, 1909, 27½ weeks, less 7 weeks out on escape, amounting to 20½ weeks at \$2 per week, or \$40.28½.

Maggie Moore was refused admission for want of room on June 17, 1908. On September 2, 1909, an order for her admission was given, but the jail was quarantined from smallpox, and the order was renewed on January 25, 1910. Leavenworth county presents a bill for 60½ weeks, amounting to \$120.28½, from January 1, 1909, to February 25, 1910, the date the patient was taken to the hospital. The amount due Leavenworth county is \$111.14, for the period from January 1, 1909, to January 25, 1910, 55½ weeks at \$2 per week.

Ureal Hanson was refused admission for want of room June 17, 1908, but an order for his admission was given on July 9, 1909. Leavenworth county figures this bill from January 1, 1909, to July 21, 1909, the date the patient was taken to the hospital. This is 28½ weeks at \$2 per week, or \$57.11½. This bill should be figured from January 1, 1909, to July 9, 1909, the date the order was given, which amounts to 27½ weeks at \$2 per week, or \$54.28.

Eva Crouser was refused admission for want of room on July 1, 1908, and an order for her admission was given on August 28, 1909. Leavenworth county presents a claim from January 1, 1909, to September 27, 1909, the date the patient was taken to the hospital, amounting to 38½ weeks at \$2 per week, or \$77.14½. The claim should be from January 1, 1909, to August 28, 1909, 34½ weeks at \$2 per week, or \$68.57.

John H. Magers was refused admission for want of room December 19, 1908, and an order for his admission was given on July 2, 1909. During the month of January, 1909, this patient was cared for by the Masons and Eagles. Leavenworth county presents a claim for 23½ weeks, amounting to \$46.85½ from February 1, 1909, to July 14, 1909, the date the patient was taken to the hospital. The claim should run from February 1, 1909, to July 2, 1909, the date the order of admission was given, amounting to 21½ weeks at \$2 per week, or \$43.42.

Alice Dugan was refused admission for want of room on January 20,

1909, and died February 23, 1909. Leavenworth county presents a bill for 4½ weeks at \$2 per week, amounting to \$9.71½, which is correct.

Samuel W. Hilt was refused admission for want of room on February 17, 1909, and was sent to the hospital on July 12, 1909. Leavenworth county presents a bill for 20½ weeks, amounting to \$41.42½, which is correct.

Bert Benson was refused admission for want of room on April 22, 1909, but an order of admission was given on July 17, 1909. Leavenworth county presents a bill for 13½ weeks, amounting to \$27.71½, which is incorrect. The amount due is for 12½ weeks at \$2 per week, or \$24.57.

Branch Whittner was refused admission for want of room and also as a nonresident on June 27, 1908. The report of the examining physician showed that he had been insane for two years prior to coming to this state. Under the law he could not gain a legal residence in this state. However, Leavenworth county had to care for him, and in order to relieve the county, on July 17, 1909, an order for his admission to the Topeka State Hospital was given. This patient was afterwards removed to the Parsons Hospital, being afflicted with epilepsy. Leavenworth county presents a claim for his keeping from June 26, 1908, to July 17, 1909, 54½ weeks at \$2 per week, amounting to \$109.14½, which is correct.

James Grey, an insane convict, was refused for want of room on July 2, 1909, and was kept by Leavenworth county until January 21, 1910, when he was sent back to the Penitentiary. Leavenworth county presents a claim for 29 weeks at \$2 per week, amounting to \$58, which is correct.

Adrian Smith, an insane convict, was refused admission for want of room on July 2, 1909, and was sent back to the Penitentiary on January 22, 1910. Leavenworth county presents a claim for 39½ weeks, amounting to to \$58.28, which is correct.

Frank Kinney, an insane convict, was refused admission for want of room on July 3, 1909, and was sent back to the Penitentiary on January 21, 1910. Leavenworth county presents a claim for 28½ weeks, amounting to \$57.71½, which is correct.

Geo. Smith, an insane convict, was refused admission for want of room on July 3, 1909, and was taken back to the Penitentiary on January 21, 1910. Leavenworth county presents a claim for 28½ weeks, amounting to \$51.71½, which is correct.

Walter Brown, an insane convict, was refused admission for want of room on July 3, 1909, and was taken back to the Penitentiary on January 21, 1910. Leavenworth county presents a claim for 28½ weeks, amounting to \$51.71½, which is correct.

John Thornton was refused admission for want of room on July 3, 1909, but was given an order for admission on July 17, 1909. Leavenworth county presents a claim from July 3, 1909, to July 24, 1909, the date he was taken to the hospital, amounting to \$6. This amount should be changed to \$4.

Jane H. Hughes was refused admission for want of room on September 3, 1910, and has been kept by Leavenworth county since that time. The bill presented for \$32.28½ is correct.

Hettie Gaske was refused admission for want of room on September 13, 1910, and has been kept by the county since that time. The claim presented for \$31.42½ is correct.

Irene Brown was refused admission for want of room on September 24,

1910, and has been kept by the county since that time. The claim of \$28.28½ is correct.

Mahala DeBow was refused admission for want of room on September 21, 1910, and has been a county charge since that time. The claim presented for \$28.28½ is correct.

Harriet Greenwood was refused admission for want of room on September 28, 1910, and has been a county charge since that time. The claim presented, amounting to \$26.57½, is correct.

Mary Sanders was refused admission for want of room on October 19, 1910, and has been kept by Leavenworth county since that time. The claim presented for \$20 85½ is correct.

#### LINN COUNTY.

Linn county presents a claim for the keeping of Mary Pinks, who was refused for want of room April 15, 1909, in the sum of \$18, which is correct.

#### MIAMI COUNTY.

Miami county presents a claim for the care of Isaac Cole, who was discharged from the Osawatomie Hospital March 1, 1909, to make room for George E. Long. The bill is for 95 weeks at \$2 per week, amounting to \$190, which is correct.

#### MONTGOMERY COUNTY.

Montgomery county presents two claims, one for \$70 for the care of Chester Hollis and the other of \$49.50 for the care of George DuBois.

Chester Hollis was refused admission for want of room on December 5, 1908, and was kept by Montgomery county until April 10, 1909, when an order for his admission to the Osawatomie Hospital was given. This claim is for a period of 18 weeks, and should amount to \$36 instead of \$70.

George DuBois was refused admission for want of room on February 11, 1909. The county should be allowed for a period of 11 weeks at \$2 per week, or \$22, instead of \$49.50.

#### NEMAHA COUNTY.

Nemaha county presents a claim, amounting to \$12, for the care of Louis Belveal, who was refused admission for want of room on April 26, 1909, and died at the county farm June 6, 1909, being kept for a period of six weeks. This claim is correct.

#### NEOSHO COUNTY.

Neosho county presents a claim of \$208 for the care of Maria Wells, an exchange patient from the Osawatomie Hospital, which is correct. This patient was returned to the county on November 15, 1906, and has been an inmate of the county farm since that time. The bill presented is from January 1, 1909, to December 31, 1910, 104 weeks.

This county also presents a claim for John Burton who was refused for want of room on March 18, 1909, and kept by the county until July 20, 1909, a period of 17 weeks at \$2 per week, amounting to \$34, which is correct.

#### RUSH COUNTY.

Rush county presents a bill for the care of Mary B. Blowers at the Evergreen Place Hospital, amounting to \$213.83. This patient was refused admission for want of room on April 2, 1909, and was kept by the county until August 27, 1909, a period of 21 weeks, when she was admitted to the Topeka State Hospital. There is due this county the sum of \$42.

## RUSSELL COUNTY.

Russell county presents a bill of \$132.50 for the care of Lena Weinhardt at Prospect Park Hospital, Atchison. This patient was refused admission for want of room on April 22, 1909, and was kept by Russell county at the above-named hospital until an order for her admission to the Topeka Hospital was given on August 27, 1909. There is due Russell county \$36.28 for the 18½ weeks' time she was cared for by the county.

## SALINE COUNTY.

Saline county presents two bills, one for Maggie Addison for \$98, and the other for Lillian Peterson for \$109.

Maggie Addison was returned to Saline county on September 27, 1910, to make room for Mary Gage. Saline county is entitled to \$2 per week from September 27, 1910, to December 31, 1910, amounting to 13½ weeks, or \$27.14.

Lillian Peterson was refused admission for want of room on September 12, 1910. On September 21, 1910, an exchange order of admission was given, but no patient was returned to Saline county to make room for her, and she was kept at the Evergreen Place Hospital until January 12, 1911, when a straight order of admission was given her to the Topeka Hospital. Saline county is entitled to pay from September 12, 1910, to January 12, 1911, amounting to 17½ weeks at \$2 per week, or \$34.85.

## WABAUNSEE COUNTY.

Wabaunsee county presents a claim for \$127.75 for the care of Archibald Davis at the Evergreen Place Hospital. This patient was refused admission for want of room April 22, 1909, and an order for his admission to the Topeka Hospital was given on July 9, 1909. Wabaunsee county is entitled to \$22 for the care of this patient for 11 weeks at this hospital.

## WYANDOTTE COUNTY.

Wyandotte county presents the following claims, which are just and should be allowed:

Name of patient.	Date refused.	Amount claimed.
Mary Booth.....	August 27, 1908.....	\$52.00
Mary Doody.....	April 22, 1909.....	156.00
Mary De May.....	May 14, 1907.....	156.00
Lula Duncan.....	July 20, 1909.....	140.00
Gustave Erickson.....	April 17, 1909.....	8.00
Helen C. Fields.....	March 22, 1909.....	36.00
Monroe D. Harris.....	January 21, 1909.....	6.00
Lucy D. Marsch.....	March 10, 1909.....	20.00
Hannah A. Newman.....	November 7, 1906.....	14.00
Ellen Pumpel.....	April 29, 1909.....	28.00
Nancy Ready.....	March 10, 1909.....	156.00
Josephine Sigmund.....	April 22, 1909.....	106.00
Mike Szulic.....	February 27, 1909.....	6.00
John J. Turner.....	March 20, 1909.....	6.00
James Taylor.....	March 20, 1909.....	150.00
Anna Moore.....	September 14, 1910.....	25.00
Henry Osborne.....	October 15, 1909.....	53.00
William Taylor.....	December 30, 1908.....	97.00
Total.....		\$1,221.00

Respectfully submitted.

REPORT TO THE NATIONAL CONFERENCE OF  
CHARITIES AND CORRECTION.

CHAS. W. GIBBS, Secretary State Board of Control, Corresponding Secretary of the State  
of Kansas.

NEW LEGISLATION RELATING TO CHARITIES, CORRECTION OR SOCIAL  
ADVANCE.

1. All private institutions of the state of a charitable nature are subject to the visitation, inspection and supervision of the State Board of Control, and the legislature of 1911 appropriated \$15,000 for the fiscal years ending June 30, 1912, and June 30, 1913, to be apportioned by the Board of Control among these various institutions in accordance with the amount of charity work done and the facilities for handling and properly expending the money so apportioned. Fifty-nine institutions received state aid under this act.

2. All charitable or benevolent institutions desiring to solicit aid in more than one county are required to obtain a certificate from the State Board of Control authorizing such soliciting. The Board requires a showing to be made of the past work of the society and its desires and aims for future work. At the time of the passage of this act, one children's home-finding society was soliciting funds for the purpose of building or purchasing a business building to be used as an advertisement for the society and the income of which was to be used for the purpose of aiding in paying the expenses of the society. The Board of Control has refused authority to solicit for such purpose. One children's home-finding society was refused permission to solicit for the purpose of paying the expenses of finding homes on account of poor business management by the officers of the society.

3. Providing for the treatment of children afflicted with any deformity or malady that may be cured by surgical operation or by treatment at the hospital of the University Medical School at Rosedale, Kan. This act contemplates the sending of children from state institutions and of indigent children from county homes or by the counties direct to the hospital, the county from which the child comes paying the expenses in each case, except that where children are sent from the state schools or hospitals the school or hospital pays the expenses of taking the child to and from the University Hospital out of the maintenance fund. The operation and treatment at the University Hospital is free, but charge is made for care and maintenance while at the hospital.

4. Provision is made for the care of destitute insane who have been re-

fused admission to the state hospitals for want of room, by paying to the counties maintaining such destitute insane, upon proper showing, the sum of \$2 per week for each patient. The total amount appropriated by the legislature of 1911 for this purpose was \$3546.65, the amount being distributed to 17 counties out of 105.

5. An act authorizing the directors of the State Penitentiary to erect, equip and maintain in connection with the State Penitentiary suitable buildings, to be known as the "State Asylum for the Dangerous Insane," and providing for the care of criminal or dangerous insane therein. Patients may be transferred thereto from the state hospitals for the insane upon order of the Board of Control. Patients may also be sent direct thereto by verdict of a jury and order of the district court, where they have been found to have committed criminal acts while insane. This act has been passed upon by the supreme court and held to be constitutional. It is probable that the next legislature will make a sufficient appropriation to enable the board of directors to build suitable buildings for this purpose.

6. An act making it a felony for any husband who without just cause shall desert or neglect and refuse to provide for the support of his wife in destitute or necessitous circumstances, or any parent who shall refuse to provide for the support and maintenance of his or her child or children under the age of sixteen years in destitute or necessitous circumstances. Several prosecutions have been had under this act, and wife desertion and desertion of little children has become exceedingly unpopular in Kansas.

In addition to the above, the following laws are contributing to the general social advancement of the people:

The adoption of the commission form of government in twenty-six cities of the state places direct responsibility for the care and management of public parks, public utilities and general financial and industrial conditions.

Enlargement of the powers of the State Board of Health and providing for fire escapes on all public buildings, apartment houses and factories; the abolishment of the public drinking cup and the roller towel and the strict inspection of hotel and restaurant kitchens.

The enactment of child-labor laws, prohibiting the employment of children under fourteen years of age in any capacity, and prohibiting the employment of children under the age of sixteen years in mines, factories or dangerous places.

#### RESULTS OF NEW LEGISLATION.

1. The legislature of 1911 provided for the establishment of a new hospital for the insane, and appropriated \$100,000 for this purpose. Fifteen towns and cities were applicants therefor, and the Board of Control, after visiting all of the sites offered, located the same at Larned, Kan.

2. This legislature also appropriated \$50,000 for the location of a State Tubercular Sanatorium, which is to be located by the Board of Control upon the advice and recommendation of an advisory commission of physicians appointed by the governor.

3. The new psychopathic and reception hospital for the treatment of the insane at the Topeka State Hospital will be opened about June 1, and will have a capacity of 140 patients. This hospital is equipped with all of the latest hydrotherapeutic apparatus, and will be in charge of a competent physician and trained nurses.

NEW PRIVATE PHILANTHROPIC AGENCIES.

St. Luke's Hospital, located at Wellington, Kan., owned by Christ's Hospital Association of the Episcopal Diocese of Kansas, organized for the purpose of caring for the destitute sick and for a training school for nurses; pay patients also received; Rev. Jas. De B. Kaye, of Topeka, executive head.

Rose-Tillotson Home for the Aged, Fort Scott, Kansas; owned by a religious sect known as the Church of God, or Holiness People; organized for the purpose of caring for the destitute aged of both sexes. Mrs. P. R. Johnston, superintendent.

Topeka Association for the Study and Prevention of Tuberculosis, located at Topeka, Kan.; a private corporation organized for the purpose of maintaining a fresh-air camp, a public dispensary, a public clinic, and whatever else may be necessary for destitute tubercular cases; A. A. Goddard, president.

NEW DEVELOPMENTS.

There have been marked developments in the treatment of the prisoners in the Penitentiary under the present warden, J. K. Codding. Mr. Codding's theory is that the Penitentiary is a repair shop for men rather than a place of punishment; that criminality is a disease—a preventable one.

The policy is to give each prisoner:

1. A full day of hard, productive labor.
2. Plain, wholesome, properly prepared food, with a decent bed and medical attention.
3. Discipline firmly and wisely administered.
4. Night school six months of the year, which over one-third of the prisoners attend.
5. Thirty minutes each day for recreation.
6. Spiritual training; voluntary Bible classes having grown from 60 to 325.

Special attention has been given to tuberculosis. The death rate has been reduced from nine per year to one a year.

Great attention has been given to the parole system, and out of ninety-seven paroled only seven have broken their paroles, and of that number only one committed a crime, the others being brought back for failing to report, getting drunk, etc.

SOCIAL NEEDS.

There should be established a home for the aged. Many old persons are sent to the hospitals for the insane, or application made therefor, who could be more properly cared for in a home for such people.

There should also be established a home for incurable cripples. These two might, perhaps, be consolidated and taken care of in one institution.

Some means should be provided for the after-care of the insane—some method by which persons paroled or discharged from the hospitals for the insane might be employed and more carefully looked after. Many persons who are now paroled or discharged from hospitals for the insane, and who afterward return to the institutions, might, if given proper employment under patient and sympathetic supervision, be able to make their way without returning to the institution.

Stricter supervision of the private children's home-finding societies would, in our judgment, result in preventing traffic in children, whereby

the home-finder secures a fee both from the county or person desiring to place the child and from the home or person with whom the child is placed. It would also result in better care of the children and better home surroundings.

#### THE SOCIAL OUTLOOK.

1. The social outlook is particularly bright at this time. Kansas is one of the few states where the prohibitory law has been in force long enough to produce appreciable results. It has been on our statute books so long many of our young men have grown to manhood and have never seen a saloon. In this state prohibition has decreased crime and increased the credit of individuals and has improved industrial conditions generally. There is on deposit in the banks of Kansas \$108 per capita for every man, woman and child in the state. And in point of illiteracy Kansas has the lowest per cent of any state in the Union, with one exception.

2. The anticigarette law is also producing a wholesome effect, especially among the minors. In most counties the law is rigidly enforced.

3. The state is also making much progress in fighting the "great white plague." In addition to appropriating funds for the establishment of a sanatorium for the treatment of tuberculosis, it maintains a traveling lecturer on this subject, who uses moving-picture films in connection with his lecture to great advantage. This year he has already lectured in about 125 towns. One important thing specialized on is to educate the young people regarding tuberculosis, and a great per cent of good will come in the next generation.

#### PRISON LABOR.

1. The boards of county commissioners of the various counties of the state may, under such rules and regulations as they may from time to time provide, require all male prisoners committed to the jail of their county, for failure to pay fine and costs, to work upon the public streets, highways, poor farms or any public work, under the direction or control of some state or county official.

2. The warden of the State Penitentiary is authorized to assist in the building of a macadam road from Leavenworth to Kansas City by working the prisoners thereon, when the counties of Wyandotte and Leavenworth shall perform certain stipulated conditions. Under previous acts the inmates of the Penitentiary have, under charge of the Board, assisted in the building of a paved road from Lansing to Leavenworth city. No contract labor is performed at either the State Penitentiary at Lansing or the State Reformatory at Hutchinson. Industrial shops are maintained at each of these institutions. Also quite extensive farming operations are carried on, all under direction of the guards of the institution. A coal mine is maintained at the State Penitentiary at Lansing, where approximately thirty cars of coal are mined each week. This is also done by the inmates in charge of guards. The coal mined is shipped to the various state charitable and educational institutions, the Penitentiary taking credit therefor at the uniform price of \$3 per ton but the institutions receiving the coal do not pay therefor. The product of the industrial shops is used about the institution. A brick plant is also maintained at the State Penitentiary, and the brick is used in building state institutions and paving about the same. The binding-twine factory furnishes practically all of the binding twine used in Kansas, and the excess product is sold in other states. The price at which

the twine is sold merely covers the cost of material and production, being considerably under the regular price of binding twine as purchased on the market.

STATE CONFERENCE OF CHARITIES.

State Conference of Charities and Correction, to be held in Topeka in November, 1912. President, W. B. Hall, superintendent of the State School for the Blind, Kansas City, Kan.; secretary, Guy T. Justus, general secretary Provident Association, Topeka.

Conference of Superintendents of State Charitable Institutions, to be held in the office of the Board of Control, at the statehouse, Topeka, in September, 1912. Dr. J. H. Cooper, assistant superintendent Topeka State Hospital, chairman of program committee. A similar conference is to be held in February, 1913, at the office of the Board of Control. The chairman to be appointed later.

**Fourth biennial report to the State Board of Control, for the two years ending June 30, 1912, the same being the eighteenth biennial report of this institution.**

## SUPERINTENDENT'S REPORT.

*To the Board of Control of State Charitable Institutions:*

GENTLEMEN—I have the honor to present herewith the eighteenth biennial report of the Topeka State Hospital.

The following table is a detailed exhibit of the movement of the hospital population during the two years:

TABLE No. 1. Showing the movement of population.

MOVEMENT.	Year ending June 30, 1911.			Year ending June 30, 1912.		
	Male.	Female.	Total.	Male.	Female.	Total.
Remaining June 30, 1910 and 1911.....	794	477	1,271	852	503	1,355
Admitted.....	261	129	390	220	104	324

Transferred to asylum for criminal insane, Lansing.....	3		3	2		2
Died.....	100	87	187	78	29	107
Totals.....	190	99	289	197	99	296
Absent on parole or elopement.....	33	19	52	26	24	50
Total removals.....	223	118	341	223	123	346
Remaining June 30, 1911-1912.....	852	503	1,355	881	503	1,384
Daily average.....	835	491.2	1,326.2	875.18	502.52	1,377.7

From this table the following important facts may be summarized:

There were admitted during the two years 714 patients, an increase of 131 patients over the preceding biennium. Of the number 390 persons (261 males and 129 females) were admitted during the year ending June 30, 1911, and 324 persons (220 males and 104 females) were admitted during the year ending June 30, 1912. During the two years there were 687 removals from the hospital (446 males and 241 females). Of the removals, 146 (96 males and 50 females) were discharged "restored," while 162 (93 males and 69 females) were discharged "improved." These figures indicate that during the two years the mental condition of 308 persons improved sufficiently to enable them to return to their homes and become self-supporting units of society. These removals, based on the number of admissions during the same period, indicate a percentage of 43 plus, who recovered, or improved sufficiently to enable them to reside outside the

hospital. These results were 2.5 per cent better than shown in the preceding biennial report.

During the period covered in this report the number of unpromising cases admitted has not been reduced. The involution group of cases continues to grow. It is interesting to compare the types of cases as returned in our more recent reports. The biennium ending June 30, 1906, reported 81 involution cases, 43 of whom were senile dementia. In the report of 1908 there were reported 78 involution cases, with 57 senile dementia; 1910 reported 101 involutions with 81 seniles; 1912, 209 involutions, with 84 seniles. These figures indicate a growing tendency of society to penalize old age. "Honoring thy father and thy mother" and caring for them in the days of their infirmity seems to be becoming too antiquated a dogma for this progressive age. Filial duty is certainly a fading jewel in the social crown. Another interesting deduction from the classification table is that the paresis group has increased from 25 admitted during the two years ending June 30, 1908, to 57 for the biennium ending June 30, 1912. This large increase may have been accidental, however. It is consistent with the generally recognized fact that this incurable type of insanity is increasing in frequency.

These deductions only emphasize the well-known fact that the ratio of incurable types of insanity to the total number of admissions to hospitals for the insane are increasing. It has not infrequently been remarked that with all the advance in the care and treatment of the insane, that the percentage of restorations is not greater than that reported at an earlier date in the history of psychiatry. I am of the opinion that the increasingly unfavorable character of the cases admitted to the hospitals for treatment is a fair and reasonable explanation of this criticism. In view of this fact, it is complimentary to the work of the hospitals that the percentages of restorations have not actually declined. Doubtless, if reliable statistics were obtainable, it could be demonstrated that there has been very material increase in the ratio of recoveries with the more favorable forms of insanity.

The statistical tables relating to percentages of cases recovered and improved are interesting in that they show the important influence of the age of the individual on the prospect of recovery; also, the duration of the attack, together with decreasing probability of recovery of attacks subsequent to the first attack.

#### MORTUARY REPORT.

The death rate, consistent with the increasing age of our population, shows an increase; there having been 244 deaths, compared with 161 deaths reported during the preceding two years. Of the deaths, 45 were the result of paresis, 37 senile exhaustion and 29 tuberculosis. Pellagra is the assigned cause of one death. The case was that of a man, age 55 years. The disease was in an advanced stage upon admission, the exhaustion increasing rapidly until death supervened after two months' residence in hospital. Two other cases of the disease have been diagnosed during the biennium; one, a man, age 45 years, with a markedly confusional type of psychosis, was discharged restored (mentally) after eleven months' residence. There was also remission in the pellagrous symptoms of this case coincident with the improvement in mental state. The third case, a woman, age 27 years, admitted twenty-six months ago, is still under treatment.

The case has experienced several severe exacerbations of the symptoms, and is now very greatly reduced physically. The corresponding psychosis is dementia præcox, catatonic.

We regret having to report three deaths from suicide by hanging. These persons had not manifested suicidal tendencies, and were therefore not in the observation wards, taking advantage of opportunities thus afforded. The inquest in each case relieved the hospital of all blame concerning the unfortunate events.

It is a sad duty to report the untimely death of attendant, D. F. Thompson, on November 8, 1911. At an unguarded moment a strongly homicidal colored man struck him a blow with a floor rubber, knocking him down, then striking him a fatal blow over the kidney. Following the assault his condition indicated a serious abdominal injury. He was removed to hospital and the abdomen opened. It was found that a cystic kidney had been ruptured, causing copious bleeding. The kidney was removed, the abdomen closed, but the unfortunate man survived but an hour. Mr. Thompson was a man old in the service, reliable and trustworthy in every particular, and respected by all. His untimely death was greatly regretted.

Other than the foregoing casualties, there have been no accidents of importance—only a few fractures from falls and other minor injuries.

#### PSYCHOPATHIC HOSPITAL.

The important event in the hospital's affairs during the period has been the completion of the reception hospital. It is the realization of our most urgent want, and with its completion we feel that we are thoroughly equipped to give our patients the benefit of the most modern methods in treating the insane. The plan of building, briefly outlined, is as follows:

A central building, three stories in front, with wings extending from either side, which are two stories. The lower floor, center, is arranged for the resident physician's quarters, together with the office room, drug room, chief nurse's office and nurses' dining room in front, with two large dining rooms for patients to the rear, with kitchen, storage rooms, etc., back of the dining rooms.

The second floor center is arranged in front for surgery, while to the rear are the rooms where the hydrotherapeutic apparatus is installed. The third floor center is arranged for nurses' quarters.

The wings, on either side of the center building, are wards for patients. The wards are modern in every detail, with diet kitchen, examination room, showers, and rest rooms. Detached from either lower ward is an isolated feature for the accommodation of noisy, maniacal cases. This arrangement is such that the noisy cases are completely segregated. Connected with these rooms are installed the continuous bath tubs, thus providing for the complete separation of the disturbed cases from the quieter patients.

It is our plan to use this building entirely for the treatment of acute and probably curable cases or cases that can be relieved. With its advantages we shall be able to do all that can be done to assist in the mental restoration of our patients. The completion of this building satisfies completely a long-feit want, and I hope we do not manifest an unseemly pride in this important improvement of our equipment.

The direct appropriation for the building was \$100,000. The finishing work has been done by the labor of the hospital. The heating and water

service, the laying and finishing of the floors, all the painting, both exterior and interior, the electric wiring and installation of fixtures, the making and hanging of window screens, has all been done by the patients and the usual employees of the hospital.

A fair estimate of the value of the building and equipment is \$125,000. The capacity of the building will be 135 beds when comfortably filled, together with surgery, hydrotherapy, nurses' quarters and other accessories.

#### OTHER IMPROVEMENTS.

During the last year was begun and completed an important undertaking in the construction of a pipe tunnel extending from the general ward building, passing the site of the reception hospital, thence passing the detached cottages for women, and on to the new building for women, now under process of construction.

The tunnel is 1000 feet long by six feet high and six feet wide. The construction is all concrete. The excavation and all other work was done by the hospital's labor, and a great deal of the filler was made of broken brick and other refuse about the premises. This tunnel will enable us to connect the hospital building and the cottages directly with the general heating and power plant. The heating systems that were installed in the cottages have been distressingly unsuccessful, and we expect that this improvement will prove highly satisfactory. The cost of construction of the tunnel has, for reasons indicated, been reduced to a very modest sum.

*New Cottage for Women.*—The last legislature appropriated \$35,000 for the erection of a custodial building for women. The contract for the construction of this building has been let to Messrs. Carter & Young, of Lawrence. The excavation and construction of the basement walls, together with the first floor, was reserved from the contract and has been done by the patients, under supervision. It is all reinforced concrete work, and is now ready for the contractor to begin the superstructure. The pursuit of this work has been so satisfactory that I regret that the entire building was not completed in the same way. It is proposed to do all the interior finishing of this building with our own help, the same as was done in the hospital building. Experience teaches me that nearly all kinds of work can be done successfully by the insane. That moderate occupation is an important remedial agent in the treatment of the insane is recognized by all alienists. I think the policy of opportunities for employment should be enlarged, and I know of nothing that is so practical as concrete construction. Many of the patients become very skillful in the art of concrete work; their interests in the affairs of life are awakened, and it has been my pleasure to observe the daily improved mental condition of several of these men while thus engaged in healthful exercise in the open.

#### TRAINING SCHOOL AND BETTER SERVICE.

With the completion of the reception hospital, we are planning to improve the work of the training school. Miss Mary Groves, who comes to us with good credentials, has been engaged as chief nurse of the hospital and superintendent of the training school. We expect that, under more competent supervision, interest in training work will be stimulated and that the quality of the nursing service will be improved. The course of instruction will be extended, especially in practical training. We expect to have the senior pupil nurses assigned to tours of duty in the hydrotherapy and

surgical service, thus giving ample opportunity to become proficient in the technic of practical nursing. Our experience is that of other superintendents in procuring and retaining desirable nurses for the proper care of our patients. During recent years there has developed a class of careless, restless, incompetent, roving hospital workers. It is the habit of these people to find an engagement in some hospital, and after a few weeks' or months' service, without cause or sufficient reason, to quit their engagement to seek employment in some other hospital. It is a condition that is most unsatisfactory, both to the hospital and the restless employee. The cause of this undesirable condition does not rest altogether with the roving workers; some material faults are chargeable to the institutions. All agree that, if possible, this condition should be improved. In finding a remedy it seems very proper that the faults chargeable to the hospitals demand our first attention. Occasionally a layman is sufficiently interested to inquire of the wages paid our nurses and attendants. When told they are paid from \$22 to \$33 per month they are surprised and wonder how we are able to secure people for such indifferent pay. Indeed it is difficult, and too often results in the necessity of employment of very unpromising persons. However, we find it more difficult or impossible to get appropriations that will allow us to pay a better wage. The only method that will be successful in establishing a class of efficient hospital workers is to pay a wage that will satisfy in a measure the commendable ambition of competent men and women to remain in employment that will enable them to lay up at least a competency during their productive years for their support in the decline of life. In other words, hospital nursing should be placed on a professional basis, and the remuneration should be sufficient to attract intelligent persons of character to enlist in the profession.

Another beam that might well be removed from the institutional eye, in connection with this service problem, relates to the long hours that the work enjoins. Our service requires an attendant to go on duty at 5:30 A. M. and remain on duty until eight or nine o'clock P. M., with a half day off duty every nine days—this, with an exacting duty that requires tact, intelligence and trustworthiness, all for the sum of \$270 to \$390 per annum.

Again, another fault resting with the hospitals is the improper accommodation of the employees. Until recently the usual provision for the attendants consisted of rooms on the wards with the patients. How improper this arrangement is certainly requires but little detailed comment. After a long day of ward duty, with trying experiences with the insane, it does not cement the bond between the nurse and the service to retire to a restless bed located in the midst of noise and disturbing influences. Many of the hospitals of the country are relieving this trying relation between the nurse and work by providing suitable nurses' homes. Sentiments of common humanity demand improved conditions in this undesirable neglect. The home life of the nurses should be made more attractive if we expect contentment and protracted service.

Illustrative of the importance of the foregoing observations, I regret to report that of the eighty-five nurses who have graduated from the training school since its organization, but twenty-one are at this time in the service of this hospital. The others have wandered far afield. Several of the most efficient ones are employed in the hospitals of California and other states, where the pay is more attractive. Others have become interested in other

pursuits of life. These results constitute the most discouraging feature of training-school work. The advantage of having a corps of trained nurses over the usual untrained attendant is so very important that the cause or causes of this unfortunate condition should be located and if possible relieved. I am quite sure the first and most important cause depends on the low wage paid. The pay of the graduate nurse should be increased to at least \$35 to \$40 per month.

*Nurses' Homes.*—We were quite hopeful that the last legislature would at least appropriate funds for building one of the two nurses' homes that were urgently recommended. In this expectation we were disappointed. I am therefore again earnestly requesting these improvements. The construction of the new hospital at Larned will necessarily be slow. The power and heating plant, the domestic buildings and other accessories will have to be completed before the patients' buildings that may be constructed can be occupied. Before the new hospital can receive patients the demand for more room for the care of the insane will be very urgent and distressing. The nurses' homes will allow us to vacate the rooms in the several wards that are now occupied by the nurses. This, in turn, will afford considerable room for additional patients and will go far to relieve the overcrowding now present. I therefore most urgently recommend that \$75,000 be appropriated for the erection of two nurses' homes.

#### MEDICAL SERVICE.

The following changes in the medical staff have occurred during the two years: Dr. R. A. Young left the service, and was succeeded by Dr. Leo Haughey, who in turn resigned, after one year of service, to engage in private practice. During the past year Dr. G. E. Hesner has been engaged with this service. Recently Dr. Maggie McCrea resigned to take charge of a private sanitarium. The vacancy thus created has been filled by the engagement of Dr. Maude S. DeLand. The opening of the reception hospital required the installation of an additional assistant physician. Dr. L. C. Bishop has been engaged with this important service, and is now becoming fairly settled in the work incident to the opening of the new hospital. Doctors Cooper and Scott have continued as efficient, trained members of the staff.

Preceding observations relative to the remuneration of nurses applies with even greater force to the uninviting pay of the hospital staff. When we consider the list of bright, energetic, efficient young men who have quit the medical service of this hospital during the past years because of dissatisfaction with the pay, we are compelled to regret the short-sighted economy that has been practiced in thus alienating these desirable persons from our service.

One year is a short time for a physician to become proficient in the work of an assistant, however well equipped he may be in general medical training. With a desirable assistant, the longer he remains the more useful he becomes. These facts being self-evident, then it certainly follows that there should be an increasing salary schedule, based on continued service and quality of work. We should cease to be a training school for other institutions and other lines of professional work offering more attractive salaries.

*The staff meetings* have been an important feature of the medical work.

At these meetings the patients are presented for examination and study by all the members of the staff. The influence on the medical work of the staff meetings has been positively good. It has been especially important in developing interest in the study of psychiatry.

Doctor Cooper has continued the work in the clinical laboratory, and his report on the work done follows:

*Summary of Laboratory Examinations.*

Urine analyses . . . . .	664
Blood examinations . . . . .	41
Sputum examinations . . . . .	48
Stomach contents . . . . .	18
Cerebrospinal fluid . . . . .	11
Plasmodium malaria . . . . .	10
Widal tests . . . . .	14
Cultures from throat . . . . .	12
Cultures from cerebrospinal fluid . . . . .	3
Cultures from blood . . . . .	2
Feces, cases . . . . .	12
Smears, pus exudates, etc. . . . .	53

*Dental Work.*—Some provision should be made for the service of a dentist for the patients. I do not consider it necessary to engage the entire time of a dentist, but I think a satisfactory connection should be arranged that would provide a dentist one or two days each week. I believe such an engagement would sufficiently provide for the necessary care of the patients' teeth.

**THE CRIMINAL AND DEFECTIVE INSANE.**

The last legislature did a commendable act in the creation of the department for the care of the criminal and dangerous insane in connection with the State Penitentiary at Lansing.

Since its establishment we have, upon order of the Board of Control, as provided, transferred five strongly homicidal men to the criminal asylum. Some of those cases have long been a menace to our hospital, one of them having fatally assaulted a trusted and faithful attendant.

The continued breeding of the unfit, who are becoming an ever-increasing burden to society, is enlisting the earnest attention of sociologists throughout the land. Society surely has a valid right to protect itself against the dangers and public expense that is involved in the propagation of the defective classes.

Several states, including our own, have enacted laws restricting the marriage of defectives. Other states have legalized the sterilization of certain types of the unfit. I believe that no proposed legislation is of greater importance than these laws that are intended to curtail the increase of these undesirable elements of our population. Could the innumerable examples of defective propagation be forced upon the attention of our legislature as they are brought to those who engage in the care of these unfortunates, I am sure there would be little delay in making laws that would tend to relieve these unwholesome social influences.

It appears that these laws have been rather disappointing where they have been in operation, chiefly on account of nonenforcement. The very important law of Kansas prohibiting the marriage of certain types of the unfit is sadly neglected. Paroled inmates of the insane hospitals and ab-

sentees from the Hospital for Epileptics have been licensed to marry while away from the institutions on leave. Our state should reinforce the marriage-restriction law by enacting the Indiana and Iowa sterilization law, and provide for stricter enforcement of both laws. A reasonable penalty for nonenforcement of the laws should be provided. A law without a penalty clause is of no practical benefit.

#### EMPLOYMENT AND ENTERTAINMENT.

Throughout the two years we have been able to supply our male patients with a large amount of congenial employment. The usual request of our patients is to be allowed to go out with the working parties and an opportunity to engage in some useful exercise. We find no remedial agent that affords more positive results in restoring the mental balance of our cases. Unfortunately, we find greater difficulty in providing suitable occupation for our female inmates. This can best be provided by establishing a crafts and arts department, under the direction of a competent instructor. It is a well-established fact that much can be done in stimulating recovery in curable cases through useful occupation. Another beneficial result of employment is reëducation of the chronic insane, and it is also important in arresting the progressive mental deterioration of the incurable types of insanity.

We have provided in a fairly liberal way social entertainment for our population. The patients' dances, moving-picture entertainments and occasional amusements of various kinds have been furnished. The holidays have been observed with appropriate exercises and gastronomic attractions.

#### RECAPITULATION OF OUR NEEDS.

For two nurses' homes .....	\$75,000
Rebuilding kitchen and bakery and domestic employees' home. ....	45,000
Building dairy barn and silos.....	18,000
Addition to laundry.....	7,500
Repairs of womens' wards.....	7,500

Concluding this report, I desire to express my appreciation of continued efficient service of the many reliable employees who have remained in the service. These persons are the foundation of the hospital's success; upon them the weight of responsibility presses with increasing force, yet they are always faithful and trustworthy.

I also take pleasure in acknowledging my obligation to you gentlemen of the Board of Control for many favors extended. The continued pleasant relations between the Board and the hospital has been an important factor in relieving unpleasant features of administration and stimulating interest in the service rendered. I thank you.

Respectfully submitted.

T. C. BIDDLE, M. D., *Superintendent.*

**GENERAL STATISTICS.**

**TABLE No 2. Showing general results since opening the hospital in 1879.**

	Male.	Female.	Total.

## FINANCIAL STATISTICS.

TABLE No. 1. Appropriations for current expenses.

ITEMS.	Year ending June 30, 1911.	Year ending June 30, 1912.
<b>Salaries and wages:</b>		
Appropriated for fiscal year .....	\$67,500.00	\$69,000.00
Expended during fiscal year .....	66,502.98	67,551.12
Unexpended balance June 30 .....	\$997.02	\$1,448.88
<b>Maintenance and repairs:</b>		
Appropriated for fiscal year .....	\$120,000.00	\$100,000.00
Expended during fiscal year .....	115,885.76	99,999.21
Unexpended balance June 30 .....	\$4,114.24	\$0.79
<b>Fee fund (earnings of hospital):</b>		
Unexpended balance at beginning of year .....	\$49,640.93	\$84,992.53
Received and remitted to treasurer of Board of Control .....	44,831.14	23,187.94
Total .....	\$94,472.07	\$108,180.47
Expended during fiscal year .....	9,479.54	40,921.80
Unexpended balance June 30 .....	\$84,992.53	\$67,258.67
<b>Recapitulation:</b>		
Salaries and wages appropriated for fiscal year .....	\$67,500.00	\$69,000.00
Maintenance and repairs appropriated for fiscal year .....	120,000.00	100,000.00
Fees appropriated for fiscal year .....	49,640.93	84,992.53
Fees received and remitted to treasurer Board of Control .....	44,831.14	23,187.94
Total .....	\$281,972.07	\$277,180.47
Total amount expended during fiscal year .....	191,868.28	208,472.13
Total amount unexpended June 30 .....	\$90,108.79	\$68,708.34

TABLE No. 2. Special appropriations.

ITEMS.	Year ending June 30, 1911.	Year ending June 30, 1912.
<b>Tubercular pavilion:</b>		
Unexpended balance June 30, 1910.....	\$4,549.38	
Expended during fiscal year.....	4,549.16	
Unexpended balance June 30.....	\$0.22	
<b>Hospital for women:</b>		
Unexpended balance June 30, 1910.....	\$24,787.80	
Appropriated for fiscal year.....	25,000.00	
Total.....	\$49,787.80	
Expended during fiscal year.....	49,786.03	
Unexpended balance June 30.....	\$2.77	
<b>Reception hospital for men:</b>		
Appropriated for fiscal year.....		\$50,000.00
Expended during fiscal year.....		48,814.18
Unexpended balance June 30.....		\$1,185.87
<b>Heating system:</b>		
Appropriated for fiscal year.....		\$3,500.00
Expended during fiscal year.....		3,438.66
Unexpended balance June 30.....		\$11.35
<b>Cottage for women:</b>		
Appropriated for fiscal year.....		\$25,000.00
Expended during fiscal year.....		1,907.81
Unexpended balance June 30.....		\$23,092.69
<b>Recapitulation:</b>		
Total amount appropriated.....	\$54,337.18	\$88,500.00
Total amount expended.....	54,034.19	54,210.09
Total amount unexpended.....	\$2.99	\$34,289.91

TABLE No. 3. Receipts and disbursements of fees.

ITEMS.	Year ending June 30, 1911.	Year ending June 30, 1912.
Unexpended balance at beginning of year.....	\$49,640.98	\$34,992.58
Received and remitted to treasurer Board of Control (private patients).....	42,378.84	21,158.56

Fourth biennial report to the State Board of Control, for the two years ending June 30, 1912, the same being the eighteenth biennial report of this institution.

## SUPERINTENDENT'S REPORT.

*To the Board of Control of State Charitable Institutions:*

GENTLEMEN—I have the honor of presenting to you the eighteenth biennial report of the Osawatomie State Hospital, same being the fourth report to the Board of Control, and covering the biennium ending June 30, 1912.

### POPULATION.

On July 1, 1910, there were in this hospital 674 male patients and 619 female patients, a total of 1293. During the biennium there were admitted 267 male patients and 198 female patients, total 465, making the total number under treatment during the biennium 1758.

### REMOVALS.

During the same period the number of deaths were: Males, 135; females, 71; total, 206. Discharged restored: Males, 80; females, 76; total, 156. Discharged improved: Males, 17; females, 20; total, 37. Discharged unimproved: Males, 1; females, 1; total, 2. Grand total number discharged, 491.

Per cent of restorations based on admissions: Males, 30; females, 38; average, 34.

We have been fortunate in that we have had no serious epidemic of sickness during the biennium.

The present overcrowded condition at this hospital makes it impossible to classify our patients to the best advantage. The new psychopathic hospital at Topeka will afford some relief from overcrowding for a short time. Later the new cottage for women at Topeka will afford temporary relief again. Then within the year the new nurses' home at Osawatomie will enable us to vacate room for about forty more patients. This will give our hospital a capacity of about 1,400. The indications are that before the new hospital at Larned can accommodate patients our hospitals at Topeka and Osawatomie will be compelled to refuse patients for want of room. From year to year we repeat the statement that the state should make ample provision for all its insane. It is a fact of common knowledge that the counties can not give the best care for the insane, because of the fact that they do not have proper facilities for care and treatment.

### INCREASE OF DEFECTIVES.

Defective dependents are increasing out of proportion to the increase in the general population. This fact claims the careful attention of all good citizens. Not much progress will be made in lessening this threatening calamity until the people awake to the fact that marriage of the unfit should be carefully restricted.

The recent action of our State University authorities in calling together a large number of representative men from all over the state to discuss these matters was a step in the right direction and should result in much

good. As long as people are allowed to marry without any regard to the laws of heredity we need not expect anything else but a rapid increase in the per cent of increase of the insane.

#### DRUG AND LIQUOR ADDICTIONS.

We still maintain that these unfortunates should not be cared for in the state hospitals for the insane. Special provision should be made for them. They should be put to work and their families should receive their wages. Succeeding offenses should call for longer periods of confinement.

#### PAROLED PATIENTS.

Added experience has taught us that in most cases patients leaving the hospital should be paroled and given a chance to make good at home before being finally discharged. The reasons are obvious. The patient returning home from a state hospital does not have a fair show. His actions are watched closely, and conduct that otherwise would not be noticed is now thought to be the result of an unsound mind and neighbors can hardly be criticised for being apprehensive. So firm are our convictions on this matter that we discharge very few persons without first giving them a trial at home. A few exceptional cases may be safely discharged at the time of leaving the hospital. For example, a person recovering from the first attack of insanity and having a good heredity.

#### LABORATORY WORK.

We do a considerable amount of laboratory work, such as microscopic examination for parasitic diseases, urinalysis, blood count, etc.

#### SURGERY AND GYNECOLOGY.

Number of patients treated .....	95
Number of local treatments given .....	675
Number of vaginal douches administered .....	3870
Trachelorrhaphies .....	25
Perineorrhaphies .....	20
Amputation of uterine cervix .....	2
Amputation of breast .....	3
Amputation of finger .....	1
Uterine curettments .....	8
Amputation of toe .....	2
Amputation of arm .....	1
Rectal abscess .....	1
Hemorrhoids .....	8
Varicocele .....	1

#### NURSES' TRAINING SCHOOL.

The following persons graduated from our Nurses' Training School June 29, 1911: Ella Gertrude Shea, Clede May Pace, Florence Antoinette Renfro.

The graduating class of May 23, 1912, consists of Jennette Price, Elizabeth Uhls, Naomi M. Woodruff, Marguerite C. Benson, Margret Anna Webster, Louie Mariam Thompson, Phronie Alice Sheldon, Katherine Fiedelia Windisch.

No institution of this character is complete without a training school for nurses. We find that service is improved and well worth the additional wages we pay graduate nurses. Seventy-nine nurses have received diplomas after a full two years' course here.

**FEMALE NURSES ON MALE WARDS.**

We continue the practice of placing female nurses on male wards when conditions appear to us to make it desirable.

**SALARIES AND WAGES.**

So far as my information goes, Kansas continues to pay the lowest salaries paid in the United States for official service in state hospitals. In most cases the wages of employees are too low. Especially is it true as relates to the heads of departments. It seems to be more difficult than formerly to find young men who will remain long in the service without a chance of increase in wages, and it is not surprising that such is the case.

**AMUSEMENTS.**

At best the life of an inmate is quite monotonous. We have found that our efforts to relieve this condition have been successful so far as we have gone. Only those acquainted with the facts can understand how the insane appreciate the different forms of diversion and amusement. Our facilities along this line should be increased. Many of our people spend much time brooding over their troubles, real or imaginary, and any form of innocent amusement that will claim their attention and interest is worth while. Our moving-picture machine has proved to be a great source of satisfaction and benefit to our people. They tire of almost all forms of amusement, more or less, but the moving picture entertainments as yet show no sign of becoming monotonous. Many of our patients show great interest in our baseball games. During the winter we have one dance and one picture show each week. At present we are continuing the picture shows, one a week, and are contemplating adding another.

**EMPLOYMENT FOR THE INSANE.**

Perhaps no one thing is more important in the care and treatment of the insane than useful employment. We try to keep our people busy helping with the ordinary ward work and other work in the kitchens, dining rooms, bake shop, sewing room, laundry, shops, etc. Also, we are able to employ a good many men on the farm and garden, as well as with the dairyman. In fact, we try to find some work for all who are able and willing. But we are convinced that it would be a good plan to make special effort along this line. We think we could operate successfully a canning factory, a mattress factory, and a broom factory. One or all of these would be practicable as a means of keeping patients busy, and also be measures of economy. Many patients have made remarkable progress toward recovery whose progress dated from the time they became interested in some kind of work, and we believe not a few have recovered who would probably never have done so without the good effect of work.

**TUBERCULOSIS.**

The insane are peculiarly susceptible to tuberculosis. No insane hospital is complete without facilities for segregating this class of patients. I refer to this matter under the head of "Improvements During this Biennium."

**PATIENTS' LIBRARY.**

One of the things we have neglected is our patients' library. The unavoidable increase in the cost of maintenance has caused us to buy very few books for our library during this biennium. We had about 500 volumes

at the beginning of the period covered by this report. We have added but few books; many volumes are badly worn and should be replaced with new books. The library is a source of great pleasure and some profit to our people, and should not be neglected.

#### CHAPEL SERVICES.

The pastors of the Protestant churches in Osawatomie alternate in holding preaching services in our chapel each Sunday at two P. M. Many of the patients enjoy these services. From four to five hundred attend. We have Catholic services when requested. Our Christian Endeavor Society holds regular meetings, on Monday evenings, for officers and employees. These meetings are well attended, interesting, and help to break the monotony of institution life.

#### LEGAL HOLIDAYS.

Only comparatively few of our employees can get away at one time, and it is our custom to give some one holiday and some another. Usually every one gets as much as one of the legal holidays. Employees living far from the hospital may have the day before and the day after to go and come, but they do not get pay for these two days. We give special dinners to all on Thanksgiving and Christmas, and give a Christmas treat, seeing that every patient gets something. Friends and relatives of our patients sent presents last Christmas to the amount of about fifteen hundred dollars.

#### IMPROVEMENTS DURING THE BIENNIUM.

##### *New Boilers.*

The seven old boilers have been replaced by five Hawkes boilers of 250-horsepower each. A new tile and reinforced concrete smokestack was erected during the last year. The total cost of boilers and stack was about \$28,000, and it was money well spent, as the old boilers were worn out and the old stack too small. We now have an efficient heating and power plant.

##### *Refrigeration.*

Individual refrigerators have been installed during this biennium in the Knapp, the Adair and the Infirmary buildings, and are giving good service. This is a great improvement over the old way of trying to furnish all refrigeration from one central plant. The cost of installing these three small refrigerators was about \$2000.

##### *Water System.*

We now have a good water system, and not much is needed to improve this except additional filters and cementing the reservoir. Our water supply comes from the Marais des Cygnes river; it is muddy much of the time and our present filter is inadequate. The continual leaking from our reservoir causes us to have to pump much water that gets away from us. This is quite a loss.

##### *Farm, Garden and Orchard.*

During the first year of this biennium farm crops were good except on our bottom lands that were flooded. The garden was productive. Peaches, cherries and grapes were a good crop. We raised all the hay we needed. Apples were about a half crop.

During the last year most crops were poor on account of the severe drouth. This was the first year in the last fifteen that our bottom lands

were not under water from one to five times. The corn in the bottoms was good, but the garden was not good. Potatoes were a failure, and pasture was so poor we were compelled to pasture practically all our meadow land, consequently had to buy hay. We had no peaches and only about half a crop of other fruits. The drouth and the advance in the cost of meats, canned goods, etc., will account for a somewhat higher per capita cost.

#### *Dairy Herd.*

Our herd is doing well. We now have about 130 cows and heifers. Our plan is to cut out undesirable old cows and replace them with young cows until we have 100 milk cows, and then keep about that number. We keep only registered males, and are gradually grading up. We now have about twenty-five registered cattle, and within a few years the herd should consist entirely of registered stock.

#### *Hogs.*

We have been unfortunate in that our hogs have died from cholera or swine plague until we got rid of all our hogs. Many of them died, and we thought best to sell off all that remained and start in with entirely new stock. This we did on a small scale, and our hogs now seem healthy. We only have about fifty old and young.

#### *Silo.*

Last year we built a concrete silo according to plans furnished us by the State Agricultural College. Prof. Geo. S. Hines came from the college and showed us how to make the forms and start the construction of the silo. We built it with our own labor at a cost of about \$200. The silo is sixteen feet in diameter inside and thirty-six feet high. The wall is six inches thick, well reinforced. Its capacity is about 150 tons. We filled it with field corn, using a Bell City cutter. The silage kept perfectly, and we find this the best feed for our cattle we have ever tried. Our cattle came through the winter in better condition than ever before. We will build another silo this year, and expect to start in the winter with about 300 tons of the best cattle feed known.

#### *Fire Protection.*

We have taken out all old fire hose, replacing it with new and installed other hose, until we can now reach any part of every building with water from stationary fire hose. This, together with our hose cart and extension ladders, gives us first-class fire protection. Improvements in this department during this biennium cost about \$1500.

#### *Overcrowding.*

This institution now contains about 1350 beds, which is at the very least fifty more than we should have. It is impossible to properly classify our inmates in our present crowded condition. We have rooms containing five beds where there should be only three, and many rooms have two beds where there should be but one. Our capacity at present should be only 1800. Then when we get our nurses' home and our psychopathic hospital, that would add about 200 beds, making 1500. Then this hospital would be large enough, and no more room should be provided here for patients. The building of a new hospital should not prevent this hospital from having proper facilities for affording the best care and treatment of its inmates.

*Tuberculosis Pavilions.*

During the biennium we have erected two tuberculosis cottages, one for women and one for men, each having twenty-three beds. When the buildings were completed we had a number of bedfast patients suffering from tuberculosis. These were placed in these cottages, given special treatment and care. It could not be expected that these patients should recover, and most of them died. Our plan now is to place patients in these cottages as soon as the test reveals tuberculosis. The result is that most of the patients soon begin to improve and put on flesh, and many have been sent back to the wards and new patients who have responded to the test have taken their places in the pavilions. The buildings are arranged with special reference to this class of patients, and the result is quite an improvement over the old method of caring for these cases on the wards. During the last year of the biennium fourteen of the patients taken to the tuberculosis pavilions have apparently fully recovered and have been placed back on the wards. So far none of these have suffered a relapse. Our tuberculosis pavilions are the best we have seen.

## RECOMMENDATIONS FOR NEXT BIENNIUM.

*Regular Appropriations.*

Care and maintenance, annually.....	\$125,000
Salaries and wages, annually.....	72,000
Total.....	\$197,000

*Special Appropriations.*

Water filter.....	\$3,000
Cementing and partitioning reservoir.....	20,000
Improving heating system.....	4,000
Psychopathic hospital.....	100,000
Nurses' home.....	25,000
Steel ceilings.....	4,000
Remodeling dairy barn.....	3,500
Tile floors.....	4,000
General store room.....	6,000
Outside painting.....	2,000
Additional land.....	10,000
Library, amusement, music and musical instruments.....	1,500
Dental work.....	1,000
Total.....	\$184,000

## OFFICIAL STAFF.

Only two changes have occurred in our official staff. Dr. F. H. Redmond, resigned to enter private practice. Dr. J. N. Hill was advanced to his place. Dr. H. L. Goss, of Topeka, was appointed to take the place vacated by Doctor Hill.

Our old clerk, I. E. Page, of Pratt, Kan., after many years of faithful service, resigned on account of poor health, and Miss Lena Martin of Eureka, Kan., was appointed clerk.

The petty jealousies and consequent unpleasantness that so frequently creep into institution life have not been of enough importance to be worth mentioning.

I desire at this time to thank officers and employees for good service and the Board of Control for courtesies extended.

Respectfully,

L. L. UHLS, M. D., *Superintendent.*

## GENERAL STATISTICS—PATIENTS.

TABLE No. 1. Movement of population.

ITEMS.	Male.	Female.	Total.

**Fourth biennial report of the State Board of Control, for the two years ending June 30, 1912, the same being the fifth biennial report of this institution.**

## SUPERINTENDENT'S REPORT.

### *To the Board of Control of State Charitable Institutions:*

GENTLEMEN—I submit herewith the fifth biennial report of the State Hospital for Epileptics for the period ending June 30, 1912. The period covered by this report has not been one of active growth in the institution, no buildings having been completed during this time, the only cottage provided for by the last legislature being now under construction. A number of lesser improvements have been made, as noted in detail below under the headings of "Repairs" and "Expenditures." The cottages and other property belonging to the plant have been kept in a good state of repair and the lawns improved; more shade is now provided by the growing trees, and the general appearance of the institution is more attractive. Some minor changes in the internal management tending to a betterment of the services and adding to the comfort of the patients have been made, but there has been no marked deviation from the methods heretofore pursued in the conduct of the hospital. With the opening of the cottage for boys, probably about October 1, a better classification can be provided for in both male and female departments. The boys and younger male patients will be separated more completely from the older men, which will be an improvement over present conditions. This change will give another cottage in the women's group, which will relieve the crowded condition in No. 1 south. By converting cottage No. 2 of the women's group into a closed building, corresponding somewhat to No. 8 north, the custodial women patients of better mental condition can be separated from the demented and more disturbed types. Any change which provides for a more thorough classification of patients in accordance with their mental condition is a distinct advantage in any state institution. On account of the irritable and querulous nature of most epileptics, classification is of special importance in a colony for their care. When the building now under construction is completed the hospital will have twelve cottages occupied by patients, five in the women's group and seven in the men's. In addition to these cottages there are on the grounds seven other substantial buildings, and a number of sheds and outhouses about the barnyard.

### MOVEMENT OF POPULATION.

During the biennium 181 patients were admitted. Of these 102 were classed as sane and received on voluntary commitment, and 79 were committed by the courts as insane. For the first time in the history of this institution the number of voluntary admissions is in excess of the court commitments, the percentage of the two classes being 56 to 44 respectively. This would indicate that a better type of patients are seeking admission, an inference that is borne out by the statistical tables presented elsewhere. The admissions have contained a larger number of comparatively acute cases, eight patients received having been epileptic less than one

year, and in eighteen the disease was of less than two years duration. There has also been received a larger number of young patients than heretofore. I am very pleased to be able to report this favorable change in the type of admissions, as it shows that the institution is gaining the confidence of the public, and that at least some of the people are aroused to a knowledge of the necessity of early and systematic treatment of this disease, and are willing to seek hospital care while there is yet some chance for relief. The majority of the patients received, however, continue to be of the chronic and hopeless type. During the two years covered by this report there were admitted an unusual number of old people. Of those admitted, seventeen were more than sixty years of age, four were between seventy and eighty and two were above eighty years old. Little can be done for these old patients except to give them custodial care for their few remaining years. In contrast to what was noted above regarding a larger number of comparatively acute cases received, table No. 10 in the medical statistics presents some points of interest concerning the duration of epilepsy of the admissions. During this biennial period twenty-five patients were received who had been epileptic more than thirty years, five between forty and fifty years, one more than fifty years, and one more than sixty years. Of the admissions the males still predominate in number, the ratio of male to female patients being about two to one. I know of no explanation of this other than that given in my last report, viz., the difference in the temperament and tractability of female and male patients of the milder types and the greater reluctance to sending female patients away from home. A larger number of patients were removed from the hospital during this period than during any former biennium, the total number of removals being 170. Of those removed 3 were discharged as restored, 2 restored to sanity but remaining epileptic, 4 were found to be not epileptic, 31 were improved, 44 unimproved, and 86 died. The number remaining on the hospital register June 30, 1912, was 484. The total number under treatment was 659, and the daily average in the institution for the period was 455.5. Since the opening of the hospital 1076 pa-patients have been admitted.

#### MEDICAL NOTES.

There has been no change in the medical staff during the past two years, and the staff meetings, as noted in my last report, have been continued.

The general health of the patients has in the main been as good as in former years, although we have a larger percentage of deaths to report. There have been the usual number of minor accidents resulting from epileptic attacks, falls, etc., but no fatalities resulting from accidents. There have been two epidemics of measles among the employees and the patients; a few cases of mumps during the past year; and a rather serious but limited epidemic of typhoid, which resulted in four deaths. A fuller report of the typhoid epidemic is given below. A short time after making my last report, in which comment was made on the rather remarkable freedom of the institution from tuberculosis, a number of patients contracted this disease, and during the year ending June 30, 1911, there were seven deaths from this cause. During the past year four patients have died of tuberculosis, and at this time there are four cases of tuberculosis in the hospital, although they do not seem to be progressing at present, none of those afflicted being confined to bed. In my last report attention was called to two

patients who had developed pellagra here, and at present two suspected cases of this disease are under observation.

In only about one-half of the cases received could a probable cause be ascertained. In many chronic cases of long duration no history whatever of the early stages of the disease could be obtained, and in some of more recent development the histories furnished were so very meager and indefinite as to be of little value. Of the probable causes determined heredity holds first place, an inherited taint being known to be present in about twenty per cent of the admissions. This percentage would undoubtedly be much higher if the real facts were known about the families of all patients. Next in frequency as a cause, as shown by our tables, is the group of infantile cerebropathies. Here also we find the percentage increases as our knowledge of the first epileptic attacks becomes more complete. Injuries and diseases affecting the brain in infancy and childhood are very much more important factors in the causation of epilepsy than they are usually considered to be, and I am convinced that a careful study of the so-called idiopathic epilepsies would show that in many instances the epilepsy was secondary to some infantile cerebropathy.

*Epidemic of Typhoid.*—The records show that since the opening of the hospital there has been under treatment an occasional case of typhoid. In some of these the history indicated that the patients were infected before admission. One such case was admitted during the active stage of the disease, and in another instance an attendant who had recently nursed a private patient with typhoid became ill within a week after beginning service here. All our cases previous to those of last year had been isolated ones, and our water supply is from the same source as that of the city of Parsons, where typhoid is infrequent. There was one case of the disease in the institution in 1909 and one in September, 1910. The first of the series of cases last year occurred in March, 1911. Following this there were two in June, one in July, three in August and one in September. All the patients attacked were in cottage No. 1 south. Since all the cottages have a common water supply and all commissaries are issued from the general store, it was evident that the source of infection was somewhere in this cottage. A careful investigation failing to reveal any chance of contamination about the building, and a rigid enforcement of the usual disinfection and preventive measures failing to check the spread of the disease, it appeared probable that there was some inmate of the cottage who was a typhoid carrier. It was therefore thought best to immunize all those in the building. All the patients except a few infirm and old people and several who were known to have had the disease, and all the nurses in cottage No. 1, a total of 115, were given the initial immunizing dose of typhoid bacterin August 24, 1911. Ten days later the second dose, double the former in size, was given, and this was repeated in ten days more. One patient developed the fever shortly after having started the immunizing treatment, having no doubt been infected before the bacterin was given. A few complained of slight headache and malaise following the bacterin injection, but in no case was there any serious or really disagreeable reaction. There was no further spread of the disease, the hospital having remained free from typhoid since September, 1911.

**SCHOOL.**

We have continued to operate a school for the younger patients, although this work has been carried on under very adverse conditions. The only room available for this purpose is a part of the day room in cottage No. 2 south, which has been partitioned off and furnished with desks. It is unsuited for school use and quite inconveniently situated. The only new work introduced in the school since the last report has been wood carving, in which a class of the larger boys has been much interested. The enrollment for the term 1911 and 1912 was thirty-four, exclusive of the class in fancy work for the older women patients. I am recommending, under the appropriations needed, that an effort be made to secure a school building and the necessary equipment to carry on this very important department.

**RECREATION AND AMUSEMENTS.**

The policy of allowing as much personal freedom and giving as many privileges to the patients as is consistent with a well-regulated institution has been continued with satisfactory results. All those whose mental condition will justify it have the freedom of the grounds, and most of the patients spend much of the time out of doors. The usual outdoor sports such as baseball, tennis, quoits, etc., are entered into with pleasure by many, and the weekly dances and picture shows afford the patients much enjoyment. Christmas holidays were observed in an appropriate manner, with special treats and a turkey dinner served to all. On Christmas eve an entertainment was given by the school children, following which presents were distributed from the Christmas tree, each patient being remembered. Fourth of July was celebrated by contests in field sports, and with fireworks in the evening for the children. Some addition to the library has been made and much reading matter has been donated by friends in the city. Pianos have been placed in cottages 4 and 5 in the women's group.

**FARM AND GARDEN.**

The two years covered by this report have been rather poor crop years, on account of the protracted droughts which occurred each summer. In spite of the fact that some crops both on the farm and in the garden were absolute failures, the value of the products from this source was \$4760.40 for the year 1911 and \$5792.50 for the year 1912. Table No. 11 of the financial statistics gives an itemized statement of the produce raised and the value of the same. If to the figures given above we add the value of products from the dairy and poultry yard, together with live stock sold, we have the sum of \$23,835.96, representing the proceeds from all these industries for the biennial period. Hay has been the most profitable farm product, and for the past two years we have planted a large acreage of cow peas. This crop has proven to be very valuable, comparing quite favorably with alfalfa on upland such as we have. During the past year a small acreage of sorghum was planted, and the experiment of making syrup was tried. It was so successful that we have planted several times as much this year, and expect to make a considerable quantity of sorghum molasses this season.

**LIVE STOCK.**

Table No. 12 shows the amount of live stock of various kinds on hand July 1, 1910, and June 30, 1912. The total value of live stock of all kinds on hand at the close of the period is \$8512.80, a gain of about \$2200 in two

years. The greatest gain has been made in the dairy stock, which by improved breeding has developed into a herd of seventy-two head of high-grade and full-blood Holstein cattle. Hog raising has continued to be a very profitable industry. Hogs to the value of \$2473.92 were sold during the biennium. We had the misfortune to have cholera develop in the herd during the past winter, and lost about \$1500 worth of stock. The disease was mostly of the subacute or chronic form, and it was some time before a definite diagnosis was made. As soon as this point was settled serum was obtained from the State Agricultural College and the entire herd vaccinated. A number of those sick at the time of treatment died subsequently, but the disease was checked, notwithstanding the fact that the herd remained in the infected pens. The brood sows were given the permanent immunity treatment.

#### ORDINARY REPAIRS.

During the period covered by this report there has been expended \$2530.67 for ordinary repairs, exclusive of pipe and fittings, which under the new classification are carried with general shop supplies. The largest item in ordinary repairs is painter's supplies, for which \$997.08 has been spent. The services of a painter, with an assistant at times, are required constantly to keep the interiors and outside wood and metal work properly painted. For lumber \$608.40 has been expended and \$265.11 for glass in the ordinary upkeep of the institution. There has been an unusual amount of glass broken during the last year on account of high winds and hail. As the institution grows older the ordinary repairs naturally increase, and for the next biennium an expenditure of \$1500 or \$2000 per annum will be required.

#### EXTRAORDINARY REPAIRS AND IMPROVEMENTS.

During the fiscal year 1911 the sum of \$3665 67 was required on account of repairs and improvements other than those in connection with ordinary upkeep. The largest items under this head were furniture for cottage No. 8, \$242.60; screens for radiators and windows for the same cottage, \$305; grading, \$450.01, and a team of mules, \$330. For the fiscal year 1912 the extraordinary repairs and improvements have been unusually heavy, amounting to \$4259.74. Of this sum \$377.72 was expended for an addition to the dairy barn and for sheds to shelter the growing herd of live stock. The gas lines in the tunnel and to the administration building have been replaced by larger pipes, in order to secure a sufficient volume of gas on a reduced pressure, as now required by the gas company. Material for these changes cost \$335.18. Other items in extraordinary expenses for the year were drug-room fixtures, \$210; a team of mules, \$425; repairs to slate roofs and gutters after the storm of May 10, 1912, \$257.48, and repairs to water tower and tank, \$533.98. The repairs to the tank were required on account of the outlet pipe freezing up and bursting during the extreme cold weather of the past winter.

#### EXPENDITURES—SPECIAL APPROPRIATIONS.

Table No. 1 of the financial statistics shows the special appropriations made by the last legislature and the expenditures from these funds.

*For Additional Room and Material for Laundry.*—The laundry being too small and the equipment inadequate to meet the growing needs of the institution, an appropriation was requested to provide more room and additional machinery. An appropriation of \$2500 was granted for this purpose.

An extension 33 x 36 feet was added to the west wing of the laundry. This has enlarged the wash room and provided space for sorting and housing soiled clothing. The old temporary sorting room has been torn out. These alterations have allowed changes to be made in the position of some of the machinery, whereby the work can be carried on in a more systematic manner and the entire plant be made more efficient. The old roof ventilators, which were entirely too small, have been replaced by larger and better constructed ones, which add much to the comfort of those working in the laundry. Some new equipment has been installed, and there has been a general overhauling of the old machinery. The laundry is now in an excellent state of repair. Included in the new equipment is a dry-room tumbler, which has proven to be a very satisfactory machine. It materially lessens the work of the mangle, reduces the amount of hand work, and is much superior to the old dry-room method in laundering blankets, underwear and woollens.

*Screened Porch at the Custodial Cottage for Men.*—An appropriation of \$2500 was allowed for a porch in front of cottage No. 8. A porch 12 x 40 feet, of pressed brick and stone trimmings to match the building, and with a cement floor, has been built at a cost of \$1482.25. This has added much to the appearance of the cottage and makes it very much more comfortable. A large day room is required for the care of the turbulent class of men in this cottage, and the screened porch with a southern exposure can be utilized practically every day in the year as an additional living-room space, as well as for fresh air and exercise.

*Alterations and Improvements in the Two No. 1 Cottages.*—The sum of \$4000 was appropriated by the last legislature for improvements in these two cottages. A new kitchen has been added to each of the buildings, and the cement floors in the rooms formerly used as kitchens and in the halls leading to the dining rooms have been taken out and replaced with white tile. The additions were necessarily rather expensive on account of the amount of Carthage stone required to make the new walls correspond in appearance with the walls of the rest of the building. These new kitchens are large, airy, comfortable rooms, and are much more sanitary than the old ones were. The rooms formerly used as kitchens are utilized for serving rooms.

*Cottage for Boys.*—This cottage, for which an appropriation of \$23,000 was allowed, is under construction, \$9101.91 of this fund having been expended to date. The plans provide for a two-story building of forty beds capacity. The design includes a large and attractive day or living room, a play room for the younger children, a broad, open porch in front and a two-story screened porch in the rear. The second-floor porch is so arranged that beds can be conveniently moved to it from the dormitories, thus converting it into sleeping quarters for such patients as need open air treatment. A feature of this cottage is the number of small dormitories, there being several of three- and four-bed capacity. By this arrangement boys of the same type mentally can be placed in a room together, thus preventing much disturbance at night. This will be a decided improvement over present conditions. The kitchen and dining rooms are on the ground floor, which is an improvement over the arrangement of most of the cottages, in which the kitchen and dining rooms are in half-basements.

The contract for the general construction work was let for the sum of \$18,088. The plumbing, which is also to be done by contract, will cost \$1205.28. Our engineering department will install the heating plant and wire the building, thereby making a considerable saving, as we were able to demonstrate in the construction of the custodial cottage for men. The cottage will be finished and ready to be occupied early in the fall. It will be the most attractive as well as the best arranged cottage on the hospital grounds, and when completed will have cost very little over \$500 per bed.

*School Building.*—In my last report I recommended that an appropriation of \$14,000 be requested for a suitable school building and equipment. For this purpose \$4950 was allowed. Realizing that the appropriation was much too small to obtain what was needed to carry on the school work in a satisfactory manner, it was planned to erect a building to which an addition could be made subsequently. A small building of hardly sufficient size to meet our present actual needs, but with architectural lines that would harmonize with other surrounding cottages, was designed and bids for the same solicited. The lowest bid was nearly \$1000 above the appropriation, and even after making every alteration possible in the plans to reduce the cost without entirely destroying the usefulness of the building, it was impossible to get a bid within the amount of funds available. It was accordingly decided to allow the appropriation to lapse.

#### RECOMMENDATIONS—SPECIAL APPROPRIATIONS.

A hospital building.....		\$40,000
A farm cottage, barn, outhouses, etc.....		20,000
Ice plant and cold-storage rooms.....		12,000
Tile dining-room floors in the two No. 1 cottages.....		2,000
Improvements of grounds.....		2,500
Greenhouse.....		2,000
For paving drive.....		2,500
	1914.	1915.
Salaries and wages.....	\$36,000	\$37,500
Maintenance and repairs.....	64,000	65,500

#### ACKNOWLEDGEMENTS.

The management wishes to thank the many friends of the hospital for reading matter, presents, etc., furnished to the patients. I feel deeply grateful to officers and employees for a continuation of their loyal assistance and coöperation and am pleased to express my appreciation of the helpful advice and courtesies accorded me by the Board of Control.

Respectfully, M. L. PERRY, M. D., *Superintendent.*

Fourth biennial report to the State Board of Control, for the two years ending June 30, 1912, the same being the sixteenth biennial report of this institution.

## SUPERINTENDENT'S REPORT.

---

*To the Board of Control of Charitable Institutions:*

GENTLEMEN—Herewith is presented the sixteenth biennial report of the State Home for Feeble-minded.

One year ago we lost by fire our Administration building, the estimated value, including furnishings, being nearly \$100,000. Many records were destroyed, hence our statistical tables pertaining to patients could not be completed for the entire period. These few incomplete reports we have herewith appended.

Doctor Clark resigned as chief executive of this institution September 1, 1911, on account of ill health. Returning to his old home in Labette county, after six years of faithful service, he never regained his former vigor, and on July 9, 1912, died after a ten weeks' illness, typhoid fever being the immediate cause of death. Since Doctor Clark's resignation the executive work has been done by the assistant superintendent, who was on that date appointed acting superintendent by the Board.

The building destroyed housed eighty inmates, and to accommodate these children with quarters necessitated converting a large dining-room in our Reception building into a dormitory. Many were furloughed following the fire, and have not been returned yet. We are badly overcrowded on all wards, and accommodating many more children than the rated capacities of the three remaining buildings warrant.

Our mortality for the past two years has been below 4 per cent, a decrease of 1 per cent below that of previous periods. One reason for this, we believe, has been the policy of making an especial effort to find outdoor employment for our custodial class of children, who are below par physically as well as mentally, and who constitute 40 per cent of our population. These boys this year have done a great amount of work, under the guidance of capable attendants, and have accomplished more in road making, orcharding, hay making, weed pulling, etc., than has ever been done before.

School work has been somewhat hampered for want of room, due to loss of our administration building, yet we have produced a higher grade of work during the past two seasons in our manual-training department than was done in the earlier years following the establishment of this department. We hope to make a very creditable display at the State Conference of Charities and Correction to be held this coming September.

Kindergarten work continues to be very satisfactory, and the many little folks in this branch are showing evidence of some advancement. Six class plays were given entirely by inmate children, and all were well received and enjoyed. The moving pictures continue to be eagerly looked for each week, and these cinematograph entertainments have entirely displaced the children's dances that were given frequently in earlier years. We frequently use outside talent, and vary our programs as much as possible. For two

seasons the Winfield Band, the well-known organization that has made good music for twenty years, has given us a midwinter concert. This service has been gratuitous and highly appreciated by the whole institution family.

Outdoor life strongly appeals to all of us, and especially so to the children, who surely chafe at the monotony of a closely supervised guardianship, and they without doubt welcome the trees, the creek and the playgrounds. Our policy has been to favor this life as much as possible, and monthly picnics or outings are established rules, with a good dinner and cool drinks in the woods. The boys, in care of their attendants, are encouraged to go fishing; the girls to go with their supervisors to the park or on strolls through the country. A volley-ball court has been recently added, and our baseball team of inmate boys has frequent matched games with near-by country teams (percentage not given, however). We feel that more could and ought to be done for the children by purchasing and furnishing a better playground equipment.

After the fire in July, 1911, our first task was to remove the debris and establish water and heating connections with other buildings and the power station. This was accomplished in a few weeks' time, largely by inmate labor, and a new tunnel with stone walls and cement top, with piping installed, was ready by fall. Dirt has been hauled and a lawn made where the old building stood, nearly effacing the scar made by the fire demon. A new cement and iron porch has been placed on our Annex, also a fire escape, giving us two additional exits in case of need. Our assembly hall occupies the third floor of this building, and frequently 200 or more people are congregated there.

New sidewalks have been constructed around the west building, and a new concrete curb and gutter has taken the place of the loosely placed rocks that fringed our main driveway. This road has also been widened, and will soon be nicely graded with shale and gravel.

A general overhauling of the entire farm and grounds has been the order, and old sheds have been torn down and replaced by newer structures, especially about the engine room and feed lots. New fencing has been placed and new lines established.

All orchards were plowed last fall and the fruit trees pruned and sprayed. Much dead stock has been cut out, and replacement will be made this winter. A plot for small fruit has been planted, to be enlarged at the next planting season. On the farm new crops have been tried, our dairy herd carefully supervised, and all unfit dairy stock eliminated. The garden has been moved near our creek, and a survey has been made for installation of piping for irrigation. A new cement silo, 16 x 32, is already in process of construction.

Our location, on a high, rocky hill, never permitted us to keep the hill-sides clean, and to accomplish this a herd of fifty Shropshire sheep was purchased. These animals have accomplished the purpose remarkably well, and besides making our lawns beautiful, both by their presence and their ability to closely crop weeds and grass, have given an impetus to our fee account more rapidly than could possibly be accomplished by any other stock. Their wool and lambs have returned our original purchase price within six months' ownership.

Within doors, plastering, painting and the purchase of new furniture and furnishings has helped materially in keeping close to our standard of

good housekeeping. Fire extinguishers have been placed on all wards, and extension of water pipes to all attics has enabled us to place hose and reels in these unprotected places. The kitchen cooking apparatus has been improved by our engineer, thoroughly eliminating the clouds of steam that were formerly so objectionable. An addition to the ice plant gives us much-needed room for proper operation of mechanical features.

The outdoor illumination has been improved by addition of more light poles and equipping with 60-watt tungstens, with street hood reflectors, replacing the few arc lights that were formerly used.

Two years ago a new pump with gasoline engine was installed at Timber creek, three-quarters of a mile distant, with a two-inch pipe line, to act as an auxiliary water-supply station, as in extreme dry weather our three wells fail to furnish sufficient water for industrial and household purposes. This has supplied the institution until the present time, but the supply is again becoming inadequate on account of a growing institution with increasing uses for water. A survey made during the winter indicated that an 18-inch dam would conserve all the water necessary for future needs in case of extreme drouth, and enable us to put in a six-inch service pipe to replace the two-inch pipe now in use. The dam will be constructed this summer and an appropriation asked for to enable us to purchase piping, machinery and wire to properly install the station. For drinking and cooking purposes we maintain a small independent pumping plant, using well water entirely, that continues to give good service and furnish pure water, free from creek contamination.

Our altitude has always permitted the very best of sanitation in regard to the disposal of sewage, yet we are expending about \$7000 on a disposal plant that is expected to be a model of its kind. The contract will be let in August and its completion will take two or three months. We have recently fitted our Custodia and West buildings with modern plumbing equipment to replace latrines and worn-out, obsolete fixtures that have been in service for many years. All our buildings are now modern in this regard and approved by the State Sanitary Board.

Our fuel supply during the extreme winter weather has always been a vital question, especially the method of transporting coal from our siding, one-half mile distant, up an ice-covered road of steep incline. The Santa Fe railroad has been asked to make a survey to determine the feasibility of laying track from the railroad to our coal sheds. If the grade will permit, and such a spur be placed, it will solve the fuel question and its present attendant difficulties.

## APPROPRIATION AND IMPROVEMENTS NEEDED.

The appropriations asked for are as follows:

New building for inmates.....	\$60,000
New kitchen and congregate dining room, with ice plant.....	25,000
Hospital of twenty-five-bed capacity.....	25,000
Administration building.....	30,000
Superintendent's residence.....	10,000
Laundry addition.....	2,000
Fire house and equipment.....	2,000
Dairy barn.....	10,000
Remodeling old barn and converting into industrial school.....	3,000
Porch appropriation.....	2,000
Playground equipment.....	500
Purchase of six-inch pipe, electric wire and machinery for installation of larger pumping station at Timber creek.....	2,500
<b>Total.....</b>	<b>\$172,000</b>

The total appropriation asked for is in excess of that of previous years, but suffering disaster by fire has brought us to the necessity of seeking redress through the legislature, who are representing the taxpayers of Kansas. If we are to progress and be classified among the high-grade institutions of our country we must build, improve and adopt ideas in keeping with the progressive spirit of our time. There is no doubt but that the percentage of defectiveness is slowly increasing, and until such a time when we are willing to accept the theory and put it into practice that the production of delinquents should be curtailed rather than the increasing tide should be fostered, then we must continue to create more room and give the best we have for their betterment.

Kansas, in maintaining nine charitable institutions, where the various types of defectiveness may be properly classified and treated, and in partially supporting many smaller semicharitable ones, is doing a grand, noble work in the uplift of her social and business life. We are proud to live in such a state, and many of us who are devoting our time and talent to the service are proud to be identified with such a movement.

Respectfully submitted to the Board of Control, whose interests are centered in our charitable organizations, and who are vitally concerned in the interest of patients, employees and officers of the State Home for Feeble-minded.

F. C. CAVE, Acting Superintendent.

Fourth biennial report to the State Board of Control, for the two years ending June 30, 1912, the same being the thirteenth biennial report of this institution.

## SUPERINTENDENT'S REPORT.

*To the Board of Control of State Charitable Institutions:*

GENTLEMEN—I have the honor to submit my third biennial report, and the thirteenth since the foundation of the institution formerly known as the Soldiers' Orphans' Home, but now known as the State Orphans' Home.

Much that has been said in former reports will be omitted in the present. The scope and purpose of the institution remains the same, viz.: the care of the state's homeless, dependent, neglected children. To what extent it fulfills its mission the public will be able, or partially so at least, to judge from a perusal of the following pages and statistical tables.

During the past two years the Home has prospered in all its various lines of activity, and it now comes nearer being a real home to the homeless than at any former time in its existence. I would not want to be understood as believing or thinking that we have arrived at a state of perfection, or have reached a point where we could not improve or go forward, and my intention in these pages is to point out where further improvements may be profitably made.

### SCHOOLS.

The schools at the Home for the past two years have reached and maintained a high standard of excellence. Within three years twenty-eight of our pupils have successfully completed the state course of study for common schools and have received their diplomas admitting them to the high schools. Many of these pupils and former inmates are continuing in school. During the past year five of them were pupils of the Atchison high school, all of them making their credits, and they are now sophomores in that very excellent institution.

Within the past three years four of the Home boys, through the kindness of Mr. A. F. Heck, the owner and manager of the Atchison Business College, have been enabled to take and complete the stenographic course in that institution, and are now self-supporting as a result.

We are not satisfied, however, with what is being done in an educational line, and our work will not be complete until we have an up-to-date manual-training and domestic-science department. While it may seem to many a fad of the times, it is generally agreed by educators that the value and importance of manual training can not be overestimated. All city schools and the most enterprising and up-to-date of the country schools now maintain a regular department in this line, and it is growing to be more and more appreciated as its good results are becoming better known and more widely felt. If it is desirable that the children who have homes and parents who are able to provide for them should have this training, is it not also desirable that the same advantages be given the wards of the state, who must be self-supporting at the earliest possible moment? It is a recognized fact that one of the world's greatest needs is more people who can fill positions

requiring skill. If men and boys who are found in the bread line could be taught to do the things requiring skilled labor they would become a necessity to society instead of a burden to it. All manufactured articles are high-priced because of the fewness of those who know how to make them. The wages of even a trained farm hand become high-priced in proportion to his skill in farming, and it is so with everything else.

#### "PLACING" CHILDREN.

In placing out children, two objects are to be considered—one to save the state the expense of maintaining them, and the other to save the child and make society better. The last consideration is by far more important. If abandoned infants and street waifs through the medium of good homes can be converted into good citizens, the whole framework of society will be strengthened. If, on the other hand, dependent children are allowed to mature in immoral atmospheres, pauperism and crime are increased.

It is therefore of the utmost importance that the work of the state agent should not be carelessly or hurriedly performed, because of the large amount of it to be done, or to save the state expense. It should be performed in the most careful and conscientious manner. For every child placed in an immoral or unfit home the public stands a chance later on of being burdened with a multitudinous pauper and criminal progeny from that source.

For the past five years the state agent's work has been done by one person, and the best of results have been obtained. But the time has come when one person can no longer do the work and when the present methods of handling the children and placing them in homes will have to be abandoned. Our average attendance is constantly on the increase, and has been for quite a number of years. For the year ending June 30, 1911, it was 196; for the year ending June 30, 1912, it was 205, and most of the year our capacity was taxed to its utmost. Formerly the people wanting children came to the institution for them, or their location and wants were made known through correspondence. These were the only people dealt with, and in the past they seemed sufficient. But if we are to keep the number down to our capacity and admit those needing the advantages provided by the Home, we will have to find some method of moving them faster.

Up to within a few years the number admitted and the number placed out were easily kept on a level, but at the present time the prospect seems good for an average attendance up to our full capacity, and it is quite likely the Board of Control will be obliged to refuse admission on account of lack of room.

The "Home Finders" tell us there is a home waiting for every desirable child. If this is so we should increase our home-finding facilities by adopting some of their methods and depend less upon voluntary assistance.

Greater publicity should be given to the work carried on at the State Home, and an effort should be made to get in touch with the homes wanting children, and if possible to place a child in every desirable home. There are now over 400 children under the charge of the agent of this home. The number is more than she can possibly supervise or visit in any one year, and little time is left for the investigation of others or finding homes for them.

## IMPROVEMENTS.

An appropriation was asked for and obtained from the legislature of 1911 for the renewing of some of the floors of the main building. Of this amount \$152.50 was spent in renewing the floor of the third-floor dormitory. There was granted us \$2500 for the renewal of all the plumbing in the main building. This was all used. These two improvements have contributed much to the comfort and convenience of the inmates and employees. The new plumbing, being entirely modern, has contributed greatly to the sanitary condition in this building.

In the midst of the severe drought of 1912 our water supply again failed. On examination it was found that our well, lately put down by Lewis & Kitchen, had filled with quicksand and was really little better than a heap of rubbish. In order to save this well it was necessary to spend in all about \$1200 upon it. This well is now in fine condition, and we believe we have a permanent and perfectly wholesome supply of the best water in this vicinity in quantities sufficient to answer all our present needs.
